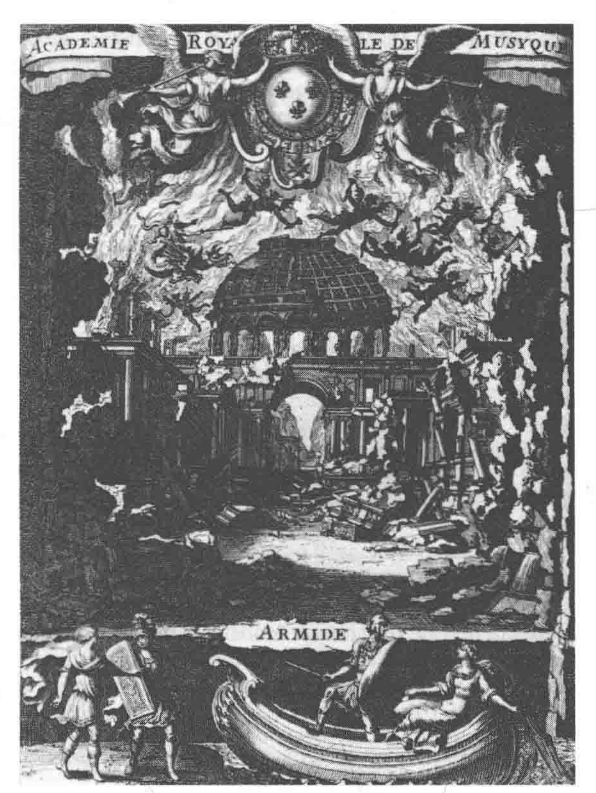
However, the king bore the composer no grudge. He never tired of hearing his other operas at Saint Germain-en-Laye and Fontainebleau, where he stood godfather to the eldest son of his *surintendant* at a magnificent baptismal ceremony on 9 September 1677, giving the boy his own first name. The first performance of Lully's famous *Te Deum* was given on this occasion. Lully was soon to have a second protector at court in the dauphin. From the time of the first performances in 1679 of *Bellérophon* the heir to the throne often attended operatic performances in Paris, and it was to celebrate the dauphin's marriage to Marie-Anne-Christine-Victoire of Bavaria that Lully composed *Le triomphe de l'amour*. Three of Louis XIV's other children danced in this ballet, which had its première at Saint Germain-en-Laye in 1681: they were the Comte de Vermandois, the Princesse de Conti and the young Mademoiselle de Nantes. In the same year Lully appeared on stage again in a revival of *Le bourgeois gentilhomme*, and made the audience laugh so much in the part he had previously taken over ten years before that the king appointed him *conseiller secrétaire du roi*, a distinction which meant he could be immediately ennobled.

In his 50th year, Lully was at the peak of his career. He had not had any partners in the Opéra since 1680: when his contract with Vigarani expired he preferred not to renew it but to employ a salaried designer for his productions, turning for the purpose to Jean Berain, *dessinateur de la chambre et du cabinet du roi*. Lully was as shrewd a businessman as ever in his management of the Palais Royal theatre. While he gave standing room to the humbler part of the audience for only 30 sols, he charged higher prices than any other theatre in Paris for the seats reserved for more prosperous opera lovers. The highest price of all, one louis d'or, was charged to sit on the stage itself, a favour he granted the dauphin's retinue. Thanks to a second privilege granted by the king on 20 September 1672, he also derived royalties from the librettos sold to the audience, and from 1677 from his printed music. He published the separate parts of *Isis* that year, and after 1678 he issued the complete scores of all his music dramas.



While he was enriching himself in this way, he made the best use he could of his prerogatives to the performance of opera in France. He was unyielding to rivals, such as Jean-François Lalouette and Paolo Lorenzani, who might set up in Paris, but proved more accommodating to provincial entrepreneurs: in 1684 he allowed the composer Pierre Gautier (ii) to open another Académie de Musique in Marseilles in return for a fee, and he gave permission for two citizens of Rouen, Pierre Le Clerc and François Pannuit, to organize public concerts 'of five voices and 30 instruments' in their city. At this period he also made up his quarrel with La Fontaine, whom he asked to provide dedications to the king for his *tragédies en musique Amadis* and *Roland*, and he agreed to write an *Idylle sur la paix* to verses by Racine, another writer who had previously been hostile to his productions. His works were successful both in the city and at court. They were revived in Marseilles, Brussels, Antwerp and on the other side of the Rhine in Regensburg, Wolfenbüttel and

Ansbach. In Paris Lully's fame was evident in another medium when his portrait by Paul Mignard was engraved; in June 1685 the engraving went on sale in the rue Saint-Honoré, near the Opéra.

A few months earlier, however, an incident occurred which compromised him seriously and caused him to fall out of favour to some extent with the king. Louis XIV learnt that he had seduced the page Brunet assigned to his service. Increasingly preoccupied with morality and religion under the influence of the devout Mme de Maintenon, who was trying to persuade him to turn away from the theatre, the king could not tolerate such a scandal. The composer's masterpiece, *Armide*, was a triumph in Paris in 1686 (fig.4), but it was never performed in the king's presence. A production of Michel-Richard de Lalande's *Ballet de la jeunesse* was preferred to it at Versailles. Lully now found a new patron in the duc de Vendôme. Thanks to this prince, his heroic pastoral *Acis et Galatée* was first performed at the château of Anet during festivities organized for the dauphin. Despite the continued support of the heir to the throne and the successful marches he composed for two grand tournaments given at court in the dauphin's honour in 1685 and 1686, Lully never enjoyed as much favour as before with Louis XIV. Soon he was even asked to leave the Palais Royal theatre, since the king wished to construct apartments for the duc de Chartres on the site. However, these projects were not put into practice. Lully died on 22 March 1687 as the result of a self-inflicted wound to his foot three months earlier, when he was conducting his *Te Deum* in the church of the Feuillants in the rue Saint-Honoré. Gangrene subsequently spread to his leg, and despite the efforts of several doctors it finally killed him.

3. MS fragment of an unknown work, in Lully's autography, bound between 'Acis et Galatée' and 'Idylle sur la paix' (F-Pmeyer)

4. *Destruction of Armide's enchanted palace from Act 5 of Lully's 'Armide', Paris Opéra (Académie Royale de Musique), 1686: engraving by J. Dolivar after the design by Jean Berain I, from the first edition of the libretto (Paris, 1686)*

Lully's body was buried in the chapel of St John the Baptist in the Augustinian church of Notre Dame des Victoires, while his entrails were buried in the church of Ste Marie-Madeleine, his own parish. In fact the composer died in a house he had bought not far away, now the site of 28 and 30 rue Boissy-d'Anglas. He left a considerable fortune in addition to the several properties he owned in Paris. With his father-in-law Michel Lambert he also owned a house outside Paris in Puteaux, and he had acquired stocks, gold and jewels. The direction of the Opéra, of which the sets, machinery and costumes were his property, passed not to one of his sons, as set out in his privilege, but to his son-in-law Jean-Nicolas de Francine, whose abilities were far from matching Lully's own.

Lully was sincerely mourned, despite his faults. He was grasping, so jealous of his prerogatives as to do his utmost to oust any possible rivals, and insolent enough to defy the highest personages in the land; his manners were always rustic despite his extraordinary rise in the social scale. His modest origins, which he tried to hide by passing himself off (even in his marriage contract) as the son of a gentleman in Florence, were said to be evident in his physical appearance. According to Le Cerf de la Viéville, 'his lively and singular physiognomy' was 'not at all noble'. His features were coarse, with 'a large nose and a large, well-formed mouth', and his small eyes were short-sighted. Since he had a good appetite and liked his wine, he must have acquired a certain corpulence in maturity; we can guess at it in the portraits that have survived. The best of them is the bust by Coyzevox which was placed on his tomb. It displays a mixture of power and brutality characteristic of Lully's personality (fig.5). His temper could sometimes be extremely violent, particularly towards his operatic company in Paris. He was known to have broken violins over the backs of certain players when their playing displeased him, and was even said to have kicked pregnant actresses in the stomach to make them abort. He certainly imposed very strict discipline. According to Le Cerf de la Viéville, he refused to tolerate 'women singers suffering from colds for six months of the year, or men who were drunk four times a week'. A contract of engagement confirms the severity of his discipline; it sets out the fines for each hour of rehearsal time missed, or for any absence from performances. However, Lully also paid his performers well, made up his quarrels with them when he had been angry, looked after their welfare and even guaranteed them earnings outside the Opéra as long as those earnings were not made in the service of rival enterprises.

Some of the notable personalities in the company had been recruited in the time of Perrin and Cambert. Others, including Marie-Louise Desmatins, Marie Le Rochois and Louis Gaulard Dumesny were chosen by Lully. The instrumental ensembles that performed the composer's works at the royal residences or in Paris were sometimes large ones: over 75 players took part in the première of *Le triomphe de l'amour* at Saint Germain-en-Laye in 1681. Lully's orchestra, regarded at the time as the best

5. *Jean-Baptiste Lully: bust by Antoine Coyzevox, bronze, after 1687 (Notre Dame des Victoires, Paris)*

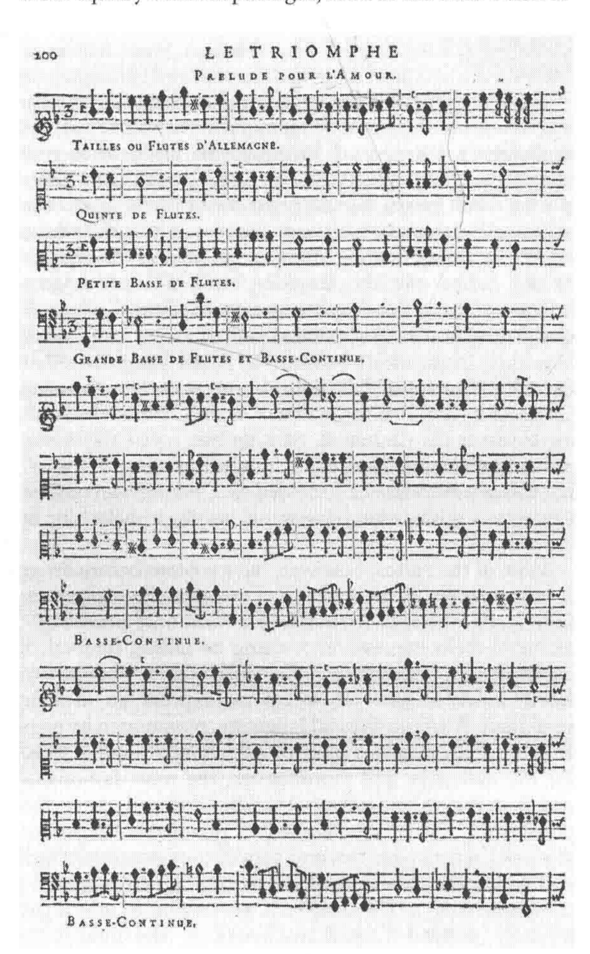
in Europe, contained some remarkable musicians: the famous dynasties of flautists and oboists, the Philidors, the Hotteterres; the harpsichordists Jean-Henry D'Anglebert and his son Jean-Baptiste-Henry; and the viol players Marin Marais and Jean Theobaldo de Gatti. All these performers received excellent training from Lully. As a violinist, dancer and actor himself he was able to control the accuracy of the instrumental playing, demonstrate the steps of ballets, show how a performer should make an entrance and move on stage, and display the attitudes they should adopt. From the first, thanks to these abilities and the convergence of so many talents, his work received excellent performances which contributed to their success.

2. Ballets de cour. None of Lully's musical autographs has survived, but the many manuscript copies and printed scores provide evidence of the breadth and influence of his creativity. His impressive body of work may be divided into ballets, *comédies-ballets*, operas and sacred music. His first known works are ballets, a genre to which he first contributed in 1652 with the *Mascarade de la Foire Saint-Germain*. None of the music is extant, and neither are the Italian vocal pieces he composed at the beginning of his career at court. These include the *récit grotesque* of the *Ballet des bienvenus*, the *concert* in the scene in the underworld from the *Ballet de Psyché*, *récits*, dialogues and duets from *La galanterie du temps*, and almost all the *airs* and ensembles of *L'Amour malade*. In these circumstances it is difficult to assess Lully's role between 1655 and 1657, when he emerged as the principal representative of Italian influence in the spectacles in which the young Louis XIV took part.

However, he did not disdain the French style in his dance music, and at first collaborated with other musicians in composing it. There are more sources available here, but they present different problems. They are all late manuscript copies, and the attribution to Lully of various passages of instrumental writing from the time of the *Ballet du temps* (1654) onwards is not supported by any contemporary document. Furthermore, different versions of the same works are sometimes found, even though they may have received only a few performances over a short period of time.

In spite of many uncertainties, however, Lully's authorship of entrées in the *ballet de cour* tradition can be confirmed. Some of those concerning such stock characters as demons or the divinities of the winds, suggested by rapid passages in the music, continued to feature in the composer's operas. Examples occur from the time of the *Ballet d'Alcidiane* (1658), which includes 'a battle and a siege', a descriptive passage developed further in the *tragédies en musique*. The stately dances also foreshadow those in Lully's dramatic works, in particular the chaconnes and related pieces. The famous 'Louchie' at the end of the *Ballet de la raillerie* (1659) is notable for its exceptional length and its studied writing: it has great rhythmic variety, with syncopations, effective use of rests, melodic development of the outer parts, the use of shorter note values to produce more movement, and a passage in the minor mode. Lully was to employ all these methods again, and he also made good use of the minuet: he introduced it into court spectacles with the *Ballet de la raillerie* and was chiefly responsible for making it popular.

It was during this period that Lully began to adopt the French overture, which is found as early as the *Ballet d'Alcidiane* (1658). While he was to make constant use of this type of overture, contributing more than anyone to its wide dispersal, he does not seem to have invented it. According to one of the extant sources of the masquerade in the *Ballets des plaisirs troublés*, his rival Mollier was ahead of him, and had written an accomplished example of the genre as early as 1657. The two-part design – a majestic first section in duple metre with dotted notes, followed by a fast contrapuntal section in triple time and (usually) a short, slower conclusion effectively recalling the solemnity of the opening bars – was to remain the pattern until Lully's last operas.



From 1661, when he became *surintendant*, Lully was anxious to make his vocal music conform better to the country where he was to pursue his career. His first great success with a French *air*, 'Sommes-nous pas trop heureux', which was to be much imitated, came in the *Ballet de l'impatience* (1661). A few months later, in the *Ballet des saisons*, a marked decrease can be observed in his use of Italian words for musical setting. From this point on he was to reserve Italian for comic scenes, such as that with the schoolmaster in *Les noces de village* (1663), and for particularly emotional moments. In the latter context he took as his model the Italian *lamento*, employing descending chromaticisms to express grief, dissonances of an equally expressive nature, and a slow tempo suited to melancholy meditation. His first example was in *Les Amours déguisés* of 1664, with the 'récit d'Armide', 'Ah Rinaldo, e dove sei?'. In the following year he composed another *plainte*, for Ariadne in the *Ballet de la naissance de Vénus*, this time to a French text, 'Rochers, vous êtes sourds'. It caused a great sensation. One of his most moving examples, however, is the *plainte de Vénus* in the *Ballet de Flore* (1669), a fine lament over the body of Adonis, with the voice beginning on a heart-rending major 7th (ex.1).

During this period Lully's instrumental music also evolved at a remarkable rate. He devised *concerts* for his ballets, varying the instrumental timbres to suit what was being described in the librettos. After a *ritournelle pour le concert du Printemps* in the *Ballet des saisons*, he introduced a *concert de trompettes* into his entrées for Cavalli's *Ercole amante*, as well as two *concerts de guitares*, in which he himself was one of the peformers. However, it was in the *Ballet des muses* of 1666 that he

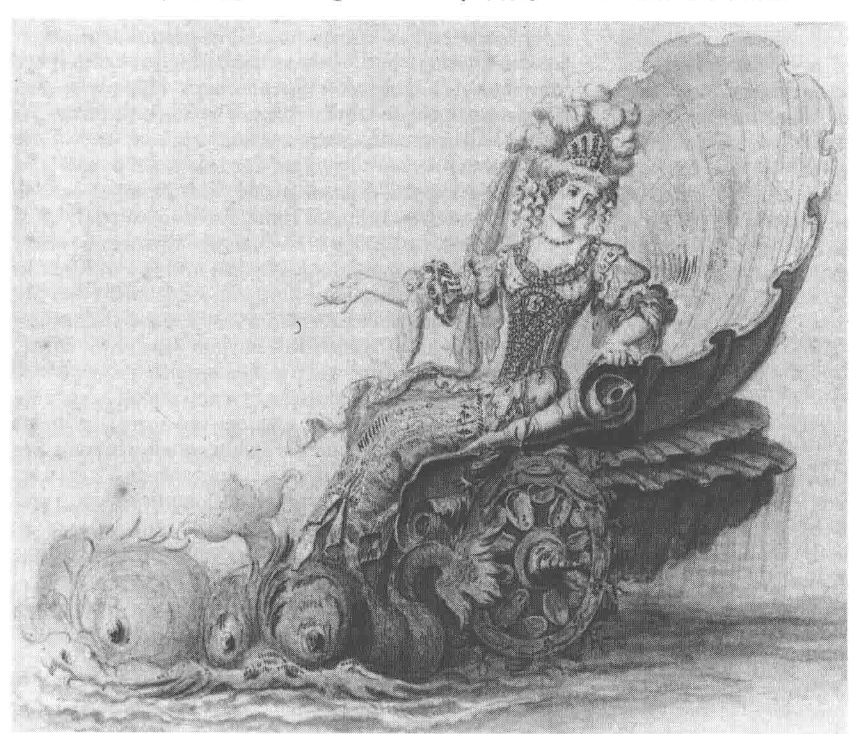
really displayed his talents as an instrumentalist, this time on the violin, playing a solo part in a piece where he represented Orpheus. The passages he played alternated with orchestral passages in a manner which foreshadowed the concerto. The *Ballet des muses* also contained a 'Spanish *concert* with harps and guitars'. This piece was intended to suggest local colour, while in *Les amours déguisés* of 1664 flutes had been chosen to convey the character of the Loves. Lully was to recall this later in the prelude he gave the little god Cupid in his score for *Le triomphe de l'amour* (1681; fig.6).

3. COMÉDIES-BALLETS. In his *comédies-ballets* Lully took a different line. After writing a single dance, a courante, for the first of these works, *Les fâcheux* (1661), and leaving the rest of the musical composition to Pierre Beauchamps, he contributed a good deal to the success of the new genre created by Molière. The *intermèdes*, often well integrated into the dramatic action, gave him the chance to write irresistibly amusing scenes for his singers. He exploited this comic vein from 1664, notably in *La princesse d'Elide* for the scene in which the kennel boys wake Lyciscas, a part taken by Molière at the work's première. *Monsieur de Pourceaugnac* inspired Lully to write equally comical passages, such as the duet 'Buon dì'

6. Opening of the 'Prélude pour l'Amour' from Lully's 'Le triomphe de l'amour' (Paris, 1681), scored for four-part wind ensemble of transverse flutes, tenor recorders, bass recorders and great bass recorders

sung by the Italian musicians, and in particular the duet for the lawyers, one of them 'jabbering' and the other 'drawling'. *Le bourgeois gentilhomme* holds a special place among these comic works. The Turkish ceremony begins with a famous march, which until the end of the 18th century served as a model for many composers who wanted to suggest oriental music. The passages for the Turks themselves in lingua franca, a device already used by Molière in *Le Sicilien* (1667), derive their comic effect from the words, repetitions, rhythm and use of rests. In *Le bourgeois gentilhomme* Lully also depicted everyday life, introducing several *chansons à boire*, and the famous minuet to which Monsieur Jourdain learns to dance, already used the same year in *Les amants magnifiques*, would have been familiar to the first audiences. According to several sources, its tune was derived from a popular song, 'Margot sur la brune', which was being hummed as early as 1660, and it satirized the duchesse de Vitry, who had retired to the convent of the Assumption (exx.2 and 3).

Ex.2



Ex.3 (Lully)

While drawing on the musical sources of his new country, Lully did not entirely abandon passages in the Italian manner in his *comédies-ballets*. In *La princesse d'Elide* he wrote his first lament to French words (Tircis's 'Arbres épais') and he composed another, exceptional in its development, Cloris's 'Ah, mortelle douleur', for *George Dandin*, performed as part of a divertissement at Versailles in 1668. Two years later *Les amants magnifiques* contained the first of Lully's *sommeils*, or slumber scenes, the origins of which may be sought in the works of Luigi Rossi and Francesco Cavalli. After a *ritournelle* for flutes (instruments well chosen to express the sweetness and charms of slumber), came the trio 'Dormez, dormez, beaux yeux', notated in long notes in 3/2 time. The first *intermède* in *Les amants magnifiques* also foreshadowed Lully's future operas in its length, and in the importance attached to the solo singers, choruses and dances.

However, the work that came closest to the new repertory which the composer was to contribute to music drama in Paris was *Psyché* (1671). This was a *tragédie-ballet*, a unique hybrid spectacle partaking of the nature of both the *tragédie à machines* and the *comédie-ballet*. From the former genre, its model first perfected by Pierre Corneille in his *Andromède* (1650), *Psyché* borrowed the structure of five acts and a prologue, with a change of setting and the intervention of a glory, or of a heavenly chariot, in each act. It also took an elevated subject from classical mythology and treated it in a manner sometimes *galant* and sometimes dramatic, while the description of the piece in the libretto as a 'tragi-comedy' allowed a happy ending. Molière, who was short of time, had asked Corneille to write almost all the verses for the last four acts. The contribution of the *comédie-ballet* genre was equally large: no *tragédie à machines* had ever had the advantage of large-scale *intermèdes* in which music and dancing could feature so prominently. The first of these

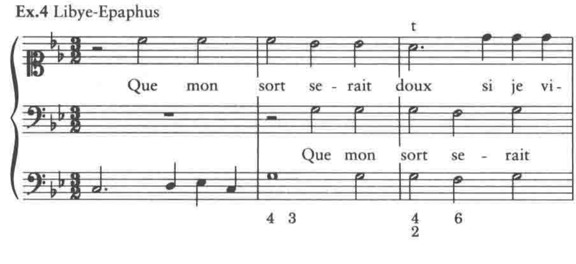
7. Design by Jean Berain for the marine chariot of the sea-nymph Thetis in Lully's 'Alceste' for the original production at the Paris Opéra (Académie Royale de Musique), 1674 (or possibly for the revivals of 1677–8): pen and ink with wash (F-Pn)

intermèdes, rightly regarded as one of the peaks of Lully's art, presented a long funereal lament, while the last was a monumental finale with a succession of *entrées de ballet*, *airs* for solo singers, vocal ensembles and choruses. In spite of all these features, *Psyché* was not an opera; to make it into one it was necessary to replace all the spoken dialogue by recitatives, and that was exactly what Lully, Corneille's brother Thomas and his nephew Fontenelle did in 1678, when they turned the *tragédie-ballet* into a *tragédie en musique*.

4. OPERAS. However, the composer did not wait until then to create his new operatic genre. It was revealed to the public in 1673 with *Cadmus et Hermione*. For the libretto Lully had turned to Philippe Quinault, who had already provided the French words for the vocal numbers in *Psyché*. The poet devised an excellent solution to the major problem of recitative. In the first place, he simplified and tightened the plot, stripping it of unnecessary episodes so as to keep the audience's interest constantly alive. The concision of his language was much admired, and he proved skilful in facilitating the setting of the libretto to music, resorting to free verse and flexibly alternating alexandrines and octosyllabic lines to provide both vivacity and dignity. He may have acquired this ease of style from his predecessors at the Académie de Musique, Pierre Perrin and Gabriel Gilbert, who adopted the same approach and introduced the same kind of variety. They had already made use of lines of six and seven syllables.

Nonetheless, Quinault's style was superior to that of the earlier librettists. Taking *Psyché* as his model, he and Lully devised a nobler and more refined kind of French opera, drawn from the superior literary traditions of Corneille and Molière. When looking for models for his recitatives the composer, who had written the *intermèdes* for *Oedipe* and probably for other tragedies as well, is said to have gone to the Comédie to hear Marie Desmares, known as 'La Champmeslé', famous for her performances in Racine's plays, and to note the intonations and inflections of her voice. Anxious to adapt an Italian genre to the French milieu, he adopted some of Perrin's practices and avoided castrati, who were popular in Italy but whom Perrin, an amateur theoretician, regarded as 'the horror of the ladies and the laughing-stock of men'. Again following his predecessor's recommendations, Lully realized that operas should not last more than 'two and a half hours' or 'three short hours', the usual length in other Parisian theatres. That did not prevent his choosing Quinault as his librettist, and he was particularly demanding towards the dramatist, making him revise the words of his librettos as often as he himself thought necessary. For the *airs de danse* he provided the poet with an outline ('canevas') with some provisional words to help him in his task.

Most of the verses, however, were written before being set to music, in particular all the texts for the recitatives; Lully used melodic, rhythmic and harmonic procedures to make them expressive. A rising or falling interval, a melisma or a dissonance judiciously underlining certain words could suggest an image or express an idea or sentiment. A whole musical language, punctuated by rests which were sometimes emotionally charged, was devised for the dialogues and monologues, the most famous of which is the second act of *Armide* ('Enfin, il est en ma puissance'). These passages were intended to drive the dramatic action forward, and superfluous ornamentation was excluded since it would have been detrimental to comprehension of the sung text, something to which the logically minded French audiences of the time were particularly attached. To add variety to these scenes Lully supported the voices with a continuo comprising some ten instruments, at least in performances at court: two harpsichords, four theorbos, archlutes or lutes, two bass



viols and one or two bass violins. From *Bellérophon* (1679) onwards he also adopted the Italian practice of using the string ensemble to provide greater density at certain dramatic moments. At the same time he also developed this practice in various *airs*.

Several kinds of *air* may be distinguished in Lully's writing, depending on their form. As well as those to be sung to dances during the ballets, there are binary and ternary forms. Others are rondeaux or written over a ground bass. Those in the last category, apparently inspired by examples from Cavalli, are mostly for tearful lovers. A justly famous *air* is Sangaride's 'Atys est trop heureux' in Act 1 of *Atys*, which is heavily tinged with melancholy. There are other and equally moving examples, for instance Theone's heart-rending 'Il me fuit l'inconstant' in Act 2 of *Phaëton*. Most of these lyrical passages are integrated into the recitatives, and sometimes display parallels with them that create some ambiguity, particularly when accompanied by the string ensemble. Many of them, however, required no instrumental support except for a continuo, and consisted of short, simple melodies to a straightforward rhythm, so that they were easy to remember and became widely popular. According to Le Cerf de la Viéville, the famous *air* of Arcabonne, 'Amour, que veux-tu de moi', from the second act of *Amadis*, was sung by every cook in France. The *plaintes* remained more complex: the lament of Pan in *Isis* is accompanied by flutes, according to contemporary reports in order to suggest the sound of the wind in the reeds.

The vocal ensembles, most of them duets, show equal sensitivity, allowing the hearer to appreciate both words and music, as in the amorous exchange between Renaud and Armide, 'Aimons-nous, aimons-nous, tout nous y convie', in the last act of *Armide*. *Phaëton* also contains two fine duets for Epaphus and Lybie. One of them, 'Que mon sort serait doux', for which Lully had a special fondness, displays refined harmonic writing with a succession of delicate dissonances (ex.4).

The chorus, which is usually in four parts (soprano, *haute-contre*, tenor and lastly bass), is sometimes heard during recitatives from the wings, but it also takes its usual place on stage in the divertissements developed from the great *intermèdes* of the *comédies-ballets*, which in the *tragédies en musique* are situated in the middle or at the end of each act. In those scenes where the dances

Ex.4 Libye-Epaphus

are concentrated, the chorus contributes to the lavish spectacle by its presence alongside other performers and by its frequently solemn character enhanced by chordal writing. While bringing interest and diversity to those moments when attention tends to turn away from the drama, it sometimes gave the audience a chance to join the singing too, adopting a simple melody of a popular cast that could be easily memorized. The audience could join the members of the chorus in taking up themes sung first by a soloist, the words being contained in the librettos on sale at the theatre door, and this practice also occurred in the prologues. It can be traced back to *Cadmus et Hermione*, and is found in *tragédies en musique* of a later date, notably in the fourth act of *Phaëton*, nicknamed 'the opera of the people', in the catchy ensemble sung by the Hours, 'Que ce palais'.

In the divertissements the chorus is sometimes closely associated with the composition of the dances. In the last act of *Armide* it helps to amplify the monumental character of a *passacaille* devised, like the chaconnes, to show the expressive possibilities of the orchestra. Minuets and gavottes are the dances most frequently found in the ballets, in greater number than bourrées, canaries, gigues, loures, passepieds, rigaudons and sarabandes. To this remarkable variety one may add that provided by the *airs* and the entrées, which illustrate the nature of the characters and take an effective part in the development of the dramatic action. In the third act of *Atys*, for instance, the Pleasant and Sorrowful Dreams point out to the young Atys, in their mime, the advantages and disadvantages likely to come his way, depending on whether he rejects or accepts the love of the goddess Cybele.

The orchestra alone is also required to play a descriptive part in preludes, *ritournelles* and other *symphonies*. As with the dances, the music is usually in five or three parts. The five-part string ensemble, consisting of violins, three sizes of violas (*hautes-contre*, *tailles* and *quintes*) and bass violins, already in use at court under Louis XIII for the ballet repertory, was introduced to the lyric theatre in Paris by Lully, and was to maintain its place there until 1720. In the orchestral ensemble, placed in front of the stage as it is today, it constituted the basis of the *grand choeur*, often duplicated, at least in the top and bottom parts, by recorders, flutes, oboes and bassoons. This ensemble, sometimes with trumpets and kettledrums to accompany heroic scenes, was distinct from the smaller *petit choeur*, which consisted of the continuo instruments. It was a powerful ensemble, well able to evoke the tumult of battle, the raging of the sea, the descent of heavenly machines and the chaotic atmosphere of the underworld.

This resource led Lully to modify his descriptive language. Up to *Persée* and *Phaëton* his slumber scenes are of Italian inspiration, and the scene in *Atys*, although notated in duple metre, is in the same tradition. Renaud's *sommeil* in *Armide*, by contrast, bears no relation to similar scenes by Cavalli: the violins, muted, no longer hold long notes but imitate the movement of the water flowing slowly past the turf on which the hero lies asleep, the victim of a spell.

A development connected with the nature of the librettos can also be observed. After 1677 all trace of comedy disappeared, and Lully no longer sought to make the audience smile with repeated notes for the barking of Cerberus in *Alceste* or the shivering of the inhabitants of

cold climates in *Isis*. However, when Quinault abandoned mythological subjects and turned, with *Amadis*, to themes drawn from tales of chivalry, the music (unlike the settings and costumes) underwent no particular modification. On the other hand, it greatly influenced the music of the other dramatic genres to which Lully devoted himself after 1672. Vocal writing is more prominent in his later ballets, *Le triomphe de l'Amour* and *Le temple de la paix*. The second of these, with its more coherent dramatic action, is in fact related more to opera than to the old type of choreographic spectacle. As for the heroic pastoral *Acis et Galatée*, it borrows even more from the new *tragédie en musique*: despite having three acts and not five, it has the same internal organization, with recitative scenes sprinkled with *airs*, and divertissements with choruses and dances similar to those of the new genre.

5. Church music. Lully wrote comparatively few sacred works, but they occupy an important place in his output. According to contemporary accounts and the extant musical sources, they were composed between 1660 and 1687, that is over a period of more than 25 years during the most fruitful part of his career. Some were particularly popular, including the *Miserere*, much admired by Louis XIV and Mme de Sévigné, as well as the *Te Deum, De profundis* and *Quare fremuerunt*.

A distinction must be made between the *grands motets* and the *petits motets*. The former, written for performance by the royal chapel, were for two choirs each consisting of five parts. One contained the solo singers, and was dominated by high registers, with two sopranos, *haute-contre*, tenor and bass. The other was a sizable ensemble with a noticeable emphasis on lower registers in the choice of a single soprano part together with *haute-contre*, tenor and bass. This vocal distribution had been adopted in France at the beginning of the 17th century by Nicolas Formé, *sous-maître* of Louis XIII's chapel and then by his successor Thomas Gobert and by Jean Veillot. Lully and his contemporaries also adopted it and followed Veillot in using a string ensemble for accompaniment, here and elsewhere, which was also inherited from the royal music: the 24 Violons du Roi. While Lully represented a structure governed by national institutions, he was able to give his *grands motets* certain touches whose origin must be sought on the other side of the Alps, and it was not surprising that the papal nuncio considered the *Te Deum* 'a work of Italian inspiration'. Du Mont, too, was subject to Italian influence, but his choral writing is less homophonic. Lully excelled in massive vocal homophony, which he used to dramatic effect, as did Carissimi, whose *histoires sacrées* he must have known.

The powerful inspiration behind these vocal ensembles is maintained in frequent interventions from the orchestra. With his *Miserere* of 1663 Lully was probably the first composer to begin a *grand motet* with a five-part instrumental introduction. Such *symphonies* assumed increasing importance with *Plaude laetare* (1668) and superseded three-part *ritournelles* in the *Te Deum* (1677), where they are sometimes reinforced by trumpets and kettledrums. This, again, was an innovation in the dignified genre of sacred music. A new development can also be observed in the solo *récits* of the *petit choeur*. The *Miserere* contains numerous duets, often beginning with introductions in imitation. Such duets became fewer in the other motets, allowing solo passages to be better developed and to comment more effectively on the words. During Lully's lifetime, these works were praised for their 'correctness of expression, answering to the subject'. An extract from the *Te Deum* illustrates this characteristic, appealing as much to melodic as to harmonic qualities (ex.5).

The *petits motets* devoted to the cult of the Virgin and the holy sacrament, are thought to have been composed for the Parisian convent of the Assumption in the rue Saint-Honoré. They are among Lully's most italianate works. Their scoring, in three parts with continuo, and certain turns of phrase are evidence of the continued influence of Carissimi. However, they fall within a decidedly French body of music, the *motets et élévations* represented at the time by Du Mont, Robert and Danielis, and as with Lully's other sacred compositions their contrasts of effect meant that they did not fail to please.

6. Influence. The influence of Lully's work was considerable. In France it was felt in most of the genres to which he turned. He endowed the *grand motet* with all the ceremony proper to a regal genre. Lalande owed much to him, and Charpentier's famous *Te Deum* would never have been what it is without Lully's setting. Charpentier, wrongly regarded by many as Lully's principal rival, also respected the structure of the *tragédie en musique* in his own *Médée*. The model of this genre, the most successful in French opera under the *ancien régime*, was to inspire many composers for over a century: first Lully's most faithful disciples, Collasse, Marais and Desmarest, and then Rameau and Gluck in the 18th century, to mention only the most famous names. Even in *opéra-ballet*, a form of spectacle which was to rival the *tragédie en musique* in popularity towards the end of Louis XIV's reign, references to it still remain: several passages in Campra's *L'Europe galante* allude directly to the *sommeil* of Renaud and the *passacaille* in *Armide*. Lully's operatic works remained alive in the public's memory until the eve of the Revolution, and they were often revived in Paris and in the provincial theatres of Marseilles, Lyon, Rouen, Lille, Dijon and Strasbourg.

Ex.5

Outside France Lully's works were also performed in Brussels, The Hague, Hamburg, Stuttgart and Rome. In Amsterdam the publishers Heus, Pointel and Roger issued his overtures and other instrumental pieces between 1682 and 1715, thereby contributing to the creation and success of the French suite in north European countries, where composers as eminent as Bach and Handel contributed to the genre. Through some lesser known composers (Humphrey, Muffat, Fischer and Kusser, thought to have been acquainted with Lully in Paris) his music also reached England, where it had a strong influence on Purcell and was performed in Germany, Austria and Bohemia as well.

This extraordinary degree of influence resulted from the prestige of French culture in the 17th and 18th centuries, and the astonishing popularity of many secular *airs* by Lully, which were constantly imitated and used in church services and performances of the new *opéra-comique* genre. Some of these melodies were famous: the celebrated chorus of shiverers in *Isis* provided inspiration both for Purcell in *King Arthur* and for Vivaldi in the 'Winter' section of the 'Four Seasons'. Lully, regarded throughout Enlightenment Europe as the leading figure in French music, created a style which was truly his own, drawing on many sources which he was probably better able to assimilate than anyone else in his time. The language he forged, and to which he sometimes brought exceptional breadth, could leave no one indifferent, and it still attracts audiences today with its power, clarity, equilibrium, coherence, poetry and exquisite sensitivity.

(2) Louis Lully (*b* Paris, 4 Aug 1664; *d* Paris, 1 April 1734). Composer, the eldest son of (1) Jean-Baptiste Lully (i). He did not have the successful career that was anticipated for him, partly because of his own dissolute conduct. After being 'imprisoned by the authority of justice in the religious house of the Charité at Charenton', he was almost disinherited by his father. Subsequently, and against his family's wishes, in 1691 he married Marthe Bourgeois, by whom he had already had a child in 1690. His distressing behaviour and many debts prevented his taking up the posts he could have claimed: he never succeeded his father as director of the Opéra, or in any other position. Moreover, he was of questionable talent. Those of his operas which did prove successful and were revived several times (*Zéphire et Flore* and *Alcide*) were written in collaboration with other composers, the first with his brother Jean-Louis and a music master, Pierre Vignon, the second with Marin Marais. On the other hand, the work to which he put his own name alone, *Orphée*, was hissed at its first performances. However, the act set in the underworld still merits attention for the prominence it gives to accompanied recitative, one of the most original features of the late 17th-century French operatic repertory.

WORKS

Idylle, Anet, Aug 1687, *F-B*, *Pn* Collection Meyer; collab. (4) J.-L. Lully

Zéphire et Flore (opéra, prol., 3, M. Du Boullay), Paris, Opéra, 22 March 1688 (Paris, 1688), collab. (4) J.-L. Lully and P. Vignon; rev. Destouches, 1715, *Po*

Epithalame, for wedding of the Prince of Conti and Mlle de Bourbon, July 1688, music lost

Orphée (tragédie en musique, prol., 3, Du Boullay), Paris, Opéra, 21 Feb 1690 (Paris, 1690)

Eglogue (J. Palaprat), Anet, 1691, music lost

Alcide (tragédie en musique, prol., 5, J.G. de Campistron), Paris, Opéra, 31 March 1693, *Pn*, collab. M. Marais

(3) **Jean-Baptiste Lully (ii)** (*b* Paris, 6 Aug 1665; *d* Paris, 9 March 1743). Composer, second son of Jean-Baptiste Lully (i). He was destined for the church at an early age, and on 6 May 1678, when he was 12, the king gave him the benefice of the abbey of St Hilaire in the diocese of Carcassonne; he exchanged it for that of St Georges-sur-Loire, near Angers, in 1684. Like his brothers, he was active as a composer, but there was some dispute concerning his talents. According to a document of 1768, he 'knew hardly anything about music', a situation which suggests that he had recourse to the services of one or more collaborators. That did not prevent his putting his name to several works at court, and being appointed *surintendant de la musique du roi* on 7 February 1696. It was reported that he was granted this position, which he shared with Lalande, 'out of consideration for his father's talents'.

WORKS

Le triomphe de la Raison sur l'Amour (pastorale), Fountainebleau, 25 Oct 1696 (Paris, 1697)

Eglogue, pastorale, Fountainebleau, Oct 1697, music lost

Apollon et Daphné, divertissement, Fountainebleau, 5 Nov 1698, music lost

Concert de violons et hautbois donné au souper du roy, Versailles, 16 Jan 1707, *F-Pc*

Divertissement, Paris, Hôtel de Vendôme, 30 Aug 1721, music lost

(4) **Jean-Louis Lully** (*b* Paris, bap. 24 Sept 1667; *d* Paris, 23 Dec 1688). Composer, youngest son of Jean-Baptiste Lully (i). On 8 June 1687 he was appointed to two positions his father had held at court, becoming *surintendant* and *compositeur de la musique de la chambre du roi*. According to another royal warrant issued later that month, he was under consideration for succession to another of his father's posts, that of director of the Opéra. The decision was deferred because of his youth, and his premature death meant that it was never ratified. It is doubtful, though, that he was any better a composer than his brothers. Most of the works of which he claimed authorship, including an *Idylle* performed at Anet and *Zéphire et Flore*, the profits of which he shared with Louis Lully, were largely written by Vignon. The music written for a divertissement, dated Chantilly, August 1688, is lost.

JÉRÔME DE LA GORCE

Lumbye. Danish family of musicians.

(1) Hans Christian Lumbye (*b* Copenhagen, 2 May 1810; *d* Copenhagen, 20 March 1874). Conductor and composer. He first studied music in Randers and Odense where at the age of 14 he served as a military trumpeter; from 1829 he served in the Horse Guards in Copenhagen while still continuing his musical education. In 1839 he was deeply impressed by an Austrian band which performed compositions by Lanner and Strauss in Copenhagen, and in 1840 he appeared at the head of his own orchestra performing his own works in 'Concerts à la Strauss'. He became associated with a number of theatres and other places of entertainment in Copenhagen in the next few years, and he achieved popularity, not only as a conductor (who often played his violin at the head of the orchestra) but also as a composer of brilliant dance melodies and other light music. He entered into a successful collaboration with the famous Danish ballet-master Auguste Bournonville, composing impressive dances for Bournonville's ballets at the Royal Theatre. His greatest fame began with the opening of the Tivoli Gardens in 1843, where Lumbye served as music director until 1872 and founded the musical traditions which are still alive in Tivoli today.

In addition to light music, including a large number of his own compositions, Lumbye conducted concerts of Danish and foreign symphonic works. From 1844 he also toured the Danish provinces between the Tivoli summer seasons and made several concert tours to such foreign cities as Paris, Vienna, Hamburg, Berlin, St Petersburg and Stockholm; he was applauded everywhere as a worthy rival to the famous Viennese dance composers.

WORKS
(*selective list*)

for complete list, see Skjerne

Edition: *Folkeudgave af H.C. Lumbye's Kompositioner*, all works arr. solo pf (Copenhagen, *c*1880) [L]

all published in Copenhagen

DANCES AND MARCHES

Waltzes: Amélie vals (1846), L ii; Krolls ballklänge (1846), L ii; Souvenir de Johann Strauss (1849); Hesperus vals (1853), L ii; Dronning Louise (1868), L i

Polkas: Polka militaire (1842); Emilie polka (1848); Pepita polka (1858); Britta polka (1864), L i

Galops: Champagnegalop (1845), L i, ed. S. Lunn (1950) [orch]; Les zouaves (1859), L i; Salut for August Bournonville (1869), L i; Bouquet royal (1870), L i

Marches: Marche de Napoléon (1857); Kong Frederik VII's honneurmarsch (1861), L i; Kong Christian IX's honneurmarsch (1864), L i; Storfyrst Alexander (1866), L i

Ballet music, for A. Bournonville, Royal Theatre, Copenhagen: Napoli, 1842: Finale galop, L i; Polacca guerriera, 1846: Pas de deux; Fjernt fra Danmark, 1860: Indiansk krigdans, L ii; Livjaegerne paa Amager, 1871: Finale galop, L ii

OTHER WORKS

Fantasies for orch: Drømmebilleder (1846); Krigerens drøm (1856); Drømmen efter ballet (1861); En festaften paa Tivoli (1861)

Other inst works, incl. Concert polka, 2 vn, orch (1863), ed. (1956); 48 lette dandse for claveer (n.d.)

Music for Singspiels in the Folketeatret and Casino, Copenhagen; songs

(2) Carl (Christian) Lumbye (*b* Copenhagen, 9 July 1841; *d* Copenhagen, 10 Aug 1911). Violinist, conductor and composer, son of (1) Hans Christian Lumbye. He was taught the violin by Ferdinand Stockmarr and theory by Edvard Helsted. For many years he played in his father's orchestra and later conducted the orchestras of several places of entertainment in Copenhagen; for 20 years he directed the wind band in the Tivoli Gardens. He also taught singing in schools and composed many dances, marches and songs.

(3) Georg (August) Lumbye (*b* Copenhagen, 26 Aug 1843; *d* Copenhagen, 29 Oct 1922). Conductor and composer, son of (1) Hans Christian Lumbye. He studied at the Paris Conservatoire and became a conductor of light-music orchestras. After making concert tours in Denmark he conducted the Tivoli wind band from 1885, and in 1891–7 the Tivoli Concert Hall orchestra. In addition to light music he composed some string quartets and many songs, of which several attained considerable popularity, as well as operettas and incidental music.

SIGURD BERG

Lumley [Levy, Levi], **Benjamin** (*b* ?Birmingham, 1810; *d* London, 17 March 1875). English impresario. His father was Lion or Sion Levi (later Louis Levy), a Canadian merchant resident in Birmingham. The boy attended King Edward's School, Birmingham, 1823–6, and left to work as clerk to an attorney in London, adopting the name Lumley about the same time. In 1832 he became a solicitor and three years later was hired to resolve the bankruptcy of P.F. Laporte, manager of the Italian opera at the King's Theatre (renamed Her Majesty's in 1837). From 1836 Lumley oversaw all the opera's finances and in 1842, after Laporte's death, reluctantly succeeded him. The new manager dealt coolly with the *vieille garde* of Grisi, Persiani, Rubini, Tamburini and Lablache, and with Michael Costa the conductor. In 1846–7 all but Lablache left him to set up their own (successful) company at Covent Garden, the 'Royal Italian Opera'. Jenny Lind's appearances at Her Majesty's Theatre, 1847–9, together with aristocratic support, briefly strengthened the manager's position, but for the seasons 1853–5 he had to close. Reopening in 1856, he struck a notable success with Piccolomini in the first London performances of *La traviata*. Thereafter receipts went down. In August 1858 the Earl of Dudley, by then Lumley's creditor and the theatre's lessee, took possession and the manager retired. He resumed his law practice and later wrote two books of fiction and two on his operatic experiences; the last are particularly valuable for their discussion of the opera house as legal property in England and of the weaknesses of the commercial finance system.

Although Lumley may be credited with introducing Lind, Johanna Wagner, Tietjens and other singers to London, as well as with the London premières of *Linda di Chamounix* and *Don Pasquale* (1843), *Ernani* (1845), *Nabucco* and *I Lombardi* (1846), and *Traviata*, he is also associated with some outstanding failures, including Costa's *Don Carlos* (1844), Verdi's *I masnadieri* (1847; commissioned by Lumley and conducted by the composer) and Thalberg's *Florinda* (1851). He seems to have suffered from a combination of bad luck (Verdi's withdrawal from a proposed *King Lear* in 1846), bad judgment (too much emphasis on the ballet; the choice of Balfe as a replacement for Costa) and hostility from certain sections of the press (notably Chorley in the *Athenaeum*).

LEANNE LANGLEY

Lumsdaine, David (*b* Sydney, 31 Oct 1931). Australian composer. After early studies at the NSW Conservatorium and private composition study with Gordon Day, he took his first degree at Sydney University; subsequently he moved to England in 1952, studying composition with Lennox Berkeley at the RAM, and independently with Seiber. At the RAM he instituted the Manson Room as a centre for contemporary studies, and until 1970, when he was appointed lecturer at Durham University, he pursued a freelance career in London, composing, teaching, editing and playing a leading part in the Society for the Promotion of New Music. In Durham he established a major electro-acoustic composition studio, and became recognized as an outstanding teacher of composition. There he was awarded the DMus (1978), and in 1981 he joined his wife, Nicola LeFanu, at King's College, London, as senior lecturer. He retired in 1993 to pursue composition full time, in Britain and Australia.

Lumsdaine's music is a highly individual amalgam of diverse techniques. Early on the influence of Stockhausen's advanced serial procedures was apparent, as were techniques derived from medieval music and the classical music of northern India; note-permutation systems and

cyclically evolving rhythmic structures remained a fundamental part of his compositional vocabulary for over two decades. Such controls were applied to provide structural strength, not rigidity, and the major orchestral works *Episodes* (1968–9) and *Hagoromo* (1977) demonstrate the degree to which Lumsdaine's interpretation of these devices allows room for an almost improvisatory fantasy. Many of his earlier works have been withdrawn, but *Annotations of Auschwitz* (1964), a cantata upon a text by Peter Porter, is typical of a group of passionately lyrical vocal works written during that period, all with clear historical connections. This and other Porter collaborations notwithstanding, *Kelly Ground* (1966) for solo piano is the first major work with evidence of what was later to become a significant preoccupation with his native Australia: first its history, then increasingly, too, its natural soundscapes. *Salvation Creek with Eagle* (1974) for chamber orchestra, *Cambewarra* (1980) for piano and *Mandala V* (1988) for orchestra are all typical in their luminosity and slow-breathing spaciousness; perhaps *Aria for Edward John Eyre* (1972), an hour-long work for voices, electronics and instruments, is the most intensely personal work of inner exploration of those years, a dramatic treatment of Eyre's account of his transcontinental Australian journey of 1846.

Among other electro-acoustic compositions, *Big Meeting* (1978), a celebration of the Durham Miners' Gala, and *A Wild Ride to Heaven* (1980), described by the composer as 'a radiophonic adventure playground for the ear', all show personal insights into the capabilities of the medium, and are characteristic examples of Lumsdaine's habit of periodically re-examining a given compositional premise. The five *Mandala* works share this feature, united as they are by a concern with the idea of music as a multi-dimensional object upon which to meditate. They show a clear progression outwards (one might equally well say inwards) from one *Mandala* to the next, into a broader, deeper and more intensely personal soundworld. *Mandala III* (1978), for instance, contains woven into its final movement an entire work for solo piano, *Ruhe sanfte, sanfte Ruh'*, composed four years earlier; this in its turn reveals the final chorus in Bach's *St Matthew Passion* from which it takes its title. The quotations woven into the orchestral textures of *Mandala V* are of Australian birdsong. Indeed Lumsdaine's music is far from hermetic; earlier works such as *Episodes* for orchestra and *Caliban Impromptu* (1972) for piano trio with electronics make clear reference to compositions by Bach and Schubert respectively. More recent pieces show a readiness to embrace elements of folksong and jazz. *Shoalhaven* (1982), commissioned for a semi-professional orchestra in southern New South Wales, has clear connections with traditional jazz, and *A Dance and a Hymn for Alexander Maconochie* (1988) draws its explosive energy from brilliantly subsumed folk rhythms. The cantata *A Tree Telling of Orpheus* (1990) is frankly modal, showing, for all that, no relaxation in its technical demands upon the five players or the soprano soloist.

Throughout his working life, Lumsdaine, a gifted ornithologist, has been concerned with making high-quality recordings of birdsong. Much of this work resides in the Australian National Sound Archive (part of the British Insitute of Recorded Sound, London), and leading from it are the *Soundscapes 1–6* (1990–95), commissioned by the Australian Broadcasting Commission. Herein, Lumsdaine insists, it is the birds who are the composers; his own function has simply been to record sequences of song in defined areas of bushland, subjecting them in the studio to a necessary minimum amount of editing. The line of progression through *Big Meeting* and *A Wild Ride to Heaven* to the *Soundscapes* is evident.

WORKS

Ballet: Meridian, perc, pf, tape, 1973

Orch: Episodes, 1968–9; Salvation Creek with Eagle, chbr orch, 1974; Sunflower, chbr orch, 1975; A Little Dance of Hagoromo, orch, 1975; Hagoromo, 1977; Shoalhaven, 1982; Mandala V, 1988; The Arc of Stars, str orch, 1990; A Garden of Earthly Delights, vc, orch, 1992

Brass band: Evensong, 1975

Choral: Dum medium silentium, SATB, 1975; Tides (various Jap.), nar, 12vv, perc, 1979; Where the lilies grow, 8 pt chbr choir, 1985

Solo vocal: Annotations of Auschwitz (P. Porter), S, fl + b fl, tpt, hn, pf, vn, vc, 1964; Easter Fresco (Lat., Bible: *John*), S, fl, hn, hp, pf, 1966, rev. 1971; My Sister's Song (anon. Tamil poetry, trans. A.K. Ramanujan), S, 1974; What shall I sing? (W.H. Auden, C. Isherwood, S. Takahashi, trad.), S, 2 cl, 1982; Fire in Leaf and Grass (D. Levertov), S, cl, 1990; A Tree Telling of Orpheus (Levertov), S, fl, cl, vn, va, vc, 1990; A Norfolk Song Book (Lumsdaine), S, recs/fls, 1992; A Child's Grace (R. Herrick), 1v, ob, hp, 1993

Chbr: Mandala I, wind qt, 1968; Mandala II (Catches Catch), fl, cl, perc, va, vc, 1969; Kangaroo Hunt, pf, perc, 1971; Mandala III, solo pf, fl, cl, va, vc, bell, 1978; Mandala IV, str qt, 1983; Bagatelles, fl, cl, pf, vn, va, vc, 1985; Empty Sky – Mootwingee, fl, trbn/hn, vc, 2 perc, 2 pf, 1986; A Dance and a Hymn for Alexander Maconochie, fl, cl, perc, mand, gui, vn, db, 1988; Round Dance, sitar, tabla, fl, vc, kbd, 1989; Sine nomine, a sax/b cl, perc, 1990; Rain Drums, 4 perc, 1993; Kali Dances, fl, ob, cl, tpt, tba, vib, pf, vn, va, vc, db, 1994

Pf: Kelly Ground, 1966; Flights, 2 pf, 1967; Ruhe sanfte, sanfte Ruh', 1974; Cambewarra, 1980; 6 Postcard Pieces, 1994

Other solo inst: Blue upon Blue, vc, 1992; Curlew in the Mist, shakuhachi, 1993; Metamorphosis at Mullet Creek, sopranino rec, 1994

El-ac: Looking Glass Music, brass qnt, tape, 1970; Aria for Edward John Eyre (E.J. Eyre), vv, ens, elecs, 1972; Caliban Impromptu, pf, vn, vc, live elecs, tape, 1972; Big Meeting, tape, 1978; A Wild Ride to Heaven, tape, 1980, collab. N. LeFanu; Soundscapes 1–4 (Lake Emu, Meunga Creek, River Red Gums and Black Box, Butcher Birds and Spirey Creek), tape, 1990; Soundscape 5 (Cambewarra), tape, 1991; Soundscape 6 (Mutawinji), tape/CD, 1995

Other: 2 Just So Stories (R. Kipling: *The Elephant's Child*, *The Sing Song of Old Man Kangaroo*), nar, dancer, live elecs (midi), 1990; The Crane (incid music, B. Townshend), fl, perc, hp, synth, 1991

Principal publishers: University of York Music, Universal

ANTHONY GILBERT

Lumsden, Sir **David (James)** (*b* Newcastle upon Tyne, 19 March 1928). English organist, choirmaster, harpsichordist and teacher. As organ scholar of Selwyn College, Cambridge, he studied with Ord and Dart, taking the MusB degree in 1951, the PhD in 1955 (with a dissertation on Elizabethan lute music) and the Oxford doctorate in 1959. He was appointed Nottingham University organist in 1954 and was organist and choirmaster at St Mary's, Nottingham and founder conductor of the Nottingham Bach Society. In 1956 he succeeded Robert Ashfield as *rector chori* at Southwell Minster and became director of music at the University College of North Staffordshire, Keele (later Keele University); he also taught at the RAM,

1960–62. In 1959 he became organist and Fellow of New College, Oxford, and university lecturer in music. He inherited from H.K. Andrews a choir of high reputation and added to its lustre, as was evidenced by the choir's unusually diverse repertory, its recordings and its impact on audiences during two tours of the USA (1973 and 1975). He established a particular affinity with the composer Kenneth Leighton, whose music the New College choir memorably recorded. He was also responsible for the versatile new organ built in 1969 for New College chapel by Grant, Degens and Bradbeer. In 1978 Lumsden became principal of the Royal Scottish Academy, moving in 1982 to London as principal of the RAM where in 1990 he established the first performance-based undergraduate course between the RAM and King's College, London, as well as the first joint faculty between the RAM and the RCM. He holds an honorary fellowship at Selwyn College and received and honorary DLitt from the University of Reading in 1990. He retired from the RAM in 1993.

Lumsden is a noted solo organist, particularly drawn to the music of Bach. He was for a time harpsichordist with the London Virtuosi, a chamber group whose other members were principals with the LSO. He is a specialist in Elizabethan music, has published *An Anthology of English Lute Music* (1954) and *Thomas Robinson's School of Musicke, 1603* (1971), and is general editor of *Music for the Lute* (1968). He has been president of the Royal College of Organists and of the Incorporated Association of Organists, and a vice-president and general editor for the Church Music Society. He was knighted in 1985.

STANLEY WEBB/PAUL HALE

Lun. *See* RICH, JOHN.

Luna (y Carné), Pablo (*b* Alhama de Aragón, Zaragoza, 21 May 1879; *d* Madrid, 28 Jan 1942). Spanish composer. He studied harmony and composition at the music school in Zaragoza, then worked as a conductor of various zarzuela companies before becoming conductor at the Teatro de la Zarzuela in Madrid in 1908. There he did much to further the music of Spanish composers such as Falla, Turina, Guridi and Millán. At the same time he was making a name with his own stage works, not least those that moved the zarzuela away from traditional settings, such as *Molinos de viento* (1910), set in the Netherlands. There followed *Los cadetes de la reina* (1913), *El niño judío* (1918) and *La pícara molinera* (1928), all of which displayed Luna's fluent and insinuating melodic invention and command of atmosphere to good effect. He composed more than 170 stage works, including operettas and revues.

WORKS
(*selective list*)

all stage works, in order of first performance; first performed in Madrid unless otherwise stated; most published in vocal score in Madrid shortly after production; for more detailed list see GroveO

La escalera de los duendes, Bilbao, 1904; La rabalera, Zaragoza, 1904; El oso blanco, Zaragoza, *c*1904; Musetta, 13 July 1908; Fuente escondida, 1908; ¡A.C.T! ... ¡Que se va el tío!, 27 Feb 1909, collab. T. Barrera; Pura, la cantaora, 1909; Las once mil virgénes, 1909; Vida de principe, 1909, collab. L. Foglietti; El club de las solteras, 1909, collab. Foglietti; La reina de los mercados, 1909; Molinos de viento, Seville, 1910; Huelga de criadas, 1910; El dirigible, 1911; Sangre y arena, 1911, collab. P. Marquina; Las hijas de Lemnos, 1911; La canción húngara, Seville, 1911

El paraguas del abuelo, 1911, collab. Barrera; Canto de primavera, Zaragoza, 1912; Los cuatro gatos, 1913; Los cadetes de la reina, 1913; La cucaña del Sotanillo, 1913; La alegría del amor, 1913; La gloria del vencido, Bilbao, 1913, collab. M. Amenázabal; La corte de Risalia, 1914; El rey del mundo, 1914; El potro salvaje, 1914, collab. Valverde *hijo*; Salambó, o Los ojos de mi morena, 1914; La boda de Cayetana, o Una tarde en Amaniel, 1915; El patio de los naranjos, 1916; El asombro de Damasco, 1916; El sapo enamorada, 1916; La casa de enfrente, 1917

Los postineros, 1917, collab. Foglietti; El niño judío, 1918; El aduar, 1918; Trini, la Clavellina, 1918; Los calabreses, 1918; Muñecos de trapo, 1919; La menanógrafa, 1919; Pancho Virondo, 1919; ¡Llévame al Metro, mamá!, 1919; El suspiro del moro, 1919; Una aventura en París, 1920; Las Venus de las pieles, 1920

Su alteza se casa, 1921; Los papiros, 1921; Ojo por ojo, 1921; El sinvergüenza en palacio, 1921, collab. A. Vives; Los dragones de París, 1922; Los apuros de Pura, 1922; La tierra de Carmen, 1923, collab. Valverde *hijo*; Benamor, 1923; La moza de campanillas, 1923; Su Majestad, 1923; Rosa de fuego, 1924; La joven Turquía, Barcelona, Sept 1924; Calixta la prestamista, o El niño de Buenavista, 1924; El anillo del sultán, 1925; La paz del molino, 1925; Sangre de reyes, 1926, collab. F. Balaguer

Los ojos con que me miras, 1925; El torpiezo de la Nati, o Bajo una mala capa, 1925; Las espigas, 1925, collab. E. Brú; Las musas del Trianón, 1926; La pastorela, 1926, collab. F. Moreno Torroba; Las mujeres son así, o Amor con amor se gana, 1926; El fumadero, 1927, collab. Moreno Torroba; La manola del portillo, 1928; La chula de Pontevedra, 1928, collab. E. Brú; La pícara molinera, Saragossa, 1928; ¡Ris Ras!, 1928, collab. M. Penella; La ventera de Alcalá, 1928/9, collab. R. Calleja; El antojo, 1929; El caballero del guante rojo, 1929; La mujer de su marido, 1929

La ventera de Alcalá, 1929; Flor de Zelanda, 1930; La moza vieja, 1931, rev. as El pregón del riojana; ¡Como están las mujeres!, 1932; Los moscones, 1932; Las peponas, 1934; Al cantar el gallo, 1935; Quién te puso petenera, o Una copla hecha mujer, 1939; Currito de la Cruz, o El chavalillo, 1939; La gata encantada, o Flor del cerezo, 1939; Los calatravas, 1941; El Pilar de la victoria, Saragossa, 1944, completed J. ANDREW LAMB

Lunati, Carlo Ambrogio. *See* LONATI, CARLO AMBROGIO.

Lund. Town in Sweden. It is 16 km north-east of MALMÖ.

Lund, Carsten (*b* Copenhagen, 12 May 1940). Danish organ builder. He was an apprentice of Troels Krohn in Hillerød from 1957 to 1961, and worked for Poul-Gerhard Andersen in Copenhagen from 1962 to 1966; he founded his own workshop in Copenhagen in 1966. He is the organ builder who has followed and developed the ideas of the Danish Organ Reform Movement with the greatest consistency and his designs are rooted in classical European organ-building traditions. In Denmark, he has pioneered the use of flexible winding, suspended action, soldered pipe caps, hammered pipe metal and classical keyboard design, and has developed his key action to a high degree of perfection. Examples of his work are in Copenhagen at St Stefans church (1983), Frederiksberg Castle Church (1994), Garnisons Church (1995) and Sions Church (1996), and in Vålerengen Church, Oslo (1987).

OLE OLESEN

Lund, Gudrun (*b* Copenhagen, 22 April 1930). Danish composer. She was educated in Copenhagen at the university, studying music, German and English, and at the Kongelige Danske Musikkonservatorium. She began to compose when she was 46; she then took lessons in composition and orchestration with Svend S. Schultz and Mogens Winkel Holm. In 1983–4 she studied in the USA at the Hartt College of Music. Between 1966 and 1995 she taught at KDAS, a college of education in Copenhagen, while composing prolifically. Her wide-ranging music embraces several styles and compositional techniques, and has become increasingly modernistic. Her stylistic diversity is characterized by a certain unpretentiousness which can turn into humorous abandon.

INGE BRULAND

Lundquist, Torbjörn Iwan (*b* Stockholm, 30 Sept 1920). Swedish composer, conductor and pianist. He studied composition and instrumentation with Dag Wirén, the piano and harmony with Ragnar Althén, the piano with Yngve Flyckt, counterpoint with Hans Leygraf and conducting with Hugo Hammarström (choral conducting) and Othmar Suitner. In the 1950s he taught composition and the piano at the Stockholm Citizens' School and was conductor at the Drottningholm Palace theatre. He was a board member of FST, the Society of Swedish Composers (1953–71), acting as its deputy chairman. He began writing film and other light entertainment music, but after his *Kammarsymfoni* of 1956 he concentrated on a more serious art music. Of his output nine symphonies are the dominant component, and they reflect his strong commitment to ecology (no.4 'Sinfonia ecologica', no.6 'Sarek') and to humanism (no.2, no.7 'Humanity' – in memory of Dag Hammarskjöld – and no.9 'Survival'). He has also been influenced by the ethnic music of various cultures. He has said that in his music he seeks 'the core of life, not to flee reality but to re-establish it'. His music is chiefly traditional in form, but he does not shirk avant-garde elements and jazz-influenced excursions.

ROLF HAGLUND

Lundsdörffer, Albrecht Martin. German 17th-century composer. He contributed to collections edited by JOHANN CHRISTOPH ARNSCHWANGER.

Lüneburg. City in Lower Saxony, northern Germany, south of Hamburg. A member of the Hanseatic League from 1371, it was a prosperous town from the Middle Ages, with an economy based largely on the mining of its rich salt deposits. Politically Lüneburg belonged to the Duchy of Brunswick-Lüneburg, whose royal residence was in Celle. The earliest record of musical activity dates from about 955 with the founding of the Benedictine monastery of St Michael. Choristers were trained in its associated school, but few documents about the music there survive.

Missals from the 11th and 12th centuries are known to have existed, but are lost; a few sources survive from the 14th and 15th centuries. Christian lay fellowships, notably the Kalandbruderschaft, took part in liturgical music. A second centre of church music developed after the founding of the Johannisschule (1406), and in 1430 a *schola externa* was opened at the monastery of St Michael for students from the town, where singers were trained for church services.

Polyphonic sacred music was introduced to Lüneburg rather late, about 1516, but subsequent inventories of both the Johannisschule and Michaelisschule include many masses and motets by leading 16th-century composers, such as Lassus, Clemens non Papa, Handl, Crecquillon, Kerle, Lechner, Rore, Ruffo and Wert. After the Reformation a document laying down the essentials of musical instruction as well as of the liturgy was published as the *Psalmodia* (1553) by the assistant headmaster at the Johannisschule, Lucas Lossius, and at this time school choirs became important to the city's musical life. These choirs (*Chori symphoniaci*) sang in the church, in the streets before the houses of Lüneburg residents and at various private ceremonies and festivities. Cantilena singing in the streets at Christmas was a distinctive musical activity of the Lüneburg schools (see Walter, 1967). Choruses of poor children were also permitted to sing in the streets, but monophonic songs only, on Tuesdays, for the purpose of collecting alms. The schools also performed plays with music directed by the Kantor. Kantors at St Johannis included Lampadius (1535–7), Bertram (1559–62), Christoph Praetorius (1563–81), Euricius Dedekind (1582–94), Cossius (1627–50), Michael Jacobi (1651–63) and Funcke (1664–94); at the Michaeliskirche Anton Burmeister was Kantor from 1604 to 1634.

From the 17th century the town council employed between four and seven salaried instrumentalists (*Ratsmusikanten*); they participated in church music, school plays and civic ceremonies. About ten additional musicians were available for dances, weddings, guild festivities and the annual 'Kopefest' (pre-Lenten celebration). The most important 17th-century organists were Christian Flor (Lambertikirche and St Johannis), Johann Jakob Löwe (Nikolaikirche) and Georg Böhm (St Johannis). Löwe and Böhm were active when J.S. Bach was a student at the Michaelisschule (1700–?1702), a poorly documented period of his life (see Fock), though scholars have speculated on how Bach may have been influenced by music there (see Blume). The keyboard tablatures in the Ratsbibliothek (*D-Lr*), especially the organ tablatures with music by Jacob Praetorius (ii), Scheidemann, Weckmann and others, are evidence for Lüneburg's musical traditions between 1610 and 1670, and are an important source of north German Baroque keyboard music. The inventories of the lost library of the monastery of St Michael provide information about the flourishing practice of vocal music between 1630 and 1690; as in other north German towns there were oratorio concerts in addition to liturgical music. In the 18th century many Passions and cantatas were performed including Passions of Handel (1723), Telemann (1766) and C.P.E. Bach (1774). Kantor Eberwein performed the Passions of C.H. Graun, Rolle and Homilius. To a lesser extent new organ music was performed by the organist of St Johannis, L.E. Hartmann. An important successor of the latter was J.C.

Interior of the Michaeliskirche, Lüneburg: painting by Joachim Burmeister, 1700 (Museum für das Fürstentum Lüneburg)

Schmügel, a pupil of Telemann and teacher of J.A.P. Schultz.

Opera and Singspiel became popular in the 18th century. In 1718 *Glückliche Liebe*, a pastoral play with arias and dances after Keiser, was performed. Later, visiting theatrical troupes put on plays, replacing the previous school dramas. The Seyler company appeared in 1769; their performances always concluded with a ballet. The Stöffler troupe often performed Singspiele and operettas directed by F.A. von Weber, composer of the operetta *Lindor und Ismene*. In 1786 the Vereinigte Gesellschaft Deutscher Schauspieler gave a performance of Hiller's comic opera *Die Jagd*. Heinrich Marschner visited the city in 1843, followed in 1850 by Lortzing with his operas *Zar und Zimmermann* and *Die beiden Schützen*.

There was little amateur or private music-making before the 19th century; however, a Musikverein founded in 1823 gave performances of Handel's *Samson* in St Johannis. This was succeeded mostly by subscription concerts with mixed programmes. In 1859 a Schiller festival took place, and Romberg's *Glocke* was performed. At the beginning of the 20th century a Verein für Geistliche Musik began to organize concerts, and between 1902 and 1910 performed choral works by Beethoven, Brahms, Schumann and Berlioz. It also gave the première of Busoni's *Sonnabend auf dem Dorfe* (1929).

Lüneburg commemorated the bicentenary of Bach's death (1950) with a large festival. At the same time the Gesellschaft für Musikforschung held the first international musicological congress after World War II. In 1956 the 33rd German Bach Festival again brought many internationally known musicians and scholars to Lüneburg. The city's postwar musical life has been provided chiefly by the church choirs, the Stadttheater, which

presents operas, operettas and musicals, and by subscription concerts with visiting orchestras and soloists. Chamber music concerts are held in the Lüne monastery, and are devoted to early music.

GEORG KARSTÄDT/R

Lunelli, Renato (*b* Trent, 14 May 1895; *d* Trent, 14 Jan 1967). Italian musicologist, organist and composer. He attended the local technical school and the Munich Handelhochschule (1913–14) but was forced by the outbreak of World War I to return to Trent, where he studied the organ with Attilo Bormioli at the Liceo Musicale. Almost all his musical activity centred on Trent where he was organist at S Maria Maggiore, music critic for *Il nuovo Trentino* and *L'adige*, and where in 1953 he was asked to organize the new music section of the Biblioteca Comunale.

Lunelli's main interest was organs; he pioneered this subject in Italy and became an uncontested authority. His first publication in the field (1925) dealt with the restoration of the organ in S Maria Maggiore; his subsequent research spread from Trent to the whole of Italy and resulted in articles on the origin of the organ in Italy and foreign organs in Italy, as well as the monograph *L'arte organaria del Rinascimento in Roma* (Florence, 1958). With Tagliavini he founded *L'organo: rivista di cultura organaria e organistica* and edited it from 1960 until his death. He also composed much vocal music, including five male-voice masses and three cantatas.

WORKS
(selective list)

5 masses (male vv, org): op.7, 1932; op.13, 1933; op.14, 1935; op.15, 1935; op.19, 1936

Cants.: 11 beato Stefano Bellisini, op.26, solo vv, male chorus, org (1940); Giubila il salmo, op.27 (1944); Il campanile del borgo, op.33, 1v, male chorus, org (1949)

Other liturgical works, Trent folksong arrs.

CAROLYN GIANTURCO/TERESA M. GIALDRONI

Lunga (It.: 'long'). A word often placed above a note or, particularly, a fermata to indicate a longer wait than might be expected. The words 'lunga pausa' or 'pausa lunga' also appear to indicate that a pause is to be made at the performer's discretion, not according to rests showing the precise length.

DAVID FALLOWS

Lungul, Semyon Vasil'yevich (*b* Khlinaya, Sloboziya region, 16 Feb 1927). Moldovan composer. He graduated from the Kishinev (Chişinău) Conservatory in 1958 as a composition student of Gurov and Lobel'; the year before he had begun teaching at the Coca School in Kishinev. Since 1974 he has held various official positions in the Moldovan Composers' Union, the USSR Composers' Union and the Moldovan broadcasting authority. His music is broadly lyrical and dramatic, though he is not averse to elements of the grotesque, and combines distinctive traits of Moldovan folk music with a contemporary style and non-traditional schemes. Important works include the oratorio *Dmitrie Cantemir* and the songbooks *Cântările Nistrului* ('Songs of the Dniester').

WORKS
(selective list)

Choral poems: Toamna în Moldova [Autumn in Moldova] (A. Busuioc), 1962; A fost război [There was a War] (G. Vieru), 1968; Memoria veacurilor [The Memory of Centuries] (Busuioc), 1973; Ciclu de poeme corale [Cycle of Choral Poems] (V. Filip and others), 1980–83

Other vocal: Meleaguri natale [Native Expanses] (cant., L. Deleanu), 1958; Cântările Nistrului [Songs about the Dniester] (vocal cycle, Vieru and others), bk 1, 1970; Patria mea [My Native Land] (cant., Vieru), 1972; Dmitrie Cantemir (orat, G. Dimitriu), T, Bar, spkrs, chorus, orch, 1973; Cântările Nistrului [Songs about the Dniester], bk 2, 1984

TAT'YANA BEREZOVIKOVA

Lünicke. *See* LINIKE family.

Lunn, (Louise) Kirkby (*b* Manchester, 8 Nov 1873; *d* London, 17 Feb 1930). English mezzo-soprano. She studied in Manchester and then at the RCM with Visetti. While still a student she sang Margaretha in the English première of Schumann's *Genoveva* (1893) and the Marquise de Montcontour in Delibes's *Le roi l'a dit*. She sang Nora in Stanford's *Shamus O'Brien* at the Opéra-Comique in 1896, then joined the Carl Rosa company, where her roles included Julia in Sullivan's *Martyr of Antioch* and Ella in the première of MacCunn's *Diarmid*, both at Covent Garden (1897). In 1901 she reappeared there as the Sandman in *Hänsel und Gretel* and Siébel in *Faust*; she continued to sing at Covent Garden until 1914, appearing in several London first performances, notably as Pallas in Saint-Saëns's *Hélène* and in the title role in *Hérodiade* (both 1904), Hate in Gluck's *Armide* (1906) and Delilah (1909), as well as Orpheus, Ortrud, Brangäne, Fricka, Carmen, Olga (*Yevgeny Onegin*) and Amneris. She appeared at the Metropolitan (1902–3 and 1906–8). She sang Kundry in English in Boston (1904), and later with the British National Opera Company at Covent Garden (1922). She possessed a large, rich voice, which ranged from *g* to *b♭″*; recordings confirm its size and its steady, somewhat severe quality. Her stage performances were sometimes considered rather cool; Saint-Saëns said he thought her Delilah was a clever embodiment 'même avec son peu de chaleur'.

HAROLD ROSENTHAL/R

Lunssens, Martin (*b* Molenbeek St Jean, Brussels, 16 April 1871; *d* Etterbeek, Brussels, 1 Feb 1944). Belgian conductor and composer. He studied at the Brussels Conservatory and won the Belgian Prix de Rome (1895) with his cantata *Callirhoé*; he later taught at the conservatory for many years. Afterwards he was successively director of the Kortrijk Academy of Music (1905–16), the Charleroi Academy of Music (1916–21), the Leuven Conservatory (1921–4) and the Ghent Conservatory (from 1924). He conducted Wagner at the Royal Flemish Opera, Antwerp, and composed in a ponderous style close to that of Bruckner and Mahler; his works include three symphonies, five concertos and four symphonic poems.

ERIC BLOM/CORNEEL MERTENS

Luo Dayou [Lo Ta-yu] (*b* Miaoshu province, Taiwan, 20 July 1954). Chinese popular songwriter and singer born in Taiwan. Luo began his creative career as a composer of film music in 1974 while studying in medical school. In 1980, he received his licence to practice as a doctor. However, when he released his first solo album the following year to much critical acclaim, he gave up the medical profession. Luo moved his base of operation from Taibei to Hong Kong in 1987. Two years later, he established his own production company, Music Factory, in Hong Kong, to develop the East Asian market (Hong Kong, mainland China, Taiwan). Widely respected as an all-round musician, Luo has received numerous awards for his film music (in background and feature song categories) in Hong Kong and Taiwan from 1987 onward.

Luo is versatile: he composes and arranges in all popular styles, from folk-like melodies and mellow soft-rock tunes to rock 'n' roll. He also produces his own recordings, most of which have topped popular charts in Hong Kong and Taiwan. His songs feature lyrics in Mandarin, Cantonese and the Taiwanese dialect of Hokkien. Luo also experimented with the crossover trend in the early 1990s, organizing pops concerts with symphony orchestras; he made his debut as a stage composer in 1997.

His fans found resonance in his voice of dissent. Among Luo's most popular songs were the *Lianqu* ('Lovesong') trilogy (1979—94), *Airen tongzhi* ('Comrade Lover', 1989), and *Huanghou dadao dong* ('Queen's Road East', 1991).

JOANNA C. LEE

Luo Jiuxiang (*b* Dapu, Guangdong province, 1902; *d* 1978). Chinese *zheng* player. He is considered the foremost representative of the Hakka (Keija) regional school of *zheng* performance. He was active as a performer throughout much of his life, working as an accompanist to the regional opera *hanju*, and gaining conservatory teaching posts both in the northern city of Tianjin and in his home province, Guangdong. Luo also recorded widely from the mid-1950s. Unlike some of his peers in other schools of performance, Luo did not attempt to create new pieces for his instrument and his music remains largely in traditional style.

JONATHAN P.J. STOCK

Luo Yusheng [Xiao Caiwu] (*b* nr Shanghai, 1914). Chinese narrative-singer. Most influential of the female performers of *jingyun dagu* (Beijing drumsong) following LIU BAOQUAN, she created her own 'Luo style'. She began by singing Beijing opera arias, only commencing serious study of drumsong in 1934. When she moved north with her teacher (later also accompanist), she reworked the repertory of Liu Baoquan, adding other pieces and winning acceptance in Tianjin (1936) and Beijing (1939). Alone among her contemporaries, Luo deliberately went beyond the confines of a single school, adopting elements from Bai (Yunpeng) and Young Bai (Fengming) styles. Her most successful pieces date from this period: *Jian'ge wenling* ('Eavesbells at Sword Hall'), a slow reflective lament of the emperor for his lost love, created by Luo, became her signature piece. In 1951 Luo joined the new Tianjin Narrative arts troupe, where she both taught and performed through the years, creating many new pieces. She sang well into her seventies, making many recordings.

Her range is close to that of Liu Baoquan, and her voice has been called golden. In China she is appraised as singing the melody as well as the tale, the lyric tones floating out, graceful and winding, but so full of inner steel that the result stirs the gut and shakes the spirit.

KATE STEVENS

Luo Zhongrong (*b* Santai, Sichuan, 12 Dec 1924). Chinese composer. As a composition student of Tan Xiaolin and Ding Shande at the Shanghai Conservatory of Music in the 1940s, he developed a special interest in the music and writings of Hindemith, whose book on harmony he translated into Chinese. He went to Beijing in 1951 where he worked with the Central Philharmonic Society as a resident composer until his retirement. His formal reputation in China is based on the popular mass song *The Land is Beautiful Beyond the Mountain* (1947) and on various conventional orchestral works of the 1950s and 60s. Luo was harassed and imprisoned during the Cultural Revolution.

When he took up composition again in 1979, his affinities with Western music shifted from Hindemith to Schoenberg. He wrote several song cycles and chamber works applying serial techniques. Luo has frequently stressed the coincidental but striking relationship between Western rhythmic or timbral serialism and the structural principles of *shifan luogu*, a genre of Chinese ritual percussion music. His String Quartet no.2 (1985) is very percussive in character and makes use of various *luogu* series. His musical style fluctuates between mild, Debussian Romanticism and serialism with a distinct pentatonic flavour, but he encourages bolder innovations in the younger generation. A private composition tutor at the Central Conservatory, he is held to be the spiritual father of modern Chinese music by many young composers in Beijing and Shanghai.

FRANK KOUWENHOVEN

Lupacchino [Luppachino, Luppagnino, Carnefresca], **Bernardino** (*b* Vasto; *fl* 1543–55). Italian composer. He served as a priest at S Maria Maggiore in Vasto in 1543, but may have moved further north by 1547, when his *Primo libro di madrigali a cinque* was published with a dedication to 'Carlo Antonio da Bologna Fantucci' and a laudatory sonnet by 'Giovan Batista da Forsembruno'. He was named *maestro di cappella* of S Giovanni in Laterano, Rome, in 1552 in succession to Paolo Animuccia, but was replaced in 1555 by Palestrina, having given offence by his ostentatious manner of living. His life thereafter is unknown. His works include 85 madrigals for three, four and five voices; he also wrote 13 duos without words, which were published together with 15 by G.M. Tasso and 11 that cannot be attributed firmly to either composer, as *Il primo libro a due voci* (Venice, 1559[24]; the first edition, now lost, must have dated from the 1540s, as Doni mentioned it in 1550). The popularity of the duos is attested by the great number of surviving reprints, the last from 1701.

The sonnet by Giovan Batista da Forsembruno at the end of Lupacchino's 1547 publication praises him for matching music to words. He did, indeed, make extensive use of word-painting, and he showed some whimsy in his choices of texts as well. *La cara pastorella* (1543), for example, is a dialogue in which a peasant girl promises that if her companion will show her the way, she will let him hear the song of the cu-cu-cuckoo (with suitable musical play on 'cu cu'). A few of the texts name specific women: Lucrezia, Laura, Julia, Bartholuccia (twice).

Although Lupacchino handled imitation well, he seems to have preferred a homophonic and declamatory texture. He was a skilled and imaginative harmonist, notwithstanding several instances of rough part-writing, and he used register effectively, not only for contrast but to produce clear and well-spaced sonorities. Repetitions of musical phrases (with new text) provide an organizing element in the music. Ludovico Balbi provided the cantus of Lupacchino's *Il dolce sonno* with four new lower voices in *Musicale essercitio* (RISM 1589[12]).

Lupacchino's untexted duos often include runs and modestly complicated figures in short note-values; some have long melodies with no pauses for breathing. Most phrases open imitatively then dissolve into free passages, often with runs in 3rds or 6ths, before proceeding to a clearcut cadence. Passages are sometimes repeated, especially the final phrase.

THOMAS W. BRIDGES

Lupato, Pietro [Luppato] (*fl* 1524–7). Singer. In 1524 he was promoted at S Marco, Venice, from the *capella minor* to the *capella maior* and in October 1525 he became acting *maestro di cappella* during the illness of Petrus de Fossis. On the latter's death (by July 1526) he became interim *maestro*, serving until the appointment of Willaert on 12 December 1527. Although he was reinstated in the *capella maior*, there is no further record of Lupato after this date. It now seems unlikely that he should be identified with the composer LUPUS. (See G. Ongaro: 'Willaert, Gritti e Luppato: miti e realtà', *Studi musicali*, xvii, 1988, pp.55–70.)

BONNIE J. BLACKBURN

Lupi, Johannes [Leleu, Jehan; Leleu, Jennot] (*b* c1506; *d* Cambrai, 20 Dec 1539). Franco-Flemish composer. From 1514 to 1521 he was a choirboy at Notre Dame Cathedral in Cambrai. After attending school in Cambrai he received a fellowship from the cathedral chapter to study at the University of Leuven, where he enrolled in the faculty of philosophy on 28 August 1522. On 18 June 1526 he returned to the cathedral as a *parvus vicarius*. On 21 March 1527 he succeeded Johannes Remigii (Jean Rémy, *dit* Descaudin) as master of the choirboys. He was promoted to *magnus vicarius* on 8 April 1530 and shortly thereafter named sub-deacon. Lupi was repeatedly dismissed from his post, mainly because of his inability to keep discipline among the choirboys; he also had difficulty in balancing the budget. But he was held in such high esteem as a musician that he was always reinstated, upon his promise of emendation. He suffered from a chronic illness that caused him to leave his position from 1535 to 1537 and that was responsible for his early death. He never became a priest; it took the chapter's special dispensation to fulfil his wish to be buried in the cathedral. Josquin Baston's *déploration*, *Eheu dolor* (*F-Pn* 1591), mourns the death of Lupi, 'not a wolf but an innocent lamb'.

In 1542 Attaingnant & Jullet published a book of motets entirely devoted to Lupi, containing 15 four- to eight-part motets. The collection is a retrospective one, containing early and late works, and was edited with exemplary care, particularly with regard to text underlay. The opening motet, *Salve celeberrima virgo*, is an impressive example of Lupi's skill in writing eight-part counterpoint.

Lupi was among the foremost composers of his generation. He was gifted with an uncanny ability to weave five and six voices together in faultless imitative counterpoint. His melodies tend to be very melismatic, yet with an unusual sensitivity to text declamation. His works show a fine sense of harmonic planning, with a preference for the Dorian mode. Stylistically, he was closer to the school of Gombert than to the French school. Like Gombert, he preferred a full texture, continuous imitative counterpoint and elided cadences, often with a flattened 7th (for a contrary view, see Urquhart). He did not use canon or cantus firmus and only rarely paraphrased the chant melody.

Lupi wrote only two masses. *Missa 'Philomena praevia'*, based on Richafort's motet, shows an unusual type of parody treatment: the Kyrie is a literal transcription of the *prima pars* of the motet, and the Gloria and Credo have no more than a few freely written bars, although the sections of the motet are not quoted consecutively. Only the 'Pleni', Benedictus and Agnus Dei are entirely Lupi's own creation. *Missa 'Mijn vriendinne'*, called *Missa 'Plus oultre'* in one source, also seems to be a parody mass, but of a different type. It is related to an anonymous *Missa 'Amica mea'* that survives in fragmentary state (*NL-L*, F).

Lupi's creative genius is best shown in his motets. An outstanding trait of his works is thematic unity. 13 of his motets are settings of responsories in the form *aBcB*, but two others also have identical musical endings for the two *partes*. His themes are related in various ways: by emphasis on certain intervals or notes, by exact repetition, by inversion or by variations in rhythm. Melodic unification also results from Lupi's handling of the modes; each mode suggested to him a number of melodic shapes appropriate only to that particular one, and thus similarities can be traced between motets written in the same mode. A number of his themes exhibit antecedent–consequent relationships. Lupi paid particular attention to text setting. The text shapes the melodic lines as well as the motet's whole structure. Each phrase of text is usually stated twice. The first musical phrase in most cases comes to rest on a non-cadential degree, avoiding traditional clausulas and a complete stop; the repetition of the phrase ends with a full cadence on the tonic or dominant, or with an interrupted cadence, depending on the grammatical structure of the text.

Lupi's chansons range from the serious to the risqué. *Vous scavez bien*, an early work, begins with a theme very similar to one in Josquin's *Mille regretz* and has the same melancholy cast. *Au joly bois sur la verdure* and *Quant j'estoys jeune fillette* are light, narrative chansons in the Parisian tradition, with many syllables set to repeated quavers. Chansons such as *Reviens vers moy*, a lady's plea to her lover, and its regretful response, *Plus revenir*, are more characteristic; nearly all phrases are set in close imitation, with little chordal motion. Stylistically, Lupi was just outside the Parisian school. His chansons are more polyphonic than those of Claudin de Sermisy; often they have long melismas. He liked to repeat the first phrases, at times using the opening material in the final phrase.

Lupi's music was generally not confused with that of LUPUS and LUPUS HELLINCK in contemporary sources. An exception is the motet *Ergone conticuit*, a setting of Erasmus's lament on the death of Ockeghem, attributed to 'Jo. Lupi' in RISM 1547[5]. Chronological and stylistic considerations suggest that this is more likely to be the work of Lupus. There were two other musicians named

Johannes Lupi. One was an organist who in 1502 left his post at the collegiate church of Ste Gertrude in Nivelles. The other, who probably died in about 1548, was a chaplain and singer at the church of Our Lady in Antwerp. (On these two musicians, see Albrecht.) Neither is known to have been a composer.

BONNIE J. BLACKBURN

Lupi, Roberto (*b* Milan, 28 Nov 1908; *d* Dornach, Solothurn, 17 April 1971). Italian composer, conductor and theoretician. He studied at the Milan Conservatory, graduating in piano in 1927, in cello in 1928 and in composition under Pedrollo in 1934. In 1937 he won the first Rassegna Nazionale for young conductors, and from that time he was very active as a conductor. He taught composition at the Florence Conservatory (1941–71) and was appointed artistic director of the Accademia di S Cecilia in 1944. From 1936 he worked on a new harmonic system, 'armonia di gravitazione', which he adapted skilfully in his compositions and which was discussed in his books *Armonia di gravitazione* (Rome, 1946) and *Il mistero del suono* (Rome, 1955). The system, which has something in common with Hindemith's *Unterweisung im Tonsatz*, associates structural principles with theosophical ideas and symbolism influenced by Rudolf Steiner's eurhythmics. Lupi applied it in his theatre music from *La danza di Salomè* (1952), but most markedly in *La nuova Euridice* (1957), in which he borrowed from Steiner's theories.

WORKS

(*selective list*)

Stage: La danza di Salomè (sacra rappresentazione, 1, after 14th-century ancient Umbrian text), Perugia, 1952; La nuova Euridice (mistero melodrammatico, 3, M. Della Quercia), Bergamo, 1957; Persefone (12 immagini sceniche), Florence, 1970

Vocal orch: Stabat mater, 1944; Psalm cl, 1945; Orpheus (cant.), 1950; Bucolica, 1953; Epigrammi enigmatici, 1960; 7 ideogrammi, 1963; Misteri, 1968

Orch: Varianti, 1948; Studi per 'Homunculus', 1958; Azioni sonore, 1960–62; 5 pezzi brevi, 1966; 12 ricercar in forma di Zodiaco, vc, orch, 1966

Chbr and solo inst: 6 studi, pf, 1942; Duo, vn, vc, 1943; Sonata, vc, pf, 1943; 7 aforismi, pf, 1944; 12 pezzi brevi, pf, 1944; Varianti, vn, pf, 1944; Nonephon, fl, 1966; Diario, fl, cl, pf, 1968; Diario secondo, sul nome BACH, vn, va, vc, gui, 1969;

Songs for 1v, pf: 7 favole e allegorie (L. da Vinci), 1944; 2 canti d'amore (Catullus), 1947; 12 Galgenlieder (C. Morgenstern), 1967–8;

Edns.: Italian Ars Nova pieces, Renaissance lute music, works by Boccherini, Cherubini, Locatelli, Monteverdi, Vivaldi

ALBERTO PIRONTI (with RAFFAELE POZZI)

Lupino, Francesco (*b* Ancona, *c*1500; *d* *c*1572). Italian composer. He was a priest. His first known appointment was at the Santa Casa, Loreto, where he was a singer from September 1532 to October 1533, and *maestro di cappella e canto* from October 1533 to September 1540. From 1540 to 1543 he was *maestro* at Fano Cathedral, and was appointed *maestro di cappella* at Urbino Cathedral in 1544, remaining in this position until 1555. He was made a canon of the same church in 1563 and probably remained there until his death. Lupino is briefly mentioned by Pietro Cinciarino (a native of Urbino) in his treatise *Introduttorio abbreviato di musica piana* (Venice, 1549). Lupino's only surviving publication, *Il primo libro di motetti* (Venice, 1549), for four voices, is dedicated to Cardinal Giulio Feltrio della Rovere, brother of Duke Guidobaldo II of Urbino, papal legate and patron of the Santa Casa, Loreto. The contents include a number of canonic motets and, despite the title of the book, a complete setting of the ordinary of the mass, the *Missa 'Haec est Regina'*, composed in a strongly imitative style. In 1541 Lupino received, as a gift from the author, Del Lago's 'opera de musiche', probably the *Breve introdut-tione di musica misurata* (Venice, 1540). An eight-voice *Magnificat* survives in manuscript (in *I-GUBd*).

IAIN FENLON

Lupi Second [Lupi], **Didier** (*fl* mid-16th century). French composer. He appears to have spent most of his life in Lyons, although he was probably not born there, as his book of four-part secular chansons published by Beringen in August 1548 is dedicated to various Italian bankers and merchants who had befriended and supported him since his arrival there. This volume includes settings of five texts by Clément Marot and four by Charles Fontaine; most of the texts are courtly *épigrammes* of eight or ten lines, but the volume includes a number of bawdy anecdotes set in lively syllabic counterpoint. In the same year he issued the *Premier livre de chansons spirituelles*, in collaboration with the poet Guillaume Guéroult, who worked for the Lyons printers Arnoullet (1550–53) and Granjon (1557). This volume attained considerable success: up to the mid-17th century the chanson *Susanne un jour* from this book was set by some 30 composers in about 40 different arrangements, most of which use Lupi's tenor as the melody. He was probably still working in Lyons in 1559 when Granjon published his setting of *O que je vis en estrange martyre*, a poem written for Clémence de Bourges by the son of the royal governor of Lyons Jean du Peyrat.

Lupi's close relationship with the Beringen brothers, Guéroult, Giles d'Aurigny and Barthélemy Aneau perhaps best expresses his attitude towards the Reformation. His music is part of the stream of new ideas that were being cultivated enthusiastically in Lyons at the time. The volume of *chansons spirituelles* is the first such large-scale work of importance by a French Protestant poet and musician. The pieces (including five psalm settings, a set of Lamentations, a *Te Deum* and two laments for St Susanna) fall into two distinct, characteristic groups. The first comprises strophic settings: in style these follow the model set by Bourgeois' 24 psalms published by Beringen in 1547 and described as 'en style familier ou vaudeville' or 'à voix de contrepoint égal consonnante au verbe', with characteristically simple melodies in the tenor that blend elements of folksong with the severity of Huguenot psalms. The second group contains non-strophic polyphonic pieces, in which frequent imitation alternates with syllabic passages; it is in these works that the influence of the secular chanson is most felt. The settings of 30 psalms by d'Aurigny are strophic and in a simple, syllabic style; their concise dimensions preclude long, imitative passages and text repetition. Brief imitation between groups of voices is common (mostly the lower voices alternating with the higher ones).

WORKS

Premier livre de chansons spirituelles nouvellement composées par Guillaume Guéroult, 4vv (Lyons, 1548); 1 ed. in Levy, 2 ed. in Becker, 9 ed. M. Honegger (Paris, 1960–65)

Tiers livre contenant trente et cinq chansons, 4vv (Lyons, 1548); 7 ed. M. Honegger (Paris, 1964)

Psaumes trente du royal prophète David, traduictz en vers françois par Giles Daurigny, dict le Pamphile, 4vv (Lyons, 1549); ed. in Eitner (1874), suppl., 1 ed. in Dobbins

Chanson, 4vv, 1559[14]; chanson spirituelle in B. Aneau: Genethliac (Lyons, 1559)

Chansons spirituelles, cited in *AnnM*, i (1953), 343, possibly by Lupi; chansons in 1540[16], 1541[7], 1541[8], 1543[14], probably by Johannes Lupi

MARC HONEGGER/FRANK DOBBINS

Lupo [de Milano, de Almaliach]. Family of string players, active in Italy and then England. They were Sephardi Jews, and it is likely that they were expelled from Spain in 1492 and subsequently settled in Milan and Venice. Three individuals 'de Milano', Ambrosio, Romano and Alexandro, were among the six string players recruited in Venice for the English court in 1539–40. Romano died in 1542, when the group returned briefly to Italy, and Alexander disappears from records in 1544. Ambrosio or Ambrose, however, remained and founded a dynasty whose members served in the court violin consort up to the Civil War. In addition to those discussed separately below there were Horatio (bap. London, 5 Nov 1583; bur. London, 23 Oct 1626), son of (3) Joseph and brother of (4) Thomas (i); and Thomas (ii) (bap. London, 7 June 1577; *d* 1647–60), son of (2) Peter. It is not yet clear how several other musical Lupos were related to them. Francis

Franz[oon] Lupo founded an instrument making dynasty in Amsterdam that included his son Pieter and the Kleynman family of violin makers, while Andrew Lupo stated he was a musician of St Giles Cripplegate, London when he made his will on 3 October 1689. Branches of the family still exist in the USA, descended from two sons of (1) Ambrose who settled in Virginia in the reign of James I.

(1) **Ambrose** [Ambrosio] **Lupo** (*b* ?Milan; *d* London, 10 Feb 1591). String player and composer. According to one document he was the son of Baptist from the Venetian district of Castello Maiori and 'Busto in Normandy, in the republic of Malan'. His Jewish ancestry is revealed in a probate document of 1542, when he is described as 'Ambrosius deomaleyex', apparently a garbled rendering of 'de Olmaliach' or 'de Almaliach', a version of the Sephardic name 'Elmaleh'. He served in the English court string consort from 1 May 1540 until his death; in 1590 he was described as 'one of the eldest' of the group. He may be the author of some or all of the pieces ascribed to 'Ambrose' in English lute sources (see Craig-McFeely).

(2) **Peter** [Pietro] **Lupo** (*b* Venice, *c*1535; *d* London, spring 1608). String player, son of (1) Ambrose Lupo. He joined the musicians' guild in Antwerp on 17 January 1555. In the following year he travelled to England to join the court string consort, and served until his death. He may have been an instrument maker, for in 1559–60 he sold a set of violins and some wind instruments to the town of Utrecht. He may be the 'Peter' whose name is attached to one of the sets of divisions in the early Elizabethan collection of dances, *GB-Lbl* Roy.App.74–6, and could also be the 'Mr Petro' who contributed a galliard to the Willoughby Lutebook.

(3) **Joseph** [Gioseffo, Josepho] **Lupo** (*b* Venice, *c*1537; bur. Richmond, 23 April 1616). String player and composer, son of (1) Ambrose Lupo and father of (4) Thomas Lupo (i). He followed his brother into the musicians' guild in Antwerp on 20 August 1557, but preceded him to London. He joined the court string consort in November 1563, and served until his death. He composed a beautiful five-part pavan based on Lassus's *Susanne un jour* in *GB-Lbl* Eg.3665 and contributed a commendatory poem to John Mundy's *Songs and Psalmes* (1594).

(4) **Thomas Lupo (i)** (bap. ?London, 7 Aug 1571; *d* London, ?Dec 1627). Violinist and composer, son of (3) Joseph Lupo and father of (5) Theophilus Lupo. He joined the court violin consort at the beginning of 1588 at the age of 16, but did not receive a paid post until May 1591. He served continuously until his death at the end of 1627, when he was succeeded by his son (5) Theophilus. In 1610 he received a second place in the household of Prince Henry (renewed in 1617 when Prince Charles formed his own household). In June 1619 his original post was exchanged for one described in the warrant as 'composer for our violins, that they might be the better furnished with variety and choise for our delight and pleasure in that kind'. He was evidently in deep financial trouble towards the end of his life, for on 27 July 1627 he was forced to sign away more than £100 of future income to a creditor; the clerk noted that 'before he could subscribe his wife by violence kept him of[f] and would not permit him'

Most of Lupo's surviving music seems to have been written as part of his work in the household of Prince Charles. Charles was an accomplished and enthusiastic viol player and patronised Orlando Gibbons, Alfonso Ferrabosco (ii) and John Coprario, the composers who, with Lupo, effectively created the English viol consort repertory. The idiom of Lupo's five- and six-part fantasias was derived from the Italian madrigal, and some of them are modelled on particular works by Marenzio, Vecchi and others, though he sometimes introduced idiomatic division passages for the bass viols. The three- and four-part fantasias are more experimental. He used a number of new scorings, including three trebles, three basses, two trebles and tenor, two tenors and bass, two trebles and bass, and two trebles and two basses. The last two, in particular, seem designed for the mixed ensembles of violins and viols with organ accompaniment that were developed in Prince Charles's household. They introduce dance-like elements appropriate to the violin into the fantasia, and were evidently stages in the process that led in the 1620s to Coprario's fantasia-suites.

Little survives of the music Lupo must have written for the court violin band, though some of his compositions and arrangements presumably survive anonymously in the sources of Jacobean masque dance music. In 1611 he was twice paid £5 for setting the dances 'to the violins' for Ben Jonson's *Oberon* and *Love Freed from Ignorance and Folly*; the £10 he received for Campion's *The Lords' Masque* (1613) was presumably for similar services. His surviving output of vocal music is small but distinguished, and includes a fine group of five-part penitential Latin motets. His importance as a composer, however, lies in his viol fantasias. They reveal a resourceful and accomplished composer, who deserves more attention than he has received in modern times.

WORKS

VOCAL

Edition: *Thomas Lupo: The Complete Vocal Music*, ed. R. Charteris (Clifden, 1982)

Sacred Vocal: Have mercy upon me, O God, 5vv; Hear my prayer, O Lord, 5vv; Heu mihi Domine, 5vv; Jerusalem, plantabis vineam, 5vv; Miserere mei, Domine, 5vv; Miserere mei, Domine, 5vv; O Lord, give ear to my complaint, 4vv; Out of the deep have I called unto thee, 5vv; O vos omnes, 5vv; Salve nos, Domine, 5vv; The cause of death is wicked sin, 5vv

Secular Vocal: Ay me, can love and beauty so conspire, 6vv; Daphnis came on a summer's day, 1v b; Shows and nightly revels; Time that leads the fatal round, 1v, lute, b viol; transcr. insts in P. Rosseter: Lesson for Consort (London, 1609); ed. in MB, xl (1977)

INSTRUMENTAL

Editions: *Thomas Lupo: The Four-Part Consort Music*, ed. R. Charteris and J.M. Jennings (Clifden, 1983)

Thomas Lupo: The Two- and Three-Part Consort Music, ed. R. Charteris (Clifden, 1987)

Thomas Lupo: The Six-Part Consort Music, ed. R. Charteris (London, 1993)

Thomas Lupo: The Five-Part Consort Music, ed. R. Charteris, i-ii (London, 1997–8)

24 fantasias, a 3; 4 pavans, a 3; 13 fantasias, a 4; 35 fantasias, a 5 (incl. some wordless Italian madrigals); 12 fantasias, a 6; 2 galliards, ?a 5, inc.; Almand, a 6, inc.; Galliard, set for kbd by B. Cosyn

(5) **Theophilus Lupo** (bur. London, 29 July 1650). English violinist and composer, son of (4) Thomas Lupo (i). He succeeded his father in the court violin band at Christmas 1627 and served until the beginning of the Civil War; a list of the group dated 12 April 1631 shows that he was one of the two 'contratenor' players. There

are 30 consort dances and two dance-like duets apparently by Theophilus in *GB-Ob* Mus.Sch.D.220 and *US-NH* Filmer 3, though some of those attributed just to 'Lupo' or 'T. Lupo' could be by (4) Thomas (i).

PETER HOLMAN

Lupo, Peter. *See* LUPO family.

Lupo, Thomas. *See* LUPO family.

Lupot, Nicolas (*b* Stuttgart, 4 Dec 1758; *d* Paris, 30 Aug 1824). French violin maker of German birth. He is considered the greatest of the French makers, and is often referred to as the French Stradivari. The first violin maker of the family was his grandfather Laurent Lupot (bap. Mirecourt, 11 Aug 1696; *d* Orléans, after 1762). He worked in Plombières (near Epinal) about 1725, then in Lunéville for Stanislas Leczinski's court from 1738 to 1756, and finally in Orléans from 1762 until his death. His eldest son, François (i) (*b* Plombières, 5 July 1725; *d* Paris, 25 Aug 1805), Nicolas' father, left Lunéville to work in Germany as violin maker to the Duke of Württemberg. He settled in Stuttgart, where Nicolas was born, then in Ludwigsburg. In 1768 he returned to France and joined his father in Orléans, where he opened his own workshop and acquired the sobriquet François Lupot d'Orléans.

For a time Nicolas worked with his father, but the son's superiority quickly came to the fore in every department of violin making. From the beginning he determined to learn from Stradivari's work and had made considerable progress by the time he moved to Paris in 1794 (although he returned frequently to Orléans, where he continued to make instruments). The move was due principally to the encouragement of François-Louis Pique, himself a fine maker, only a year older than Lupot but established in Paris since about 1780. The two were in close contact during the last years at Orléans and began to work together, a collaboration which developed when Lupot arrived in Paris. Lupot quickly perfected his models and the style of his workmanship, doubtless inspired by an abundance of Stradivari instruments in the city. In 1798 he opened his own workshop at 24 rue Croix-des-Petits-Champs. Like that of Stradivari, Lupot's career had so far been one of constant, steady improvement. He reached the highest level of his achievement towards 1810, and generally sustained it to the end of his life. In 1813 he was appointed violin maker to the imperial chapel (after 1815 the royal chapel), and in 1816 he became violin maker to the Ecole Royale de Musique.

Although the work of Stradivari was Lupot's guide, he was anything but a slavish copyist. What he did grasp as well as any Stradivari follower was incomparable good taste in workmanship; within this discipline he gave expression to his own admirable ideas, as described by Sibire (1806). His rich orange-red varnish, perfectly transparent, gave the final touch. Occasionally he copied Guarneri 'del Gesù', whose violins were rapidly achieving fame in the first two decades of the 19th century. Lupot's production was almost entirely of violins; violas and cellos are a rarity. The aristocratic tonal qualities of his instruments have always been well appreciated by players. Lupot's most important pupil was Charles-François GAND, who also became his successor through having married a young girl that Lupot considered as his adopted daughter. Another was Sébastien-Philippe Bernardel. Lupot's influence was strongly felt in Paris throughout the 19th century; above all, he created the standard by which the rest of the great French school is judged.

François Lupot (ii) (*b* Orléans, 1775; *d* Paris, 4 Feb 1838) was a younger brother of Nicolas. From 1798 he lived for a while in Nicolas' home in Paris, where he began to make violins and bows. When he married in 1806, he went into business on his own at 18 rue d'Angevilliers. He was celebrated principally as a bow-maker; at times he rivalled François Tourte. Of the many bows branded 'Lupot' on the handle, a considerable number are the work of other contemporaries, but thousands of cheap bows were thus branded in Germany at the end of the 19th century.

Luprano, Filippo de. *See* LURANO, FILIPPO DE.

Lupu, Radu (*b* Galaţi, 30 Nov 1945). Romanian pianist. He began to study the piano when he was six, made his public début when he was 12, and continued his studies with Florica Musicescu (who had taught Lipatti). In 1963 he was awarded a scholarship to the Moscow Conservatory, where his teachers included Heinrich and Stanislav Neuhaus. Despite winning two international piano competitions (the Van Cliburn, 1966, and the Enescu International, 1967), he remained a student in Moscow until 1969. That year he won the Leeds Piano Competition;

shortly afterwards (27 November 1969) he gave his first London recital, with considerable success.

Lupu's favoured composers are the great 19th-century Romantics – Schubert, Schumann, Brahms – as well as Mozart and Beethoven; in 1975 he gave the first performance of André Tchaikowsky's Piano Concerto, which is dedicated to him. His style is lyrical with a notable concern for smooth, rounded tone and a delicate refinement of the lower dynamics. He has been criticized for rhythmic waywardness, for a sometimes mannered bending of the basic pulse; but at its best his playing is distinguished by poetic sensitivity and a quiet, inward-looking emotional intensity. With Szymon Goldberg he recorded, and frequently played in concert, Mozart's piano and violin sonatas. Lupu's solo recordings include works by Schubert (a composer with whom he has a special affinity), Schumann and Brahms.

MAX LOPPERT/R

Lupus (*fl* 1518–30). Composer. His musical style, and the fact that a piece of his was copied in the so-called Medici Codex of 1518 (in *I-Fl*), a manuscript of predominantly French repertory, suggest that he may have been a northerner. Since many of his works appear in Italian sources, he is probably the 'Lupo francese cantore' (called 'fiammengo' in some documents) who was employed by Sigismondo d'Este in Ferrara from June 1518 to the end of April 1519 (Lockwood). Furthermore, he may be identifiable with LUPUS HELLINCK, who became a priest in Rome in April 1518 while in papal employment (Sherr, pp.xi–xii); but although the dates fit well, Hellinck was not French by language or political allegiance, and there are sharp stylistic differences between his and Lupus's music.

Although the title of one of Lupus's masses, *Missa Hercules Dux Ferrariae*, seems to confirm his connection with the Ferrarese court, its *soggetto cavato* is not derived from the title; moreover, the work was published two years before Ercole II d'Este came to power in 1534. Neither does the *soggetto* fit the name of the reigning duke, Alfonso, or Sigismondo. (The publisher Moderne may have added the title.) Another mass, on the *soggetto cavato* 'Carolus Imperator Romanorum Quintus', seems to connect Lupus with Charles V, possibly after his election in June 1519, or certainly after he was crowned Holy Roman Emperor in 1530 by Pope Clement VII. The two masses are technically similar to Josquin's *Missa Hercules Dux Ferrariae*, although written a generation later; they are completely unlike Hellinck's masses.

The motet *O spem non similem*, attributed to Lupus in the Vallicelliana Codex (*I-Rv*), was probably performed at the entry of Marino Grimani, Patriarch of Aquileia, in 1524. In describing Grimani's entry into Aquileia, Marino Sanuto spoke of 'una bellissima laude' performed in his honour by 'the most excellent singers of Venice'. The hypothesis that one of these singers, Pietro Lupato, might be identifiable with Lupus now seems less likely; the motet appears (anonymously) with the text *Regina clementissima* in *I-Pc* A17, dated 1522, suggesting that the text mentioning Marino Grimani is a contrafactum, though neither text fits the music particularly well.

Lupus was a composer of modest talent. His earlier works, such as *Esto nobis Domine* and *In nomine Jesu*, lack rhythmic and melodic direction; the texture is uniformly dense, the modal centres ill-defined and the counterpoint awkward, with frequent harsh dissonances. Other motets, however, such as *Postquam consummati sunt*, *Deus canticum novum* and *In convertendo Dominus*, show marked improvement in compositional skill; they enjoyed considerable success, judging from their appearance in numerous manuscripts and publications. Since Hellinck's works were often published under the name 'Lupus', it is possible that some of the better motets are his. The motet *Ergone conticuit*, set to a poem by Erasmus on the death of Ockeghem, fits stylistically into Lupus's oeuvre, although printed by Susato in 1547 as a work of JOHANNES LUPI.

Lur. (1) A highly distinctive lip-vibrated instrument dating from the late Nordic Bronze Age (it is classified as an aerophone: trumpet). It consists of a conical tube, some 2 to 3 metres in length, made of several sections joined by bands and twisted into the shape of a contorted 'S'. At the speaking end in place of a bell is a bronze disc ornamented with geometric figures. Some examples of the instrument have small metal plates hanging from rings near the mouthpiece; these swing against each other to create a rattle effect. A large number of lurs have been excavated from peat bogs in the vicinity of the Baltic Sea, particularly in Denmark (see illustration) and southern Sweden. Similar instruments have been excavated in Ireland.

Its remarkable record of preservation and the striking appearance of the instrument, together with a certain measure of ethnic motivation, have led to enthusiastic claims for its musical importance which appear in some respects to be exaggerated. The fact that lurs are frequently found in pairs inspired the claim that they played part-music and influenced the beginnings of Western polyphony. This is not convincing, particularly since the phenomenon of ancient brass instruments appearing in pairs is widespread (for example, the Jewish Temple trumpets, the *ḥaṣoṣerot*). Somewhat more plausible are the claims for its musical versatility. These stem from experiments in which modern players using modern mouthpieces have produced all the notes of the chromatic scale. Sachs argued against these claims on the grounds that it is fallacious to equate an ancient instrument's potential with what was actually played on it. He cited the ability of modern string players to play medieval instruments in several positions whereas they were in fact played only in the 1st.

A further area of dispute is the timbre of the instrument, its protagonists attributing a noble, somewhat mellow character to it. However, there is virtually unanimous testimony to the raucous character of other ancient trumpets. There is also the question of whether the lur was primarily a cult or a military instrument, a mellow quality being supposed more appropriate for religion and a strident tone more appropriate for war. Perhaps the instrument was used for both, as was the case with brass instruments of the Mediterranean cultures. There, the raucous quality of trumpets served to strike fear into the enemy and likewise performed an apotropaic function in cult, that is, they warded off unwanted evil spirits during sacrifice. The SISTRUM, a kind of metal rattle, performed the same function on a smaller scale and one cannot but compare it with the rattle-like attachments of the lur.

Lur: one of a pair found at Tellerup, Fyn, c900–700 BCE *(Nationalmuseum, Copenhagen)*

(2) Scandinavian bark and wooden trumpet played by herders, until late in the 19th century, to frighten away wild animals and to round up cattle. *See* NORWAY, §II, 3, and SWEDEN, §II, 2.

JAMES W. McKINNON

Lurano [Luprano, Lorano], **Filippo de** (*b* ?Cremona, *c*1470; *d* after 1520). Italian composer and priest. He is listed as 'clericus Cremonensis' in the records of Cividale del Friuli Cathedral, a fact that calls into question Ambros's claim that he was born in Vatellina or elsewhere in the Tyrol, and Disertori's that he was born at Laurana in Venetian territory. He was resident in Rome during the late 15th and early 16th centuries; he wrote *Quercus juncta columnus est* (RISM 1509^{2}) for the wedding of Marcantonio I Colonna to Lucrezia Gara della Rovere, niece of Pope Julius II, on 2 January 1508. In a Florentine manuscript (*I-Fl* Antinori 158), the text of his *Donna, contra la mia voglia* is preceded by the comment 'this song was the favourite of Duke Valentino' (Cesare Borgia, son of Pope Alexander VI), and this and five others of his pieces in the same manuscript are described as having been brought to Florence from Rome. He is also the most heavily represented composer in a Roman manuscript of about 1501 (*GB-Lbl* Egerton Eg.3051). Lurano left Rome by May 1512, when he appeared as singer at S Maria Assunta in Cividale; he left there by 1515 and is next recorded, in 1519, at Aquileia Cathedral. In 1520 he was succeeded by Jacopo Lurano, probably a relative. Filippo is included among other composers, Italian and north-European, in Filippo Oriolo's poem, *Monte Parnassus*, of about 1520.

Lurano wrote one secular motet, two or perhaps three *laude*, and 35 frottolas, of which two are also ascribed to other composers. All the frottolas except one appeared in Petrucci's prints between 1504 and 1509. The motet, *Quis deus hic? Phoebus*, which appears in a manuscript from Cividale, was probably written while Lurano was there, and is set to a text by the Friulian poet Marc' Antonio Grineo (*b c*1476; *d* between 1544 and 1550). A Latin *lauda*, *Anima Christi*, is also found in the Cividale manuscript. Petrucci's second book of *laude* (1508^{3}) contains one or two *laude* by Lurano: *Ne le tue brazie, o Virgine Maria*, ascribed to 'Filip. de Lurano'; and *Salve, sacrata*, ascribed to 'D. Philipo'. This name, however, could also refer to Don Filippo Lapacino, Mantuan priest and composer, whose works were included in Petrucci's lost tenth book of frottolas.

Lurano was one of the most productive and artful frottolists of the early 16th century. He favoured texts in the form of *barzelletta* or variants of it, setting 27 such poems. He also set four *ode*, one *capitolo*, one *strambotto* and two Latin poems. Among the *barzellette* are three songs intended for carnival in Rome: a *trionfo* of the goddess Fortuna, *Son Fortuna omnipotente* (1505^{4}), and two mascheratas, *Noi l'amazone siamo* and *Da paesi oltramontani* (both in 1509^{2}). The last two contain the typically coarse *doubles entendres* of the carnival-song repertory and appear to represent men masquerading as Roman courtesans.

Lurano often set poems that resemble serenades, such as *Aldi, donna, non dormire* (1505^{4}), or offer complaints against the harshness of a lady, such as *Fammi quanto mal* (1505^{5}). He was also fond of setting pairs of works with complementary textual themes, sometimes as a response to a previous work, as in *Se me è grato el tuo tornare*, perhaps an answer to *Se m'agrava el tuo partire*, and the paired texts of *Donna, contra la mia voglia* /*Donna, questa è la mia voglia*. His *Dissimulare etiam sperasti* sets a portion of Dido's lament from Virgil's *Aeneid*. This is a particularly significant work, with its recitative-like melody and through-composed form. Also indicative of his abilities is the secular motet *Quis deus hic? Phoebus*, a description of the lira-playing Apollo surrounded by the nine muses, over the mock-serious tenor, 'Sancta Maria, ora pro nobis'. As a frottola composer, Lurano ranks with Pesenti and just after Cara and Tromboncino. His frottolas are characterized by carefully constructed melodic lines and a skilful alternation of homorhythmic passages with sections containing brief imitative play.

WILLIAM F. PRIZER

Luscinius [Nachtgall], **Othmar** (*b* Strasbourg, *c*1478–80; *d* Freiburg, 5 Sept 1537). German theorist and composer. He studied from 1494 to 1496 in Heidelberg, later in Leuven and, from 1505, in Vienna. There he took organ lessons from the cathedral organist, Wolfgang Grefinger. Luscinius particularly admired the playing of Hofhaimer, the imperial organist, praising him in his *Musicae institutiones* and discussing his pupils, among them Hans Buchner and Kotter. Luscinius continued his studies (which were not only in music) in many centres in Europe and the Near East, and gave music lectures at Vienna University. In 1510 he met Virdung at the Reichstag in Augsburg. Further journeys took him to Konstanz and Melk. Between 1511 and 1514 he studied Greek and theology in Paris and then returned to Strasbourg, where he was organist at St Thomas from 1510 to 1520. In 1519 he took the degree of Doctor of Canon Law from Padua University. As a result of the Reformation he lost his organist's post and was prevented from obtaining a canonry. In 1523 he was in Augsburg and from 1525 to 1528 he was a preacher at St Moritz there. From 1528 he was a preacher at Freiburg Cathedral. In Freiburg he became friendly with Glarean and Erasmus and stayed with Erasmus for some time. In 1531 he went to live in the Carthusian monastery near Freiburg. Luscinius was one of the best-known humanist scholars in Germany, having written nearly 40 works on various subjects, including two treatises on music. *Musicae institutiones* (Strasbourg, 1515) contains his lectures on music given at Vienna. *Musurgia seu praxis musicae* was finished in 1518 although not printed until 1536. The first part is a free translation of Virdung's *Musica getutscht* (Basle, 1511), but the classification of the instruments is improved. The second part contains teaching in composition and discusses the latest techniques. No music by Luscinius survives apart from three organ works in the Kleber tablature (ed. H.J. Moser, *Frühmeister der deutschen Orgelkunst*, Leipzig, 1930).

KLAUS WOLFGANG NIEMÖLLER

Lush, Ernest (Henry) (*b* Bournemouth, 23 Jan 1908; *d* Harrogate, 12 May 1988). English pianist. He studied with Tobias Matthay and Carl Friedberg and in 1928 became a staff accompanist for the BBC in London. He was senior accompanist until 1966 when he retired to work independently. He performed with many of the world's most celebrated musicians (he was a fine sonata player) as well as appearing as a soloist at the Proms in London; he made a number of tours as accompanist including one with Pierre Fournier in East Asia. Lush did not confine himself to what is generally known as 'serious' music: the BBC series 'Men about Music', in which he and the baritone Owen Brannigan gave programmes of light music, often including folksongs (to which Lush usually improvised the accompaniments), became very popular. A number of his recordings, including recitals with Kathleen Ferrier and Jacqueline du Pré, have been reissued on disc.

RONALD KINLOCH ANDERSON

Lusheng. Mouth organ of various tribal peoples in south-west China and mountainous areas of South-east Asia, notably Miao, Dong, Yao and others in Guizhou, Guangxi and nearby provinces. Chinese sources of the 13th century mention an eight-pipe mouth organ, *lusha*, played by the Yao people. *Lusheng* ('reed mouth organ') is a Chinese name, first used in the 16th century in reference to the mouth organ used in dance celebrations by the Miao people. Tribal names include *geng* (Miao), *gazheng* (Dong) and other cognate terms, *kāēng* being a common South-East Asian term. Some Chinese sources also refer to the instrument as *liusheng* (*liu*: 'six', the usual number of pipes).

The *lusheng* has a relatively narrow wind-chest of carved wood which is wrapped with rattan or other fibre, and a long, straight blow-pipe extending from one end. Passing through the wind-chest (and extending below the bottom) are six bamboo pipes of varying lengths, open at their top ends but (among Chinese types) closed by natural nodes near their bottom ends. Each pipe has a triangular free reed of bamboo or bronze (enclosed within the wind-chest) and a finger-hole (exposed above the wind-chest). On some variants, one pipe has two or three reeds for extra volume. The reed is activated upon closing of its finger-hole and either exhaling or inhaling through the blow-pipe. Tuning is pentatonic in any of several modes (see Yuan, 1986, pp.130–31).

A closely related mouth-organ is the *hulu sheng* ('calabash mouth organ'), which is prevalent among other tribal cultures of south-west China, notably the Yi, Lahu and Lisu in Yunnan province. Local names include *ang* (Yi), *nuo* or *naw* (Lahu). The *hulu sheng* is constructed from a dried calabash gourd (forming both wind-chest and blow-pipe), through which five or more bamboo pipes are inserted. *Hulu sheng* pipes also protrude through the wind-chest, but unlike *lusheng* pipes they are open at their bottoms and sit flush with the bottom of the wind-chest, allowing the right thumb to cover selected holes to obtain alternate pitches.

Hulu sheng wind-chests made entirely of bronze have been found in sites in central Yunnan province dating from around the 5th century BCE (examples are preserved at the Yunnan Provincial Museum, Kunming, and at the British Museum, London). Because these wind-chests are shaped like gourds, it is apparent that gourd mouth organs were used as models and date to an earlier period – making this one of the oldest instrument types in continuous usage in East Asia. *Hulu sheng* type mouth organs played by tribal peoples living in and around Yunnan province have been mentioned in Chinese sources from the 9th century to the present day. In traditional practice, both *lusheng* and *hulu sheng* are used in accompaniment of festival dances (especially those which

are associated with courtship), played by young men while dancing.

ALAN R. THRASHER

Lushier [Lusher], Mr (*fl c*1595–1600). ?English lutenist and composer. Nothing is known of his life. Two pavans and four almains for six- or seven-course lute survive in English manuscripts (*GB-Cu*, *Cfm* and *Lspencer*) ascribed to Lushier/Lusher. A further pavan and two galliards in the same style, ascribed to 'L' (in *GB-Cu*), are probably by the same composer. The music is both melodically and harmonically simple, with some technically brilliant divisions in one of the pavans.

ROBERT SPENCER

Lusikian, Stepan (*b* Yerevan, 31 January 1956). Armenian composer and pianist. He attended the Komitas Conservatory in Yerevan where he studied composition with Sar'ian, with whom he undertook postgraduate work (1975–83), and in 1981 completed studies in the piano faculty with G. Saradzhev. He taught harmony and composition at the Yerevan Conservatory from 1984, later becoming a senior lecturer. From 1992 to 1997 he was deputy Minister of Culture and Sport. He has won various awards in Armenia and the former Soviet Union. His style is based on both Near Eastern and Armenian traditions. His piano compositions, which are similar to early 20th-century works of the region (especially those of Komitas and Tigranian), and his vocal cycles are notable for their transparent texture and linear writing which is both ascetic and fluid. The principle of variation of short motifs and an improvisational manner of development are characteristic of Lusikian; this trait begins with the Cello Sonata (1982). Elements of *maqām* improvisation and allusion to the folk instrument *kemanche* can be observed in other string works. The imagery of the ballet *Tohpurn u mrjun'e* ('The Dragonfly and the Ant') is akin to that of Khachaturian and Prokofiev with its adaptation to children's experiences. He has written much other music for children including stage works and puppet shows.

Lusingando (It.: 'coaxing', 'wheedling', 'caressing'; gerund of *lusingare*, 'to flatter'). An expression mark also found in the adjectival form *lusinghiero* ('seductive', 'flattering').

Lusitano, Manuel Leitão de Avilez. *See* AVILEZ, MANUEL LEITÃO DE.

Lusitano, Vicente [Lusitanus, Vincentius] (*b* ?Olivença [now Olivenza, Spain]; *d* after 1561). Portuguese composer and theorist. His family name is unknown: the surname 'Lusitano' simply means 'Portuguese'. Much of the received knowledge of his life is based on the 18th-century biography of Barbosa Machado: Vicente was born in Olivença, became a priest of the order of St Peter, and taught with great success in Padua and Viterbo. He published a treatise, *Introduttione felicissima*, in Venice in 1561, which was translated into Portuguese by Bernardo da Fonseca and published in Lisbon in 1603. One of Barbosa Machado's sources calls him a *mestizo*. Except for the fact of his priesthood and the printing of his Italian treatise, none of these statements has yet been verified. More can be deduced from his writings and the documentation concerning his dispute with Nicola Vicentino in Rome in 1551.

Lusitano's book of motets, *Liber primus epigramatum*, was dedicated to the young Dinis de Lencastre, son of Dom Afonso de Lencastre, Portuguese ambassador to the Holy See, 1551–7. Lusitano praised Dinis's musical knowledge and implies patronage of some sort; the book bears his coat of arms. The theorist Giovan Tomaso Cimello provided a prefatory epigram, flattering Lusitano as another Orpheus. Cimello at some point was in the service of Marc'Antonio Colonna, to whom Lusitano dedicated his Italian treatise of 1553, calling him 'mio Signore', but not clarifying the relationship.

By 1561 Lusitano had converted to Protestantism and sought a post at the court of Christoph, Duke of Württemberg, at Stuttgart, supported by Pietro Paolo Vergerio, ex-bishop and the duke's counsellor. Though he was paid for the compositions he sent (which probably included the *Beati omnes* in *D-Sl*), Lusitano was not hired. All trace of him is lost after this point.

Lusitano is remembered chiefly for the debate with Nicola Vicentino, which gave rise to the latter's *L'antica musica ridotta alla moderna prattica* (1555) and is reported on there at the end of Book IV, and also to the unpublished treatise of Ghiselin Danckerts, one of the judges. It originated in an argument about a *Regina caeli* performed in the home of Bernardo Acciaioli in Rome: according to Vicentino, Lusitano claimed that the music was purely diatonic; Vicentino maintained that in all contemporary music the chromatic and enharmonic genera were mixed with the diatonic. The debate took place in June 1551 in various stages. Danckerts having been absent at the time of the final encounter, both parties presented their positions in writing, which Vicentino

included in his treatise. Vicentino lost. Danckerts, however, claimed that Vicentino had falsified the report, and that the debate turned on whether composers knew in which genus they were composing, Vicentino denying, Lusitano affirming. (They were arguing at cross-purposes, since Vicentino claimed that the interval of a minor third belonged only to the chromatic genus, that of a major third only to the enharmonic, whereas Lusitano equated the chromatic genus with successive semitones and the enharmonic with quartertones.)

Apart from the last section of the *Introduttione*, Lusitano's treatise is 'very easy and useful', treating very briefly the Guidonian hand, hexachords (including transpositions to A, B, D and E), intervals, psalm intonations, and notation, with longer sections on proportions and counterpoint. A major section is devoted to 'General rules for making imitations on a cantus firmus in two, three, and four voices', followed by advice on composition. At several points Lusitano mentioned a longer 'trattato di musica pratica'. Robert Stevenson plausibly suggested that this was the anonymous Spanish *Tratado de canto de organo* in *F-Pn*. Like the *Introduttione*, it lays particular emphasis on improvised counterpoint.

As a composer Lusitano wrote imitative counterpoint in the manner of Gombert, but with even fewer rests. He followed his own advice to cadence occasionally in other modes, but not to mix *mollis* and *durus* (G Dorian motets have notated A flats, as does a *Regina caeli* that may be the one that sparked the debate). His Iberian heritage is reflected in his use of G sharp. The eight-voice *Inviolata* and *Praeter rerum* are modelled on Josquin's motets; the former uses the same canon (but with different rests between phrases), the latter the same melody and mensuration. The works in the Granada manuscripts attributed to 'Lusitano' (two have a double attribution, Avilés/Lusitano, unless this should be read as Avilés Lusitano) are possibly not his.

BONNIE J. BLACKBURN

Lusse, Christophe de. *See* DELUSSE, CHRISTOPHE.

Lusse, (Charles) de [De-Lusse; Delusse; D.L.] (*b* ?1720–25; *d* after 1774). French composer, flautist and writer on music. The name Charles was supplied by Fétis; contemporary sources identify him by only his last name or by the initials D.L. Following Choron and Fayolle (1810–11) writers have confused his activities with those of the woodwind instrument makers Jacques and Christophe Delusse. Although the composer is designated as 'Le Sr Delusse le fils' in the earliest known reference to him (*Mercure de France*, June 1743), there is no demonstrable connection between him and the other Delusses and no contemporary reference to his activity in instrument making.

According to Gerber, Lusse was a flautist at the Opéra-Comique in about 1760, but neither his claim, nor Fétis's statement that he entered that orchestra in 1758 is confirmed by contemporary sources. He may have been active earlier in Paris as a flautist and flute teacher since he published several works there for that instrument between 1751 and 1757. He also composed vocal music, including a one-act comic opera and numerous songs, and he edited the earliest collection of *romances*, which appeared in 1767. In the 1760s he produced three theoretical works: a flute method first published in late 1760 or early 1761, a proposed reform of solmization syllables using only vowel sounds, and the article 'Musique' for the collection of tables to Diderot and d'Alembert's *Encyclopédie*. He may also have either written or published a dictionary of music, for in 1765 the *Mercure de France* announced that anyone interested in such a work should address himself to M. de Lusse. He is last mentioned in 1774.

Lusse was an important figure of the French flute school, particularly because of his experimentation with innovative techniques. His solo sonatas, all three-movement works, are full of brilliant effects and complex rhythms, dynamics and articulation markings. They exploit a higher range than previous French flute works, and the sixth sonata is the first to call for harmonics and

double-tonguing. An explanation and table of fingerings for harmonics also appear in the collection – the latter more extensive than the one in Lusse's flute method. His trios for flute, violin and cello are the earliest French examples of flute trios without a figured bass part. While the flute largely predominates in them, they are still somewhat conversational in style. Their slow movements possess a remarkable depth of feeling.

Lusse's *L'art de la flûte traversière*, although not a lengthy treatise, has important discussions of ornaments, tonguing and vibrato. Moens-Haenen points out that its treatment of ornamentation and vibrato is similar to that of Geminiani's *The Art of Playing on the Violin* (London, 1751). *L'art de la flûte traversière* also contains an important early example of progressive studies, preludes in 20 different keys and 12 long and difficult caprices or cadenzas 'suitable for the exercise of the embouchure and fingers, that can also be used at the end of concertos'. These are the earliest independent cadenzas in French flute literature, and also mark the beginning of the true flute étude in France. There is also an *Air à la grecque* (ed. R. Rasch, Utrecht, 1984) featuring quarter-tones, for which Lusse supplied a fingering chart. At least one extant copy of the method also has a handwritten description of fingering on a six-keyed flute tipped into it.

WORKS

FLUTE

6 sonates, fl, bc, avec une tablature des sons harmoniques, op.1 (Paris, 1751/*R*)
6 sonates, 2 fl, op.2 (Paris, 1751/*R*, 2/*c*1761)
Les favoris d'Euterpé: [6] trios, fl, vn, vc, op.3 (Paris, 1757; 2/6 trios, 1761)
Recueil de vaudeville, menuets, contredances, et airs detachées, fl/hurdy-gurdy/musette, i (Paris, 1752)

VOCAL

L'amant statue (comic op, 1, Guichard), Paris, Théâtre du Fauxbourg St Laurent, 18 Aug 1759; ariettes, 1–2vv unacc. (Paris, 1759)
Le retour des guerriers, cantatille, S, bc (Paris, 1743)
25 romances in Recueil de romances historiques, tendres et burlesques, tant anciennes que modernes, avec les airs notés, ed. de Lusse, i, 1v (Paris, 1767) [reviewed, before pubn, in *Annonces, affiches et avis divers* (5 Nov 1766)]
Other songs in *Mercure de France* (Feb 1744, March 1746, Feb 1760, Nov 1765, Dec 1765), and in 18th-century anthologies

THEORETICAL WORKS

L'art de la flûte traversière (Paris, *c*1761/*R*, 2/?1763/*R*) [with 28 lessons, 20 preludes, 12 caprices]; 12 caprices, ed. D. Lasocki (London, 1979)
'Lettre sur une nouvelle dénomination des sept degrés successifs de la gamme, où l'on propose de nouveaux caractères propres à les noter', *Mercure de France* (Dec 1765), 173–80 [also pubd separately (Paris, 1766)]
'Musique', *Recueil de planches, sur les sciences, les arts libéraux, et les arts méchaniques, avec leur explication*, vii (Paris, 1769) [accompanies the *Encyclopédie ou dictionnaire raisonné des sciences, des arts, et des métiers*, ed. Diderot and d'Alembert]

JANE M. BOWERS

Lusse, Jacques. *See* DELUSSE, CHRISTOPHE.

Lussy, Mathis (*b* Stans, 8 April 1828; *d* Montreux, 21 Jan 1910). Swiss theorist. He received his first musical training from Alois Businger, the church organist in Stans, and in 1842 he entered the seminary of Saint-Urban to study organ and composition with Leopold Nägeli. Four years later he went to Paris to study medicine but soon abandoned the subject to devote himself exclusively to music. In 1852 he became a piano teacher in the Pipeus convent in Paris and taught there for the next 40 years. He returned to Switzerland in 1902 and spent his last years in Montreux. In 1908 he was made a Chevalier of the Legion d'Honneur for his contributions to music theory and aesthetics.

Between 1863 and 1909 Lussy published five books and several articles on the history of musical notation, the cultivation of musical feeling, and the theory of rhythm and expression. He hoped that the study of expression in performance would become a standard branch of musicology. His last book, *L'anacrouse dans la musique moderne*, is particularly valuable as a historical document as it involves comparative analyses of actual performances by the most important pianists of the late 19th century, namely Hans von Bülow, Anton Rubinstein and Karl Klindworth. Such analyses had no predecessors.

Lussy's theory of musical expression has been cited, along with the works of Spencer and Hanslick, as one of the most important contributions to music psychology and psychological aesthetics in the 19th century. His thesis that the generating causes of expression in performance reside in the musical structure has decidedly modern overtones, and it marks a significant departure from the earlier conceptions, which attributed the source of expression to the inspired soul of the performing artist.

Lussy's theory of rhythm, which is built on the principle of action–repose or tension–relaxation first formulated by Momigny, directly influenced the theories of Jaques-Dalcroze and Solesmes scholars, as well as those of Riemann.

MİNE DOĞANTAN

Lustig, Jacob Wilhelm [Wohlgemuth, Conrad] (*b* Hamburg, 21 Sept 1706; *d* Groningen, 17 May 1796). Dutch theorist, organist and composer, of German descent. His father, also Jacob Wilhelm, was a pupil of J.A. Reincken and was organist at the two Michaelis churches in Hamburg. In 1723 Lustig became organist at the Lutheran Filial church there; his teachers included Mattheson, Telemann and Kuntzen. He heard many virtuoso organists, including (in 1720) J.S. Bach, and he was a friend of the organ builder A.A. Hinsz. In 1728 he was appointed organist at the Martinikerk in Groningen, in succession to Havingha, and he remained there until his death at the age of 89. In 1732 or 1734 – Lustig gave different dates in the two sources of information on his life, his autobiography under the pseudonym Conrad Wohlgemuth in Marpurg's *Historisch-kritische Beyträge zur Aufname der Musik*, and a commentary in his Dutch translation of Burney's travels – he received a grant from his church to study in London. He married Alijne Reckers in 1736 and acquired Dutch nationality in 1743. Although in his autobiography he stated that he was perfectly happy with his post and would never leave Groningen, he applied for the post of organist at the Nieuwe Kerk in The Hague in 1741. Among his acquaintances were Burney, whom he met in 1772 and whom he presented with a list of his compositions, and G.J. Vogler, who visited Groningen in March 1786 and played the organ there.

As far as can be judged from his few surviving works Lustig was a composer of little originality or importance. His sonatas, despite French titles to individual movements, show exclusively Italian and German stylistic influences; there are occasionally striking harmonic progressions, but usually suggesting awkwardness rather than invention. In his lifetime he was highly regarded as an organist, organ examiner and teacher. He was also important as a writer on music. He translated much current literature into Dutch, notably works by Quantz, Werckmeister, Marpurg, Pasquali and Burney. His own writings provide much information on his contemporaries and musical life in the Netherlands, but are marred by his conceit, his jealous remarks on his more talented colleagues like Locatelli and Hurlebusch and his spiteful comments on publishers who refused his works. His books include passages taken, with acknowledgment, from the writings of Mattheson.

WORKS

6 sonates, hpd, op.1 (Amsterdam, 1735); partly repr. with other pieces (Paris, 1742/*R* in Musica Repartita, xi (Utrecht, 1987); ed. L. Cerutti (Padua, 1994))
Vervolg van 'tet musikaels tydverdryf, 10 secular and 20 sacred songs, 1v, bc, in A. Mahaut, *Maendelyks musikaels tydverdryf* (Amsterdam, 1752/*R*1979)
V Geestryke zang- en muzyk-stukjes (?Amsterdam, 1754–5), lost
Other compositions, all lost, cited in Commentary

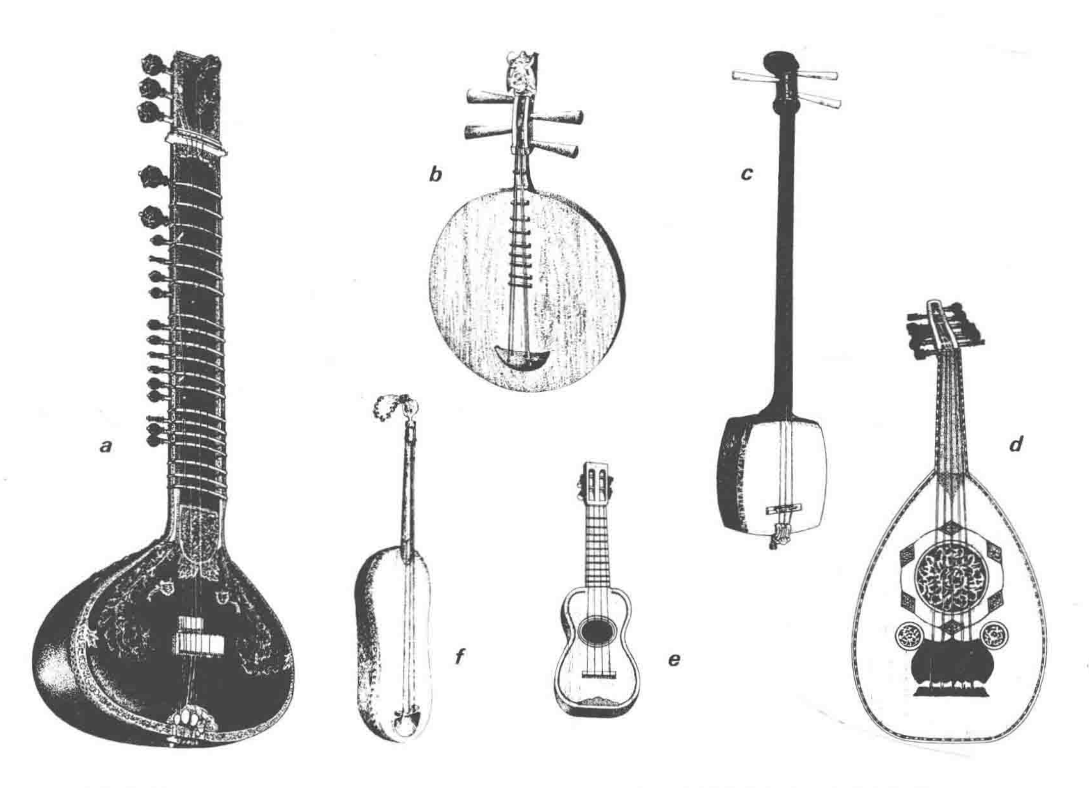
AREND KOOLE/PAUL VAN REIJEN



Lute (Arab. *'ūd*; Fr. *luth*; Ger. *Laute*; It. *lauto, leuto, liuto*; Sp. *laúd*). A plucked chordophone, made of wood, of Middle Eastern origin (*see* 'UD) which flourished throughout Europe from medieval times to the 18th century. Broader, generic uses of the term are discussed in §1.

1. The generic term. 2. Ancient lutes. 3. Structure of the Western lute. 4. History. 5. Tunings. 6. Technique. 7. Ornamentation. 8. Repertory: (i) Italy (ii) Germany, Bohemia and Austria (iii) France (iv) The Netherlands, Spain and eastern Europe (v) England.

1. THE GENERIC TERM. In the Hornbostel-Sachs classification system (Sachs and Hornbostel, A1914) the term 'lute' covers those 'composite chordophones' – string instruments in which a string bearer and a resonator are 'organically united' and cannot be separated without destroying the instrument – in which the plane of the string runs parallel with the soundtable (figs.1 and 2). This definition excludes harps and zithers but includes pluriarcs (or bow lutes) (*see* GABON, fig.2), lyres of various sorts and 'handle lutes' proper. The following excerpt from Hornbostel and Sachs (from the *GSJ* translation, with minor alterations) shows the classification of handle lutes (for their complete classification of lute types *see* CHORDOPHONE):

321.3 *Handle lutes*: the string bearer is a plain handle; subsidiary necks, as e.g. in the Indian *prasārinī vīṇā* are disregarded, as are also lutes with strings distributed over several necks, like the *harpolyre*, and those like the lyre-guitars, in which the yoke is merely ornamental
321.31 *Spike lutes*: the handle passes diametrically through the resonator
321.311 *Spike bowl lutes*: the resonator consists of a natural or carved-out bowl – found in Persia [now Iran], India, Indonesia
321.312 *Spike box lutes or spike guitars*: the resonator is built up from wood – found in Egypt (rabāb)
321.313 *Spike tube lutes*: the handle passes diametrically through the walls of a tube – found in China, Indochina [now Vietnam]
321.32 *Necked lutes*: the handle is attached to or carved from the resonator, like a neck
321.321 *Necked bowl lutes* (mandolin, theorbo, balalaika)
321.322 *Necked box lutes or necked guitars*: (violin, viol, guitar) NB a lute whose body is built up in the shape of a bowl is classified as a bowl lute
321.33 *Tanged lutes*: the handle ends within the body resonator

Common usage also excludes bowed instruments (such as the violin). However, the Hornbostel-Sachs classification provides suffixes for use with any division of the class of chordophones to indicate the method of sounding; thus, for example, a violin if played with a bow is classified as a bowed lute.

1. Examples of plucked lutes: (a) sitār (India); (b) yüeh-ch'in (China); (c) shamisen (Japan); (d) 'ūd (Syria); (e) ukulele; (f) gurmi (Niger)

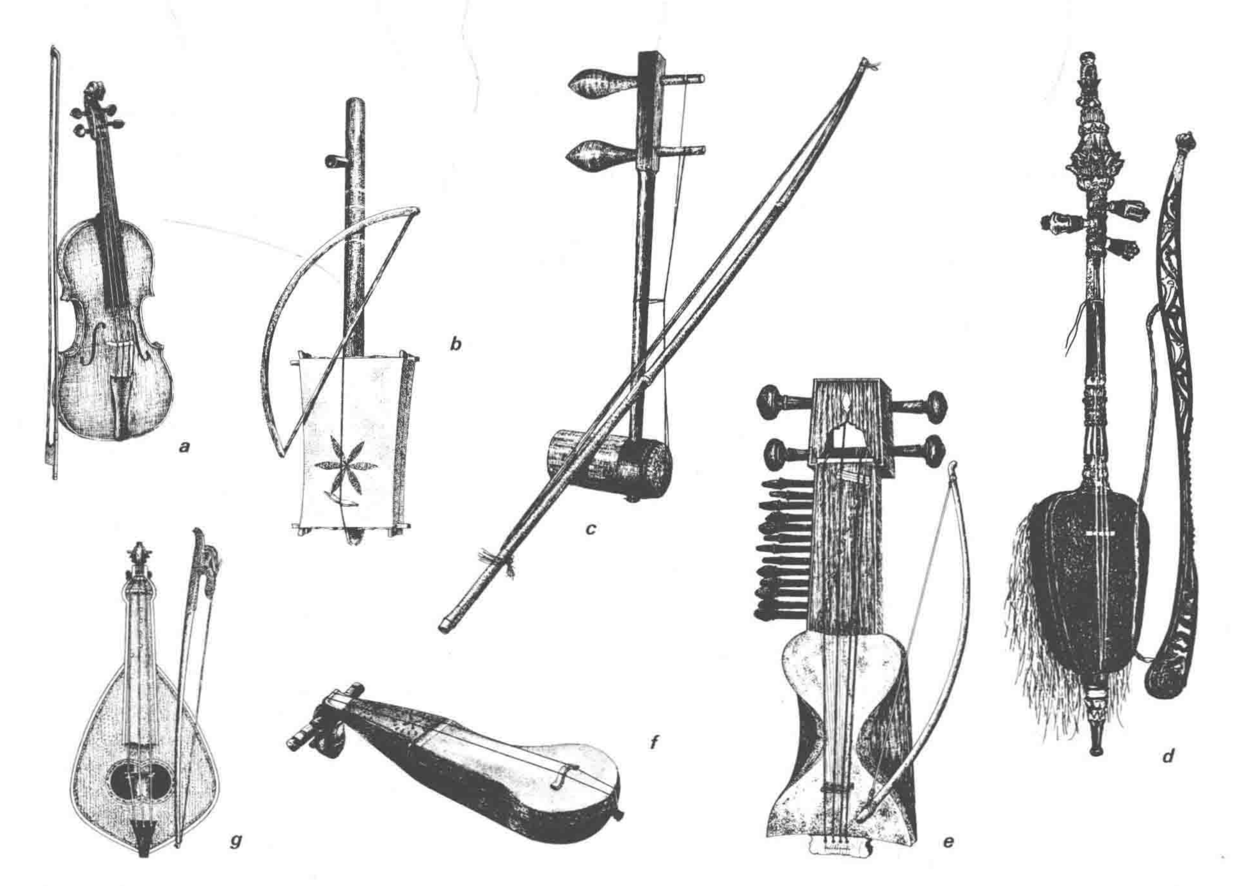
Spike lutes and necked lutes differ from each other by the manner in which neck and resonator are assembled. Fig.3 illustrates possibilities of assembly as found in a series of instruments of the lute family (played with a bow) from the Indonesian island of Sulawesi. If the neck clearly passes through the resonator, as it does in the first four examples, the label 'spiked lute' applies. But in six cases the handle is 'attached', and in this sense the instruments are 'necked lutes'. However, the examples show that there are several transitional forms to which neither label applies well; hence a third category has been added to the Hornbostel-Sachs classification above, under the code 321.33, for instruments in which, as Hornbostel himself described it, 'the handle ends within the body'.

Sachs ascribed the earliest types to a period from the 4th to the 2nd millennium BCE, basing his conclusion on cultural geography. Seen in the perspective of human development, lutes are in any event a comparatively late invention. Because the use of a bow to play string instruments is even more recent – the earliest documentation dates from around the end of the 1st millennium CE – the discussion of ancient lutes in §2 deals exclusively with plucked instruments.

2. ANCIENT LUTES. Two types of ancient lute are clearly distinguishable: the earlier long-necked lute and the short-necked lute. There is a wide range of difference within each type, but the most common features of the long-necked lute are an unfretted, rod-like neck and a small oval or almond-shaped body, which before the advent of wood construction was fashioned from a gourd or tortoise shell. In many early examples where the table is of hide, the neck or spike is attached to it by piercing it a number of times in the manner of stitching. The strings, usually two, are attached at the lower end of the spike in varying ways and are bound at the top by ligatures from which hang decorative tassels. Pegs were not used until comparatively late in the instrument's history.

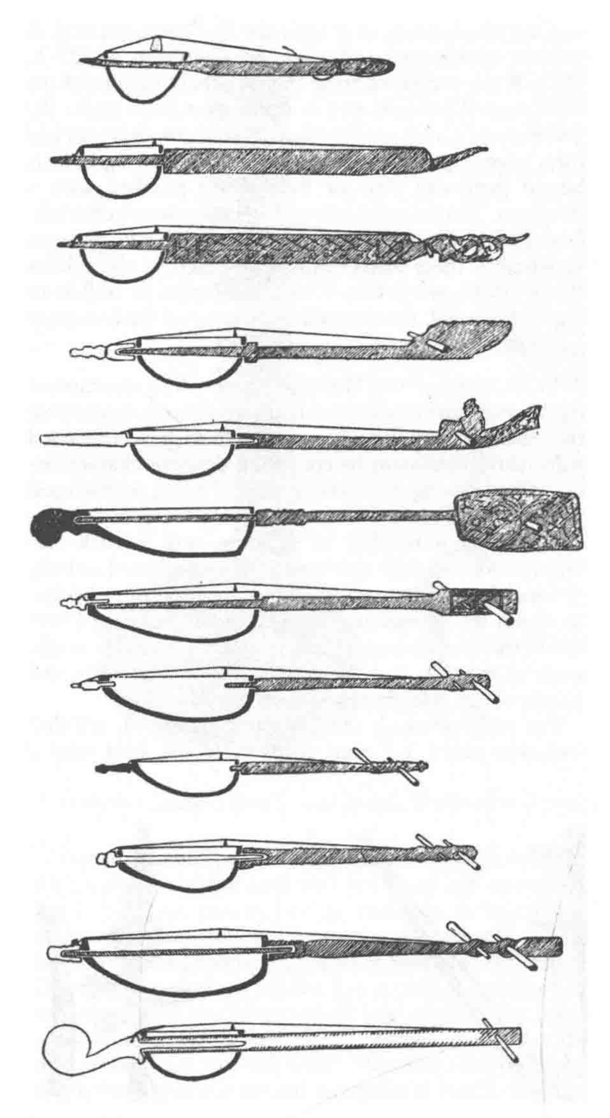
The long-necked lute is now thought (by Turnbull and Picken, for example) to have originated among the West Semites of Syria. Turnbull (A1972) has argued convincingly for its earliest appearance being that on two cylinder seals (fig.4*a*) of the Akkadian period (*c*2370–2110 BCE); on one the lute is in the hands of a crouching male who plays while a birdman is brought before a seated god. In contrast to the draped female harpists, the lutenists of early Mesopotamia are men, sometimes shown naked or with animals. None of these instruments has survived, but the lute's popularity is attested by many objects of the Babylonian period. The Louvre possesses a Babylonian boundary stone, found at Susa, which shows bearded men with bows on their backs playing the lute in the company of such animals as the lion, panther, antelope, horse, sheep, ox, and an ostrich. In the the early 2nd millennium BCE the lute is also attested for the Hittite Old Kingdom: a sherd from Alishar Höyük has preserved the end of a neck with two strings hanging from it.

The lute first appeared in Egypt as a result of Hyksos influence, which opened the country to Western Asiatic ideas. In the New Kingdom (1550–1070 BCE) the long-necked lute was often represented in banquet scenes, played either by men or women. The two main types of instrument, with round (usually a tortoise shell) or oval soundbox, appear in a scene now at the British Museum showing details of the frets and soundholes as well as the plectrum. The earliest Egyptian evidence of the lute to survive is a soundbox now in the Metropolitan Museum,



New York, and there is a well-preserved instrument from the Theban tomb of the singer Ḥarmose in the Cairo Museum (Dynasty 18, 1550–1320). The lute had a function in ritual processions such as those depicted in the Luxor temple at the festival of Opet, when a number of players performed together. It appeared more often, though, in the chamber groups that featured at court functions and official banquets. The end of the neck is sometimes carved with the head of a goose or falcon. This probably had religious significance, as is clearly the case when a Hathor head is carved. The dwarf-god Bes, himself probably of Asiatic origin, is an adept at the lute, and satirical scenes show it in the hands of a crocodile.

Greco-Roman lutes (*see* PANDOURA), which are depicted in a number of Hellenistic sculptures and on late Roman sarcophagi, are comparatively rare. They appear to have at least three strings, plucked with the fingers, and a thick unfretted neck. (The evidence indicating this last feature, however, may be influenced by the sculpture medium.) One depiction, a terracotta in the Louvre (see fig.4*c*), shows the body tapering to form the neck in the manner of the short-necked lute. The surviving representations from Byzantium, most notably a 5th-century mosaic from the former imperial palace of Istanbul and a 6th-century mosaic from a church near Shahhat, Libya, show lutes of the pandoura type.



The short-necked lute, which is characterized by a wooden body tapering off to form the neck and fingerboard, probably also originated in Asia. There are only rare representations of it until the first centuries BCE. A number of statuettes and reliefs (see Geiringer, A1927–8, pls.1–3) are preserved from the Gandhara culture of the time, named from an area in north-west India under the influence of Greek civilization; these show short-necked lutes with a pear-shaped body, a frontal string-holder, lateral pegs and four or five strings plucked with a plectrum. The Sassanid lute or *barbat*, as shown on a 6th-century silver cup from Kalar Dasht, was of this type. Apparently these instruments are related to those lutes that spread eastwards to China and Japan, as well as to the Arabian *'ūd*, the immediate ancestor of the European classical lute.

3. STRUCTURE OF THE WESTERN LUTE. The structure of the Western lute evolved gradually away from its ancestor the Arabian *'ūd*, though some features have remained sufficiently consistent to constitute defining characteristics. Chief among these are: a vaulted back, pear-shaped in outline and more or less semicircular in cross-section, made up of a number of separate ribs; a neck and fingerboard tied with gut frets; a flat soundboard or belly in which is carved an ornate soundhole or 'rose'; a bridge, to which the strings are attached, glued near the lower end of the soundboard; a pegbox, usually at nearly a right angle to the neck, with tuning-pegs inserted laterally; and strings of gut, usually arranged in paired courses.

The ribs, of which the body is constructed, are thin (typically about 1·5 mm) strips of wood, bent over a

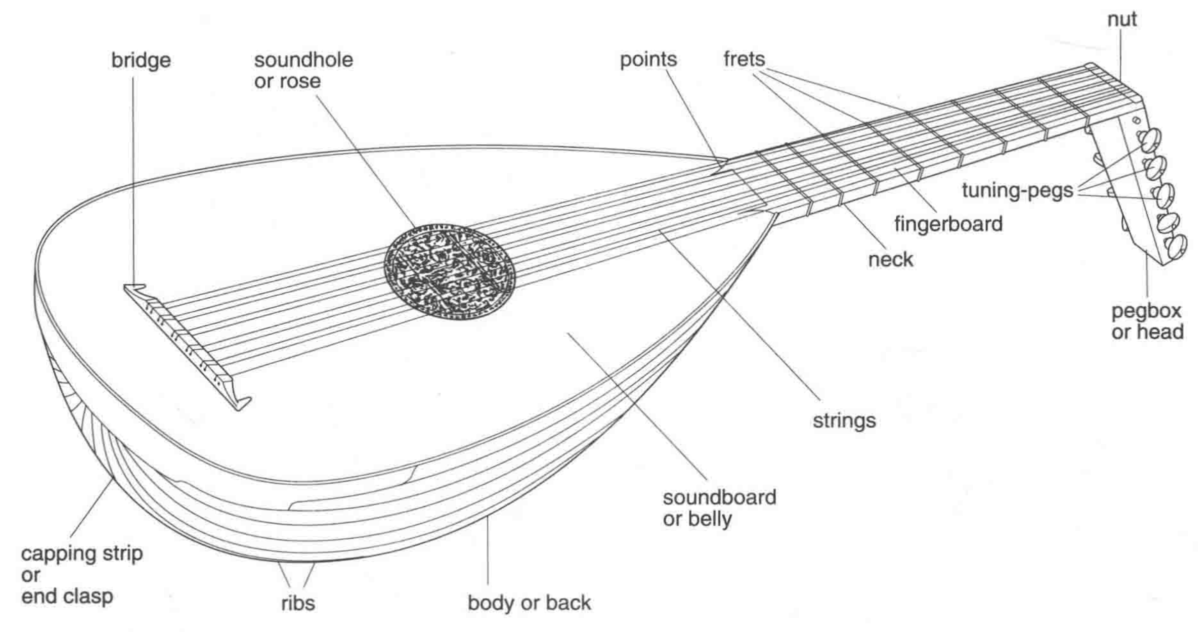
2. *Examples of bowed lutes: (a) violin; (b) rabāba (Syria); (c) ching-hu (China); (d) rebab tiga tali (West Malaysia); (e) sāraṅgī (India); (f) rebab (North Africa); (g) lira (Crete)*

3. Bowed lutes from the Indonesian island of Sulawesi, in cross-section, showing the varying ways in which neck and resonator are assembled

mould and glued together edge to edge to form a symmetrical shell. Although the overall sizes of lutes vary considerably, there is much less variation in the thicknesses of their constituent parts, and even very large lutes have ribs of less than 2 mm. The glue joints between the ribs are reinforced inside with narrow strips of paper or parchment. Many surviving lutes also have five or six strips of, usually, parchment glued round inside the bowl across the line of the ribs. The number of ribs varies according to date and style from only seven to up to 65, but it is always an odd number because lute backs are built outwards from a single central rib. Many kinds of wood, even sometimes ivory, have been used for the back. Maple and yew were the favoured local woods but exotic woods from South America and East Asia, such as rosewood, kingwood and ebony, were used as they became available in the 16th century. The extent of their use by 1566 is revealed in the inventory of Raimund Fugger (see Smith, B1980). At the lower end, where these ribs taper together, they are reinforced internally with a strip of softwood bent to fit, and externally with a capping strip, usually of the same material as the ribs. At the other end the ribs are glued to a block, often of softwood, to which the neck is attached. In most pictures of medieval lutes up to about 1500, as in the early *'ūd*, the ribs are shown as flowing in a smooth curve into the line of the neck and in these cases the end of the neck itself, suitably rebated, may have formed the block to which the ribs were glued. However, by 1360 there are already some pictures showing lutes with a sharp angle between neck and body, implying that the separate block, which is universally present in surviving lutes, was not unknown. The overlap of these two forms spanned at least 200 years; both forms are depicted in *The Last Judgement* by Hieronymus Bosch (*c*1500, Vienna Academy). In the later two-part construction the joint is a simple glued butt joint, secured with one or more nails driven through the block into the end-grain of the neck. This simple joint proved adequate during the remainder of the lute's history.

Most surviving lutes from the early 16th century have been re-necked in later styles but iconographical sources reveal that early necks appear most often to have been made of a single piece of hardwood such as sycamore or maple to match the body. In later and surviving lutes after about 1580, the neck is most often veneered in a decorative hardwood, often ebony, sometimes striped or inlaid with ivory, on a core of sycamore or other common hardwood. At first, throughout the medieval period and into the Renaissance, necks were semicircular or deeper in cross-section. As the number of courses increased through the 16th and 17th centuries, the necks became correspondingly wider, necessitating a change of left-hand position to enable stretches across to the bass strings. This meant that a thinner neck was more comfortable. Baron (C1727) commented that Johann Christian Hoffmann (1683–1750) made the necks of his lutes to fit the hand of their owner, unlike his father Martin Hoffmann (1653–1719), who made his necks too thick.

Separate fingerboards are often not very apparent in pictures of medieval lutes, leading to the supposition that they were either made of boxwood or simply constituted the flat top surface of the neck. Sometimes when there is a marked change of colour between the 'fingerboard' and the soundboard, the join occurs so far down the soundboard as to be beyond any possible neck block; a separate fingerboard is therefore structurally impossible. Instead, the change of colour must result from a protective coat of something like varnish. Surviving lutes from the 1580s onwards almost universally have separate ebony fingerboards set flush with the soundboard and, after about 1600, usually with separate 'points' decorating the joint between the fingerboard and soundboard (fig.5). The lutes of Tielke in the 18th century often had multiple 'points' (see G. Hellwig, B1980). Medieval and Renaissance lute fingerboards were usually flat, even the wide chitarrone and theorbo fingerboards, but from about 1700 makers started to give a curve to their fingerboards, helping the lie of the frets and making fingering easier.



At the back of the top end of the neck a rebate is cut out to form a housing for the pegbox. This same design of joint, with or without a reinforcing nail into the end-grain of the neck, was used throughout the history of the lute, as was the basic form of the pegbox: a straight-sided

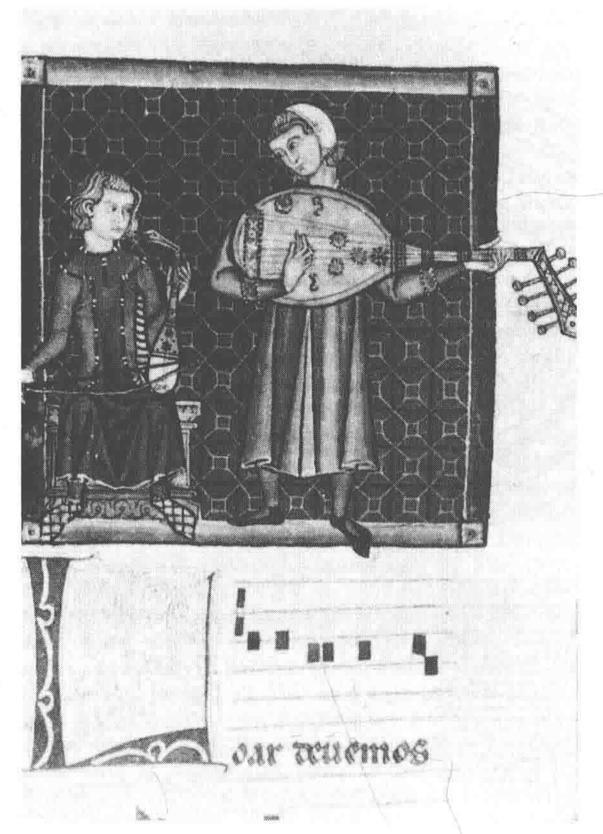
box, closed at the back, open at the front and tapering slightly in both width and depth. However, after about 1595 various branches of the lute family also developed different and characteristic pegbox forms in order to accommodate the longer bass strings needed to extend the range of the lute downwards. Slender tapering hardwood tuning-pegs were inserted from the sides. Medieval pegs appear often to have been made of boxwood, but later, in the 17th and 18th centuries, fruitwood such as plum seems to have been a preferred material, though these were often stained black.

The soundboard is a flat straight-grained softwood plate, nowadays mostly thought of as *Picea abies* or *Picea excelsa* (though historically the types of wood used may have included species of *Pinus* and *Abies*) into which is carved an ornamental rose soundhole, whose pattern often shows decidedly Arabic influence (see Wells, D1981). However, it is noticeable that iconography does not support a continuous tradition of rose design from the Arabic *'ūd*; most medieval pictures of lutes feature gothic designs, and the frequency of Arabic patterns in the later surviving lutes may reflect rather the contemporary interest in such designs by artists such as Leonardo da Vinci and Dürer. The soundboard is often made from the two halves joined along the centre line, but on larger instruments several pieces may be used. Most surviving lute soundboards are quite thin, often about 1·5 mm. However, there is some support for the view that the very earliest soundboards, dating from about 1540, may have been rather thicker, and that they were made progressively thinner as the number of the supporting bars was increased (see Nurse, D1986). Early lutes from before the 1590s usually had no edging to the soundboard. After that, often an ebony or hardwood strip was rebated into half

5. Features of the Western 16-century lute



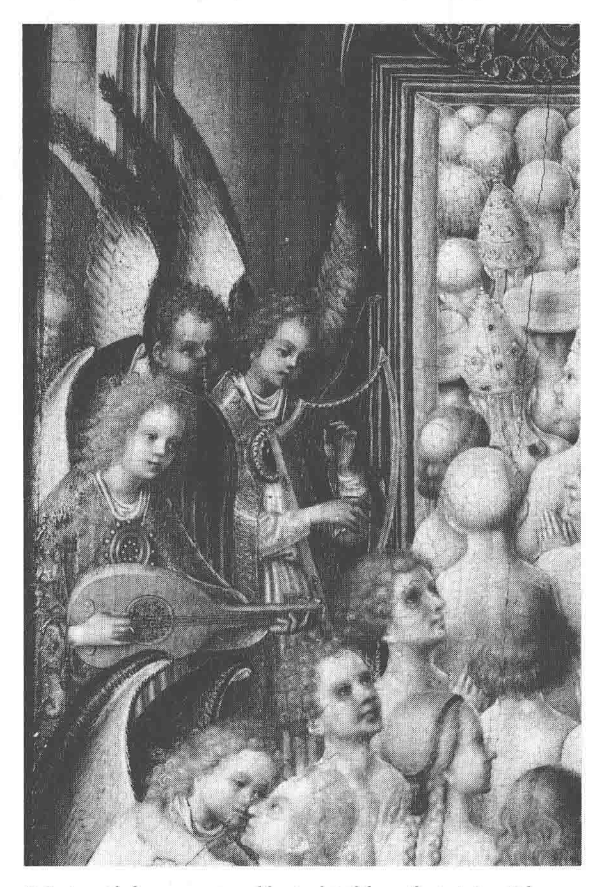
the depth of the soundboard edge as a protective measure. Later still, when the fashion for re-using old soundboards was in sway (see Lowe, B1976), a 'lace' of parchment or cloth with silver threads was often used to wrap the edge, possibly to cover pre-existing wear.

Bridge designs went through a slow evolution, particularly in the shape of the decorative 'ears' which terminate both ends, but were consistently made of a light hardwood such as pear, plum or walnut, sometimes stained black, and were glued directly to the surface of the soundboard. Their cross-sectional design was very cleverly arranged to minimize stress at the junction with the thin and flexible soundboard. Holes drilled through the bridge took the strings, which were tied so that they were supported by a loop of the same string rather than by a saddle as in the modern guitar. This has a marked effect on the tone of the instrument, and contributes to the sweetness of the lute's sound.

The tension of the strings, because they are pulling directly on the soundboard, tends to cause it to distort. This is resisted by a number of transverse bars of the same wood as the soundboard, glued on edge across its underside. These bars, besides supporting the soundboard, have an important effect on the sound quality. By dividing the soundboard into a number of sections, each with a relatively high resonant frequency, they cause it to reinforce the upper harmonics produced by a string rather than its fundamental tone. This is matched by the strings themselves, which are quite thin compared with those of a modern guitar; a thin string tuned to a certain note produces more high harmonics than a thicker string tuned to the same note. Thus the whole acoustical system of the lute is designed to give a characteristically clear, almost nasal, sound (*see also* ACOUSTICS, §II, 8).

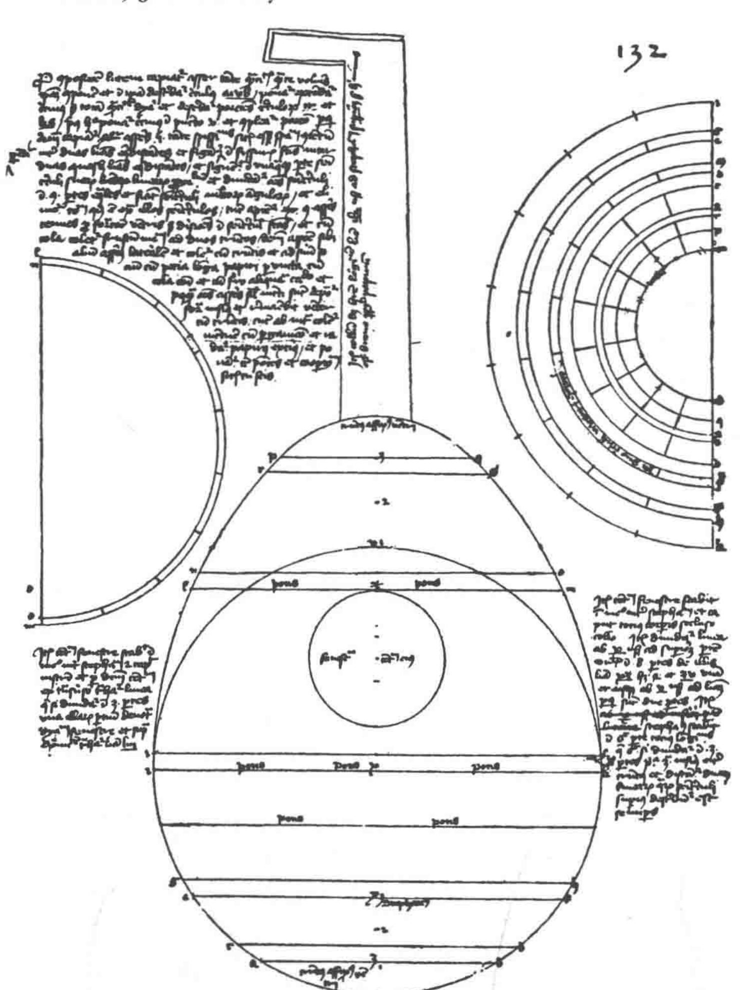
4. HISTORY. The European lute derives both in name and form from the Arab instrument known as the 'ŪD, which means literally 'the wood' (either because it had a soundboard of wood as distinct from a parchment skin stretched over the body, or because the body itself was built up from wooden strips rather than made from a hollow gourd). The Arab *'ūd* was introduced into Europe by the Moors during their conquest and occupation of Spain (711–1492). Pictorial evidence shows Moorish *'ūd* players, and 9th- and 10th-century accounts tell of visits of famous players such as Ziryāb to the court of the Andalusian emir 'Abd al-Raḥmān II (822–52). The *'ūd* was not confined to Muslims, however, as is shown by illustrations to the *Cantigas de Santa María* of Alfonso el Sabio (1221–84) which include players in distinctive Christian costume (fig.6). However, from pictorial and written evidence it is clear that by 1350 what we must now call lutes, since there is no longer any connection with Arab musicians, had spread very widely throughout Europe, even though trading and cultural links with Moorish Spain were not well developed. We need to look elsewhere for a route that would lead to the eventual domination of European lute making by numerous German families who came originally from around the Lech valley region and Bavaria. Bletschacher (B1978) has argued that this was due largely to the royal visits of Friedrich II with his magnificent Moorish Sicilian retinue to the towns in this valley between 1218 and 1237. The valley was a main north–south trading route across the Alps, with the necessary raw materials growing there in abundance, so it would have been a natural focus for any such development to occur, even more so following the Venetians' capture of Constantinople in 1204 which so greatly increased their trading activities with the Near East. The *'ūd* is still in use although it no longer has frets. Over the centuries it has undergone structural changes analogous to those of the lute, and thus differs from both the original *'ūd* and the medieval lute.

As no lutes from before the 16th century have survived, information must be gathered from pictures, sculpture and written descriptions. These indicate that the lute has usually had its strings in pairs, and that at first there were only four such 'courses' (fig.7). From the start, lutes were made in widely different sizes, and therefore of different



6. *Lute ('ūd) with nine strings, and rabāb: miniature from the 'Cantigas de Santa María', late 13th century (E-E b.I.2, f.162r)*

pitches. Both pictorial and written evidence point to the use of different sized lutes for treble and ground duet performance (see Polk, F1992). During the 15th century a fifth course was added. Masaccio depicted two five-course lutes in his altarpiece, *Virgin and Child* (1426; now in the National Gallery, London). Later, in his *De inventione et usu musicae* (*c*1481–3), Tinctoris mentioned a sixth course and there are even tablatures from this period calling for a seven-course lute, though no contemporaneous pictures show one.



The earliest extant account of structural details for the European lute is in a manuscript of about 1440 written by Henri Arnaut de Zwolle (see Harwood, D1960). Arnaut described both the lute itself and the mould on which it was built, combining the two in the same diagram (fig.8). His design was unmeasured but instead was worked out in terms of geometrical proportion, including the positions of bridge, soundhole and three transverse bars. Almost 200 years later, Mersenne (1636) described the design and construction of a lute by remarkably similar methods. By this time the number of soundboard bars had doubled, but the placing of three of them, as well as that of the soundhole and bridge, corresponds with that given by Arnaut. There can be no doubt that there was a well-established tradition of instrument design by geometrical methods, going back to the '*ūd* at least as far as the 9th and 10th centuries (see Bouterse, D1979). It is perhaps significant that a portrait (1562) of the lute maker Gaspar Tieffenbrucker surrounded by his lutes and other instruments shows him holding a pair of dividers. However, when Arnaut's design is compared to lutes shown in most paintings of the period, it is in fact rather different, being oddly rounded at the top of the body. The very long neck he specifies is almost never shown. This suggests that, as an enquiring scholar, he may have been given the general principles of design by the lute maker(s) he consulted, but not the exact relationships which determine the precise shape and which may have been regarded as a craft secret.

Medieval lutes usually had two circular roses, one large and more or less halfway between the bridge and the neck, as specified by Arnaut, the other much smaller and higher up the body close to the fingerboard. The large rose was occasionally of the ornate 'sunken' variety, often with designs similar to some gothic cathedral windows. This may have been intentional, for Arnaut calls the rose in his drawing 'Fenestrum'. Around 1480 there was even a brief fashion for the upper rose to be in the form of a lancet window, and interestingly just such a rose has survived in the clavicytherium now in the RCM, London, which has been dated to about 1480 (see E. Wells: 'The London Clavicytherium', *EMc*, vi, 1978, pp.568–71).

The '*ūd* was, and still is, played with a plectrum, and at first the same method was used for the lute (see figs.4 and 5). With this technique it was probably mainly a melodic instrument, playing a single line of music, albeit highly ornate, with perhaps strummed chords at important points. However, some of the very early plectra are

7. *Lute with four courses and harp: detail from the painting 'The Last Judgment' by Stefan Lochner, fl 1442–51 (Wallraf-Richartz-Museum, Cologne); note the plectrum between the first and second fingers of the right hand, which is parallel to the strings*

8. Henri Arnaut de Zwolle's diagrams (c1440) for the construction of a lute (F-Pn lat.7295, f.132r)

shown as large and solid looking, implying that the lute may also have been used as a percussive rhythm instrument rather like the Romanian *cobză*, which closely resembles the very early medieval lute, especially in the wide spacing of the strings at the bridge and the shortness of the steeply tapering neck (see Lloyd, B1960). This may explain the early drone tunings (see §5 below).

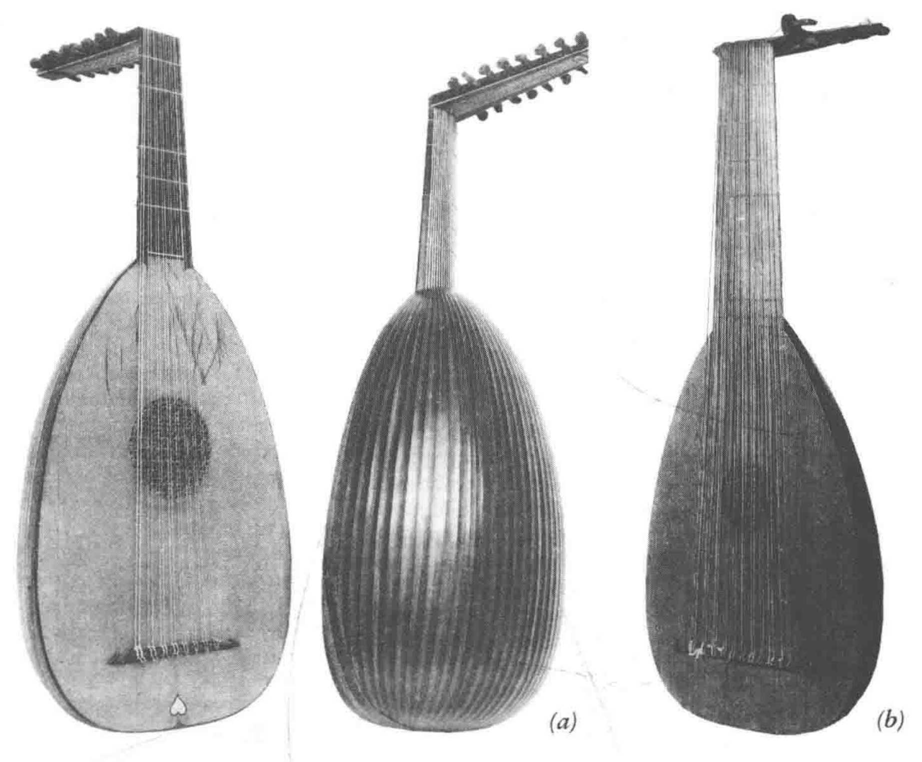
During the second half of the 15th century, there was a change to playing with the fingertips, though, as Page (B1981) pointed out, the two methods continued for some time side by side. Tinctoris (*c*1481–3) wrote of holding the lute 'while the strings are struck by the right hand either with the fingers or with a plectrum', but did not imply that the use of the fingers was a novelty. However, the change was very significant for the lute's future development, for it allowed the playing of several parts at once, and meant that the huge repertory of vocal part music both sacred and secular became available to lute players. This function was made easier by the invention about this time of special systems of notation known as tablature, into which much of this repertory was transcribed (intabulated). There were three main kinds of tablature for the lute, developed in Germany, France and Italy respectively. A fourth early system, 'Intavolatura alla Napolitana', was also used from time to time. Of the four main types the French may have been the earliest. The German one was probably written during the lifetime of Conrad Paumann (*c*1410–1473), the supposed inventor of the system. Although Tinctoris had mentioned a six-course lute, these first tablatures, and indeed the very names by which the strings of the instrument were known, suggest five courses as still the most usual number at this time.

By about 1500 a sixth course was commonly in use, which extended the range of the open strings by another 4th to two octaves. This may have been enabled by improvements in string making. Gut was used for all the strings and it was usual on the two or three lowest courses to set one of the pair with a thin string tuned an octave higher, to lend some brilliance to the tone of its thick neighbour.

By 1500 the first written records confirm the existence of several lute-making families in and around Füssen in the Lech valley. Most of the famous names of 16th- and 17th-century lute making seem to have originated from around this small area of southern Germany. By 1562 the Füssen makers were sufficiently well established to form a guild with elaborate regulations which have survived (see Bletschacher, B1978, and Layer, B1978). A careful reading of these regulations reveals how much they were predicated on the idea of export. They also show an organized tendency to keep the trade within individual

families, which resulted in much intermarriage. This was a powerful force for continuity which clearly lasted for centuries. However, the number of masters who could set up a workshop in the town was limited to 20, so there was a built-in pressure to emigrate. It was also precisely this area which was devastated first by the Peasants' Revolt of 1525, the war against the Schmalkaldic League (1546–55), and finally by the Thirty Years War which killed more than half the population of central Europe. It is hardly surprising that lute makers, who already had international connections, moved away from the area in such numbers.

Many settled in northern Italy, no doubt attracted by the country's wealth and fashion but also perhaps by the access to exotic woods imported via Venice. The tradition of intermarriage meant that they remained together in colonies and did not become much integrated into Italian society. Luca Maler (*see* MALER) was active in Bologna from about 1503; by 1530 he was a property owner of considerable substance and had built up an almost industrial scale workshop employing mostly German craftsmen (see Pasqual and Ragazzi, B1998). The inventory compiled at his death in 1552 lists about 1100 finished lutes and more than 1300 soundboards ready for use; his firm continued trading until 1613. Among several other lute makers in Bologna were MARX UNVERDORBEN (briefly) and HANS FREI. The main characteristic of their lutes is a long narrow body of nine or 11 broad ribs with rather straight shoulders and fairly round at the base. This form is remarkably close to that proposed by Bouterse (D1979) in his interpretation of Persian and Arabic manuscripts of the 14th century. The chief difference is that these Middle Eastern descriptions, like Arnaut's, indicate a semicircular cross-section, whereas the instruments of Maler and Frei are somewhat 'more square'. Often made from sycamore or ash, they remained highly prized as long as the lute was in use, but became increasingly rare as time went on. No unaltered example is known to have survived, for their prestige was such that they were adapted (sometimes more than once) to keep abreast of new fashions. They have all been fitted with replacement necks to carry more strings; sometimes the vaulted back is the only original part remaining (see Downing, B1978).

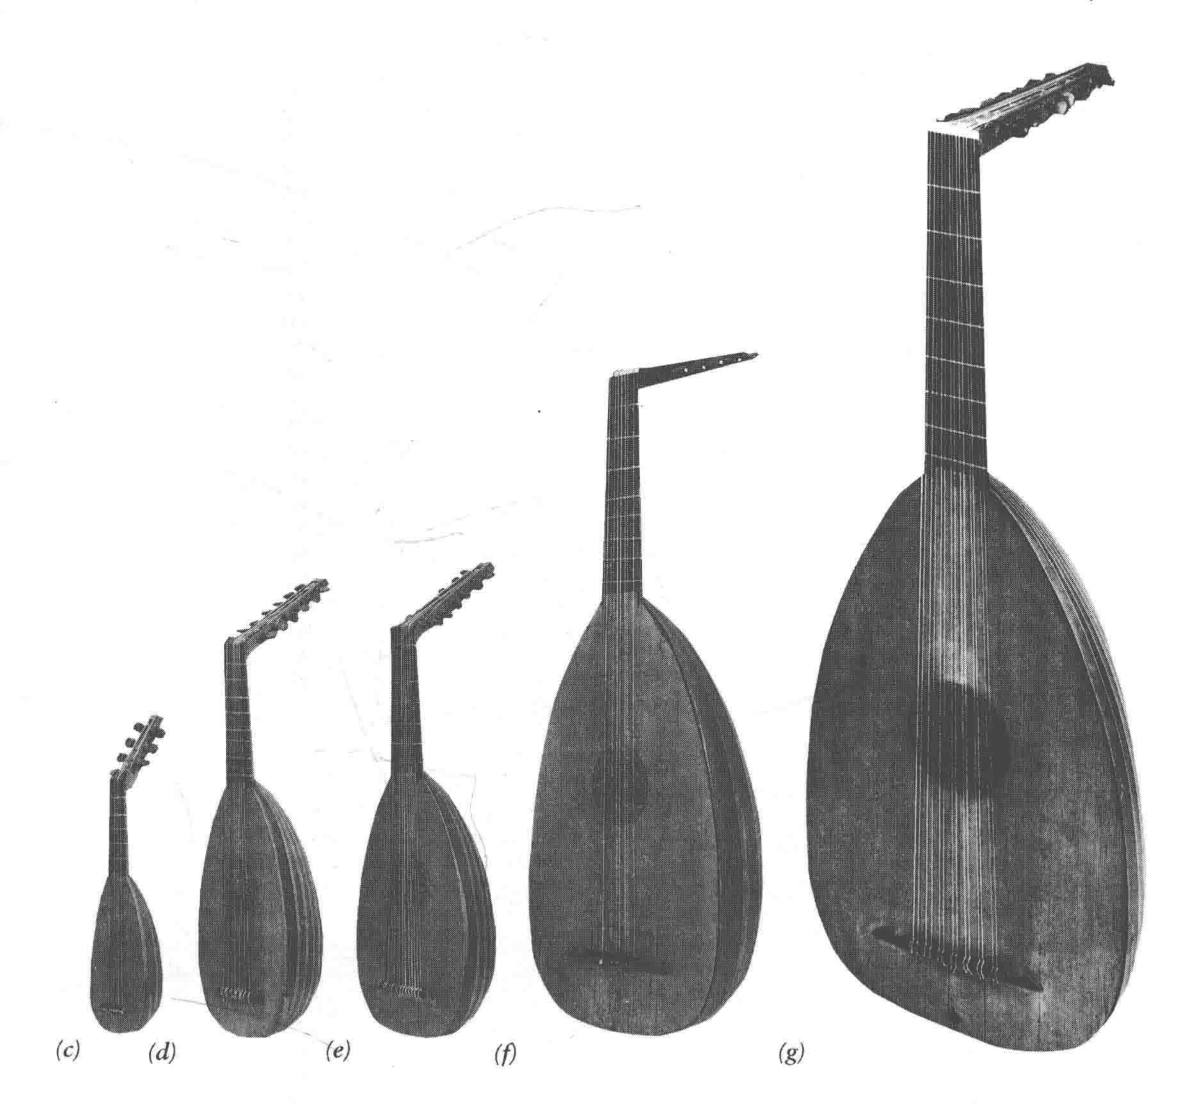


In Venice, as in Bologna, the German colony kept to its own quarter and had its own church. By 1521 Ulrich Tieffenbrucker is recorded as present in the city, and for the next hundred years the TIEFFENBRUCKER family, especially Magno (i), Magno (ii) and Moisé, as well as Marx Unverdorben and Luca Maler's brother, Sigismond, dominated lute making in the city (see Toffolo, B1987). The name Tieffenbrucker was taken from their original village of Tieffenbruck, but their instruments are usually signed Dieffopruchar and regional spellings abound with variants such as Duiffoprugcar and even Dubrocard. Another branch of the Tieffenbrucker family settled in Padua, including 'Wendelio Venere', who has recently been discovered to be Wendelin Tieffenbrucker, probably the son of Leonardo Tieffenbrucker the elder. MICHAEL HARTUNG also worked in Padua and may have been taught by Wendelin, although Baron (C1727) stated that he was apprenticed to Leonardo the younger. The typical body shape of these Venetian and Paduan lutes was less elongated than that of Maler's and Frei's instruments, and the shoulders were more curved (fig.10*a*, *c–f*). The first examples had 11 or 13 ribs, but later the number was increased, a feature associated with, but not exclusive to, the use of yew, which has a brown heartwood and a narrow white sapwood. For purposes of decoration, each rib was cut half light, half dark, which restricted the available width and required a large number of ribs, sometimes totalling 51 and even more. The yew wood was supplied from the old heartland of lute making in south Germany, and cutting the ribs for Venetian makers became a valuable source of winter employment there (see Layer, B1978).

The use of geometrical methods of lute design has already been mentioned, and it has been found by several writers that the shape of these instruments can be readily reproduced by such means (see Edwards, D1973; D. Abbott and E. Segerman: 'The Geometric Description and Analysis of Instrument Shapes', *FoMRHI Quarterly*, no.2, 1976, p.7; Söhne, D1980; Samson, D1981; and Coates, D1985). This may account for the similarity in basic form between instruments of different sizes and by different makers. By comparison with the modern guitar, these early lutes, whether of the Bolognese or Paduan type, are distinguished by the lightness of their construction. The egg-like shape of the lute body is inherently strong and does not need to be built of very thick materials. Although the total tension of up to 24 gut strings (for later lutes) can be as much as 70–80 kg, the well-barred thin soundboard withstands this pull remarkably well. Though in the 17th century, as Constantijn Huygens's correspondence makes clear, it was routine to re-bar old lutes as part of their renovation, this may have had more to do with alterations in barring layout than structural weaknesses.

The instruction to tune the top string as high as it will stand without breaking is given in many early lute tutors (though not by Dowland or Mace). If the highest string is lowered for safety's sake much beneath its breaking point, the basses will be either too thick and stiff or, if thinner,

9. Five-course lute with 11 frets, the top three glued to the soundboard: painting 'The Concert' (c1490) by Lorenzo Costa (National Gallery, London); the player's right arm and hand are again nearly parallel to the strings, in the old 'plectrum' position, although he is playing with the fingertips



10. (a) Large 'mean' lute by Magno Tieffenbrucker, Venice, 1609 (front and back); (b) large 'mean' lute by Hans Frei, Bologna, 1550; (c)–(f) descant and two treble lutes (c1580) and a 'mean' lute (1582) by Wendelin Tieffenbrucker, Padua; (g) great bass lute by Michael Hartung, Padua, 1602; (a) Museo Bardini, Florence; (b) and (c)–(f) Kunsthistorisches Museum, Vienna; (g) Germanisches Nationalmuseum Nuremberg (all are reproduced to the same scale)

too slack to produce an acceptable sound. Wire-wound bass strings which could ease this dilemma by increasing the weight without increasing the stiffness are not known to have been available until after 1650, and were apparently not much used thereafter either. Therefore, as the breaking pitch of a string depends on its length but not on its thickness, the working level of a given instrument is fixed within quite narrow limits.

In the second half of the 16th century there was a tendency to build instruments in families of sizes (and thus pitches), roughly corresponding with the different types of human voice. The lute was no exception. Examples of the variety of sizes available around 1600 are shown in fig.10. The instrument by Magno Tieffenbrucker (fig.10*a*) has a string length of 67 cm; the string lengths of the instruments shown as fig.10*c–g* are 29·9 cm, 44 cm, 44·2 cm, 66·6 cm, and 93·8 cm. Strictly speaking, the smallest of these (fig.10*c*) should be called a MANDORE (*see also* MANDOLIN, §1). In England the nominal *a′* or *g′* lute was known as the 'mean', and was the size intended in most of the books of ayres, unless otherwise specified. The only other names used in English musical sources are 'bass' (nominally at *d′*) and 'treble', which is specified for the Morley and Rosseter *Consort Lessons*. The pitch of these 'treble' lutes implied by the other parts was also *g′* but it is possible that this music was intended to be played at a pitch level a 4th higher than that of the mean lute (see Harwood, B1981). This nomenclature of 'treble' has caused some interest and, taken together with a number of specifically English pictures of small-bodied long-necked lutes, may indicate a particular English variant (see Forrester, B1994).

It should be noted that although all sorts of sizes were available at most times, the general trend from 1600 to 1750 was towards larger instruments for common use. Thus, for example, we might expect Dowland's songs to be accompanied on a lute of about 58 cm string length tuned to a nominal *g′* or *a′*, whereas most French Baroque music of the mid-17th century calls for an 11-course lute of about 67 cm with a top string at a nominal *f′*, while the lutes used in Germany in the 18th century were mostly 13-course instruments of about 70–73 cm, also with a nominal top string of *f′*. Some of this may represent a drop in the pitch standard, but we must also assume that

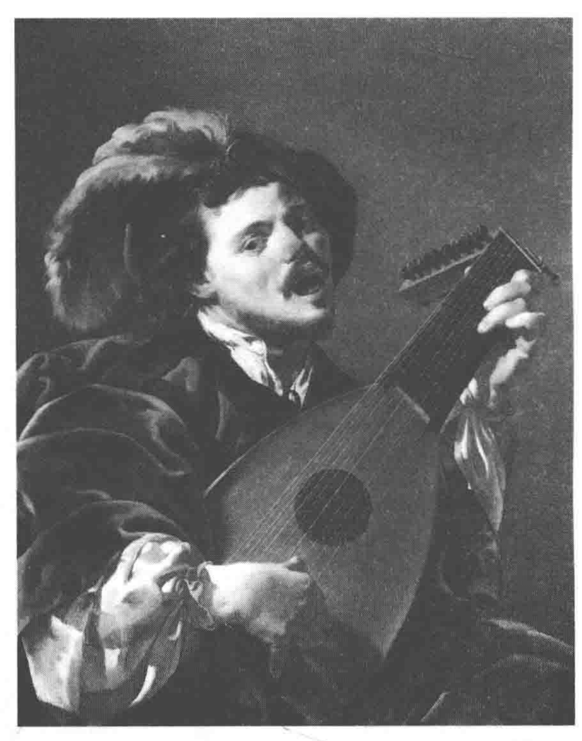
(c) (d) (e) (f) (g)

string makers had managed to improve their products to increase the total range available, since these size changes represent considerable changes in the instruments' requirements. Apart from the development of overwound strings, this increase in range could only have been achieved by increasing the tensile strength of the trebles, by making the thick basses more elastic and flexible or by increasing the density of bass strings, perhaps by the addition of metallic compounds (see Peruffo, D1991). There is currently much interest in trying to reproduce these conjectured developments. It is noticeable from written accounts that the cost of strings was remarkably high compared to that of the lutes themselves, leading to the thought that there was more to their manufacture than is now apparent.

Although seven-course lutes appear as early as the late 15th century, and Bakfark's apprentice, Hans Timme, wanted to buy an Italian seven-course lute as early as 1556 (see Gombosi, F1935), it was only in the 1580s that they became at all common with the seventh course pitched at either a tone or a 4th below the sixth (see §5 below). Improved strings are conjectured to have popularized this greater range, perhaps providing a better tone and enabling John Dowland, in his contribution to his son Robert's *Varietie of Lute Lessons* (1610), to recommend a unison sixth course:

Secondly, set on your Bases, in that place which you call the sixt string, or γ ut, these Bases must be both of one bignes, yet it hath beene a generall custome (although not so much used any where as here in England) to set a small and a great string together, but amongst learned Musitians that custome is left, as irregular to the rules of Musicke.

The same book, reflecting the growing tendency to increase the number of bass strings, included English and continental music for lutes with six, seven, eight and nine courses. This only occasionally extended the range to low *C*; mostly the extra strings were used to eliminate awkward fingerings resulting from having to stop the seventh course. These 'diapasons' were usually strung with octaves. Already by the early 1600s the ten-course lute had made its appearance, shown in contemporary illustrations as constructed like its predecessors, with the strings running over a single nut to the pegbox, which has to be considerably longer to accommodate the additional



pegs. The pegbox is also usually shown as being at a much shallower angle to the neck than the earlier Renaissance lute, a fact borne out by the surviving original ten-course lute by Christofolo Cocho in the Carl Claudius collection, Musikhistorisk Museum, Copenhagen (no.96a). Often the paintings of ten-course lutes show a treble 'rider', a small extra pegholder on top of the normal pegbox side, designed to give a less acute angle on the nut for the fragile top string.

Another innovation reported by Dowland in *Varietie* was the lengthening of the neck of the instrument:

for my selfe was borne but thirty yeeres after Hans Gerles booke was printed, and all the Lutes which I can remember used eight frets . . . some few yeeres after, by the French Nation, the neckes of the Lutes were lengthned, and thereby increased two frets more, so as all those Lutes, which are most received and disired, are of tenne frets.

Initially this may have been done to improve the tone of the low basses, but unless stronger treble strings became available at the same time, the pitch level of these longer lutes must have been lower than the older eight-fret instruments. Interestingly, one such lengthened neck survived until quite recently, but when it was 'restored' this important source of evidence for the practice was removed. Sometimes extra wooden frets were glued on to the soundboard, an invention which Dowland attributed to the English player Mathias Mason.

It is interesting that Dowland should thus report the prevailing fashion in lutes as coming from France, for by his death in 1626 France was the dominant culture musically and was the centre for developments in different tunings, starting some time around 1620, which led to the 11-course lute. Lowe (B1986) has suggested that the 11th course may at first have been only an octave string. The later surviving 11-course lutes mostly appear to be conversions of ten-course instruments, all done in the same way, by making the second course single and adding a treble rider for the top string or 'chanterelle' on the top of the normal pegbox treble side. This effectively gave two extra pegs which were used for the new bass course, but, because the neck was now too narrow, these strings were taken over an extended nut which projected beyond the fingerboard and were fastened to the pegs on the outside of the pegbox. The famous portrait of Charles Mouton (fig.12) clearly shows that this was obviously not regarded as a stopgap measure. This final extra course on the same string-length has often been attributed to the invention of wire-wound or overspun strings, first advertised in England by Playford in 1664. However there is distressingly little hard evidence that these were in fact much used and they are not mentioned by either Mace or the Burwell tutor even though both wrote about the choice of strings. As Lowe (B1976) has shown, during the 17th century the French were already buying and converting early 16th-century Bologna lutes, seemingly because of a new aesthetic which valued the antique. There are so few surviving lutes with any claim to have been made in France that it is not possible to be sure what their makers were producing by way of new lutes at a time when lute playing was so important to French musical life. One must assume that the French cannot all have been playing on antique instruments. Indeed the inventory of the French maker Jean Desmoulins (*d* 1648) points to a vigorous rate of production since it lists 249 lutes in various stages of construction as well as 14 theorbos both large and small (see Lay, F1996). Only one

11. Ten-course lute with all the strings on one head: painting 'The Singing Lute Player' (1624) by Hendrick Terbruggen (National Gallery, London); note the right-hand little finger on the bridge, and the thicker octave strings of the bass courses; the right hand is now almost at right angles to the strings; note also the overhanging nut, carrying the lowest course outside the neck

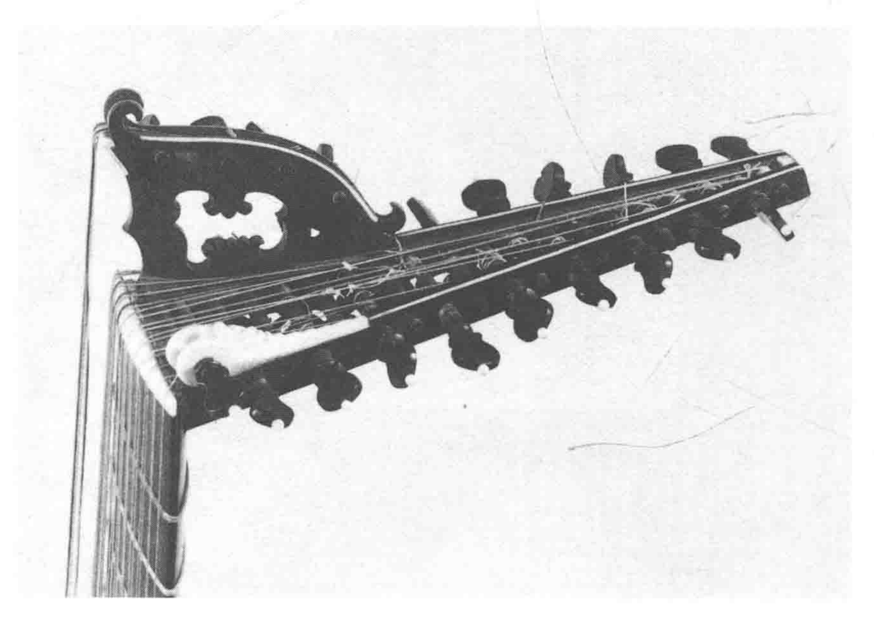
12. The lutenist Charles Mouton: portrait by Jean François de Troy (1679–1752) in the Musée du Louvre, Paris

lute by this maker has survived (Cité de la Musique, Marseilles).

Makers working in Italy, where the old tuning held sway, had already addressed the problem of extending the bass range in the 1590s by the expedient of having longer and therefore naturally deeper-sounding strings carried on a separate pegbox. The theorbo, chitarrone, *liuto attiorbato* and archlute all had extended straight-sided pegboxes carved from a solid piece of wood set into the neck housing at a very shallow angle and carrying at their ends a separate small pegbox for these extended bass strings. The form of all these instruments is very similar, differing mainly in the length of the extended pegbox, the number of courses carried and whether the bass courses were double or single. It was therefore only to be expected that this principle of longer, and therefore unfingered, bass strings should also be applied to non-continuo lutes. From about 1595 to 1630 various other types of extended pegboxes were tried for the bass strings. In one version, an extra piece of neck was added on the bass side which carried its own small bent-back pegbox. One of these (by Sixtus Rauwolf, 1599, though the extension may be later) has survived in the Carl Claudius collection, Musikhistorisk Museum, Copenhagen and there are several paintings showing this form, including works by Carlo Saraceni (*c*1579–1620) and Jan Miense Molenaer (*c*1610–1668).

More widely adopted was a double-headed lute with curved pegboxes (fig.13), one set backwards at an angle rather like the normal lute, the other extended in the same plane as the fingerboard. This carried four separate small nuts to take the bass courses in steps of increasing length. This form usually had 12 courses and was apparently invented by Jacques Gautier in about 1630 (see Spencer, B1976, and Samson, B1977) but was not used much by the French who remained largely loyal to their single-headed lutes. As the author of the Burwell Lute Tutor (*c*1670) wrote: 'All England hath accepted that Augmentation and ffraunce att first but soone after that alteration hath beene condemned by all the french Masters who are returned to theire old fashion keeping onely the small Eleaventh'. He, or she, objected to the length of the longer bass strings and felt that they rang on too much, thereby causing discords in moving bass lines. It was, however, widely used in England and the Netherlands until at least the end of the 17th century. The apparent thinking behind this form was a desire to avoid the sudden leaps in tone quality between the treble and bass strings which characterize the theorbo and archlute forms. An important tutor for this type of lute was Thomas Mace's *Musick's Monument* (1676), in which it was classed as a French lute; Talbot (*c*1695), however, called it the 'English two headed lute'. For Talbot the 'French lute' had 11 courses, with all the strings on a single head. There has been some discussion as to the size of these instruments (see Segerman, D1998). Talbot measured the string length of a 12-course instrument of this type as 59·7 cm; iconographical sources show all sizes. To date, six examples of this type have been found with fingered string lengths of between 50 and 75 cm.

This same principle of stepped nuts for bass strings of gradually increasing length lay behind a specifically English form of the theorbo, which is also described in Mace and was measured by Talbot (see Sayce, B1995; Van Edwards, B1995). Unusually for a theorbo this had



13. Man playing a two-headed 'French' lute: detail of a painting by Hendrik Martensz Sorgh (1611–70) in the Rijksmuseum, Amsterdam

double-strung courses in the bass which still further smoothed the transition across the range. None of these have survived. The French too seem to have developed their own version of the theorbo principle in the 17th century with a shorter extension than the Italian theorbo and possibly with single stringing (*see* THEORBO).

In Italy in the 17th century the drive towards extending the bass range of the lute was accommodated somewhat more consistently by incorporating the theorbo design into smaller lutes for solo use. Thus the *liuto attiorbato* came to be used in addition to normal lutes and theorbos, and later archlutes, for accompanying singers and continuo work. Matteo Sellas was part of another large German family of instrument makers still based in Italy, and produced very elaborate lutes and *liuti attiorbati* of ivory and ebony at his workshop 'alla Corona' (at the sign of the crown) in Venice. His brother Giorgio made equally decorative guitars and lutes 'alla stella'. Working in Rome, beyond what might seem to be the natural bounds of migration from Germany, were David Tecchler, Antonio Giauna and Cinthius Rotundus, from each of whom has survived an archlute, attesting this instrument's importance in Rome in the 17th and 18th centuries.

By the beginning of the 18th century, the centre of activity in lute music shifted from France to Germany and Bohemia. The makers extended the range of the instrument still further, and by 1719 composers were writing for 13 courses. There were two types of 13-course lutes developed and it is hard to say which was first, since both are possible conversions from pre-existing 11-course instruments and so labels are not conclusive. Paintings of both types are surprisingly rare. In one version a single pegbox was used like that of the 11-course lute, but, possibly starting as a conversion, a small subsidiary pegbox or 'bass rider' with four pegs to take the extra two courses was added to the bass side of the main pegbox (fig.14). This had the effect of giving between 5 and 7 cm extra length to these two courses. Commonly these lutes were quite large by previous standards with 70 to 75 cm being the usual string length. From what has been said so far about stringing this must imply a lower pitch for the main strings. It is clear from the details of the tablature that Silvius Leopold Weiss composed throughout his life for this version of the 13-course lute which was developed by the new generation of German makers, working in Bohemia and Germany itself. Among the most important at this time were Sebastian Schelle and his pupil Leopold Widhalm working in Nuremberg (see Martius, B1996), Martin Hoffmann and his son Johann Christian working in Leipzig, Joachim Tielke and his pupil J.H. Goldt working in Hamburg (see G. Hellwig, B1980) and Thomas Edlinger of Augsburg and his son Thomas, who moved to Prague and set up his workshop there. All these makers were violin makers as well, reflecting the growing importance of this instrument at a time when the lute was becoming less in demand.

These makers were also responsible for the other version of the 13-course lute with extended bass strings, the German Baroque lute (see Spencer, B1976). This had an ornately curved double pegbox carved out of a single piece of wood, usually ebonized sycamore. This type did not usually have a treble rider, but did occasionally feature a small separate slot carved in the treble side of the main pegbox to take the top string. Typically this kind of lute had eight courses on the fingerboard and five octaved courses going to the upper pegbox, these five being normally between 25 and 30 cm longer than the fingered strings. This design appears to be a modification of the pre-existing ANGÉLIQUE form. Some apparently early 13-course lutes, such as the 1680 Tielke instrument, dating from long before the earliest surviving 13-course music (*c*1719), seem to be converted 'angéliques'. Others, such as the Fux conversion in 1696 of a Tieffenbrucker instrument and the 13-course lute of Martin Hoffmann dating from the 1690s, raise more awkward questions of dating. An even more elaborate triple pegbox form of this type was also developed and a few examples have survived, notably by Johannes Jauck, a lute and violin maker working in Graz, and Martin Bruner (1724–1801) in Olomouc. These seem to have been functionally the same as the double pegbox form, and they may have represented a further attempt to obtain a smoother transition from the treble to bass courses.

14. Detail of pegbox showing treble and bass riders on a 13-course lute, originally by Hanns Burkholtzer, Füssen, 1596; string arrangement by Thomas Edlinger, Prague, 1705 (Kunsthistorisches Museum, Vienna)

Internally, the barring structure behind the bridge was altered by these makers. Beginning with an increase in the number of small treble-side fan bars, the characteristic J-bar on the bass side of the Renaissance soundboard was finally removed and various kinds of fan-barring were introduced right across this area of the soundboard. These seem to have had the effect of increasing the bass response. The main transverse bars were also made slightly smaller and more even in height, maybe with the same intention. The body outline of these lutes is remarkably similar to that of the early 16th-century lutes of Frei and Maler and this resemblance may well have been deliberate, for the old instruments continued to be highly prized. It was about this time (1727) that the first systematic history of the lute was written, by E.G. Baron. Referring to the lutes of Luca Maler, he wrote:

> But it is a source of wonder that he already built them after the modern fashion, namely with the body long in proportion, flat and broad-ribbed, and which, provided that no fraud has been introduced, and they are original, are esteemed above all others. They are highly valued because they are rare and have a splendid tone.

This echoes the value placed on Maler lutes in the Fugger inventory of nearly 200 years earlier, which talks of 'An old good lute by Laux Maler' and 'One old good lute by Sig[ismond] Maler'. Baron's comment on the possibility of fraud is also interesting in this context, since there are several surviving lutes with supposedly 16th-century Tieffenbrucker labels which are clearly the work of Thomas Edlinger the younger working in Prague at about the time Baron was published. Thomas Mace too wrote of Maler 'but the Chief Name we most esteem, is Laux Maller, ever written with Text Letters: Two of which Lutes I have seen (pittiful Old, Batter'd, Crack'd Things) valued at 100 l [£] a piece'.

In the 18th century a much simpler form of German 'lute', the mandora, emerged with the same string lengths and barring system as the Baroque lute but usually with only six or eight courses in a variety of tunings. Apparently mainly used by amateurs, it also found a useful niche in orchestras in place of the 13-course Baroque lute as well as for continuo and bass lines in sacred music, especially large scale works.

Throughout the lute's history the gut strings have been matched by movable gut frets tied around the neck. The placing of these frets has always been a problem to both theoreticians and players, and many attempts have been made to find a system that will give the nearest approach to true intonation for as wide a range of intervals and in as many positions as possible. A number of writers, including Gerle (C1532), Bermudo (C1555), the anonymous author of *Discours non plus mélancholique* (1557), Vincenzo Galilei (*Fronimo*, 1568) and John Dowland, put forward various systems, many of which were based on Pythagorean intervals. Late 16th-century theorists in Italy, as well as 17th-century writers such as Praetorius and Mersenne, habitually assumed that the intonation of the lute (and other fretted instruments) represented equal temperament, whereas, in contrasts, keyboard instruments were tuned to some form of mean-tone temperament (*see* TEMPERAMENTS).

5. TUNINGS. The earliest tuning instructions for the Western lute date from the late 15th century and are mostly for five-course lute. The best known is that of Johannes Tinctoris, whose *De inventione et usu musicae* (*c*1481–3) gives a tuning of 4ths around a central 3rd. However, as both five- and six-course lutes are mentioned, the position of the 'central 3rd' is unfortunately ambiguous. Both the Königstein Liederbuch (*c*1470–73) and an English manuscript dating from between 1493 and 1509 (*GB-Ctc* 0.2.13) give intervals of 4–3–4–4 from bass to treble. Ramis de Pareia (*Musica practica*, Bologna, 1482) stated that the most common tuning was *G–c–e–a–d′*, but mentioned another drone tuning with the lowest three strings tuned to *A–d–a*; the trebles were set in various (unspecified) ways. Antonio de Nebrija (*Vocabulario Español-Latino*, Salamanca, *c*1495) apparently gave an unlikely diminished 5th between the two lowest courses, then 3–4–5, but the correct translation of his description is disputed. The late 15th-century Pesaro manuscript (*I-PESo* 1144) includes tablature for a seven-course lute with the tuning 4–4–4–3–4–4, as does a manuscript now in Bologna (*I-Bu* 596.HH.2[4], which probably dates from the same period. The latter gives the tuning *E–A–d–g–b–e′–a′*.

By around 1500 six courses had become standard; the earliest printed sources, including Spinacino (1507), Dalza (1508) and Bossinensis (1509 and 1511) require a six-course lute, usually tuned 4–4–3–4–4. Virdung (*Musica getuscht*; Basle, 1511) mentioned lutes of five, six and seven courses, the six-course lute being the most common, and gave a tuning 4–4–3–4–4, with the sixth course tuned to a nominal *A*. The fourth, fifth and sixth courses were tuned in octaves, the second and third courses in unisons, with a single first course. Agricola advocated this pattern in the first edition of his *Musica instrumentalis deudsch* (Wittenberg, 1529) but gave a tuning a tone lower, in nominal G. Occasionally the sixth course was tuned down a tone, a variation called 'Abzug' by Virdung and 'bordon descordato' by Spinacino. In the 1545 edition of *Musica instrumentalis deudsch* Agricola stated that a seven-course instrument, with the seventh course tuned a tone below the sixth course, was preferable to this scordatura, which was difficult to manage.

This basic six-course tuning, with octaved lower courses, and an interval of two octaves between the outer courses, remained the norm for most of the 16th century. Tablature sources with parallel staff notation (from both the 16th and early 17th centuries) show that the most common nominal tunings were either in A (*A–d–g–b–e′–a′*) or G (*G–c–f–a–d′–g′*), though lutes in other nominal pitches are encountered. There is a considerable body of literature discussing whether or not these variable pitches were intended to be interpreted literally. Practical considerations of instrument availability, together with notational considerations such as the avoidance of leger lines in the staff notated part, suggest that these apparent lute pitches were only nominal. Cue notes are often provided in the tablature, to clarify the relationship of lute pitch to staff notation. The absolute pitch of the lute was variable; contemporary tutors typically instruct the player to tune the top course as high as possible, and set the other strings to that.

Surviving 16th-century tablatures for multiple lutes call for a total 'consort' of nominal *d″*, *a′*, *g′*, *e′* and *d′*, to accommodate all of the variations encountered in the duet and trio repertories, though Praetorius (*Syntagma musicum*, ii, 1618, 2/1619/*R*) mentioned other sizes too. The intervals between courses remained the same, irrespective of the size of the lute. A few lutenists explored other tunings, albeit briefly; these included Hans Neusidler

(1544) whose infamous *Judentanz* requires a drone tuning; Barberiis (1549) printed pieces using the tunings 4–5–3–4–4, 5–4–2–4–4, and 4–4–3–5–4; Wolff Heckel (1562) also used a drone tuning for a *Judentanz* and other pieces.

By the 1580s a seventh course, tuned either a tone or a 4th below the sixth course, was in regular use, and eight-course lutes incorporating both of these options became common in the 1590s. By the early 1600s ten-course lutes were in use, with diatonically tuned basses descending stepwise from the sixth course. Around the same period the octave tuning of at least the fourth and fifth courses was dropped in favour of unisons, though the octaves were certainly retained on the lowest courses and perhaps on the sixth course too. Otherwise the tuning of the six upper courses remained essentially unchanged, and became known as *vieil ton*. There was a brief vogue for *cordes avallées* tunings in France, used by Francisque (1600) and Besard (C1603), which involved lowering the fourth, fifth and sixth courses to give drone-like 4ths and 5ths. These tunings were used almost exclusively for rustic dance pieces.

In the early years of the 17th century two distinct traditions began to emerge. The Italians mostly retained the old tuning, adding extra bass courses (*see* ARCHLUTE) though P.P. Melli and Bernardo Gianoncelli experimented with variant tunings of the upper courses. Around 1620 French composers began to experiment with several *accords nouveaux*, first on ten-course lutes, and later on 11- and 12-course instruments. (With these new tunings, the interval between the first and sixth courses was always narrower than the two octaves of *vieil ton*; they should not be confused with the *cordes avallées* tunings, where this interval was always wider than two octaves.) This experimentation continued until at least the 1670s, and music for over 20 different tunings survives, many of which were given different names by different scribes or composers (see Schulze-Kurz, E1990). However, only a handful were common and these included what is today considered to be the normal 'Baroque' D minor tuning. This did not become standard until the second half of the 17th century; the tuning commonly known as 'Flat French' was equally popular until about the 1660s. The advantages of the new tunings were increased resonance and ease of left-hand fingering, though only within a very limited range of keys. The derivation of these tunings from *vieil ton*, and the subsequent emergence of the D minor tuning, has been somewhat obfuscated by recent editorial methods which transcribe these tunings on the basis of an instrument whose sixth course is tuned to G. The transition is much clearer (and transcriptions emerge in less obscure keys) if the sixth course in *vieil ton* is considered to be *A*. Some of the more common tunings are shown in Table 1. In all of the above tunings (including *vieil ton* on lutes with more than eight courses) the basses were tuned diatonically downwards from the sixth course. The lute had become essentially diatonic in its bass register, and the tuning of the lowest courses would be adjusted for the key of the piece. (This was a major factor in the grouping of pieces by key, which led to the baroque suite.)

TABLE 1

Vieil ton	*A–d–g–b–e′–a′*
Sharp tuning	*A–d–g–b–d′–g′*
Gautier	*A–d–g–b–d′–f♯′*
Mesangeau	*A–d–g–b–d′–f′*
Flat French	*A–d–g–b♭–d′–f′*
D minor	*A–d–f–a–d′–f′*

The first print to use the new tunings was Pierre Ballard's *Tablature de luth de différents autheurs sur l'accord ordinaire et extraordinaire* (Paris, 1623; now lost). Slightly later collections survive, containing fine music by Mesangeau, Chancy, Belleville, Robert Ballard (ii), Pierre Gautier (i) and others, in various *accords nouveaux*. The tunings were widely used in England after the 1630s; publications by Richard Mathew (1652) and Thomas Mace (C1676) use 'Flat French' tuning; Mace provided a translation chart to convert tablatures between 'Flat French' and 'D minor' tunings. By the 1670s the 11-course single-pegbox lute in D minor tuning had emerged as the preferred norm throughout much of Europe, and remained so until the early years of the 18th century, when two further courses were added, extending the lute's range down to *A′*. The last printed sources to make significant use of variant tunings are Esaias Reusner (ii) (1676) and Jakob Kremberg (1689).

6. TECHNIQUE. Several writers of instruction books for the lute have remarked that many masters of the art were, as Mace put it, 'extreme *Shie* in revealing the *Occult* and *Hidden Secrets* of the *Lute*'. Bermudo had lamented the same characteristic in teachers: 'What a pity it is (and those who have Christian understanding must weep for it) that the great secrets of music die in a moment with the person of the musician, for lack of having communicated them to others'. The training of professional players was almost certainly carried on through some system of apprenticeship, and this may well be one of the reasons why comparatively few books give really informative instructions on all aspects of playing technique. Nevertheless, details have been left by the more conscientious authors that are sufficiently clear to establish the main characteristics of lute technique in each period.

Although little was written about left-hand techniques, certain basic rules were mentioned from the Capirola Lutebook (*c*1517, *US-Cn*; ed. O. Gombosi, 1955; see also Marincola, F1983) onwards. The lute must be held in such a way that no weight is taken by the left hand. The thumb should be placed lightly on the underside of the neck, opposite the first and second fingers. The tips of the fingers should always stay as close as possible to the strings so that each one is ready to take its position without undue movement. Fingers must be kept in position on the strings until they are required to stop another string, or until the harmony changes. Judenkünig went so far as to say they must never be lifted until needed elsewhere.

In Capirola's lutebook the player was advised to keep the fingers in readiness and not to avoid using the little finger; the first finger could be laid across several strings to form a *barré* chord. Sometimes a finger was placed on one string only of a course in order to create an extra voice (a device also described by Valentin Bakfark and the vihuelist Miguel de Fuenllana); the right hand would then strike through the whole course as usual.

It was, however, the German masters who first codified a system of fingering. Judenkünig gave a series of diagrams of left-hand positions. In the first of these the hand spans the first three frets and the fourth fret on the sixth course; the first finger is marked with the six characters of the

first fret in German tablature; the second finger is marked with the next series; the third finger takes the lower three courses on the third fret; and the little finger takes the upper three courses as well as the fourth fret on the sixth course. Each diagram shows the fingers rigidly aligned on the appropriate fret. A small cross placed above a letter indicates that the finger must be held down and the following note played with the next finger, whatever fret it may be on. Judenkünig did not describe the fingering of chords, or cross-fingering where the counterpoint makes it necessary to depart from the prescribed alignment. Neusidler (*Ein newgeordnet künstlich Lautenbuch*, 1536) indicated by means of dots the fingering of a number of simple compositions. In general he followed the rules laid down by Judenkünig, but he also showed how chords constantly demand the use of fingers on frets other than those allotted to them in a strict diagrammatic scheme.

In England and France little attention was given to left-hand technique until the publication of Adrian Le Roy's tutor *Instruction ... de luth* (?1557, lost, repr. 1567, also lost, Eng. trans., 1568, see §8(v)), which described the *barré* chord as 'couching' the first finger 'along overthwart the stoppe'. Robinson (C1603) described how to finger certain chord passages and also how to finger ascending and descending melodic lines. He also added fingering marks to the first five compositions in his books. Besard (C1603) described in considerable detail the use of the *barré*, and half *barré*, and also gave advice on how to choose the correct finger for holding notes, particularly in the bass. Later in the 17th century more complete markings were given by Nicolas Vallet (*Secretum musarum*, 1615) and, for a 12-course French lute, Mace.

Until about the second half of the 15th century most representations of lute players (where the details are visible) show the strings being struck with a quill or plectrum. The hand approaches the strings from below the bridge and lies nearly parallel with them. The plectrum or quill is held either between the thumb and first finger, or the first and second, or even the second and third. Gradually the fingers replaced the plectrum. In pictures dating from about 1480 it is common to see players with the hand in a slightly more transverse position (see fig.9). For any composition involving chords the advantage of this change is obvious. Tinctoris observed that players were becoming so skilful that they could play four voices together on the lute perfectly.

The earliest printed books gave little information about right-hand techniques. A dot placed under a note signified that it was to be played upwards, and the absence of a dot downwards; all passages of single notes were played accordingly. Later sources specified that the downward stroke was always taken by the thumb on the accented beat, while the unaccented beat was taken upwards, usually with the first finger. This type of fingering was to remain standard practice until about 1600. It was still mentioned by Alessandro Piccinini (*Intavolatura di liuto, et di chitarrone*, 1623) and by Mersenne (1636–7), and it survived for runs of single notes across the lute from bottom to top and for certain other passages until 1660–70.

According to the instructions in the Capirola manuscript (the first to give any real insight into the playing position of the right hand), the thumb was held under the second finger, that is, inside the hand. Adrian Le Roy was the first to mention that the little finger is placed on the belly of the lute, although many representations of players before 1568 show the hand with the little finger in this position. Le Roy wrote: 'the little finger serveth but to keep the hande from [firm] upon the bealie of the Lute'. From then onwards it was frequently mentioned. Robinson, for example, said: 'leane upon the bellie of the Lute with your little finger onelie, & that neither to far from the *Treble* strings, neither to neere'. Mace wrote: 'The 2d. thing to be gain'd is, setting down your *Little Finger* upon the *Belly*, as aforesaid, *close under the Bridge*, about the *first*, 2d, 3d, or 4th. *Strings*; for thereabout, is its *constant station*. It *steadies the Hand*, and gives a *Certainty* to the *Grasp*'. From this time onwards, portraits of performing lute players always show the little finger placed either on the soundboard, in front of or behind the bridge, or on the bridge itself (as in fig.11).

During the Renaissance, chords were usually played with the thumb on the bass, playing downwards, and the first and second, or the first, second and third fingers, playing upwards. For chords of more than four notes the following procedure was given by Le Roy and Besard: for five-note chords the thumb plays the bass downwards, the third and fourth courses are raked upwards by the first finger, and the first and second courses are played respectively by the third and second fingers; six-note chords are played in a similar way with the thumb playing downwards across both the sixth and fifth courses. The upper note of two-part chords was generally taken by the second finger, although Robinson preferred the third.

A single dot under a chord of two or three notes generally means that it is played upwards with the usual fingers, but without the thumb. Gerle, however, used a dot under a chord to show that all the notes were to be played upwards with the first finger, while Judenkünig said that in dance music full chords may be stroked or strummed with the thumb throughout. Neusidler also mentioned the 'thumb-stroke'. Robinson, however, advocated the third finger for notes farthest from the thumb, the second for the next note, and the first for those nearest. Besard was the first writer to describe a new position for the thumb; his directions are translated as follows in Dowland's book of 1610:

> stretch out your Thombe with all the force you can, especially if thy Thombe be short, so that the other fingers may be carryed in the manner of a fist, and let the Thombe be held higher than them, this in the beginning will be hard. Yet they which have a short Thombe may imitate those which strike the strings with the Thombe under the other fingers, which though it be nothing so elegant, yet to them it will be more easie.

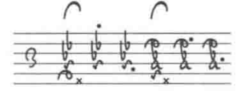
Dowland himself is said to have changed to the 'thumb-out' position in mid-career (Beier, B1979), presumably to take advantage of the consequent greater stretch, perhaps in connection with the addition of extra courses. The increase in the number of courses was probably also responsible for a general shift in the position and movement of the hand. Besard suggested:

> the first two fingers may be used in Diminutions very well insteed of the Thombe and the fore-finger, if they be placed with some Bases, so that the middle finger be in place of the Thombe, which Thombe whilst it is occupied in striking at least the Bases, both the hands will be graced and that unmanly motion of the Arme (which many cannot well avoide) shall be shunned. But if with the said Diminutions there be not set Bases which are to be stopped, I will not counsell you to use the two first fingers, but rather the Thombe and the fore-finger: neither will I wish you to use the two fore-fingers if you be to proceede (that is to runne) into the fourth, fift or sixt string with Diminutions set also with some parts.

Markings comprising a pair of dots or small strokes under the note to indicate the use of the second finger occur in many manuscripts from the early 17th century (e.g. Vallet used the latter marking). A single vertical line or stroke under a note was an indication to use the thumb, to which greater attention was paid with the increasing number of bass strings. Piccinini described an *apoyando* stroke:

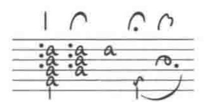
> The thumb, on which I do not approve of a very long nail, must be employed in this manner, that every time you sound a string you must direct it [the thumb] towards the soundboard, so that it is crushed onto the string below, and it must be kept there until it has to be used again.

This type of stroke was mentioned by other writers and appears to have become standard practice during the Baroque period. In fact, such a technique is almost essential when the thumb has to make rapid jumps among a number of diapasons. If the thumb is held free, there is no point of reference from which each movement can be judged accurately.



In the second decade of the 17th century many new technical devices began to appear. Bataille's *Airs de différents autheurs* (iv, 1613) used a dot for a quasi-rasgueado device in repeated chords (ex.1) that is described by Mersenne and became extremely common, especially in pieces in sarabande rhythm: the dot at the top of the chord stands for an upward stroke with the first finger, while the dot at the bottom stands for a downward stroke with the back of the same finger (ex.1*a*). For this device, sometimes called *tirer et rabattre*, later composers often distinguished the second, downward-struck chord by dots next to the notes (ex.1*b*).

Italy was apparently the first country in which the slur was developed as part of normal technique instead of being confined to the execution of graces. Pietro Paoli Melli (*Intavolatura di liuto attiorbato libro secondo*, 1614) described the action of the left hand, and placed a ligature under pairs of notes to be slurred, a marking which was always used to indicate the slur. There seems to be no evidence that the slur was used in France, England or Germany at this early date, but Mersenne described it in 1636.



Piccinini introduced some individualistic traits into his playing: although the use of the nails was deprecated by nearly all other writers, Piccinini said that they should be 'a little long, in front of the flesh, but not much, and oval in shape'. He played the rapid '*groppo* that is made at the cadence' with the first finger alone, striking upwards and downwards with the tip of the nail. (This is similar to the vihuela's 'dedillo', which was usually played with short nails.) He also advocated a change of tone colour by moving the right hand nearer or farther from the bridge. In France an increasing number of different right-hand strokes were used. Mersenne gave the traditional fingerings both for chords and single-note passages, and some new strokes which had evidently become popular by then. He described several ways of playing chords, and a system of marking by which each method could be distinguished. Some chords were played downwards with the thumb: others with all the notes played by the thumb except the top one which was played by the first finger; others with the thumb playing the single bass note while the first finger raked the rest of the notes upwards. Unfortunately these detailed notations seem not to have been adopted in other surviving printed and manuscript sources. Nevertheless many of these devices became part of the French Baroque style. In volumes such as Denis Gaultier's *Pièces de luth* (1666), Denis and Ennemond Gaultier's *Livre de tablature des pièces de luth* (*c*1672) and Jacques Gallot's *Pièces de luth* (1681), markings are given for arpeggiating or 'breaking' chords. Some writers described the 'slipping' of the first finger across two notes on adjacent strings to realize a short mordent, usually at a cadence; this characteristic device, which was used well into the 18th century, was shown by three different markings (ex.2).

(b) Gallot: *Pièces de luth* (1684)

Ex.2 Gallot: *Pièces de luth*

Many of these techniques were carefully described in English lute books such as the Mary Burwell Lute Tutor (*c*1660–72, *GB-Lam*) and in Mace's *Musick's Monument*. The techniques were passed on to the German school; a similar variety of strokes is described by Baron who also mentioned a change of right-hand position for tone colour. As in other countries, German sources vary greatly in the extent to which technique marks and left-hand fingerings were added to the tablature, often reflecting the level of attainment of the person for whom they were written.

The development of playing technique was thus closely related to the continual process of extending the resources of the instrument. Moreover, each technique produces particular qualities suited to its own time, and the modern lutenist must know this in order to do justice to the music. Most 'technical' indications, such as vibrato or staccato (see §7 below), or the spreading of chords (indicated by oblique lines separating the notes of a chord; see §8(iii)), come under the general heading of 'graces' (Fr. *agréments*; Ger. *Manieren*), which term adumbrates most aspects of performance as well as ornamentation in treatises, including playing loudly and softly or with rhetorical intent.

7. Ornamentation. The use of what in modern terms would be called trills, mordents, appoggiaturas and vibrato has evidently always been an integral part of the performance of lute music. The fact that in the Renaissance period ornament signs are frequently not included in printed books or manuscripts and are written about comparatively rarely in early tutors may be due to several causes; probably the most important was that there was a living tradition that was considered unnecessary to mention or notate. Another reason may have been that cited by Mersenne, namely that printers lacked the requisite signs in their equipment. These ornaments never acquired a standardized nomenclature or system of signs, although some degree of conformity developed towards the end of the Baroque period.

In the Capirola Lutebook (*c*1517, *US-Cn*), the earliest known source of information, two signs are used: one shows figures notated with red dots; the other consists of two red dots placed over the figure. Of the first sign it is said only that the finger on the lower fret is held firm and another finger is used to 'tremolize' on or from the fret above. The second sign is said to indicate that the note is 'tremolized' with a single finger; it probably represents a mordent.

More precise information was given by Pietro Paolo Borrono in the second printing (Milan, 1548) of the *Intavolatura di lauto* which gives appoggiaturas with both notes carefully indicated by sign. Only the appoggiatura from above is mentioned in the directions, which also say that it is to be played on the beat.

Rudolf Wyssenbach printed a transcription in German tablature (Zürich, 1550) of part of the contents of the Francesco-Borrono book of 1546; half circles are said to indicate *mordanten*, but no further explanation is given. The word *mordanten* appears to have been used in German as a general term for ornaments including the appoggiatura rather than as a specific term for any one type of ornament. It occurs in Martin Agricola's *Musica instrumentalis deudsch* (1529) and was still used by Matthäus Waissel in his *Lautenbuch darinn von der Tabulatur und Application der Lauten* (1592). Waissel's remark that the fingers are put 'a little later on the letters and moved up and down two or three times' indicates (in agreement with Borrono) that the ornament came on or after the beat and not before.

No information appears to have survived concerning ornamentation of French lute music before Besard, who made the following remark:

> You should have some rules for the sweet relishes and shakes if they could be expressed here, as they are on the LUTE: but seeing they cannot by speech or writing be expressed, thou wert best to imitate some cunning player.

Vallet used two signs: a comma, signifying a fall from above the main note (upper appoggiatura), and a single cross, signifying the same thing repeated several times, i.e. a trill. In his *Regia pietas* (1620) Vallet described what is in effect a vibrato, indicated by a double cross.

Mersenne gave the most complete exposition of the art of ornamentation of the period. Excluding minor variants (such as whether a tone or semitone is involved), seven ornaments may be tallied: the *tremblement* (trill); the *accent plaintif* (appoggiatura from below, equal in duration to half the value of the main note); the *martelement* or *soupir* (mordent); the *verre cassé* (vibrato, which Mersenne said was not much used in his time, although it was very popular in the past; in his opinion, however, it would be as bad a fault to omit it altogether as to use it to excess); the *battement* (long trill, more suitable to the violin, he said, than to the lute); a combination (for which no name is given) of appoggiatura from below with trill from above; and a mordent ending with *verre cassé*. He gave a sign to indicate each of the seven types, but remarked that in French music the small comma was generally used to 'express all sorts'.

In Italy, Kapsperger (*Libro primo d'intavolatura di chitarrone*, 1604) placed two dots above many notes to indicate the *trillo*, and also added a sign (an oblique stroke with a dot on either side) below certain chords to show that they were to be arpeggiated. Melli marked the notes on which a 'tremolo' should be performed, but gave no explanation of the meaning of the word, though he described a method of performing an appoggiatura from below by sliding the auxiliary to the main note with a single finger. This is indicated by a ligature above the two notes and appears to be unique in this period. Piccinini, however, gave detailed descriptions of the trill, the mordent and the vibrato, which he called the first, second and third tremolo, but he did not include signs for them in the tablature.

Early English manuscript sources show no ornament signs, but all the books copied by Matthew Holmes (*c*1580–1610, *GB-Cu*) contain them, although their placing is often curious. At least 17 other manuscripts also have signs, and William Barley's *A Newe Booke of Tabliture* (1596) includes the double cross, but with no explanation of its meaning. The only English book of this period containing information on the subject is Robinson's *The Schoole of Musicke* (1603). He gave no signs nor any indication of where the graces should be placed, but he described three that could be used: the relish (perhaps an appoggiatura from above, or a trill); the fall (an appoggiatura from below); and a fall with a relish (possibly the same as Mersenne's combination of lower appoggiatura and upper trill). Robinson said of the relish:

> The longer the time of a single stroke ... the more need it hath of a relish, for a relish will help, both to grace it, and also it helps to continue the sound of the note his full time: but in a quicke time a little touch or jerke will serve, and that only with the most strongest finger.

The variety of graces in use around 1625 is indicated in Table 2, taken from the Margaret Board Lutebook (*GB-Lam*, f.32). Generally, however, the lack of standardization in signs and the absence of any indication of their meaning as used by different scribes poses a formidable problem in interpretation, and it is possible here only to offer some suggestions based on a study of their context in all the available material.

Table 3 shows the signs most generally found in English manuscript sources. Sign (*a*) is often the only sign in a manuscript, and, like the French comma, can be taken 'to express all sorts'. If it appears in company with other signs it seems to signify an ornament from above the main note, perhaps an appoggiatura or trill. Sign (*b*) indicates an appoggiatura from below, a mordent, or a slide (the ornament that comes up to the main note from a minor or major 3rd below). Sign (*c*) appears in the Sampson Lutebook (*GB-Lam*); its possible interpretation as a slide on a major 3rd is discussed below. Sign (*d*) indicates an appoggiatura from below, in the Sampson Lutebook; this

is suggested by the fact that the sign appears before a note which is followed by (*a*), presumably indicating Robinson's 'fall with a relish'. Sign (*e*) is used similarly (*US-Ws* 1610.1). Signs (*f*) and (*g*) (the latter from *GB-Lbl* Add.38539) indicate a mordent, appoggiatura from below or a slide. Sign (*h*) occurs in a limited number of pieces in *GB-Lbl* Add.38539, always on a note immediately preceded by the note above, and often in fairly fast runs. This may be the 'little touch or jerke' mentioned by Robinson, or possibly an inverted mordent. Although the latter was clearly described in Spain from the time of Tomás de Santa María (in *Arte de tañer fantasía assi para tecla como para vihuela*, 1565) to Pablo Nassare (*Escuela musica*, 1724), in Italy by Girolamo Diruta (*Il transilvano*, 1593) and in Germany by Praetorius (*Syntagma musicum*, iii, 2/1619), there is no mention of it in any English source. It would, however, fit into the passages in which the sign is used. Signs (*i*), (*j*) and (*k*) indicate a fall with a relish. In compositions in John Dowland's hand, (*c*), which appears on both open and stopped notes, presumably indicates an upper appoggiatura or trill; (*f*), which appears on stopped notes only, may indicate an appoggiatura from below; and (*b*), which appears on open notes only, may indicate a trill. However, these interpretations are open to question owing to a marked lack of consistency in the application of gracing, and in its notation. Many sources have few, if any, grace marks, and in the final analysis musical intuition has to be the arbiter. (The interpretation of ornament signs in English lute music is further addressed, with somewhat differing results, in studies by Buetens and Shepherd.)

Fashion in ornamentation may have varied from country to country; English players of the first two decades of the 17th century perhaps graced their music to a greater extent than those in any other part of Europe. A Fantasie by Dowland (*GB-Lbl* Add. 38539, f.14*v*), with nine ornaments in the space of five bars, shows an extreme of English practice.

No exact line of demarcation can be drawn between Renaissance and Baroque ornamentation. Most graces used in the earlier period continued in favour, but a few more elaborate combinations appeared. From Mersenne's time onwards, some French manuscripts have a large variety of signs: the comma, 'x' and 'v' for *martelements*, something like an ordinary mordent sign placed under a note, and, to indicate the appoggiatura from below, a bow-like sign placed beneath the tablature letter, very like Mace's sign for a slur. Double shakes or appoggiaturas began to appear. The *étouffement* (Mace's 'tut') is also mentioned in some sources, and the sign 'x' is used. Mace's *Musick's Monument*, in many ways the most thorough study of the French lute, includes (pp.101ff) a list of ornaments, which are summarized in Table 4. He also wrote of loud and soft play and the use of the pause (indicated by a small fermata sign) as additional graces to be observed.

In Denis Gaultier's *Pièces de luth* (1666) less elaboration is found. The two ornaments given are indicated by the comma and the slur and are equivalent to Mace's back-fall and fore-fall. In *Livre de tablature des pièces de luth* by Denis and Ennemond Gaultier (*c*1672) the explanation of the comma shows that the number of falls should be increased according to the length of the note. According to Mary Burwell's teacher, however, Denis Gaultier 'would have no shake at all'. Undoubtedly personal taste

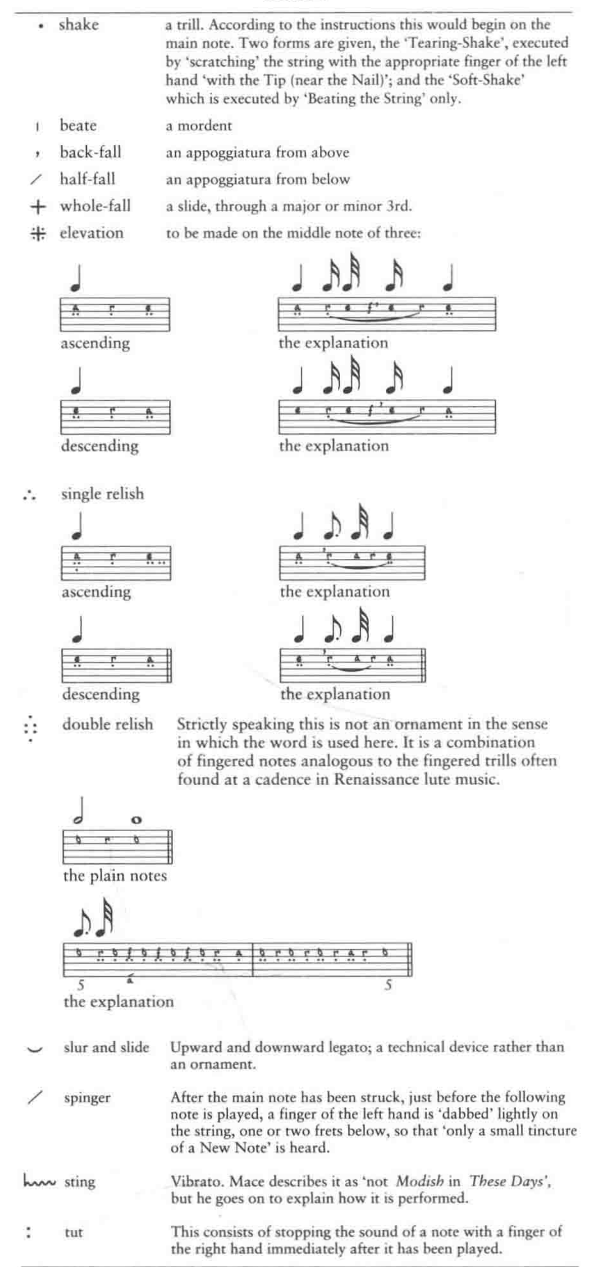

TABLE 4

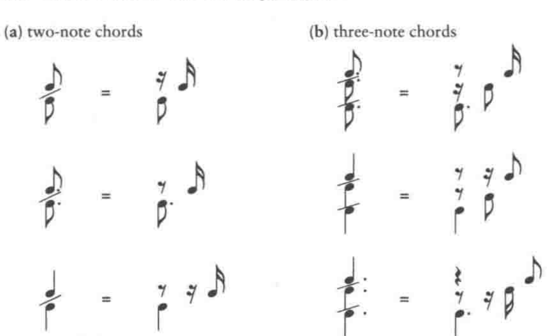
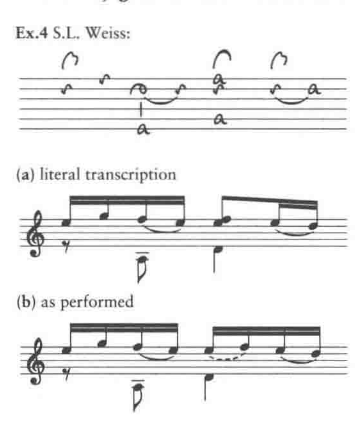
Sign	Name	Description
·	shake	a trill. According to the instructions this would begin on the main note. Two forms are given, the 'Tearing-Shake', executed by 'scratching' the string with the appropriate finger of the left hand 'with the Tip (near the Nail)'; and the 'Soft-Shake' which is executed by 'Beating the String' only.
ı	beate	a mordent
,	back-fall	an appoggiatura from above
/	half-fall	an appoggiatura from below
+	whole-fall	a slide, through a major or minor 3rd.
⁜	elevation	to be made on the middle note of three:
		ascending — the explanation; descending — the explanation
∴	single relish	ascending — the explanation; descending — the explanation
⁘	double relish	Strictly speaking this is not an ornament in the sense in which the word is used here. It is a combination of fingered notes analogous to the fingered trills often found at a cadence in Renaissance lute music.
		the plain notes; the explanation
‿	slur and slide	Upward and downward legato; a technical device rather than an ornament.
/	spinger	After the main note has been struck, just before the following note is played, a finger of the left hand is 'dabbed' lightly on the string, one or two frets below, so that 'only a small tincture of a New Note' is heard.
〰	sting	Vibrato. Mace describes it as 'not *Modish* in *These Days*', but he goes on to explain how it is performed.
:	tut	This consists of stopping the sound of a note with a finger of the right hand immediately after it has been played.



played a part in ornamentation as in all other aspects of performance. Three ornament signs are listed by Gallot: *tremblement*, or trill, indicated by a small comma after the tablature letter; *martelement*, or mordent, indicated by 'v'; *choutte*, or *tombé*, an appoggiatura from below, indicated by an inverted 'v' before the letter. The rhythmical breaking of chords, a universal feature of the French lute style (ex.3; see also §8(iii) below), was explicitly indicated by oblique lines between chord members. The existence of another explicit notation, a vertical line connecting non-adjacent tablature letters, to indicate that the notes are to be struck together, suggests that a certain degree of spreading was in fact normal.

German Baroque lutenists at first consciously maintained the tradition of the Parisian *luthistes*, using many



of the French ornament signs, which they classed under the general heading of *Manieren* (equivalent to *agréments* or 'graces') along with other technical or performance indications. The Breslau lutenist, Esaias Reusner (ii), who was coached by an unknown French lutenist in Paris in the 1650s, used a cross, a comma and a 'fermata' sign (*Delitiae testudinis*, 1667 and *Neue Lauten-Früchte*, 1676) but did not explain their meaning. The context suggests that the comma indicates a trill and the cross a mordent, while the fermata probably represents a pause, as it does for his English contemporary, Mace. Reusner indicated the appoggiatura from below by a bow under the letter. Le Sage de Richée (*Cabinet der Lauten*) gave, together with other information about performing practice, three ornaments: the trill indicated by a comma; the appoggiatura from above, which he called *Abzug*; and the appoggiatura from below (*Fall*). Both appoggiaturas are written out with a bow under the pairs of letters (the explanations are somewhat ambiguous). Radolt (Vienna, 1701) provided an exhaustive list of *Manieren* citing François Dufaut's example. Hinterleithner (Vienna, 1699) explained that the *Abzug* (which he called *Abriss*) divides the ornamented note's duration equally. Trills are only played on dotted notes; on shorter notes they are abbreviated to an *Abriss*. Radolt stressed that the trill always begins on the upper note. Baron (Nuremberg, 1727) used the same signs as Radolt for the appoggiatura from above (*Abziehen*) and for the trill (performed from the upper note, and gradually increasing in speed), but in addition described two forms of vibrato (*Bebung*): one (on the higher strings) performed with the thumb released from the back of the neck, the other with the thumb held firm. He indicated them with a double and slanted cross respectively. Baron added that the ornaments he mentioned were not the only ones that could be used, as many more could be added with the use of skill and taste: 'Every player must judge for himself what sort of affect he wishes to express with this or that ornament'. He also stressed the difference between solo performance, where a player could use more ornamentation and rubato, and ensemble playing, where each player's performing method had to be known in advance and accommodated for the sake of good ensemble. For faster music, Baron remarked that 'the best *Manier* is nothing more than neatness and clarity, and if someone wanted to make many other additions it would be as ridiculous as chasing rabbits with snails and crabs'.

Silvius Leopold Weiss's notational practice was remarkably consistent in his numerous autograph manuscripts. As was common in the period, he tended to use more

Ex.3 Perrine: *Pièces de luth en musique* (1680)

Ex.4 S.L. Weiss:

ornamentation in slow movements, and the ornamental notes are seamlessly integrated into the music, occasionally (especially the *Einfall*) being written out explicitly in the tablature, often using separate strings for the ornamental and main notes, rather than being indicated by signs. This 'two-string appoggiatura' (ex.4) had been in use since the days of the Parisian *luthistes*, but unlike them Weiss frequently used it in an unambiguously melodic context. He used the normal comma sign for an *Abzug* or *Triller*, sometimes extended by repetition, and the bow under a letter for an appoggiatura from below; sometimes, especially at a cadence, this sign extends backwards towards the previous note, even across a barline, looking somewhat like a legato slur (ex.5). The

Ex.5 Weiss:

mordent is marked by a single cross and *Bebung* (vibrato, rarely used by Weiss) by a short wavy line above and to the right of the letter.

There is no surviving treatise or table of ornaments by Weiss although he was much in demand as a teacher. Whereas he was following earlier practice in not using signs to distinguish the *Abzug* and *Triller*, nor the short and long forms of mordent and trill, later players, whose extensive repertory of signs was possibly influenced by the practice of their keyboard-playing contemporaries, became more explicit in their notation. A manuscript from Bayreuth (*c*1750, *D-Ngm* M274) contains two tables of 'Zeichen der Lauten Manieren' ('signs for lute graces') attributable to Weiss's one-time pupil, Adam Falckenhagen. The signs therein correspond with Falckenhagen's printed works and with the tablature version of J.S. Bach's Lute Suite in G minor BWV995, which was probably intabulated by Falckenhagen. Signs which seem to be introduced in these tables for the first time include one for 'gebrochener Bass' ('broken bass'; the fundamental and octave strings of a bass course being rhythmically separated), a sign for staccato or damped ('gestossen') chords, and a sign for the full turn (with a written-out realization equivalent to C.P.E. Bach's *geschnellte Doppelschlag*). A closely related table was printed by J.C. Beyer with his lute arrangements of *Herrn Prof. Gellerts Oden und Lieder* (1760). The principal ornament signs used or explained by Le Sage de Richée, Hinterleithner,

Radolt, Baron, Weiss, Falckenhagen and Beyer are summarized in Table 5.

From the early years of the 16th century until the end of the 18th, the use of graces was an integral part of performing practice on the lute as it was on the harpsichord. Because of its lack of sustaining power (compared with bowed instruments) these devices were essential, especially in slower music. Finally the necessity promoted the fashion and composers expected graces to be added, whether or not they were actually indicated, since they were an essential feature of lute style.

During the 17th and 18th centuries the art of ornamentation received careful attention in numerous treatises on singing and on playing various instruments, and also in composers' prefaces to their works: this valuable information is often applicable to the lute as well as to the particular subject under consideration (for further details *see* ORNAMENTS).

8. REPERTORY. From the 1270s, when Jehan de Meung in *Le roman de la rose* mentioned 'quitarres e leüz', the presence of the lute in western Europe is evident in literary sources, court records and inventories. The Duke of Orléans is said to have had in his service in 1396 'un joueur de vièle et de luc' called Henri de Ganière. The names of a few players from other parts of Europe have also survived, such as a certain Obrecht in Basle in 1363, and the brothers Drayer, minstrels at Mechelen from 1371 to 1374. During the 14th century, representations of the lute in drawings, paintings and sculpture became common, often in combination with other instruments, sometimes accompanying one or more voices.

Extant 15th-century records mention sums of money paid to lute players in service at the French court. In 1491 for example, Antoine Her, a lute player of the chamber royal, received a monthly stipend of 10 livres and 10 sols. The great esteem in which virtuosos were held is evident in the case of Pietrobono, who served the Este family at the court of Ferrara from about 1440 until his death in 1497. Other courts competed for his services; he was widely travelled, became a rich man and was celebrated by poets and writers of the time (including Tinctoris). Surviving documents imply that he accompanied himself in singing and that he was associated with another player who was listed as a 'tenorista' – possibly another lute player or a viol player who, in either case, would have supplied a 'tenor' against which Pietrobono would have improvised. He seems to exemplify an age in which Italian lute players were passing from a style that had been mainly improvisatory to one in which, as Tinctoris suggested, a full training in the technique of contrapuntal writing or playing was essential.

This development was associated with the change from playing the lute with a plectrum to using the right-hand fingers. Whereas previously the lute had been a melodic instrument, it could now be used for polyphony. This in turn soon led to the invention of special forms of notation to overcome the particular problems involved in transmitting the music to the written or printed page. Examples

TABLE 5

	Sign	*Le Sage de Richée*	*Hinterleithner*	*Radolt*	*Baron*	*Weiss*	*Falckenhagen*	*Beyer*
(*a*)		Triller (increasing in speed)	Triller (played as *b* on short notes)	Triller (starting on main note)	Trillo	[Abzug (=*b*) or Trillo, depending on context]	Abzug (=*b*)	Abzug (=*b*)

(*k*)							(turn)	
(*l*)								Circulo mezzo (? = *k*)

of German, French and Italian tablatures from the end of the 15th century have come to light, but these fragments reveal little about the early repertory. In addition, there are in the Segovia Cathedral manuscript some instrumental duos with elaborate divisions by Tinctoris, Agricola and others that well suit the lute and clearly reflect the improvisational demands on players of the time; one of these in particular, a setting of Hayne van Ghizeghem's *De tous biens plaine*, ascribed to Roellrin, also appears in a German manuscript (*PL-Wu* Mf.20161) and is unlikely to have been playable on any other contemporary instrument. Some of the compositions in the earliest printed sources show a similar style.

A common thread that runs throughout the history of lute playing is the improvisatory skill of the great performers. For this reason, most of the repertory was probably never written down. Lute playing was passed on by individual tuition, and many lute manuscripts were compiled by teachers for their pupils, and supplemented (sometimes somewhat inexpertly) from memory by the pupils. These circumstances, combined with the irrecoverable loss of a great many sources, account for the fact that much lute music in manuscript carries no composer's name, and, as much in the Baroque period as in the Renaissance, there is frequently divergence between versions of the same piece in different sources, especially in matters concerning performance. For a fuller discussion of lute sources, with illustrations, *see* SOURCES OF LUTE MUSIC.

(i) Italy. The earliest surviving significant Italian lute source is a heart-shaped manuscript (*I-PESo* 1144) partially copied in the last decades of the 15th century and possibly of Venetian origin. Unusually, it is notated in a rudimentary form of French lute tablature (the rhythm-signs and sporadic barring being apparently based on the position of the *tactus* rather than on note durations) using letter-ciphers rather than numbers. This early layer of the manuscript, which includes one piece for seven-course lute, contains a few song arrangements (including the ubiquitous *De tous biens plaine*), a number of ricercares in improvisational style, and a single bassadanza, a setting of the well-known basse danse tenor *La Spagna*. From the first decade of the 16th century the Venetian printing press of Petrucci distributed music by the early lutenist-composers of the Italian school, whose influence was felt throughout Europe for the entire 16th century. Although Marco Dall'Aquila obtained a Venetian privilege to print lute music in 1505, no such publications by him have survived. Petrucci published six volumes of lute tablature between 1507 and 1511. The first two books, entitled *Intabulatura de lauto* (1507), contain works by Spinacino, mainly for solo lute but there are also a few duets. There are 25 pieces called 'recercare' but most of the pieces are intabulations of Flemish chansons (from the 1490s) originally for voices. The *Intabulatura de lauto, libro tertio* (1508), devoted to music by Gian Maria Hebreo, is now lost; the *Libro quarto* by Dalza (1508) contains dances and a few intabulations of frottolas by contemporary Italians such as Tromboncino. These books include rudimentary instructions for tablature reading and right-hand technique. Songs for solo voice and lute appeared in the *Tenori e contrabassi intabulati col sopran in canto figurato per cantar e sonar col lauto* (*Libro primo*, 1509; *Libro secundo*, 1511), in which the lutenist Franciscus Bossinensis intabulated the lower parts of frottolas whose vocal originals had already been printed by Petrucci. The first book contains 70 such compositions, the second 56; each contains 20 or more ricercares as well. The six Petrucci volumes form a substantial collection of first-rate music in what must have been a well-established tradition of lute writing. The types of composition they contain evidently reflect the unwritten procedures of late 15th-century lute playing. The 'first phase' of Italian printed books for lute included one more collection of frottolas with voice part and tablature, by Tromboncino and Marchetto Cara. The sole extant copy is undated, but it certainly appeared in the 1520s.

Among the earliest examples of Italian lute music are two pieces in a Bologna manuscript (after 1484, *I-Bu* 596). The first page gives an explanation of the tablature headed 'La mano ala viola'. There has been some discussion about the meaning of 'viola' in this instance but, since the discovery of Francesco Canova da Milano's *Intavolatura de viola o vero lauto* (Naples, 1536/*R*), it is clear that it refers to the flat-backed, waisted instrument which closely resembles the Spanish vihuela and which was considered suitable for playing lute music. The form of tablature used in this case is the rare 'Intavolatura alla Napolitana' in which the second volume of Francesco's book is printed and which is explained in Michele Carrara's *Regola ferma e vera* (Rome, 1585). In appearance it resembles Italian tablature but it is the reverse way up, with the figures for the lowest course lying on the bottom line of the staff. The figure 1 is used throughout for the open course.

Few contemporary manuscripts survive, but two are of special importance, both of Venetian provenance. The earlier (*F-Pn* Rés.Vmd 27) dates from the first decade of the 16th century, and, like the earlier Pesaro manuscript, the tablature for the most part omits bar-lines and rhythm-signs. It comprises two sections, the first of which contains 25 ricercares, dances and frottolas for solo lute; a ricercare and the bassadanza on *La Spagna* are also found in the Pesaro manuscript. The second section contains lute accompaniments to 89 frottolas without the vocal melody. The other manuscript, the Capirola Lutebook (*c*1517, *US-Cn*), beautifully written and adorned with drawings by a pupil expressly to ensure its preservation, includes instructions for playing and the use of ornamentation (see §7 above). The composer, Vincenzo Capirola (*b* 1474; *d* after 1548), was clearly the outstanding figure of the earliest period of written lute music.

The acknowledged leader of the following generation, and one of the most famous lutenists of any age, was Francesco Canova da Milano. He was already famous for his remarkable skill at improvisation (his contemporaries often referred to him as 'Il divino') when his first works were published: *Intabolatura di liuto* (Venice, 1536), and the above-mentioned *Intavolatura de viola o vero lauto*. Some 120 to 150 of his compositions are known today; many continued to appear in print until late in the century and also appeared in manuscript collections in several countries besides Italy. Francesco's lute music consists chiefly of pieces entitled ricercare or fantasia. He expanded the scope of the quasi-improvisatory ricercare of the older generation of composers, often making greater use of sequence, imitation and repetition, and sometimes writing in the strictly contrapuntal style that became characteristic of the ricercare during and after the latter part of the 16th

century. There are also many intabulations of chansons and other vocal works, most of which were published after Francesco's death. (For a modern edition of Francesco's lute works see *The Lute Music of Francesco Canova da Milano (1497–1543)*, ed. A.J. Ness, HPM, iii–iv, 1970.)

From 1536 onwards, publishers, clearly exploiting a growing level of demand from dilettante players, frequently issued lute music in books devoted to more than one composer's music. Five distinguished lutenist-composers are represented in the *Intabolatura de leuto di diversi autori* published by Castiglione (Milan, 1536); as well as fantasias by Francesco himself, there are several of comparable quality by Marco Dall'Aquila, Giovanni Giacopo Albuzio and Alberto da Ripa, as well as dances by Pietro Paulo Borrono.

Marco Dall'Aquila is the most important figure immediately preceding Francesco. A number of his works were printed, but most, including several which may originate from a lost print, are collected in a Munich manuscript (*D-Mbs* 266). The challenge of marrying a strictly imitative compositional style to the technical resources of the lute was also taken up by Alberto da Ripa (works ed. J.-M. Vaccaro, CM, *Corpus des luthistes français*, 1972–5), whose fantasias, often of considerable length, further add a telling use of expressive dissonance. Borrono seems to have specialized in dance music, although he also composed fantasias. His excellent dances are usually arranged into suite-like groupings of three or more pieces, sometimes with a concluding toccata.

Borrono published several collections of his own works and those of Francesco from 1546 onwards. In that year a large number of publications appeared containing works by minor composers such as Giulio Abondante, Melchiore de Barberiis, Giovanni Maria da Crema, Marc'Antonio Pifaro, Antonio Rotta and Francesco Vindella. Alongside idiomatic dances, fantasias and ricercares appears an almost equal number of arrangements or 'intabulations' of ensemble music, usually originally written for voices but occasionally of instrumental music by Julio Segni and others. Often these are hard to distinguish from original lute compositions, and recent research has begun to reveal that extracts of previously composed works were sometimes incorporated without acknowledgement into lute ricercares by many lutenists of the period, including Francesco himself.

Among the great number of Italian composers for the lute working in the second half of the 16th century, none reached the stature of Francesco Canova da Milano, although Giacomo Gorzanis (from 1561 to 1579), Giulio Cesare Barbetta and Simone Molinaro (1599) published some excellent works. All the current types of composition are represented in their works: ricercares and fantasias in the contrapuntal style developed by Francesco; intabulations of vocal originals; settings of dances, including the various popular grounds such as the *passamezzo antico*, the *passamezzo moderno* and the romanesca, as well as other famous tunes of the time. Much of this music was for solo lute, but a collection of dances for three lutes by Giovanni Pacoloni, long thought to have been lost, survives in an edition printed by Pierre Phalèse (i) in Leuven in 1564. In 1559 some of Francesco Canova da Milano's ricercares were published by the Flemish composer Ioanne Matelart as *Recercate concertate*, that is, with a second lute-part or *contrapunto*, ingeniously converting the original solos into duets. Until the middle of the 16th century, lute music was generally within the prevailing modal ideas of the time, although some composers occasionally departed from strict modal structure. In 1567, however, Gorzanis produced a remarkable manuscript of 24 passamezzos, each with its accompanying saltarello, in major and minor modes on all the degrees of the chromatic scale, rising in succession.

True chromatic writing for the lute was rare, although by the end of the century it was beginning to be exploited, notably in works by the Genoese *maestro di cappella*, Simone Molinaro. The few surviving fantasias by the important Neapolitan composer and lutenist Fabrizio Dentice show a great command of the instrument and its contrapuntal possibilities; they are technically demanding, being consistently written in four real parts.

Vicenzo Galilei was another important figure of the period, though he is less known today as a composer than as a writer; his theoretical and practical studies are contained in books printed between 1568 and 1589, while further prints and manuscripts preserve a large body of his excellent lute music (extracts ed. in IMi, iv, 1934). At this time Italian lutenists were in demand throughout Europe; Galilei's gifted younger son Michelangelo (1575–1631) worked as lutenist for the Polish and Bavarian courts (it was said that his brother, the scientist Galileo, was an even finer player). Diomedes Cato and Lorenzini were outstanding composers, each with a very personal style. Diomedes served the Polish court for many years, while Lorenzini, said to have received a papal knighthood for his lute playing, was unsuccessfully approached by Lassus as a recruit for the Kapelle of the Duke of Bavaria. His technically demanding and expressive music was later collected and published by a pupil, the French lutenist Besard, in his *Thesaurus harmonicus* (Cologne, 1603). Another distinguished lutenist who does not seem to have left Italy, Giovanni Antonio Terzi, published two books of his own fine music (1593 and 1599) – fantasias, vocal intabulations and dances – mainly for solo lute but including music for two and four lutes as well as lute parts to be played with other instruments. In Terzi's second collection the 'courante francese' appears for the first time in Italy, presaging the changes in musical style and lute technique that were to result in French dominance of the lute scene for most of the following century.

French influence in dance music becomes increasingly important in the few Italian lute collections of the 17th century, although the expressive Italianate toccata style holds sway in freely composed genres. Michelangelo Galilei (1620) composed suites each comprising an introductory toccata effectively exploiting expressive dissonance followed by a sequence of dances in French style. This quasi-improvisatory style was taken somewhat further in the collections for lute and chitarrone or theorbo (1604, 1611 and 1640) by the lutenist and theorbist of German extraction, Giovanni Girolamo Kapsperger, whose idiosyncratic works have been compared with those for keyboard by his Roman colleague, Frescobaldi. A more reserved figure is Kapsperger's Bolognese rival, Alessandro Piccinini, who was capable of fine works in a severely contrapuntal idiom as well as tuneful dances, virtuoso variations and expressive toccatas, frequently using chromaticism to good effect. A number of pieces by various members of the Garsi family

of lutenists from Parma are found in a variety of manuscript sources, suggesting that their music was especially popular among dilettante players such as the owner of one such book (*PL-Kj* Mus Ms 41053), the Polish or White Russian nobleman K.S.R. Dusiacki (*see* GARSI, SANTINO).

By the 1620s the lute in Italy was normally fitted with several extra bass courses. A full octave of open basses on an extended neck was standard on the *liuto attiorbato* (the 'theorboed lute') as used in the French-influenced works of Pietro Paolo Melli who, unusually, experimented with scordatura tunings. This type of instrument, whose larger cousin, the *arciliuto* (archlute), was principally (although not exclusively) used for accompaniment from around 1680, was also called for in the highly virtuoso music of Bernardo Gianoncelli (1650), and again in the Corellian sonatas of Giovanni Zamboni (1718). Lute tablature was by this time virtually obsolete in Italy, although the instrument was used throughout the 18th century. The last significant sources, Filippo Dalla Casa's manuscripts of 1759 (*I-Bc* EE155; ed. O. Cristoforetti, 1984), are written entirely in staff notation, a fact which raises the question as to whether more Italian lute music may survive in this form as yet unrecognized.

(ii) Germany, Bohemia and Austria. Although based in Italy, many of the important figures in the early history of the lute were in fact German, notably the 15th-century blind organist, harpist and lutenist Conrad Paumann, who is said to have invented the German lute tablature system. Outside Italy the first printed lute music appeared in the Germanic states of the Holy Roman Empire. Virdung included instructions for the lute and one piece as a pedagogical illustration. Schlick's *Tabulaturen etlicher Lobgesang und Liedlein* (1512) contains 14 songs for voice and lute and three solo pieces. Judenkünig's *Utilis et compendiaria introductio* (*c*1515–19) and *Ain schone kunstliche Underweisung* (1523) both include instructions for playing as well as music. The first contains solo lute intabulations of settings of Horace's odes by Petrus Tritonius published for voices in 1507, together with other similar pieces and dance music; the second is a mixture of dances, lute versions of vocal originals, and five pieces called 'Priamel', corresponding to the Italian ricercare. Gerle (1532) gave instructions and music for viol and rebec as well as for lute; his book was reprinted in 1537, and in 1546 a revised and enlarged edition was published. His *Tabulatur auff die Laudten* (1533) comprises music for solo lute, including intabulations and pieces entitled 'Preambel'.

The publications of Hans Neusidler began with his book of 1536. He was the first writer of instruction books to show real pedagogic talent; not only did he give clear instructions for both right and left hands, but his pieces are carefully graduated, leading the beginner by gentle degrees through the initial difficulties. Two modified tunings are found in his work: one, known as 'Abzug', consisted in lowering the sixth course by a tone, and the other was used in his *Judentanz*. (The scordatura notation of this piece has been misread by some scholars, who thereby mistook it for an early example of polytonality.)

Collections of music in German tablature continued to be printed until 1592, some under the name of the publisher, such as those of Rudolf Wyssenbach (1550) and Bernhard Jobin (1572), others by composer, collector or arranger, such as those of Sebastian Ochsenkun (1558), Matthäus Waissel (1573, 1591, 1592) and Wolff Heckel (including music for two lutes, 1556, 1562). A total of about 20 or 30 volumes appear to have been printed. Most of these show considerable influence from Italian, French and even Spanish music of the time.

The German system of lute tablature was in use not only in Germanic countries, but was also widespread throughout central and Eastern Europe. Its earliest appearance (the Königstein Liederbuch; *see* SOURCES OF LUTE MUSIC, §3), however, records a few single-line melodies which may be more suitable for a bowed instrument (identical tablature notation systems were often used for plucked and bowed instruments until well into the 18th century). Although there have been a number of studies of German lute tablature sources, the general lack of modern editions reflects the reluctance of modern lutenists to play from German tablature, which is commonly perceived as more difficult to read than the French or Italian systems. The relative importance of German lute sources has thus been consistently undervalued in the modern revival.

Many of the surviving manuscripts have evident associations with a university milieu, and these 'student' lutebooks often incorporate an anthology of Latin verses (frequently amorous), classical quotations and wise proverbs. Their musical content is sometimes less edifying, but they are valuable as repositories of a very wide range of styles and types of music, from solo pieces (fantasies, preludes etc.), complex intabulated vocal polyphony from the French, Italian and Flemish repertory as well as German chorale settings and *Gesellschaftslieder*, through to otherwise unrecorded dance and 'folk' music, often explicitly labelled with a regional origin. Some of the dance music can be shown to have its origins in polyphonic music and in the repertory of the *Stadtpfeifer*. An interesting characteristic is the late survival in lute sources of otherwise obsolete genres such as the *Tenorlied* and the *Hoftanz*. From the late 16th century onwards, formerly popular *Hoftänze* are often classed as 'Polish dances' in German lute sources. In manuscript and printed sources, the non-German music included tends to be predominantly Italian in the early 16th century, but by the end of the century a scattering of French, Polish and other Slavic, Hungarian and other Eastern European, and, increasingly, English dances are identified, many of which prove to be unique survivals.

After 1592, German publications for the lute used either Italian or French tablature, although German tablature continued in manuscript sources until about 1620. Important printed collections were those of Adrian Denss (*Florilegium*, 1594), Matthias Reymann (*Noctes musicae*, 1598) and Johann Rude (*Flores musicae*, 1600); these are extensive collections of pieces from the international repertory, and similar compilations continued to appear in the 17th century. The most important of these anthologies was Besard's *Thesaurus harmonicus* (Cologne, 1603), mentioned above in connection with Lorenzini, Besard's lute teacher in Rome, whose works occupy a central position in the volume. Others were those of Georg Leopold Fuhrmann (*Testudo gallo-germanica*, Nuremberg, 1615), Elias Mertel (*Hortus musicalis*, Strasbourg, 1615), and Johann Daniel Mylius (*Thesaurus gratiarum*, Frankfurt, 1622).

Probably as a consequence of the Thirty Years War (1618–48), little music for the lute was published in

German-speaking lands until much later in the century. A few manuscripts, and the evidence of paintings and literary sources, suggest, however, that the instrument continued in regular use, in solos and for accompanying the voice. Among the most important manuscripts is that compiled by Virginia Renata von Gehema in Danzig (now Gdańsk) around the middle of the century (*D-Bsb* Mus.ms.40624). In common with most such collections, it consists mostly of music by French lutenists such as Mesangeau, the Gaultiers, Dufaut and Pinel, or by their German imitators, leavened with German song settings (and, in this particular case, by an unusual number of Polish dances). The French influence extended to the use of the *accords nouveaux* on lutes with ten to twelve courses. Esaias Reusner (ii), who studied with a French lutenist, in his two published collections (1667 and 1676) mostly used the D minor tuning that was rapidly becoming the standard, but also employed other tunings in a highly idiomatic fashion. While Reusner's debt to French models, especially Dufaut, is clear, his music is characterized by an increasing tendency towards a cantabile melodic style and an expressive use of dissonance. Philipp Franz Le Sage de Richée seems to have worked for Baron von Niedhardt in Breslau, capital of the German-speaking province of Silesia, a region of much importance in the subsequent history of lute music. In his *Cabinet der Lauten* (n.p., n.d.; the copy formerly in Riemann's possession bore the date 1695), he praised Gaultier, Dufaut, Mouton (his former teacher) and the influential Bohemian aristocratic lutenist Count Jan Antonín Losy. His valuable lute-playing instructions were frequently copied into manuscripts and his book was – most unusually – reprinted as late as 1735. A more mysterious figure is Jacob Bittner who a decade earlier published a highly accomplished collection of *Pieces de lut* (Nuremberg, 1682).

In the Hapsburg lands of Austria and Bohemia, French influence on lute music was, if anything, even stronger, and it seems likely that several French players visited the region. Among the large number of items of lute and guitar music assembled in the great library of the Lobkowitz family at Roudnice are several that suggest close personal contact with Mouton, Gallot and others, including the guitarists Derosiers and Corbetta. Local composers for the lute, like their German counterparts, tended to imitate the French, while adding touches of Italianate melody, explicitly in the case of movements labelled 'Aria', which may reveal the increasing influence of opera. By 1700 the lute was unmistakably an 'aristocratic' instrument in Vienna, although T.B. Janovka (*Clavis ad thesauram magnae artis musicae*, Prague, 1701/*R*, 2/1715/*R* as *Clavis ad musicam*) stated that lutes were so plentiful in Prague that the houses could be roofed with them. The Viennese lutenists Ferdinand Ignaz Hinterleithner (1699) and Baron Wenzel Ludwig von Radolt (1701) dedicated their published works to successive music-loving emperors, although neither contains much music of any inspiration; they are both collections of chamber music for lute with other instruments. Their younger contemporary J.G. Weichenberger left no published collection, and much of his music is lost, but what remains shows some fine qualities, especially in his extended improvisatory preludes.

Count Jan Antonín Losy von Losinthal, the 'Prince among lutenists' according to Le Sage de Richée, left a significant number of works in manuscript in an idiomatic and appealingly mixed French/Italian style. He is best known, however, as the posthumous dedicatee of a *tombeau* composed on his death (1721) by the greatest lutenist of the following generation, Silvius Leopold Weiss (1686–1750), whose influence was felt throughout the German-speaking world. Weiss's long career embraced early employment in his native city of Breslau, an extended stay in Italy (1708–14) and a lengthy period of employment as one of the stars of the Dresden musical establishment (1717–50). A larger body of music by him survives than by any other lutenist of any age (over 650 pieces) dating from all periods of his life, although establishing a reliable chronology for Weiss's works is extremely difficult. In his multi-movement pieces, which he always called 'sonatas', he took the standard constituent dance forms of the French suite, working them out into impressive structures, often, especially in the later music, of great length. Some require a great deal of virtuosity in performance, but all remain highly idiomatic for the lute. In slower movements, such as sarabandes and allemandes, Weiss used a three-part texture, the inner voice contributing greatly to the expressive effect, while in faster music such as courantes, gigues and other virtuoso finale movements, the texture becomes predominantly two-part. Many of his sonatas are on an unprecedentedly large scale; they can take up to 30 minutes in performance. Most, however, do not survive with integral preludes; these are sometimes found added later to the manuscripts, in a few cases by Weiss himself. This suggests that he supplied them as substitutes or models for a movement that he expected an expert player to improvise. These highly expressive quasi-improvised preludes and fantasies, often employing chromatic harmony, represent some of Weiss's most characteristic music. He also composed a good deal of music of a more contrapuntal nature in fugal sections of overtures and fantasies as well as in a number of self-standing fugues.

Among the pieces of J.S. Bach believed to have been intended for the lute (or lute-harpsichord, and thus in direct imitation of lute style) are some fugues (BWV997, 998) which extend the demands on the player beyond the normal bounds of idiomatic technique. Bach, although usually restrained in the simultaneous activity of the voices in these works, builds towards contrapuntal climaxes in four real parts, whereas Weiss ingeniously gives the impression of more complexity than in fact is present. Several of Bach's lute works are adaptations of music originally for solo cello or violin which he made himself or are the work of contemporary lutenists (e.g. BWV997 and 1000, tablature versions by J.C. Weyrauch; BWV995, arranged by Bach, tablature version probably by Adam Falckenhagen), a precedent which has been successfully followed by many of today's players. Bach clearly admired the instrument, writing expressive obbligato solo parts for the original versions of the St Matthew and St John Passions and using a pair of lutes in the *Trauerode*. The suite for harpsichord and violin BWV1025, for some time suspected as a spurious work, has been shown to be an arrangement of a lute sonata by Weiss, and contemporary references testify to the two composers' acquaintance and mutual respect.

Weiss was the pre-eminent leader among a flourishing community of both amateur and professional lutenists in his time. Among the best-known were Wolff Jacob

Lauffensteiner (1676–1754), Adam Falckenhagen (1697–1754), and the Breslau-born players Ernst Gottlieb Baron (1696–1760), already mentioned as an early historian of the lute, and Weiss's pupil Johann Kropfgans (1708–*c*1771). Lauffensteiner's music, and that from the early careers of Baron and Falckenhagen, is similar in style to that of Weiss (which leads to some confusion in manuscript sources). By the 1740s, however, lute composers began to prefer a simpler two-part texture, with increased treble–bass polarization. Later lutenists, such as the expert keyboard player and student of J.S. Bach, Rudolf Straube (1717–*c*1780) and the Bayreuth violinist Joachim Bernhard Hagen (1720–87), were affected by the somewhat different idioms of their principal instruments, and no trace of influence from the earlier French lute tradition remains. All these players, including Weiss himself, composed chamber works for the lute with other instruments, including concertos, although in the case of Straube and, most regrettably, of Weiss himself, none survive in complete form. There was a continuing demand for lute music among German amateurs, as is shown by the large quantity offered for sale in Leipzig; over 200 solo works, 23 lute duets, over 150 trios for lute, violin and bass, and 50 concertos for lute with string ensemble feature in various Breitkopf catalogues between 1761 and 1771. A significant repertory of vocal music arranged for the lute, sometimes fully texted, together with occasional written references to the practice, suggests that the lute at least in some circles maintained its traditional role in domestic situations as an accompaniment to the voice. The use of the larger and louder theorbo as a continuo instrument in church and opera house continued as long as there were expert players; Weiss performed in all the Hasse operas in Dresden until late in 1749, and Kropfgans took part in Hiller's operettas in Leipzig for another two decades after that. Carl Maria von Weber heard Weiss's son, Johann Adolf Faustinus Weiss, play the theorbo in the Dresden Hofkirche as late as 1811.

Questions of authenticity surround the handful of early works by Haydn in contemporary versions for lute with other instruments, in which the first violin part of a quartet, transposed down an octave and furnished with a simplified bass line, is given to the lute. Some highly idiomatic music in a similar style was composed by the Viennese lutenist Karl Kohaut (1726–82; like Haydn, a member of Baron van Swieten's circle), including ensemble *divertimenti*, some challenging concertos and a single surviving solo sonata. Towards the end of the century Friedrich Wilhelm Rust composed a set of three sonatas for lute and violin (dated 1791 on one manuscript, but probably composed some years earlier). The last work for solo lute was a set of 12 variations by Christian Gottlieb Scheidler (*d* 1815) on a theme by Mozart, inspired by the first performance of *Don Giovanni* in Prague in 1787.

(iii) France. Although the Pesaro manuscript (see §8(i) above) was written in 'French' tablature, its repertory and origin are exclusively Italian. The first printed French tablature, using a five-line staff, appeared in Guillaume Vorstermann's *Livre plaisant et tres utile* (Antwerp, 1529), a translation of Virdung's book of 1511. Virdung's musical example was replaced with the Flemish chanson *Een vrolic wesen* (in organ tablature and staff notation as well as for lute). Also in 1529 Pierre Attaingnant at Paris printed his *Tres breve et familière introduction*; his *Dixhuit basses dances* of 1530 contained some 66 lute pieces (for a modern edition of some of Attaingnant's music, see *Preludes, Chansons and Dances for the Lute*, ed. D. Heartz, 1964).

Between 1551 and 1596 Adrian Le Roy printed books of music for guitar and cittern as well as for lute. His surviving lutebooks extend from *Premier livre de tablature de luth* (1551) to *Livre d'airs de cour* (1571) for voice and lute. His instructions for playing the lute survive in English translation, and give a clear description of the technique used in France at the time.

Guillaume Morlaye was associated with the printer Michel Fezandat, also of Paris, who brought out not only Morlaye's own works (1552–8) but also those of the Italian, Alberto da Ripa (1552–62). Julien Belin's *Premier livre* (1556) was printed by Nicolas Du Chemin, and Giovanni Paolo Paladin's (1560) at Lyons by Simon Gorlier.

In the latter part of the 16th century French music publishing declined somewhat, and few lutebooks were issued except for some reprints of earlier works. With the increase of diapason strings, the use of a five-line tablature staff gave way to six lines, and around the end of the century further changes began to appear. Somewhat earlier, the term 'à cordes avallées' had been used in one of Gorlier's guitar books to denote the lowering of certain strings. The application of this term to the lute in Anthoine Francisque's *Le trésor d'Orphée* (1600) signified a departure from the basic Renaissance tuning and foreshadowed a period of transition in which many tuning systems were adopted, though the old set of intervals continued in use for some time (see §5 above). The most notable collection of this period was Besard's *Thesaurus harmonicus* (1603); the same editor's *Novus partus* (1617) includes several pieces for an ensemble of lutes and instruments or voices as well as for solo lute. The ten-course lute figured largely in the books of Robert Ballard (ii) (1611, 1614) and of Vallet (1615, 1619, 1620), who also included a set of pieces for a quartet of lutes. Other distinguished composers for the lute in *vieil ton* include Julien Perrichon, Victor de Montbuisson, Mercure d'Orléans and Charles Bocquet. Their excellent works include a number of preludes or other improvisational genres, although dance music predominates.

Together with the increase in the number of diapason strings and the new tunings a marked change of style became apparent. Preludes, courantes, voltas and sarabandes became the favourite forms in the first decades of the 17th century, while intabulations of polyphonic music and the contrapuntal *fantasie* all but disappeared. The characteristic form of French lute song, the *air de cour*, sprang from the elaborate court ballets, and flourished between 1571 and 1632.

The eight volumes of *Airs de différents autheurs* (1608–18), the first six of which were arranged by Gabriel Bataille, include works by all the finest French songwriters of the time and show the influence of *musique mesurée à l'antique*. Although the exact setting of long and short syllables was not always strict, the verbal rhythms and poetic structure became of prime importance, and the restriction of the bar-line almost entirely disappeared. Many songs of great beauty were written in this style, notably by Pierre Guédron. (See also *Chansons au luth et airs de cour français du XVIe siècle*, ed. L. de La Laurencie, A. Mairy and G. Thibault, 1934; and *Airs de*

cour pour voix et luth (1603–1642), ed. A. Verchaly, 1961.)

Early works by René Mesangeau and Ennemond Gaultier use the *vieil ton*, but both composers left a larger body of music in the later tunings. Gaultier in particular favoured the D minor tuning which was to become the norm by the mid-17th century. Three important anthologies under the title *Tablature de luth des différents autheurs sur les accords nouveaux* were issued at Paris by Pierre Ballard (1623, 1631, 1638); unfortunately the earliest does not survive. These present informal 'suites' of dances grouped by composer and tuning (strongly associated with key); although the numbers of each dance vary, the order of the 'core' component movements – allemande, courante, sarabande – remains fixed. Among the dances, which include sets of branles, there are a few song settings. Some of the composers, including Belleville and Chancy, were fashionable dancing masters who were closely associated with the *ballet de cour*; others, especially Mesangeau, Pierre Dubut *le père* and François Dufaut, together with the eminent royal musician Germain Pinel, were prominent and influential lutenists whose works make up a large proportion of the manuscript repertory preserved in France, Britain and German-speaking countries during the rest of the century.

Coinciding with the emergence of the D minor tuning as the favourite *accord nouveau*, the 11-course lute (see §3 above) became established as the norm, and seems to have ousted the 12-course instrument in France by the middle of the century, although the latter retained its popularity in Britain, Germany and the Netherlands for much longer. Players such as Dufaut and Dubut *le père* adapted to the new tuning with great success, while a new generation of lutenists, among them Denis Gaultier, Jacques Gallot and Charles Mouton produced a major body of expressive work in the classic *style précieux* of the Paris salon. In the pursuit of rhetorical expression (a goal made explicit in the famous and sumptuously decorated manuscript of Denis Gaultier's music, *La rhétorique des dieux*, Paris, *c*1652; ed. A. Tessier, PSFM, vi–vii, 1932/*R*) a variety of strokes and fairly extensive ornamentation were expected, even more than those specifically indicated in the notation, and the use of *notes inégales* was also left to the taste and discretion of the player. (For the solo lute music see *Corpus des luthistes français*, a series produced by the CNRS, 1957–.)

An integral characteristic of the music of the French Baroque school was a convention of performance, reflected in the notation, that came to be known as *style brisé*; in many passages the notes of the treble and bass (or other voices) were sounded one after another (the bass first) instead of simultaneously as was the more general practice in polyphonic music. A related feature was the rhythmic breaking or arpeggiation of chords that were often written plain. This could be indicated by oblique lines placed between the component notes; often, however, such signs, like the explicit notation of *notes inégales*, were omitted altogether. Perrine, in a passage addressed to harpsichordists as well as lutenists, referred to the convention as 'the special manner of playing all sorts of lute pieces'; ex.6 shows the interpretation given in his *Pieces de luth en musique* (1680). It was this style in particular that exerted a considerable influence on the writing of contemporary keyboard players and visitors such as the young Froberger. These conventions in the performance of French lute music were clearly considered characteristic of the genre by Germans adopting the French lute style. They are almost always more explicitly notated in the many important German sources of 17th-century French lute music which formed the basis of the German repertory well into the 18th century. Since, furthermore, these manuscripts often preserve large numbers of works (for example, by Dufaut, Gallot and Mouton) not found in French sources their importance is considerable.

(iv) The Netherlands, Spain and eastern Europe. In Antwerp Guillaume Vorstermann, who had published the French translation of Virdung's *Musica getutscht*, brought out a Flemish translation, *Dit is een zeer schoon boecxken ... opt clavecordium luyte ende fluyte* (1554, 2/1568). Of greater scope were the activities of Pierre Phalèse (i), whose first lutebook, *Des chansons reduictz en tabulature de lut* (Leuven, 1545), contained works by many composers. Phalèse, something of a pirate among publishers, specialized in large anthologies of music from all over Europe, collecting vocal as well as instrumental music of many kinds. The only surviving edition of Giovanni Pacoloni's book, with music for three lutes, was published by Phalèse at Leuven in 1564. He later moved his press to Antwerp, where he joined Jean Bellère. Emanuel Adriaenssen's books *Pratum musicum*, 1584, and *Novum pratum musicum*, 1592, with other editions up to 1600, were printed by Pierre Phalèse (ii) at Antwerp, and contain work by other composers besides Adriaenssen himself, in arrangements for one to four lutes with and without voices.

Joachim van den Hove produced two large collections of works by internationally famous composers: *Florida* (1601) and *Delitiae musicae* (1612). His own compositions and arrangements, which demand a sure technique, also appear in them and in a number of manuscripts, two of which are autograph (the Schele manuscript, *D-Hs*; and Hove, *D-Bs*). In 1626 Adriaen Valerius published an unusual collection of music for voice, lute and cittern with or without other instruments called *Neder-landtsche gedenck-clanck*. This was a thinly disguised book of patriotic songs directed against the occupying Spanish forces, using many popular tunes, some of them English. The enormous Thysius manuscript (*see* THYSIUS, JOHAN) contains lute music in all the genres of the early 17th century, including much English music, a large repertory of intabulated sacred and secular vocal music and a number of pieces for an ensemble of lutes. As far as the rest of the 17th century is concerned, although copious iconographical evidence suggests continuing popularity of the instrument in the Netherlands, there are almost no surviving musical sources for the lute.

After the expulsion of the Moors in 1492 the history of the lute in Spain becomes obscure. It was referred to by Bermudo as 'vihuela de Flandes', implying a degree of unfamiliarity. The only extant books of tablature printed in Spain are for the vihuela, which, though tuned to the same intervals as the lute, is a quite distinct instrument (for an account of its history and repertory *see* VIHUELA). Nevertheless there is much evidence to suggest that the lute was more commonly used than has been generally recognized.

The most famous 16th-century east European lutenist was Valentin Bakfark, born in Transylvania. He wrote some fine fantasias in the Italian manner, and his great

renown as a player took him to various courts and the houses of nobles and magnates all over the Continent. His books testify to his cosmopolitan reputation: *Intabulatura liber primus* (1553) was printed in Italian tablature in Lyons and was partially reprinted as *Premier livre de tabelature de luth* (1564) in French tablature, by Le Roy & Ballard in Paris. His *Harmoniarum musicarum in usum testudinis factarum tomus primus* (1565) was printed in Kraków and reprinted in Antwerp (1569), both editions using Italian tablature. Wojciech Długoraj, born in Poland about 1557, published no books of his own, but his works are found in several collections. Jakub Reys ('Polonois') was also born in Poland, but went to France when quite young and was appointed lutenist to Henri III; his works are mostly found in French anthologies.

(v) England. Little is known about the use of the lute in England before the 14th century. Social development was hardly ripe for the general spread of art music outside the church, the court and a few great houses. Under the Tudors, however (following the Wars of the Roses which ended with the seizure of the English throne by Henry VII), a wealthy middle class began to appear, and the few urban centres of population grew at an unprecedented rate. From the time of Henry VIII onwards, manuscripts containing lute tablature began to appear, though none extant dates from before 1540. Most of the professional lutenists at Henry's court were Flemish or Italian. The three royal children were taught to play, and evidence suggests that in general some amateur performers were beginning to become quite proficient.

The growth of the 'leisured classes' by about the middle of the 16th century led to a demand for instructions for playing the lute, which was best satisfied by printed books. The register of the Stationers' Company records licences to John Alde for *The Sceyence of Lutynge* (1565) and to Robert Ballard (i) for *An Exortation to All Kynde of Men How they shulde Learn to Play of the Lute* (1567), but neither of these is now extant. The first three surviving instruction books in English are all derived from a single French source, Le Roy's *Tres breve et tres familière instruction*, now lost. *A Briefe and easye Instru[c]tion* (1568) 'englished by J. Alford Londenor' contains instructions in the form of rules with music examples, followed by a collection of fantasias and dances. The rules, with certain minor variants, are reprinted as the second part of *A Briefe and Plaine Instruction* (1574), which also teaches 'to set all music of eight divers tunes in Tableture for the Lute' (almost all the examples being chansons by Lassus). The third part comprises a collection of music, quite different from that of 1568, 'conteinynge diverse Psalmes, and manie fine excellente Tunes'; the latter are versions of French chansons that Le Roy had set for voice and lute in his *Livre d'airs de cour* (1571). English Protestant taste (the book is dedicated to Edward Seymore, Earl of Hertford) is catered for by the inclusion of metrical psalm tunes.

Le Roy's instructions were again translated, but without acknowledgment, by William Barley in *A New Booke of Tabliture* (1596), which also contains sections for the orpharion and bandora. This work is the first printed collection for lute by English composers, and includes, in the bandora section of the book, the earliest English solo songs with tablature accompaniment. Robinson's *The Schoole of Musicke* is a thorough lute method, written in the form of a dialogue 'between a Knight, having children to be taught, and Timotheus, who should teach them'. The music that follows is all by Robinson himself, and includes some pieces for two lutes as well as fantasias, dances and settings of popular tunes for solo lute.

The last English instruction book for the Renaissance lute was Robert Dowland's *Varietie of Lute-Lessons* (1610), comprising a translation of the instructions from Besard's *Thesaurus harmonicus* (1603) and other observations on lute playing, by John Dowland. These are the only words on the subject that John Dowland left, despite references to 'my father's greater work' in Robert Dowland's other publication of the same year, the songbook *A Musicall Banquet*. The *Varietie* contains a selection of fantasias, pavans, galliards, almains, currants and voltes (by English and continental composers) which must surely have been collected originally by John Dowland on his European travels.

These books, together with a considerably larger body of manuscript collections dating from about 1580 to about 1625, reveal music of the highest quality by composers such as John Johnson (i), Francis Cutting, Richard Allison, Daniel Bacheler, Philip Rosseter, Robert Johnson (ii), Alfonso Ferrabosco (i) (who spent most of his time in England between about 1562 and 1578), and above all John Dowland whose international fame at this time was unique among lutenists.

Solo lute music circulated mainly in manuscript, but starting with Dowland's *First Booke of Songes* (1597) a series of songbooks for voice and lute was published in England – some 30 volumes averaging about 20 songs apiece. The duration of this vogue was only 25 years (the last collection was John Attey's *First Booke of Ayres* of 1622) but it was responsible for some of the finest English songs of any period. A few of the composers also wrote in the madrigal style, and a few also composed solo lute music; but in general the writers of lute-songs in England kept almost entirely to that genre. Its appeal lay in a direction other than that of madrigals or solo lute music, for it entailed a much more concise setting of the text than the former, and had a less abstract emotional effect than the latter.

Many books of ayres were arranged so that they could be performed either as solo songs with lute and usually bass viol accompaniment, or as partsongs for four voices with lute. The favouring of a sustained bass line to balance the melody in the voice reflects the tendency to think in terms of a polarization of harmonic interest between those two parts. Many collections include lute parts as contrapuntal as the texture of a madrigal, but eventually accompaniments showed a tendency towards simplification, with less imitative part-writing and more straightforward chordal structure. Ultimately this led to the 'continuo song', where only the melody and bass were written down and the lutenist or theorbo player was expected to fill out the harmonies according to certain conventions known as the 'rule of the octave'. The partsong alternative, started by Dowland in his *First Booke* and originally intended to appeal to a public eagerly immersed in madrigal singing, lent a characteristic stamp to the English ayre that makes it quite distinct from anything produced on the Continent. (For a modern edition of some of Dowland's music, see *Collected Lute Music*, ed. D. Poulton and B. Lam, London, 1974, 3/1984.)

Another English use of the lute was in the mixed consort of three melody instruments (treble viol, flute, bass viol) and three plucked (lute, cittern, bandora), a grouping almost certainly conceived originally as an accompaniment to a solo voice somewhat in the manner of the older songs with viols (*see* CONSORT, §2). The treble viol, flute and bass viol played in three-part harmony which, often incomplete on its own, was filled in by the three plucked instruments. The cittern and bandora (both wire-strung) formed the alto, tenor and deep bass, while the lute had a dual role. Much of the music was in dance forms, with repeated sections, in the first of which the lute played chords; but in the repeats the lute played elaborate and rapid 'divisions', giving a silvery, shimmering quality to the music. This technique was known as 'breaking the ground in division'; hence the expression 'broken music'. The light texture of the three melody instruments allowed the lute prominence, while the cittern and the deep bandora provided fullness and body.

Printed collections of music for such a combination include the *First Booke of Consort Lessons* edited by Morley in 1599 and reissued with additional pieces in 1611 (ed. S. Beck, 1959) and Philip Rosseter's 1609 edition of *Lessons for Consort*. No complete set of partbooks has survived for any of the editions. There are, however, two manuscript collections (the Matthew Holmes manuscripts in *GB-Cu* and the Walsingham consort books in *GB-BEV* and *US-OAm*), both also incomplete but whose contents overlap to some extent with those of the printed books. Part of William Leighton's *The Teares or Lamentacions of a Sorrowfull Soule* (1614) is devoted to 'consort songs' set for four voices with the same six instruments.

With the development of the Jacobean and Caroline masque, larger groups of instruments began to appear. In Ben Jonson's *Oberon* (1611) '20 lutes for the Prince's dance' were required, and the description of *Love freed from Ignorance* (1611) tells of the entrance of '12 Musitions that were preestes that songe and played' and '12 other lutes'. The theorbo, said to have been introduced into England by Inigo Jones in 1605, soon found its way into favour in these entertainments. In James Shirley's masque, *The Triumph of Peace* (1634), as many as seven lutes and ten theorbos were used.

Soon after the death of John Dowland in 1626, however, the English school of lutenist-composers declined. For some time the popularity of the lute had been overshadowed by that of the lyra viol, which was now cultivated by those amateurs who were also avid players of ensemble music for viols. With the coming of Charles I's wife, Queen Henrietta Maria, and her entourage from France, a fashion grew up at court for all things French. The famous lutenist Jacques Gautier arrived from Paris with the Duke of Buckingham in 1617, was appointed to the court in 1619 and soon became popular in London, where he entered the literary circles of writers such as John Donne.

An interesting English manuscript spanning the change from the 'old' lute music of the Elizabethan and Jacobean composers to that of the new French style was compiled by Lord Herbert of Cherbury. It includes music by Dowland, Rosseter, Holborne and other such composers, along with that of Gautier and some compositions of Cherbury himself, the latest dated 1640. Also represented in this manuscript is Cuthbert Hely, who is otherwise virtually unknown. His music is of astonishing intensity: firmly grounded in the earlier English tradition, it nonetheless explores previously untried harmonic territory. Cherbury retained the 'old' tuning of the main six courses despite his interest in the new music and the French lute, but the new tunings are in evidence in other manuscripts, such as the latter part of Jane Pickering's Lutebook where compositions by John Lawrence (*d* *c*1635) and Gautier demonstrate the 'Harpe way', 'flat way' and 'tuning Gautier'.

With a few exceptions, such as the solos and duos by William Lawes, of which only three pieces survive, and the large quantity of (lost) lute music said to have been composed by John Jenkins, little music of any great value was written for the lute by English composers up to the time of the Civil War; but Lawes, using the theorbo as thoroughbass in his 'Royal' and 'Harpe' consorts, produced some of the most distinguished instrumental music of his time. During the Commonwealth and at the Restoration, trio sonatas continued to appear for viols or violins with the theorbo specified as a suitable continuo. A set of 30 unnamed pieces for solo lute or theorbo by John Wilson (1595–1674) is of outstanding interest. The pieces are in a distinctive improvisatory preludial style and systematically cover all 24 major and minor keys, with tuning indications to match. Such a scheme was only possible on the lute, whose tablature was unaffected by aspects such as enharmonic spellings and 'double' accidentals, which would have caused great problems in the staff notation of the time.

Meanwhile, the French lute and music by French composers began to enjoy considerable popularity, although the contents of Richard Mathew's *The Lute's Apology for Her Excellency* (which he claimed was the first printed book for the French lute to appear in England) fall well below the standard of excellence maintained in such manuscript collections as the Hender Robarts Lutebook, the Mary Burwell Lute Tutor (*GB-Lam*) and the Panmure Lutebook (*GB-En*). These collections, all compiled by, or under the supervision of, lutenists from Paris, show that the works of the Gaultiers, Vincent, Pinel and other distinguished French composers were familiar to English and Scottish players of the second half of the 17th century. An early 18th-century repertory for the French lute in Scotland is found in the Balcarres Lutebook, whose approximately 200 pieces consist of dance-tunes (often arranged from fiddle versions) and intabulations of Scottish melodies and well-known English songs such as 'Lillibulero' and 'The King Enjoys his Own Again', as well as a few French lute pieces.

The last great figure in the history of the lute in England was Mace, whose *Musick's Monument* contains the most thorough extant set of instructions for the French lute, as well as some appealing music. He discussed technique, ornamentation, playing style, stringing, tuning, care of the instrument and many aspects of its history. The section on the theorbo is also valuable.

As a continuo instrument, particularly in accompanying the voice, the theorbo was important throughout the 17th century and well into the first half of the 18th. The theorbo or theorbo-lute is mentioned on the title-pages of many volumes ranging from Angelo Notari's *Prime musiche nuove* (London, *c*1613) through most of Playford's songbooks to Purcell's *Orpheus Britannicus* (1698–1702), John Blow's *Amphion Anglicus* (1700) and

John Eccles's *Songs for One, Two and Three Voices* (1704). Walter Porter included both lutes and theorbos among the accompanying instruments of the consort in his *Madrigales and Ayres* (1632).

The lute and theorbo were used by Handel in a number of his operas and other works, both as continuo and as obbligato in certain arias, such as 'The soft complaining flute' in his *Ode for St Cecilia's Day* (1739). Players of the instrument were becoming rare, however, and Handel's occasional use of it was usually due to the presence of a visiting virtuoso player, such as Carlo Arrigoni (in London between 1731 and 1736), who played in the Concerto op.4 no.6, originally scored for 'Lute, Harp and Lyrichord'. According to Burney, the final appearance of the lute in an opera orchestra in England was in the aria 'Due bell'aline' in Handel's *Deidamia* (1741).

Little more is heard of the lute in England in the 18th century, although the names of distinguished foreign players are occasionally encountered in newspaper advertisements for concerts; S.L. Weiss visited London and gave a short series of concerts in 1718. One player who settled in London was J.S. Bach's former pupil, Rudolf Straube, from whom Thomas Gainsborough bought a lute and requested lessons in 1759. A manuscript partially compiled by Straube (*GB-Lbl* Add.31698) contains annotations in a later hand suggesting that pieces from it were copied by a player of the 'Theorboe Lute' up to the late date of 1813. However, the instrument mentioned on a few title pages dating from about 1800 as the 'lute' was in actual fact the harp-lute, whose music shows no discernible relationship with the real lute. (For other modern editions of English lute music see the series *English Lute Songs*, London, 1967–71, and *Music for the Lute*, ed. D. Lumsden, 1966–.)

Lute-harpsichord (Fr. *clavecin-luth*; Ger. *Lautenklavecimbel*, *Lautenklavier*, *Lautenwerck*). A gut-strung harpsichord (occasionally supplemented with a choir of metal strings) intended to imitate the sound of the lute. It should not be confused with the so-called LUTE STOP on some harpsichords. Some writers have described the ARPICORDO as a form of lute-harpsichord, but this is incorrect because 'arpicordo' is only another name for the Italian polygonal virginal. Gut-strung *arpicordi* were known, however – Michel de Hodes made an 'arpicordo leutato', and Banchieri's ARPITARRONE (*L'organo suonarino*, 2/1611) was probably gut-strung – and in all probability there were other experiments with gut-strung keyboard instruments. A 'Harfentive' was described by Virdung (1511) as being gut strung, but exactly what kind of instrument it was is unclear; it seems to have been intended to imitate the harp.

German makers in the first half of the 18th century seem to have been those most interested in the potentials of the lute-harpsichord and a number of different types were produced by such builders as Johann Christoph Fleischer, Zacharias Hildebrandt and Johann Nicolaus Bach. The form and layout of lute-harpsichords was quite variable. Some were rectangular, some oval, some wing-shaped like a harpsichord; some had a hemispherical resonator below the soundboard (similar to the lute); some had individual bridges for each string and others had continuous bridges like those in a conventional harpsichord. Of all these instruments, Fleischer's 'Theorbenflügel' was probably the most elaborate, having three sets of strings: the register at 8′ pitch and the one tuned an octave lower were of gut, but there was also a 4′ register with metal strings, presumably to brighten the overall sound.

Jacob Adlung devoted a chapter of his *Musica mechanica organoedi* (ii, 1768, pp.133ff) to lute-harpsichords and considered them to be 'the most beautiful of all keyboard instruments after the organ ... because it imitates the lute, not only in tone quality, but also in compass and delicacy'. He gives the compass as generally three octaves, *C* to *c″*, with strings that are not as long in the bass as in a harpsichord. The two lower octaves have two strings to every note and in the bass octave these are tuned as unison and octave, as on the lute; the top octave is single strung. According to Adlung the 'Lautenwerk' sounded so like the lute that it could deceive even experienced lutenists, but had the serious disadvantage of not being able to imitate the lute's dynamic gradations. J.N. Bach (a second cousin of J.S. Bach) partly overcame this difficulty by devising instruments with two or three keyboards. The jacks plucked the strings at different distances from the nut, those furthest from the nut giving the softest tone.

Among the instruments in the inventory of J.S. Bach's estate, made after his death in Leipzig in 1750, there were two lute-harpsichords, valued at 30 Reichsthaler each. An interesting eyewitness account of a lute-harpsichord which Bach is said to have designed, and had built for him by Zacharias Hildebrandt, is given by J.F. Agricola, who was himself a pupil of Bach. Agricola wrote in Adlung's *Musica mechanica organoedi* (p.139) that:

> It had two courses of gut strings, and a so-called Little Octave of brass strings. In its normal disposition – that is, when only one stop was drawn – it sounded more like a theorbo than a lute, but if one drew the lute stop [i.e. the buff stop] such as is found on a harpsichord together with the cornet stop [i.e. the 4′ brass strings], one could almost deceive even professional lutenists.

One work by J.S. Bach that must surely have been written for a lute-harpsichord is the Suite in E minor, BWV996. Bach's autograph has not survived but a contemporary manuscript copy, by J.L. Krebs, has the following inscription on the title-page: 'Preludio con la Svite / da / Gio: Bast. Bach./ aufs Lauten Werck'.

Lute societies. In England, the Lute Society was founded in 1956, to encourage the playing of the lute and related instruments; the dissemination of information on playing technique and historical instruments; and, by making working drawings available, the construction of modern instruments. The society, which numbered about 400 members in the 1990s, holds three or four meetings a year for lectures and performance. It publishes information

booklets and lute music in tablature, and arranges playing days. The *Lute Society Journal* commenced in January 1957; since 1959 it has appeared annually, changing its title to *The Lute* in 1982. A newsletter has been issued irregularly since February 1959, frequently with a music supplement in tablature.

The Lute Society of America, founded in 1966, issues irregularly a newsletter (known as the *Quarterly* from 1989), and annually a journal (no.1, 1968). The Swedish Guitar and Lute Society, founded in 1968, publishes a quarterly journal, *Gitarr och luta* (no.1, October 1968), and arranges a summer school. The Centre Animation Expression Loisir in Paris commenced publication of the journal *Luth et musique ancienne* in June 1977. The title was shortened to *Musique ancienne* from June 1978, but the journal continued to devote considerable space to the lute until the final issue (no.23, June 1989). The Nederlandse Luit Vereniging, founded in 1982, issues a newsletter approximately every four months, *de tabulatuur* (no.1, November 1982). The Société Française de Luth, founded in 1985, issues a bulletin about three times a year called *Tablature* (no.1, January 1985). It also arranges playing days and publishes tablature. The Società Italiana del Liuto, founded in 1990, issues a quarterly *Bollettino*.

ROBERT SPENCER

Lute stop (Fr. *nasale*, *registre d'hautbois*; Ger. *Nazard*, *Nasal-Register*, *Nasalzug*, *Oboezug*). A row of jacks plucking one of the 8′ choirs of a harpsichord very close to the nut, producing a characteristically penetrating sound. In the 18th century the German terms for the stop were 'Spinet' and 'Cornet'. Although this stop has been called 'lute' in English since the 18th century there is considerable confusion as to the proper use of the term, since such apparently equivalent foreign terms as 'Lautenzug' actually refer to the BUFF STOP. For clarity, the term 'nasal stop' is now sometimes used in English.

EDWIN M. RIPIN/JOHN KOSTER

Lutfullayev, Bakhrullo (*b* Farish area, Jizak province, 5 Sept 1948). Uzbek composer. He trained at the Tashkent Conservatory as a choral conductor (graduating in 1972) and composer (graduating in 1987 from the class of M. Tajiyev). He has worked as a chorus member and conductor for Uzbek Radio (1965–88), teacher at the Tashkent Conservatory (1988–92), head of the music department of Uzbek Radio (1992–6) and, since 1996, as head of music on Uzbek TV. His broadly lyrical style is influenced by Uzbek *maqom*; his works are notable for their sumptuous combination of Uzbek melodies with Western forms of polyphonic development.

RAZIA SULTANOVA

Luth (Fr.). *See* LUTE.

Luthé (Fr.). A term used by François Couperin to characterize the consistent application of the arpeggiated lute style to the harpsichord. *See* STYLE BRISÉ.

Luthéal [piano-luthéal]. A modified grand piano with parallel (not overstrung) strings, fitted with a mechanism which caused a 'pièce de touche' or buffer to come down on the strings, thereby producing sounds of a very individual timbre. The device was named 'jeu de harpe tirée' by its inventor, the Belgian organ builder Georges Cloetens. His first patent for it, granted on 28 January 1919, shows a very strong damper added to the strings which resulted in a kind of imitation of the 'lute-like' playing of the harpsichord ('jeu de clavecin'), very rich in harmonics. The keyboard was arranged in two halves, dividing at middle C. With four draw stops (two each for the treble and bass, as in a harmonium) the performer thus had nine combinations of timbres available, including the normal timbre of the piano.

Ravel used the instrument for the accompaniment to his violin piece *Tzigane* (1924); he also scored for it in his opera *L'enfant et les sortilèges* (1920–25). In the latter work, he suggested placing sheets of paper between the hammers and the strings of an upright piano as an alternative method of obtaining the *jeu de clavecin*, a technique which was employed at the Paris Opéra and which had previously been used by Satie in *Le piège de Méduse* (1914). A *luthéal* has been discovered in the cellars of the museum of the Brussels Conservatory and restored. In 1987 the French government commissioned the building of a *luthéal* to commemorate the 50th anniversary of Ravel's death; this instrument is now in the Musée de la Musique, Paris.

ROGER J.V. COTTE

Luther, Martin (*b* Eisleben, 10 Nov 1483; *d* Eisleben, 18 Feb 1546). German theologian and founder of the Lutheran Church. He influenced all 16th-century church reformers to a greater or lesser extent by his writings and activities but, unlike some of them, Luther gave an important place to music.

1. LIFE. Luther was the son of a fairly prosperous Thuringian miner, who wanted his son to become a lawyer. He was sent to appropriate Latin schools in Mansfeld and Magdeburg, and to the Georgschule in Eisenach. In 1501 he entered the University of Erfurt, where he took the bachelor's and master's degrees. Then, following his father's wishes, he began to study law, but unexpectedly entered the local Augustinian monastery and in 1505 became a monk. In April 1507 he was ordained priest and celebrated his first Mass a month later. Three years later he was commissioned to visit Rome to plead the cause of the reorganization of the Augustinian order. While there he was shocked by the commercialism and worldliness of the Italian clergy.

On his return Luther took the doctorate in theology (1512) and became professor of sacred scripture at the University of Wittenberg, a post he held until his death.

Martin Luther contrasting the righteousness of reformed services (left) with the iniquities of Catholic practice (right): woodcut by Lucas Cranach the younger, c1546

Between 1512 and 1518 he lectured on a number of biblical books, including *Psalms*, *Romans* and *Galatians*. During these years he ceased to be just another scholastic theologian and emerged as the biblical theologian and church reformer of his time. At this time he had the so-called 'tower experience': he came to believe that the essence of the Gospel is faith in the crucified and risen Christ; that the sinner is 'justified by faith alone'. Justification by faith is the touchstone of Luther's theology and, as he began to come to terms with the doctrine and its implications, he carried most of the university faculty with him. Wittenberg became known as a centre of biblical studies.

Since Luther's theology was based on the scriptures rather than on the traditions of the church, a conflict was inevitable. Thus Luther called the practice of selling indulgences into question, and on 31 October 1517 gave notice of his wish to debate the matter by nailing his 95 Theses to the door of the Schlosskirche in Wittenberg. These were quickly circulated throughout Germany – indeed, throughout Europe – and the financial returns from the sale of indulgences were adversely affected. Despite pressure to silence him, he continued to make his views public. In 1520 he published three significant writings which, in a sense, were foundation documents of the emerging church which was eventually to bear his name. In the *An den christlichen Adel deutscher Nation von des christlichen Standes Besserung* he argued against the power of the papacy; *De captivitate Babylonica ecclesiae praeludium* was his classic statement against the sacramentalism and sacerdotalism of the Roman Catholic Church: and *Von der Freiheit eines Christenmenschen* augued that a Christian is not bound by the laws of the church but is freed in the Gospel to serve Christ and his fellow man.

The following year he was excommunicated and, after his appearance at the Diet of Worms, where he refused to recant, was condemned as an outlaw by the state. Returning from Worms he was 'kidnapped' by his friends and taken to Wartburg Castle near Eisenach. During the following months of enforced solitude he was able to reflect on the implications of biblical doctrines for the life of the church; it was a very productive period and among other writings he completed his translation of the New Testament into German. When he returned to Wittenberg in 1522 he began to reorganize the church there in accordance with biblical principles. The form of worship was changed, hymnbooks were issued, and the basic Reformation doctrines were taught through his Large and Small Catechisms of 1529. The definitive summary of Lutheran belief, the Augsburg Confession, written by Melanchthon with Luther's full agreement, was presented to Emperor Charles V on 25 June 1530.

For the rest of his life Luther continued lecturing, preaching and encouraging the progress of the Reformation in Saxony and throughout Germany. His greatest work in these years was the completion of his German translation of the entire Bible, a translation which provided inspiration for generations of Lutheran composers. Luther died after acting as a mediator in a quarrel between the princes of Mansfeld. His body was reverently borne to Wittenberg and was buried five days later beneath his pulpit in the Schlosskirche.

2. WORKS. The Nuremberg poet Hans Sachs described Luther's reforming work as the singing of 'the Wittenberg

nightingale' in a poem published in 1523, when Luther was beginning to compose hymn melodies. Luther's musical abilities were recognized early; for example, while at school he received free bed and board from an elderly woman who admired his voice. He himself reported that he joined other boys singing from house to house there, begging for bread according to custom (*Luther's Works* [LW], xlvi, p.250). His practical involvement was matched by an understanding of music theory, which can be judged from his frequent references to the Quadrivium, the medieval fourfold division of mathematics into arithmetic, geometry, astronomy and music (LW, xlv, p.369; LW, xlvi, p.252). His experiences within the Augustinian order and his visit to Rome brought him into contact with the music of many composers, particularly that of Josquin des Prez and Ludwig Senfl, which he valued highly. He is said to have had a fine, though soft, tenor voice, and was an accomplished performer on the flute and lute: the *Tischreden* contains a number of references to his playing the lute at table and singing with his friends. At various periods Luther worked with significant musicians including the large body of singers and instrumentalists that Frederick the Wise employed at the Schlosskirche in Wittenberg (Duffy, 1995). He also had close associations with the organists Georg Planck in Zeitz and Wolf Heinz in Halle, with the music publisher Georg Rhau and his assistant Sixt Dietrich, as well as with the two successive Kapellmeisters to Duke Frederich, Conrad Rupsch and Johann Walter (i).

In contrast to other reformers, Luther developed a positive, theological understanding of music. He considered music to be 'the excellent gift of God' (LW, liii, p.321; see also LW, xv, p.247; WA, Tischreden, no.4441), and maintained: 'I place music next to theology and give it highest praise' (WA, Tischreden, no.7034; see also nos.968, 3815, and his letter to Senfl, 4 October 1530). In a much-quoted reference (WA, Tischreden, no.1258) he commented that Josquin's music was as free as the song of the finch, epitomizing the freedom of the gospel in contrast to the constraint of the law. Older commentators have drawn attention to the parallel between Josquin's later style, in which greater emphasis is placed on the text than in his earlier compositions, and Luther's theology of the word and his concern for the clarity and comprehensibility of the liturgical text. However, later writers (Wiora, 1969; Staehelin, 1986), suggest that Luther's appreciation of Josquin's music was as much aesthetic as theological.

The two focal points of Luther's reforms were the church and schools. In his ecclesiastical reform, vernacular congregational hymnody was fundamental (*see* CHORALE). Beginning in winter 1523–4 Luther and his colleagues began writing, revising, composing and arranging hymns for people to sing in the new evangelical worship. While Luther's ability in writing the texts of these hymns has been universally acknowledged, his compositional accomplishments in this hymnody have been variously evaluated. During the 19th century, scholarly opinion credited few, if any, of these melodies to Luther. By the mid-20th century this consensus was reversed and Luther was regarded as the composer and/or arranger of virtually all the melodies that originally appeared with his texts, a consensus based on three principal reasons: Luther's contemporaries considered them to be his; it was customary for composers to write poetry and poets to write music; and Luther clearly had the necessary musical gifts and abilities. More recent scholarship, while accepting Luther's authorship of most of these pieces, has raised questions about some of the melodies. Evidence suggests that Walter may have collaborated with Luther in establishing the accepted forms of particular melodies (Blankenburg, 1978 and 1991).

Luther not only supplied congregational hymns for the new forms of worship but also various liturgical chants. Again, his principal collaborator was Walter, who, in about 1566, recollected Luther's skill at writing such music (Praetorius, *Syntagma musicum*, 451–2; trans. Nettl, 75–6):

> When he, Luther, 40 years ago desired to introduce the German mass in Wittenberg, he ... urged His Electoral Highness to bring ... Konrad Rupsch and me to Wittenberg. At that time he discussed with us the Gregorian chants and the nature of the eight modes, and finally he himself applied the eighth mode to the Epistle and the sixth mode to the Gospel, saying: 'Christ is a kind Lord, and His words are sweet; therefore we want to take the sixth mode for the Gospel; and because Paul is a serious apostle we want to arrange the eighth mode for the Epistle'. Luther himself wrote the music for the lesson and the words of the institution of the true body and blood of Christ, sang them to me, and wanted to hear my opinion of it. ... One sees, hears and understands at once how the Holy Ghost has been active not only in the authors who composed the Latin hymns and set them to music, but in Herr Luther himself, who has invented most of the poetry and melody of the German chants. And it can be seen from the German Sanctus [*Jesaja dem Propheten geschah*] how he arranged all the notes to the text with the right *accent* and *concent* in masterly fashion. I, at the time, was tempted to ask His Reverence from where he had these pieces and his knowledge; whereupon the dear man laughed at my simplicity. He told me that ... all music should be so arranged that its notes are in harmony with the text.

The close association between words and notes, which later characterized the compositions of Schütz, was extremely important to Luther. In 1525 he wrote that 'both text and notes, accent, melody and manner of rendering ought to grow out of the true mother tongue and its inflection' (LW, xl, p.141; see also *D. Martin Luthers Werke*, [WA] Briefwechsel, iii, no.847; WA, Tischreden, no.2545). He also had an acute sense of the rhythmic stress of poetry (WA, Tischreden, no.1333) that was reflected in the rhythmic energy of the original forms of his melodies (*see* CHORALE, with facs. of *Ein' feste Burg*). These rhythms were changed in the 18th-century isometric versions.

In his concern for reform of music in schools attached to evangelical churches, Luther joined forces with various colleagues notably Philipp Melanchthon, who supplied the pedagogical framework for music in schools, Johann Walter, who composed much of the polyphonic repertory that was first taught in schools, and Georg Rhau, who published a whole series of editions of music for school and church. For Luther the knowledge of music was of utmost importance in the education of young people; he sent his son Hans to Torgau to study music with Walter (see the letter to M. Crodel, 26 August 1542), declared that a schoolmaster must know how to sing, and even held that no one should be ordained who had no practical experience of music (WA, Tischreden, no.6248). Thus it became customary in the Lutheran church, until the 18th century, for musicians to study theology and prospective pastors to study and practise music.

The combination of Luther's theology of music, his provision and promotion of hymns and chants, his encouragement of congregational, vocal and instrumental liturgical music, and his concern for music in schools, laid

the foundation for the distinctive tradition of Lutheran church music.

See also CHORALE and LUTHERAN CHURCH MUSIC.

WORKS

Editions: *D. Martin Luthers Werke: kritische Gesamtausgabe* (Weimar, 1883–) [WA]
Luther's Works, ed. J. Pelikan and H.T. Lehmann (St Louis and Philadelphia, 1955–) [LW]

HYMNS

all in WA xxxv, LW liii and J

original hymns

Ach Gott vom Himmel sieh darein (Ps xii); Aus tiefer Not schrei ich zu dir (Ps cxxx); Christ unser Herr zum Jordan kam; Dies sind die heiligen zehn Gebot (Exodus xx); Ein feste Burg ist unser Gott (Ps xlvi); Ein neues Lied wir haben an (in honour of Lutheran martyrs burnt in Brussels, 1 July 1523); Erhalt uns, Herr, bei deinem Wort; Es spricht der Unweisen Mund wohl (Ps xiv); Es wolle Gott uns gnädig sein (Ps lxvii)

Jesus Christus unser Heiland, der den Tod (in Leise form); Mensch willt du leben seliglich (Exodus xx); Mit Fried und Freud ich fahr dahin (Nunc dimittis); Nun freut euch, lieben Christen g'mein; Sie ist mir lieb die werte Magd (Revelation xii); Vater unser in Himmelreich (Lord's Prayer); Vom Himmel hoch da komm ich her (Luke ii); Vom Himmel kam der Engel Schar (Luke ii); Wär Gott nich mit uns diese Zeit (Ps cxxiv); Wohl dem, der in Gottes Furcht steht (Ps cxxviii)

hymns based on Latin models

Christum wir sollen loben schon (from A solis ortus); Der du bist drei in Einigkeit (from O lux beata trinitas); Jesus Christus, unser Heiland, der von uns (based on Jesus Christus nostra salus, attrib. Huss); Komm Gott, Schöpfer, Heiliger Geist (from Veni Creator Spiritus)

Komm, Heiliger Geist, Herre Gott (from Veni Sancte Spiritus); Nun komm der Heiden Heiland (from the Ambrosian Veni Redemptor genitum); Verleih uns Frieden gnädiglich (from Da pacem Domine); Was fürcht'st du, Feind Herodes, sehr (from Hostis Herodes impie)

hymns based on German models

Christ ist erstanden; Christ lag in Todesbanden; Gelobet seist du, Jesu Christ; Gott der Vater wohn uns bei: Gott sei gelobet und gebeneidet; Komm heiliger Geist, Herre Gott; Mitten wir im Leben sind; Nun bitten wir den Heiligen Geist; Nun lasst den Leib begraben; ?Unser grosse Sünde und schwere Missetat; Wir glauben all' an einen Gott

Liturgical Psalms and Hymns

?All Ehr und Lob soll Gottes sein (Gloria in excelsis Deo; see Ameln, 1988), Christe du Lamm Gottes (Agnus Dei), Die deutsche Litanei, Herr Gott dich loben wir (Te Deum laudamus); Ich dank dem Herrn (Ps cxi), Ich will den Herrn loben (Ps xxxiv), Jesaja dem Propheten das geschah (German Sanctus), Latina litania correcta, Lobet den Herren (Ps cxvii)

ROBIN A. LEAVER

Lutheran church music.

1. Background. 2. Origins and consolidation (1523–80): (i) Liturgical reforms (ii) *Hauptgottesdienst* (iii) *Vespergottesdienst*. 3. Confessionalism and Orthodoxy (1580–1680). 4. Pietism and Enlightenment (1680–1800). 5. Restoration and conservation (1800–1914). 6. Rebirth and incorporation (after 1914). 7. Nordic traditions. 8. North American traditions. 9. Worldwide Lutheranism.

1. BACKGROUND. Lutheran church music is rooted in the flowering of Franco-Flemish polyphony during the later Renaissance. The contrapuntal techniques associated with cantus-firmus and Tenorlied compositions of this period were exploited by the composers writing for the emerging Lutheran Church.

Martin Luther's protector Friedrich der Weise, Elector of Ernestine Saxony between 1486 and 1525, was an astute politician. On becoming Elector, Friedrich began the systematic development and consolidation of his political influence in Germany from his various residences, notably in Wittenberg and Torgau. After Maximilian I was elected Holy Roman Emperor in 1493, this process was intensified when Friedrich pursued a political agenda that made him second only to Maximilian. Indeed, on the latter's death in 1519, Friedrich der Weise was seen as the natural successor. In the event, Charles of Spain became the emperor, but Friedrich nevertheless continued to command a powerful political influence throughout the German states, especially since Charles was essentially an absentee ruler.

Saxony had been divided in 1485: Albertine Saxony in the south encompassed the ducal residence in Dresden and the university of Leipzig (founded 1409); Ernestine Saxony in the north was without a court of the stature of Dresden and had no university at all. Thus, Friedrich addressed both deficiencies. In 1502 he founded Wittenberg University, and his court chapel of All Saints effectively doubled as the university church. Modelled on the university of Tübingen, the new university was centred on theology, philosophy, law, medicine and the arts. Its professors, who generally favoured the new learning of humanism, included Luther, who arrived in the winter of 1508–09, and Philipp Melanchthon, who was appointed in 1517. During the same period Friedrich intensified and expanded the liturgical and musical traditions of his court chapels, especially in Wittenberg and Torgau, so that they rivalled Maximilian's Hofkapelle. Between 1508 and 1520 the provision for music in the liturgy of the Schlosskirche, Wittenberg, increased twofold, from 40 singers and instrumentalists to 81. The polyphonic repertory sung at the daily Masses and Offices was extensive and included music by such prominent composers as Josquin, Isaac and Obrecht (Heidrich, 1993; Duffy, 1994). It was against this background that Luther, with others, created the environment that fostered the development of various forms of worship music in Wittenberg, and thus provided the foundation for the Lutheran tradition of liturgical music.

See also LUTHER, MARTIN.

2. ORIGINS AND CONSOLIDATION (1523–80). This period is bounded by the *Formula missae* (1523), Luther's first reform of the Mass, and the *Formula concordiae* (1577), the document that defined Lutheran confessional theology (published in German in the *Konkordienbuch* of 1580).

(i) Liturgical reforms. Luther's liturgical reforms, which included both radical and conservative elements, preserved a continuity with existing liturgical music, while at the same time fostering new developments, particularly those related to the congregational chorale (*see* CHORALE and associated articles). In the Latin *Formula missae* Luther retained the traditional structure of the Mass, including Ordinary and Propers, which continued to be performed either as plainchant or polyphonically (Table 1). This meant that mass settings by Catholic composers were still sung in the new evangelical liturgy and that Lutheran composers wrote new settings of the traditional

TABLE 1: Luther's Liturgies in Outline

Formula missae (1523)	*Deutsche Messe* (1526)
Introit	German hymn or psalm
Kyrie (ninefold)	Kyrie (threefold)
Gloria in excelsis Deo	(*Allein Gott in der Höh sei Ehr*)
Collect	Collect
Epistle	Epistle
Alleluia	
Gradual	
Sequence (but only on major feasts such as Christmas and Pentecost)	
German hymn (Graduallied)	Graduallied: *Nun bitten wir* or another hymn
Gospel	Gospel
Credo	German hymn: *Wir glauben all*
Sermon	Sermon
Sursum corda	
Preface	Paraphrase of the Lord's Prayer
Verba testamenti	*Verba testamenti*
Sanctus and Benedictus	
German hymn	
Lord's Prayer	
Communion	Communion
Agnus Dei	German hymns during Communion, including the German Sanctus (*Jesajah dem Propheten das gesachah*) and German Agnus Dei (*Christe, du Lamm Gottes*)
German hymn	
Communion verse	
Collect	Collect
Benedicamus	
Benediction (3 forms)	Benediction (*Numbers* vi)

Ordinary. But the theology of the Mass was radically reinterpreted: Luther, instead of viewing the Eucharist as a 'sacrificium', that is, an offering to God, understood it as a 'beneficium', a gift from God. By removing all elements that spoke of sacrifice, he effectively eliminated the Offertory and most of the Canon. The *Verba testamenti* (Words of Institution) were retained, but Luther regarded them as proclamation, not prayer, and preferred that they be sung rather than remain, as in the Roman Canon, mostly inaudible. Towards the end of the *Formula missae* Luther expressed the desire for congregational German hymns to be sung after the gradual, Sanctus and Agnus Dei, although at this stage only the *Leisen* (older vernacular folk-hymns; *see* LEISE) were available for such use.

Three years after the *Formula missae* Luther issued the *Deutsche Messe* (1526), designed for use by congregations in smaller towns and cities. Other evangelical masses in the vernacular had already appeared in print, such as those of Caspar Kantz (1522) and Thomas Müntzer (1523/4), but Luther's was to have much the greatest influence. Music is fundamental to the *Deutsche Messe* – of its 39 pages following the preface, 31 include musical notation that frequently fills the page. For this Mass, Luther collaborated with two of Friedrich der Weise's leading musicians, Conrad Rupsch, the aged Kapellmeister, and Johann Walter (i), Rupsch's younger colleague and eventual successor. The structure, while generally following the traditional Mass, represents a simplification of the traditional order (see Table 1): a simple threefold Kyrie replaced the ninefold form of the Latin Mass; the alleluia, gradual, sequence, *Sursum corda* and Preface were omitted; the prose Credo was replaced by the credal hymn *Wir glauben all an einen Gott*; the Lord's Prayer with its introductory 'paraphrase' was brought forward to appear in the position of the traditional Preface; the Sanctus was expanded within a vernacular form that included the biblical context of *Isaiah* vi, *Jesaja dem Propheten das geschah*, and moved to the distribution of Communion, where it became an optional item along with the German Agnus Dei. The other music of the *Deutsche Messe* included (in sequence): in place of the introit, either a prose psalm (sung to a psalm tone) or a hymn; a collect (tone 8); the Epistle (tone 8), chanted to specific melodic formulae; the hymn *Nun bitten wir den Heiligen Geist*, sung in place of the gradual (hence the term Graduallied); the Gospel (tone 6), chanted to its own melodic formulae modelled on the Holy Week Passion tones; the *Verba testamenti*, similarly sung to the Gospel melodic formulae (tone 6) (see Leaver, 1995); the German Sanctus, *Jesus Christus, unser Heiland* (Luther's reworking of the Latin communion hymn attributed to Jan Hus), and the German Agnus Dei, sung as *musica sub communione*, that is, during the distribution of Communion.

Although the *Deutsche Messe* did not include a version of the Gloria in excelsis Deo, its use is confirmed by later practice. The omission from the *Deutsche Messe* in 1526 is almost certainly to be explained by the fact that the document was drawn up in December 1525, that is, during Advent, when the Gloria was customarily omitted. The vernacular translation by Nikolaus Decius, *Allein Gott in der Höh sei Ehr* (1523), quickly became the hymnic version in universal use. The *Deutsche Messe* thus established the principle of congregational, hymnic alternatives to the traditional liturgical Ordinary. After the German version of the *Kyrie fons bonitatis* appeared in 1537, the following were the primary liturgical hymns:

Kyrie	*Kyrie, Gott Vater in Ewigkeit* (EG 178.4)
Gloria	*Allein Gott in der Höh sei Ehr* (EG 179)
Credo	*Wir glauben all an einen Gott* (EG 183)
Sanctus	*Jesaja dem Propheten das geschah* (EKG 135)
Agnus Dei	*Christe, du Lamm Gottes* (EG 190.2 or *O Lamm Gottes, unschuldig* (EG 190.1)

These chorales formed the basis of much of the liturgical music of virtually every generation of Lutheran composers, encompassing a wide variety of genres and forms of choral, vocal, organ and other instrumental music, a notable example being the first group of chorales in part 3 of J.S. Bach's *Clavier-Übung* (1739).

Luther's two liturgical forms were not mutually exclusive; neither was the later vernacular order intended to replace the Latin evangelical Mass. Latin was actively encouraged in the churches of towns and cities where there were Latin schools and/or universities. A substantial part of Luther's strategy for the consolidation of the reforming movement was in a specific educational programme. The pre-existing Latin schools were reformed, and basic evangelical theology was taught alongside subjects such as grammar, rhetoric and music, the last being given high priority. Both the theoretical and practical aspects of music were addressed, and the repertory that formed the basis of the teaching was also sung in the church to which the school was attached. The choir of school pupils (Kantorei), led by their music teacher (Kantor), who was also director of music in the church (see Rautenstrauch, 1907), sang the polyphonic liturgical music and led the congregation in singing the chorales. In this educational reform Luther provided the fundamental theology of music and Melanchthon the

pedagogical principles and curricula; Johann Walter, who in 1529 became the first Lutheran Kantor in Torgau, composed much of the repertory; and Georg Rhau, in collaboration with Luther, Melanchthon and Walter, published a steady stream of music and music theory for church and school – 60 imprints appeared in the period 1528–48 (see Mattfield, 1966, appx III).

Many of the numerous Lutheran church orders of the 16th century were based on conflations of Luther's two liturgies. The first part of the eucharistic rite (Hauptgottesdienst), the Ministry of the Word, in general approximated more closely to that of the *Formula missae*, being mostly in Latin, and the later part, the Ministry of the Sacrament, to that of the *Deutsche Messe*, being mostly in German. These macaronic liturgies frequently duplicated the Ordinary, whereby the German hymnic form, sung congregationally, would follow the Latin version sung by the choir. For example, *Allein Gott in der Höh sei Ehr* was sung after the Latin Gloria in excelsis Deo, or *Wir glauben all an einen Gott* after the Latin *Credo*. This admixture of Latin and German encouraged composers to integrate the texts and melodies of German hymns into their settings of both Ordinary and Proper, such as *Christ ist erstanden*, the *Leise* that Johannes Galliculus incorporated into the sequence and Agnus Dei of his Easter mass (published in Rhau's *Officia paschalia*, 1539), and *Allein Gott in der Höh sei Ehr* interwoven within J.N. Bach's concerted *Gloria in excelsis Deo* (1716).

An examination of the different liturgical elements, together with their associated liturgical music, of the morning eucharistic Hauptgottesdienst and the afternoon Vespergottesdienst, as commonly found in the Lutheran church orders of the 16th century, reveal the distinctive features of Lutheran church music that were developed in a variety of ways in subsequent centuries.

Traditional monodic chant continued in use, often with revised texts (in either Latin or German) and in melodic forms customarily sung in Germany (see Ameln, Mahrenholz and Thomas, 1933–74; Brodde, 1961; Mattfeld, 1966, appx IV). These chant forms were found either in locally prepared manuscript collections or in printed anthologies, such as Johann Spangenberg's *Cantiones ecclesiatica latinae ... Kirchen Gesenge deutsch* (1545, and later editions); Lucas Lossius's *Psalmodia, hoc est cantica sacra veteris ecclesiae selecta* (1553, and later editions); and Johannes Keuchenthal's *Kirchen Gesenge latinisch und deudsch* (1573).

(ii) Hauptgottesdienst.

(a) Introit. The traditional introits (in Latin or German) for the principal Sundays and festivals of the church year and for a few (mostly biblical) saint's days continued to be sung to the traditional chant melodies. But the practice was generally more flexible in the evangelical Mass than in the Roman Mass. On some Sundays and festivals in various towns and cities the introit could be replaced by a suitable Latin motet, usually with a biblical text, that announced the primary theme of the day or celebration. These motets were composed by local church musicians or could be found in the published works of various leading composers, such as Michael Praetorius and Heinrich Schütz, or in motet anthologies such as those edited by Erhard Bodenschatz and Melchior Vulpius.

At other times the introit was replaced by a hymn appropriate to the day or season, either Latin (sung by the choir) or German (sung by the congregation). In each case the singing was unaccompanied, the choir supporting the congregation when a German hymn was sung. Whether the service began with a traditional introit, a choral Latin hymn or a congregational German chorale, the singing was introduced by an improvised organ prelude, the primary purpose of which was to establish the pitch for the unaccompanied singing. In the case of a chorale, such 'preluding' by the organist would remind the congregation of the melody about to be sung. Thus the genre of CHORALE PRELUDE was established. At the end of the 16th century, organ accompaniment was introduced in order to improve the quality of congregational singing (see also §3 below).

(b) Kyrie and Gloria. Luther's *Formula missae* had retained all the traditionally sung parts of the Ordinary; polyphonic settings thus continued to be sung in the early Lutheran Mass. The basic repertory was published by Rhau in Wittenberg: *Opus decem missarum* (1541) for Sundays, and *Officia paschalia* (1539) and *Officiorum ... de nativitate* (1545) for the major festivals. Composers, who were mostly Catholic rather than Lutheran, included Johannes Galliculus, Henricus Isaac, Conrad Rein, Adam Rener, Johann Stahel and Thomas Stoltzer, and much of the repertory was heavily dependent on the partbooks compiled during the first two decades of the century for the ducal Kapelle in Wittenberg (see §1 above). Galliculus's Easter mass (1539) consists of through-composed settings of introit, Kyrie, Gloria, alleluia, sequence (*prosa*), Gospel, Sanctus-Benedictus, Agnus Dei and communion. In some settings, only sections of the texts have music, implying an *alternatims praxis* of chant and polyphony, a practice that continued well into the 17th century. The gradual and Credo were omitted because these would have been sung as German congregational chorales (see below). Since the Sanctus and Agnus Dei were not necessarily sung at every celebration, a composed Lutheran mass came to mean settings of just the first two parts of the Ordinary that were customarily sung, the Kyrie and Gloria, being referred to as 'missa,' or simply 'Kyrie', later 'missa brevis'. Many later Lutheran composers produced masses in which 16th-century polyphony was replaced by 17th-century concerted music with independent instrumental parts, a sequence that culminated in J.S. Bach's large-scale *Missa* of 1733 (BWV232).

(c) Graduallied. The traditional Latin graduals and sequences continued to be sung, at least on some Sundays and festivals. But, whether or not these Latin Propers were used, the congregation sang a vernacular chorale, a Graduallied, between the Epistle and Gospel. This was a *de tempore* hymn appropriate to the day or season, as is directed in both of Luther's liturgical orders. The traditional *alternatims praxis*, in which plainchant alternated with polyphony, was here transmuted into an alternation between congregation and choir. The first stanza of the hymn was sung unaccompanied in unison, with the choir supporting the congregation. The second stanza was then sung by the choir, in a cantus firmus CHORALE MOTET, and thus in alternation throughout the remainder of the hymn. The first collection of such polyphonic settings of chorale melodies was Johann Walter's influential *Geystliche gesangk Buchleyn* (1524), the so-called *Chorgesangbuch*. Employing the twin models of the cantus-firmus technique of Franco-Flemish polyphony and the Tenorlied, especially the imitative style of Stoltzer and Senfl, Walter created a more concise form, with the cantus

firmus supplied by the congregational chorale melody rather than plainchant or secular song. With two exceptions, all Walter's settings follow the established practice of placing the melody in the tenor, the other voices being treated in imitative counterpoint, although some settings are more homophonic. Walter issued later, expanded editions of his *Chorgesangbuch*, and other similar anthologies of chorale motets were also published, notably Rhau's *Newe deudsche geistliche Gesenge* (1544). In such collections the form was further developed by numerous composers, including Sixt Dietrich, Benedictus Ducis, Johannes Eccard, Hans Leo Hassler, Leonhard Lechner, Caspar Othmayr, Melchior Vulpius and Michael Praetorius, among many others. With the passage of time, as what was to become the cantata began to evolve, the Graduallied tended to be sung by the congregation stanza after stanza, and the *alternatims praxis*, and thus the interchange of chorale motet and congregational unison, declined.

In the Valentin Bapst hymnal *Geistliche Lieder* (1545 and later editions), the last *Gesangbuch* to be supervised by Luther, 13 Graduallieder were given in sequence, covering the church year seasons from Advent to Trinity. Over the next generation more Graduallieder were written so that every Sunday and feast day had at least one appropriate hymn directly related to the Gospel of the day. In the manuscript church order of 1579 for Annaberg in Saxony, two hymns were assigned for each Sunday and celebration of the church year (Rautenstrauch, 1907, pp.171–6). Bartholomäus Gesius in his *Geistliche deutsche Lieder ... Welche durchs gantze Jar in der Christlichen Kirchen zu singen gebräuchlich* (1601) assigned as many as three or four hymns for each day. The expansion of the church year hymn repertory continued throughout the 17th century and into the 18th (see Liliencron, 1893, pp.61–77; and Gojowy, 1978). The tendency was to use the oldest hymns as Graduallieder, the newer examples being sung elsewhere in the worship of the day. These church year hymns formed the basic corpus of Lutheran hymnody, and they occur repeatedly, together with their associated melodies, in a wide variety of choral, vocal and instrumental, and organ compositions, especially in the CHORALE CANTATA that emerged during the 17th century.

(d) Epistle and Gospel. Luther stressed the proclamatory role that music should have in the liturgy, and his followers developed the Latin formula 'viva voce evangelii' to express this understanding of music as the 'living voice of the Gospel'. Luther therefore directed that biblical lections should continue to be sung, and in the *Deutsche Messe*he gave in detail the specific melodic formulae for the clergy to chant the Epistle and Gospel. This liturgical recitative continued in Lutheran worship generally until the 18th century, but the practice also gave rise to other genres closely related to the singing of the Gospel.

Rhau's anthology *Selectae harmoniae ... de passione Domini* (1538) included responsorial and motet Passions, together with other music for Holy Week, by such composers as Loyset Compère, Galliculus, Isaac, Antoine de Longueval (Obrecht according to Rhau), Senfl and Walter. The responsorial Passions of St Matthew and St John, attributed to Walter, were sung almost universally until well into the 18th century as, respectively, the Gospels for Palm Sunday and Good Friday. In his *Officia* (1539) and *Officiorum* (1545) Rhau included motet settings of the Gospels for the major festivals of Christmas, Circumcision and Easter by Galliculus, Johannes Lupi, Cristóbal de Morales and Balthasar Resinarius. A more extended collection appeared later as *Evangelia dominicorum et festorum ... continentis ... historias ... de nativitate, de epiphaniis, de resurrectione Jesu Christi* (1554[10]). Thus the 'historia' tradition was established within Lutheranism, whereby narrative accounts of the primary events in the life of Christ are expounded in significant musical settings. The greater part of this repertory consists in Passion settings, based on any one of the four Gospels or on conflated texts and poetic versions, by composers from the 16th century to the 20th, but there are also important musical treatments of Christ's birth, notably by Schütz, J.S. Bach and Hugo Distler, among others, and of his resurrection and ascension.

Another outgrowth from polyphonic settings of the Gospels for the major festivals of the church year was the Gospel motet, or *Spruchmotette* (scripture-verse motet), a through-composed setting of the key verse or verses of the Sunday and festival Gospels. Lassus published 17 Gospel motets between 1556 and 1571, and complete cycles for the church year were issued by Sethus Calvisius (1594–9), Jacobus Handl (1586–90), Leonhard Paminger (1573–80) and Andreas Raselius (1594–5), thus establishing a particular genre that has been extensively employed by subsequent Lutheran composers from the 16th century to the 20th.

(e) Credo. The Creed continued to be sung in Latin to the traditional plainchant melodies as well as in polyphonic settings, though not as regularly as in the Roman Mass. Virtually every generation of Lutheran composers produced through-composed settings of the Latin Credo, which was sung somewhat sparingly in contrast to the vernacular congregational credal chorale, *Wir glauben all an einen Gott*, which was always sung.

(f) Pulpit hymn (Kanzellied). It became customary for one or two stanzas of an appropriate chorale, usually on the Word of God but sometimes reflecting the season of the church year, to be sung by the congegation while the preacher ascended the pulpit steps, preceded by the customary organ chorale prelude.

(g) Sursum corda, Preface, Sanctus. The liturgical dialogue leading to the Preface and Sanctus was sung only on principal days and major festivals of the church year. On other Sundays, following the sermon, the service proceeded directly to the Lord's Prayer and the *Verba testamenti*. This liturgical sequence, beginning with the *Sursum corda*, might be sung in plainchant, or the liturgical dialogue might alternate chant and homophonic responses, leading to the Sanctus, which could be an extended polyphonic (later a concerted) setting. The Benedictus was not always sung. In some areas the tradition was that if the Sanctus was sung to a traditional plainchant melody, the Benedictus followed; if a polyphonic (or concerted) setting was sung, the Benedictus was omitted. Lutheran composers, therefore, commonly wrote independent settings of the Sanctus without necessarily including the Benedictus (e.g. J.S. Bach).

(h) Verba testamenti. Following Luther's liturgical directions, these words were to be sung by the Lutheran celebrant alone, but by the end of the 16th century some Lutheran composers (e.g. Michael Praetorius and Schütz) produced motets of this liturgical text. Whether such motets were intended to be sung at this juncture (on

behalf of a non-musical celebrant), as *musica sub communione* (see next), or at Vespers when these words (which, according to Luther's Small Catechism, had to be memorized by all) were taught as part of the catechism (see below), remains unclear.

(i) Musica sub communionem. In his *Deutsche Messe* Luther commended the practice of music during the distribution of Communion: congregational chorales either with a specific eucharistic content or appropriate to the celebration or season. According to custom these chorals were introduced by organ chorale preludes, which did not need to be as concise as elsewhere in the service, since the distribution took some time to be completed, especially at major festivals. It is likely that the development of the organ genres of CHORALE PARTITA and CHORALE VARIATIONS was influenced by the need for extended music during the distribution of Communion. Luther also directed that his German Sanctus and Agnus Dei (*Jesaja dem Propheten das geschah* and *Christe, du Lamm Gottes*) could also be sung during the distribution. What in the *Deutsche Messe* was considered to be wholly congregational quickly became an alternation between organ and congregation or between congregation and choir. Thus, after the congregation had sung an appropriate chorale and before it sang another, the choir might sing a setting of *Jesaja dem Propheten das geschah* or of Psalm cxi, which Luther included as a communion psalm in the Wittenberg hymnal (Joseph Klug's *Geistliche Lieder*, 1529, 2/1533/*R*). But the choir might equally sing during the distribution a through-composed setting of the Latin Sanctus or Agnus Dei, or else an appropriate motet. In time, with the evolution of the cantata form, *musica sub communione* became another opportunity for concerted music of a devotional nature.

(j) Benediction response and closing chorales. The Benediction was followed by a congregational response, *Gott sei uns gnädig* (from Psalm lxvii), sung to the *tonus peregrinus*. Afterwards three chorales, whose melodies were thematically related, were customarily sung, either by the congregation or by the choir, or by both in combination: *Verleih uns Frieden gnädiglich, Gib unserm Fürsten und aller Obrigkeit* and *Erhalt uns, Herr, bei deinem Wort*. Numerous settings of these chorales, especially *Verleih uns Frieden*, can be found from all periods, notably by Walter, Michael Praetorius, Schütz, J.S. Bach, Felix Mendelssohn and Distler, among many others.

(iii) Vespergottesdienst. This service was very similar to the pre-Reformation daily Office of Vespers. For example, the Saxon *Agenda* (1539/40) gave the following description of the order for use on Saturdays, Sundays and feasts:

> Vespers shall be held at the usual time after midday; the [school]boys shall sing one, two or three Psalms with the antiphon of the Sunday or feast, and thereafter a Responsory or [Latin] hymn, where a pure one is available. Afterwards let a boy read a lesson from the New Testament. After the lesson the Magnificat is sung with an antiphon of the Sunday or feast, and ending with the collects and *Benedicamus*.

Although this basic structure was normative, in practice it was subject to a wide flexibility of use, especially with regard to music (see Leaver, 1990).

a) Psalms. The beginning of the vesper service gave primary place to the psalms, which, until the 18th century, were customarily sung to all eight of the plainchant psalm tones. However, on feastdays and special celebrations in particular, an extended psalm motet would replace the chanted psalmody. Depending on local traditions, the text of these settings could be either Latin or German, and an extended repertory of such settings was built up over the generations, beginning with the psalm motets of Walter and Stoltzer in the 16th century, reaching a particular zenith in Schütz's *Psalmen Davids* (1619) and continuing through subsequent periods to the present day.

(b) Responsory. Traditional chant responsories continued to be sung but usually only on major feasts and their eves. Polyphonic settings were also sung, or the responsory was replaced by an appropriate hymn or motet of the day or season.

(c) Hymn. During the 16th century an appropriate hymn might be sung in a variety of ways: the choir could sing a polyphonic setting of the stanzas of a Latin hymn in alternation with the organ; or the choir could alternate with the congregation, the former singing the stanzas in Latin and the latter singing the equivalent stanzas in German. There was also the possibility, at varying points of the service, of singing a *de tempore* German chorale of the day in the same way that the Graduallied was sung at the morning Hauptgottesdienst, that is, an *alternatims praxis* of congregational unison and choral polyphony.

(d) Lesson, catechism, motet. The lesson was usually the Epistle of the day, and the teaching of the catechism (at Sunday Vespers, as well as on some weekdays) might immediately follow it, or be placed after the sermon. Luther's catechisms were generally divided into six main sections, each one with an associated hymn by Luther:

Ten Commandments	*Dies sind der heilgen zehn Gebot* (EG 231)
Creed	*Wir glauben all an einen Gott* (EG 183)
Lord's Prayer	*Vater unser in Himmelreich* (EG 344)
Baptism	*Christ unser Herr zum Jordan kam* (EG 202)
Repentance	*Aus tiefer Not schrei ich zu dir* (EG 299)
Lord's Supper	*Jesus Christus unser Heiland, der von uns* (EG 215)

As with hymnic versions of the Mass Ordinary, the melodies associated with these hymns formed the basis for many congregational, choral and organ settings by numerous Lutheran composers. The notable example is the second chorale group of Bach's *Clavier-Übung* part 3 (1739), which is made up of two complete cycles of organ chorale preludes on these catechism chorales: one of settings for manuals alone and the other for manuals and pedal, corresponding to Luther's Small and Large Catechisms. But composers also wrote through-composed 'catechism' music that was unrelated to these catechism chorales, such as Matthaeus Le Maistre's *Catechesis numeris musicis inclusa* (1559). Thus the teaching of the catechism might be followed by the singing of an appropriate catechism chorale or motet, or by organ music.

(e) Pulpit hymn. Usually the same as that sung at the morning service.

(f) Magnificat. Following the sermon the *Magnificat* was sung, either in Latin by the choir or in German by the congregation: *Meine Seele erhebt den Herren*, a prose text sung to the the *tonus peregrinus*. The Latin *Magnificat* continued to be sung in settings that alternated polyphony and chant, in all eight tones and with appropriate antiphons. This gave rise to *Magnificat* settings for organ in each of these tones, a genre that continued to be

composed into the 18th century. Alternation of chant and polyphony gave way to through-composed and concerted settings in the 17th century. In his Latin *Magnificat quinti toni* Galliculus incorporated vernacular Christmas songs, such as *Lieber Joseph*, into the texture of his polyphony. Later composers, such as Michael Praetorius, Johann Kuhnau and J.S. Bach, introduced 'chorale interpolations' into the text of the canticle as separate movements for use at Christmas Vespers.

(g) Benedicamus. This could be sung in simple chant or chorally, and might be followed or replaced by the Benediction and Benediction response as sung at the morning service. Similarly, the three related chorales sung at the end of the Hauptgottesdienst were also frequently sung at the end of the Vespergottesdienst.

Walter included many vesper compositions in the various editions of his *Chorgesangbuch*, and Rhau, as he had done for the evangelical Mass, provided a significant corpus of music for evangelical Vespers: *Vesperarum precum officia* (1540) comprised complete choral settings for weekly Vespers; *Sacrorum hymnorum*(1542), polyphonic settings of Latin hymns; *Postremum vespertini officii* (1544), *Magnificat* settings in all eight tones; and additional collections of vesper music by Dietrich and Resinarius.

3. Confessionalism and Orthodoxy (1580–1680). The generation after Luther was characterized by internal theological conflict. The issues were ultimately resolved by the *Formula concordiae* (1577). The content of Lutheran confessionalism was defined by the anthology of documents entitled *Concordia* (1580), usually known in English as the *Book of Concord*. As well as the three historic creeds and Luther's two Catechisms, the *Book of Concord* included the *Augsburg Confession* (1530), which defined Lutheranism as against Roman Catholicism, and the *Formula concordiae*, which established the essence of Lutheran faith in contrast to the alternatives proposed by some of its own theologians. Calvinism was only cursorily addressed, but the growing influence of the Reformed faith in Germany necessitated the Wittenberg Visitation Articles of 1592, which delineated Lutheranism in contradistinction to Calvinism. Thereafter these visitation articles were usually appended to the *Book of Concord*. Before being confirmed in church appointments both clergy and musicians had to give formal and written assent to the detailed confessional content of the *Book of Concord*.

Although Lutheran Orthodoxy was thus established, theological debate continued and became increasingly polemical and polarized. Part of the debate, which materially affected the music of the church, concerned 'adiaphora'. The term was employed to distinguish 'things indifferent' from those that were essential for salvation. Worship forms and ceremonial, including music, came within the purview of 'adiaphora'. For Orthodoxy, worship forms and their music, while being included among the 'adiaphora', could not be considered as peripheral matters of little consequence. On the contrary, Lutheran liturgical forms and practices, along with their musical elements, epitomized the practical outworking of specific Lutheran theology.

Following the lead of Luther, Walter and Rhau in Wittenberg, later Lutheran Orthodox clergy and musicians promoted the use of a wide range of vocal, organ and concerted music in worship. In particular, the Italian concertato style was embraced and explored by such composers as Hassler, Schütz and Michael Praetorius, among others, and organ versets, which substituted for the choir in the alternation singing of hymns and canticles (especially the *Magnificat*), were developed by Hieronymus Praetorius, Heinrich Scheidemann, Samuel Scheidt and others. By the early 17th century the features of the Baroque organ were fully developed and Scheidt contributed significantly to the establishment of idiomatic liturgical organ music, much of it chorale-based, for the Lutheran Church. The increased use of basso continuo, the 'affective' monodic principle and the use of independent instrumental parts led to the transmutation of the chorale motet into the chorale concertato, which consisted of brief, varied movements and instrumental ritornellos. But this new 'seconda pratica' did not displace the older contrapuntal 'prima pratica' style of Latin and German motets, which, as the contents of the widely circulated anthologies of Bodenschatz, Vulpius and Abraham Schadaeus exemplify, continued to be composed and sung. By the second decade of the 17th century the composition of settings of the Latin Ordinary was commonly restricted to the Kyrie and Gloria of the Lutheran *Missa*, although these sometimes appeared in German translation, such as Michael Praetorius's *Missa, gantz Teudsch* (*Polyhymnia*, 1619).

The Thirty Years War had a devastating effect on the musical life of Germany. The large-scale polychoralism of the earlier part of the 17th century was forced to give way to smaller-scale forms, a distinct contrast in style that is apparent when Schütz's *Psalmen Davids* (1619) are compared with his *Kleine geistliche Concerte* (1636, 1639). The war also led to an internalizing of spirituality, a process reflected in the hymnody of Paul Gerhardt, Johannes Crüger, and J.G. Ebeling, as well as in the more intimate musical forms composed by Schütz, J.H. Schein, Andreas Hammerschmidt, W.C. Briegel and others who contributed significantly to the development of the cantata form at the end of the century and also influenced the later Pietist desire for musical simplicity (see §4).

While the music of Orthodoxy was self-consciously Lutheran, it was not without Calvinist influences. In 1573 Ambrosius Lobwasser published his German metrical psalms with French-Genevan tunes. Although Lutheran suspicion of Calvinist 'heresies' led to the censure of the Lobwasser texts and the encouragement of 'Lutheran' metrical psalms, principally those of Cornelius Becker (1602), many of the Genevan tunes were taken over into the Lutheran chorale tradition. These tunes also provided composers such as Crüger in the middle of the 17th century with a compositional model. Calvinist influence is also to be found in the simple note-against-note homophony of Lutheran cantional style, which owes much to the Genevan psalm settings by Loys Bourgeois and Claude Goudimel, among others, and was established in Lutheran Germany by Lucas Osiander (court preacher in Stuttgart, one of the theological architects of the *Formula concordiae*, and also an accomplished musician) in his *Fünfftzig geistliche Lieder und Psalmen mit vier Stimmen … für die Schulen und Kirchen* (1586). Osiander's purpose was to improve the quality of the singing of school choirs by replacing the contrapuntal settings of the previous generation with this simpler style, a feature of which is the placing of the choral melody in the upper voice part rather than in the tenor. In the Hamburg

Melodyen Gesangbuch of 1604, the cantional-style settings by Heinrich Scheidemann, Joachim Decker and Hieronymus and Jacob Praetorius (ii) were, according to the preface, also suitable for the accompaniment of congregational singing. This style, therefore, though originally choral, became the norm for the organ accompaniment of congregational chorales, especially in smaller churches without choirs. Important anthologies of cantional settings include those of Eccard (1597), Hassler (1608), Michael Praetorius (*Musae Sioniae*, vi–viii, 1609–10), Schein (1627), Schütz (1628, 3/1661) and Gottfried Vopelius (1682).

4. Pietism and Enlightenment (1680–1800). German Lutheran Pietism of the later 17th century was strongly influenced by Calvinism in general and by English Puritanism in particular. The translation of Lewis Bayley's *Practice of Piety* into German earlier in the century was particularly important, as was the internalization of spirituality occasioned by the Thirty Years War. Devotional books by German authors, such as Johannes Gerhard's *Mediationes sacrae* (1606) and Johann Arndt's *Wahres Christenthum* (1606–09), stressed the need for inner spirituality to complement outward conformity to orthodoxy. Crypto-Calvinists within Lutheranism went further to suggest that outward liturgical forms, together with elaborate music, should be eliminated. If such things were genuinely 'adiaphora', it was argued, then they could and should be dispensed with. The result of such criticism led Orthodox churchmen to be somewhat circumspect about their views of music in worship, while making no substantial concession to Calvinist demands. Thus the printed sermons of Christoph Frick (1631), Conrad Dietrich (1632), J.C. Dannhauer (1642) and Martin Geier (1672) avowed that formality in worship and its music is inadequate if not accompanied by internal spiritual commitment.

But in his *Wächterstimmen* (1661), the Rostock theologian Theophilus Grossgebauer argued on theological grounds for the elimination of virtually all music that was not effectively congregational. This was substantially the Calvinist position. Grossgebauer was answered by Hector Mithobius, also from Rostock, in his *Psalmodia christiana* (1665), who expounded the Orthodox Lutheran understanding of the place and purpose of 'figural' music in worship. Other Rostock theologians, such as Joachim Lütkemann and Heinrich Müller, were also somewhat critical of liturgical music but, unlike Grossgebauer, argued from within confessional Lutheranism. In his sermons Müller promoted a mystical spirituality, without which, he claimed, worship was merely an outward duty instead of the expression of inward desire. He also edited a hymnal, *Geistliche Seelenmusik* (1659), in which the texts of older hymns were revised and the newer texts, particularly his own, exhibited an intense subjectivity; the melodies, around a third of them the compositions of Nikolaus Hasse, established the freer style developed by the later Pietists (see Bunners, 1966).

Arndt, Gerhardt, Müller and others have to be regarded as pre-Pietists, since the movement cannot be said to have begun until the 1680s, following the publication of P.J. Spener's *Pia desideria*, originally written as an introduction to Arndt's *Wahres Christenthum* in 1675. Spener promoted a programme of spiritual reform based on private devotional meetings for prayer and bible study (*collegia pietatis*). Spener's booklet was widely circulated and became the manifesto of Lutheran Pietism. Spener's successor as the leader of the movement, A.H. Francke, was more radical than his mentor and maintained that Luther had not gone far enough in his Reformation. The primary difference between Orthodoxy and Pietism within Lutheranism was essentially ecclesiological rather than a question of the nature and content of devotional life. Pietists did not have a monopoly on piety; many of the Orthodox, such as Erdmann Neumeister, could express warm devotional sentiments in their sermons, hymns and other poetry, very similar to the imagery favoured by the Pietists. But the Pietists deviated from Orthodoxy on the nature and function of the Church. They argued that the real Church was to be found in the *collegia pietatis* and that public worship should become more like the informal worship of these private gatherings. Elaborate liturgical forms, therefore, should be greatly simplified and church music confined to hymns in a freer, more intimate style, with modest organ accompaniment. In the early 18th-century there was much Pietist criticism of concerted church music, especially the reform cantata promoted by Neumeister, which incorporated secco recitative and da capo aria, both self-consciously borrowed from opera, a practice that Pietists dismissed as inappropriate 'theatralische Kirchen-Musik' (see Heidrich, 1995).

In spite of the acrimonious debates between Orthodox and Pietist proponents over theology, ecclesiology, worship practice and the nature of church music, the spirituality of both was nevertheless expressed in similar terms. For example, the music of Buxtehude shows traces of Pietist influence, and the important and widely used Pietist hymnal edited by J.A. Freylinghausen, *Geistreiches Gesang-Buch* (1704; censured by the Orthodox Wittenberg theological faculty in 1716), included some hymn texts written by the Orthodox Neumeister. Similarly, many of the melodies that J.S. Bach edited (BWV439–507) for G.C. Schemelli's *Musicalisches Gesangbuch* (1736) – essentially an Orthodox hymnal – were either taken from the Freylinghausen *Gesang-Buch* or composed in a similar style.

The rationalism of the Enlightenment paralleled Pietism in its effect on Lutheran worship life and its music. Elaborate music and highly developed liturgical ceremonial were considered to be remnants of an earlier unenlightened period and should therefore be substantially simplified, if not abolished. During the second half of the 18th century worship was reduced to a simple structure of hymns, readings, prayers and moralistic preaching; the sacraments were undervalued; and the music of worship was reduced to the singing of rationalized hymn texts to melodies composed in or revised to conform to a *galant* style. After its climax in the works of Bach, Lutheran church music thus declined, and its more significant compositions were mostly the extra-liturgical oratorio with its Italian operatic influences. The generation of C.H. Graun, J.F. Doles, C.P.E. Bach and J.A. Hiller produced religious music reflecting polite church-going society in contrast to the specifically liturgical and confessional music of previous generations.

5. Restoration and conservation (1800–1914). The 300th anniversary of Luther's *95 Theses* (1517–1817) gave rise to the beginnings of a restoration movement that countered the effects of both Pietism and the Enlightenment on the theology and practice of the Lutheran Church. In his *Von dem Wort und dem*

Kirchenliede (Bonn, 1819/*R*) E.M. Arndt called for the texts of the old hymns to be restored to their original forms. Although Arndt's agenda was concerned with texts, others saw that his arguments also applied to hymn melodies. But the restoration also involved liturgy and church music as well as hymnody. Berlin was in the forefront of this restoration movement, with the theologian Friedrich Schleiermacher assuming a leadership role and Romanticism supplying its ethos. In 1829 a new liturgical *Agenda* for the area was issued in Berlin, a revision of the Berlin cathedral liturgy of 1822, which was one of the earliest attempts at a restoration of liturgical form and content. In the 1822 *Agenda* the supplement of liturgical music was scored for TTBB, but in 1829 it was arranged for SATB. The same year (1829) a new hymnal, influenced by Arndt's views, was published as *Gesangbuch zum Gottesdienstlichen Gebrauch*, and the following year A.W. Bach, Felix Mendelssohn's organ-teacher, published his *Choralbuch* (1830) containing organ settings for use with the new hymnal. Many of Mendelssohn's specific church compositions were written for the choir of Berlin Cathedral around this time.

But the Prussian Church, centred in Berlin, was in the process of becoming a union Church, incorporating both Lutheran and Reformed (Calvinist) congregations. To confessional Lutherans such unionism compromised their theology and worship in general and their music and hymnody in particular. Confessional Lutherans either moved to specifically Lutheran areas or founded Lutheran churches independent of the state; some emigrated to the USA. In Bavaria Wilhelm Löhe argued for a raising of liturgical standards within the Lutheran Church and, with American Lutherans in mind, published *Agenda für christliche Gemeinden des lutherischen Bekenntnisses* (1844), a complete set of liturgical forms taken largely from 16th-century sources, with liturgical chant edited by Friedrich Layriz. Layriz was a pioneer in advocating the abandonment of the later isometric forms of chorale melodies in favour of their original rhythmic versions. He published his collection of 16th- and 17th-century melodies in 1839; this was expanded in later editions and was reprinted in the USA in the 1880s. The work of Layriz and others led to the publication of *Deutsches evangelisches Kirchen-Gesangbuch: in 150 Kernliedern* (1854), a collection of the primary chorales of Lutheranism (both texts and music), given in their original forms, intended as a resource for hymnal editors. The voluminous riches of Lutheran hymnody were thoroughly researched in substantial reference works and issued in definitive editions (Knapp, 1850, 4/1891; Wackernagel 1855/*R*, 1864–77/*R*; Fischer 1878–86/*R*; Zahn, 1889–93/*R*; Fischer and Tümpel, 1904–16/*R*). Many of the 16th-century church orders (which not only included liturgical forms but also other material such as prescriptions concerning the duties of organists and church musicians) were republished (Richter, 1846/*R*), as well as an extensive anthology of liturgical music, mostly edited from early Lutheran sources (Schoeberlein, 1865–72/*R*). Lutheran church music was the subject of extensive study (e.g. Winterfeld, 1843–7/*R*; Kümmerle, 1888–95/*R*; Liliencron, 1893/*R*), and a succession of collected works of Lutheran composers began to be published, for example, J.S. Bach (in 1851), Handel (in 1858), Schütz (in 1885) and Schein (in 1901). The publication of the music of Bach, together with Spitta's monumental biographical study of the composer, had a significant impact on the later decades of the century. Nevertheless, even though Bach and Schütz were promoted as models for Lutheran church musicians, much of the music heard in many churches during the later 19th century reflected the successive Romanticism of Mendelssohn, Brahms, Herzogenberg and Reger. There is a certain irony in the fact that none of these composers was in the mainstream of Lutheran church music reform: they were, respectively, a converted Jew, an agnostic and two Catholics. Further Catholic influence on Lutheran church music in the later 19th century was the Palestrina style, brought into prominence by the Cecilian movement.

6. Rebirth and incorporation (after 1914). During the 20th century a re-evaluation of the scriptures and the liturgy, together with a renewed interest in the life and theology of Luther, prompted a revival of liturgical worship and its music. The characterization of the 'rebirth' of church music in the early years of the century was coined by Söhngen (1953). This rebirth arose from the new awareness of Lutheran liturgical music traditions that had been fostered during the second half of the previous century. But it was furthermore part of a multifaceted renewal that included the singing movement (or Singbewegung), the amateur music-making movement (Laienspielbewegung), the organ renewal movement (Orgelbewegung), the Bach movement, especially the influence of Karl Straube in Leipzig, the new theological climate ushered in by Karl Barth's commentary on *Romans* (1918), the ecclesiastical movement for liturgical renewal that was fostered by a new critical and comprehensive anthology of 16th-century Lutheran church orders (Sehling, 1902–13), and the founding of the liturgically-orientated Michaelsbruderschaft (1931), whose influence continued for much of the remainder of the century.

A new hymnal, *Deutsches evangelisches Gesangbuch* (DEG), was published in 1915, the first to be designed for use by all the territorial churches (Landeskirchen), replacing the many regional and local hymnals that had been customary in earlier generations. In the years following, each Landeskirche issued its own edition of the basic anthology of Lutheran hymns, together with its own supplement of additional hymns and liturgical pieces. A new set of regional supplements to DEG were published in about 1930, the 400th anniversary of the Augsburg Confession (1530). Most of the texts and tunes were of the older, classic hymns from the 16th to the 18th centuries, with some examples of 19th-century German hymnody. However, some new chorale melodies were beginning to be composed, for example, H.F. Micheelsen's *Neue Gemeindelieder* (1938).

Schöberlein's treasury of liturgical music (1865–72) was reprinted in 1928; work began on its replacement, a new critical and practical anthology (Ameln, Mahrenholz and Thomas, 1933–); and important studies were issued (e.g. Gosslau, 1933; Leupold, 1933; Kempff, 1937).

In choral church music there was a distinct reaction against Romanticism. Pre-19th-century compositions were commended both as music to be performed liturgically and also as models for contemporary composition. New collected editions of the works of Lutheran composers were begun during this period, for example, Vincent Lübeck (in 1921), Scheidt (1923), Buxtehude (1925), Michael Praetorius (in 1928) and Johann Walter (1941). The influential journal *Musik und Kirche* was founded in

1928, Blume's seminal history of Lutheran church music first appeared in 1931 and Moser's larger study of Schütz was published in 1936. New directions in composition for the Church were signalled in Kurt Thomas's Mass in A minor (op.1), heard for the first time sung by the Thomanerchor in Leipzig under the direction of Straube in 1925. Notable composers of this period include J.N. David, Hugo Distler, Karl Marx, Arnold Mendelssohn, Günter Raphäel, Ernst Pepping, Johannes Petzold and Hermann Stern, whose works reflected the music of the past while exploring 20th-century techniques and employed biblical, liturgical and chorale texts (see Distler, 1935). Some of the Landeskirchen founded church-music schools that offered systematic study of the theory and practice of church music, preparing candidates for the ministry of music in the individual churches: these schools include Aschersleben (1926), later moved to Halle; Spandau (*c*1927); Heidelberg (1931) and Hamburg (1938) (see Blankenburg, 1968). In addition to local church choirs, a marked feature of German Lutheran church music is the widespread use of Posaunenchöre (trombone choirs), a tradition that has its roots in the old custom of using municipal musicians for church music, although in the modern manifestation such groups are amateur rather than professional.

With the rise of National Socialism and the dominance of the Landeskirchen by the Nazi 'Deutschen Christen', Lutheran church music during the 1930s was deflected into a heavily nationalistic and anti-Semitic mode. The DEG was criticized for its inclusion of Semitic vocabulary, and from the mid-1930s other hymnals with titles such as *Gesangbuch der kommenden Kirche* were published, from which Hebraisms ('Alleluia', 'Amen', 'Sabaoth' etc.) had been expunged and whose texts manifested a pronounced 'Vaterland' vocabulary and imagery.

The immediate postwar period in Germany was one of restoration, rebuilding and recovery of what had been lost or disfigured between 1933 and 1945 (see Söhngen, 1954; Prolingheuer, 1989; Riethmüller, 1989; Krieg, 1990). In many respects this was a process of reconstitution of what had begun before the rise of the Third Reich, though now hampered by the existence of two German nations. New church-music schools were founded by those Landeskirchen that had not created such institutions during the inter-war years, for example, Griefswald and Hanover (1945), Görlitz and Schleuchtern (1947), Bayreuth (1948), later in Erlangen, Esslingen (1948), Frankfurt am Main, Herford, Dresden and Düsseldorf (1949), and Eisenach (1950). In 1948 the territorial churches came together to form the Vereinigte Evangelisch-Lutheranische Kirche Deutschlands (VELKD). A new hymnal, *Das evangelische Kirchengesangbuch* (EKG), was published in 1950. Like the DEG it replaced, the EKG provided a basic corpus of hymnody to which each Landeskirche added its own supplement. Similarly, the EKG was also a conservative collection of hymnody, with over 90% of its content dating from the 16th to 18th centuries. The EKG was followed by new liturgical forms issued by the VELKD in 1955.

The postwar years saw many new publications: the journals *Der Kirchenmusiker* (1950–) and *Jahrbuch für Liturgik und Hymnologie* (1955–); Moser's expansive study of Lutheran church music (1953); new collected editions, replacing the earlier ones, of the works of J.S. Bach (1954–) and Schütz (1955–); the Walter edition that had foundered during the war years (1953–); and entirely new editions of the works of Telemann (1950–), Leonhard Lechner (1956–), and the music publications of Georg Rhau (1955–). There was much discussion of and experimentation in new music (see Böhm, 1959; Blume, 1960; Scheytt, 1960; Blankenburg, Hoffmann and Hübner, 1968; Söhngen, 1978 and 1981). Among the new composers were those who had studied with Straube, Pepping and Distler, such as Jan Bender (who later spent some years in the USA), Günther Ramin, and Siegfried Reda. Others were H.W. Zimmermann, who was influenced by jazz idioms, Wolfgang Fortner, who developed a neo-classical style, and P.E. Ruppel, who drew inspiration from black American spirituals. Anthologies of choral music were issued for practical use, such as *Das Wochenlied* (1951), mostly 3- and 4-part settings of the primary church year hymns edited by Philipp Reich, which not only included compositions from earlier periods but also newly commissioned pieces by such composers as F.M. Beyer, Walter Kraft, Konrad Voppel and Friedrich Zipp. On the other hand, the *Chorgesangbuch* (1975) for one to five voices, edited by Richard Gölz, consisted almost entirely of 16th- and 17th-century settings. Those who held important church music positions, such as the brothers Erhard and Rudolf Mauersberger – respectively directors of the Thomanerchor, Leipzig, and the Kreuzchor, Dresden – influenced the repertory of churches in other cities and towns.

From the 1950s the influence of the Kirchentag, a lay church congress held every few years, promoted a newer, freer style of church music and hymnody that contrasted with mainstream Lutheran church music. Ecumenical and international contacts have similarly augmented the German Lutheran tradition, reflected in the new liturgical *Agenda* (1990) and the new hymnal *Evangelisches Gesangbuch* (EG) of 1993. Unlike its predecessor (EKG), EG includes a significant proportion of hymnody and liturgical music from non-German sources, for example, from England, most central European (as well as some East European) countries, Nordic countries, Israel, USA, Latin America, Africa and Asia. As with other church music traditions at the end of the 20th century, an increasing proportion of the music heard in individual congregations is representative of worldwide Christianity.

7. Nordic traditions. The development of church music in the Lutheran churches of Nordic countries (Denmark, Norway, Iceland, Sweden and Finland) paralleled that of Germany between the 16th and 18th centuries. The Chapels Royal in Copenhagen and Stockholm were particularly influential, especially in the latter part of the 17th century, when Andreas and Gustaf Düben, father and son, performed in Stockholm works by many leading German and Italian composers. Both Schütz and Buxtehude spent some time working within the Danish kingdom.

Claus Mortensen issued a Danish Mass and hymnal in 1528, and Olaus Petri published Swedish hymns in 1526 (with at least four further, enlarged editions by 1546) and a Swedish Mass (influenced mostly by Luther's *Formula missae* rather than his *Deutsche Messe*) in 1531. Both Danish and Swedish practice involved the continued use of Gregorian chant forms and congregational hymnody modelled on the German chorale, although some of the tunes were adapted from Danish and Swedish folksongs. Hans Thomissøn's *Den danske Psalmebog* (1569; eight

further editions by 1634), a collection often described as the greatest achievement in the history of Danish church music, contained liturgical music as well as hymnody; and Niels Jesperssøn's *Gradual: en almindelig sangbog* (1573, 1606, 1637), the Danish equivalent of Lucas Lossius's *Psalmodia* (1553), provided chant forms for the Propers of the church year. Similarly Laurentius Petri's revisions of the Swedish Mass (1541–57), incorporated into *Den svenska kyrkoordningen* (1571), called for the continued use of liturgical music. Later Danish hymnals that had a continuing influence were those associated with Thomas Kingo (from 1683) and H.A. Brorson (from 1739). Swedish hymnody of the 18th century was dominated by *Then swenska psalmboken* (1695), whose *Koralbok* (1697) was a carefully edited production, each melody being supplied with figured bass. The foremost Nordic composer of church music in the 18th century was the Swedish J.H. Roman.

The remarkable *Piae cantiones* (1582) edited by Theodoricus Petri Nylandensis, a Finnish student at Rostock University, does not fit conveniently into any category, and yet it was one of Scandinavia's most influential collections of music. It included plainchant hymns, medieval carols, student songs and a few rudimentary polyphonic settings and was widely known throughout most of Finland and Sweden for over 200 years.

The use of Latin and Gregorian chant was abandoned in Denmark by the end of the 17th century, and somewhat later in Sweden and Finland. The influence of Pietism touched most of the Nordic countries in the 18th and 19th centuries, especially Sweden, as is witnessed in the many manuscript chorale books in which the Pietistic texts are set to ornamented variants of earlier tunes and a wide selection of folk melodies. By 1800 simpler, isometric forms had become the norm in chorale books, one example being H.O.C. Zinck's *Koral-Melodier* (1801), the last Danish collection to include figured bass.

Much 19th-century Nordic church music was composed expressly for major festivals and other special occasions, in a style strongly influenced by the Cecilian movement; Uppsala was an influential centre for such extra-liturgical music. Leading composers include C.E.F. Weyse, J.P.E. Hartmann and H. Matthison-Hanson in Denmark (Niels Gade composed little for church use); B.W. Hallberg and J.A. Söderman in Sweden; and L.M. Lindeman in Norway. In the earlier 19th century in Sweden, male-voice choirs, which sang a repertory of simple hymnic settings, were very popular throughout the country; in mid-century attempts were made to encourage a broader range of choral music in the churches.

The 20th century was marked by the liturgical movement that affected all Nordic churches. For example, at the turn of the century a committee was formed to provide musical settings for the revised Swedish prayer book of 1894. The resulting *Svenska massan* of 1897 laid the foundations of Sweden's 20th-century liturgical style that combines chant forms along with traditional and newly composed music. All the Lutheran churches of Nordic countries issued new hymnals in the latter part of the 20th century, such as the *Den danske salmebog* (1982), *Norske salme bok* (1985) and *Den svenska psalmboken* (1986), that exhibit a common core of Lutheran hymnody (much of it German), examples of their own distinctive linguistic and national tradition, together with a selection of representative items from world Christianity. Recent composers include S.-E. Bäck, Roland Forsberg, Egil Hovland and Trond Kverno.

8. North American traditions. A number of independent settlements of Lutherans on the east coast of the continent existed in the 17th century; these were essentially foreign churches, supported and staffed by the home country. A significant increase in the immigration of Lutherans occurred in the 18th century: some settled in what is now Georgia, others in New York and Pennsylvania. H.M. Muhlenberg (1711–87), 'the patriarch of the Lutheran Church in America', was commissioned by G.A. Francke, the director of the Pietist missionary enterprises in Halle, to minister in America. Muhlenberg soon rose to a position of influence and leadership among the Pennsylvania clergy. In the 1740s he observed that organs were a rarity and that hymn singing was either appalling or non-existent. His concern for music provided the inspiration for the first German hymnbook produced in America, the *Erbauliche Lieder-Sammlung* (1786), which drew largely on the Halle Pietist hymnal, *Neues geistreiches Gesang-Buch*, edited by Freylinghausen. The influence of Pietism in these pioneer days was such that little music other than hymn singing flourished.

In the mid-19th century there was a new influx of immigrants from Germany, who brought with them various regional hymnals. In their desire to be doctrinally orthodox they turned away from much of the 18th- and 19th-century content of these hymnals and rediscovered the rugged hymns of the 16th century. They abandoned the later isometric forms of the melodies in favour of the original rhythmic forms as they found them in Friedrich Layriz's chorale books (see §5 above). These volumes, together with his liturgical settings for Löhe's *Agenda* (1853), helped to make Layriz influential in forming the musical ideals of Lutheranism in the USA. As in Germany, the recovery of early Lutheran hymnody led to a rediscovery of classic Lutheran composers and their music. Indeed, Lutheran immigrants from Nordic countries continued with the hymnody of their own language-group, largely a blend of folksong and the type of tune promoted by German Pietism.

The renaissance of choral music began in the early 20th century, largely through the efforts of F.M. Christiansen, composer and conductor at St Olaf Lutheran College, Northfield, Minnesota. In 1941 the music department of Concordia Publishing House, St Louis, was reorganized and thereafter restricted its publication of music to what was specifically appropriate for Lutheran worship. For the next 40 years this publisher had an enormous impact on American church music generally. In 1944 Theodore Hoelty-Nickel founded the Valparaiso University Church Music Seminar, an annual event that provided information and inspiration to Lutheran composers and musicians. Other pioneers included C.F. Pfatteicher, Paul Bunjes and Walter Buszin, organists who exerted considerable influence through their writings, lectures, recitals and performing editions. A new awareness of the place of music in the worship and witness of the Lutheran Church was fostered, which included new ideals in organ building and the use of varied instrumental resources. In the 1960s the influence of German composers such as Pepping, Distler and H.W. Zimmermann was strong, partly owing to Distler's pupil Jan Bender, who was then resident in the USA. Other composers active since the 1960s include Richard Wienhorst, Daniel Moe, Richard Hillert, Carl

Schalk, Walter Pelz and David Johnson. But the music of such non-Lutheran composers as Healey Willan, Dale Wood and Richard Proulx has also been widely used in Lutheran churches. In the last quarter of the 20th century various Lutheran hymnals were issued, including the *Lutheran Book of Worship* (Inter-Lutheran Commission on Worship, 1978); *Lutheran Worship* (The Lutheran Church – Missouri Synod, 1982); *Christian Worship: a Lutheran Hymnal* (Wisconsin Evangelical Lutheran Synod, 1993); and *Evangelical Lutheran Hymnary* (Evangelical Lutheran Synod, Mankato, Minnesota, 1996). Most of these hymnals are conservatively 'Lutheran', but the supplementary hymnals of this period exhibit a more pronounced ecumenical and international content.

9. WORLDWIDE LUTHERANISM. As Lutheranism expanded through missionary endeavour in the 19th century, in Latin America, Africa, Australasia and elsewhere, church music developed in ways similar to the process of acculturation that had occurred earlier in Nordic countries. The earlier periods were characterized by the importation of the traditions of the respective European Lutheran missionaries (German, Danish, Swedish, Norwegian etc.). During the latter part of the 20th century the tendency was to incorporate indigenous musical styles as well as maintaining an ecumenical perspective.

ROBIN A. LEAVER

Luthier (Fr.; It. *liutaio*). Originally the word for a lute maker, it has become a general term for a maker of violins or other string instruments. Though French, the word has gained currency in English and German. Similarly, the derivative 'lutherie' (lute making) has acquired the meaning of instrument making in general.

Lutkeman, Paul. *See* LUETKEMAN, PAUL.

Lutkin, Peter Christian (*b* Thompsonville, WI, 27 March 1858; *d* Evanston, IL, 27 Dec 1931). American music educator, organist, conductor and composer. He was a chorister at the Episcopal Cathedral in Chicago and taught piano at Northwestern University in Evanston (1879–81) before studying with Raff, Bargiel and Haupt in Berlin, and Moszkowski in Paris (1881–4). On returning to Chicago he served as organist of St Clement's (1884–91) and St James's (1891–7). His main achievement was the founding and development of the Northwestern University School of Music, of which he was the first dean (1895–1928); he established the Chicago North Shore Festival (1909–30), and served as its choral conductor. He was a founder of the American Guild of Organists (1896) and received an honorary MusD from Syracuse University (1900). Lutkin's compositions consist mostly of church music. His writings include *Music in the Church* (1910), *Hymn-Singing and Hymn-Playing* (1930), and a *History of Music in Northwestern University* (MS in *US-Eu*).

BRUCE CARR

Lütolf, Max (*b* Altishofen, 1 Dec 1934). Swiss musicologist. He studied musicology first at the University of Fribourg with Brenn, and then with Schrade and Schmitz at the University of Basle, where he took the doctorate in 1967 with a dissertation on medieval polyphonic mass settings. Concurrently he made extensive research trips to nearly every European country. He also worked as an assistant under Schrade (1959–61) and subsequently became Kurt von Fischer's research assistant (1967) and a lecturer at the musicology department of Zürich University (1968). He completed the *Habilitation* in 1975 with a study of the polyphonic Italian Passion, and was appointed reader in 1977. He was a member of the directorate of the Schweizerische Musikforschende Gesellschaft (from 1971) and the IMS (1977–87) and he is general editor of the Schoeck collected edition.

Lütolf's main areas of research have been the history of music in the Middle Ages, Italian music after 1600 and French music around 1700. His dissertation, for which he received the Dent Medal in 1973, is a particularly authoritative exposition, informed by philological precision, a wide knowledge of sources and a remarkable analytic method. In his important first critical edition of an *opéra-ballet* by André Campra (*Les festes vénitiennes*, 1710), his study of the incorporation of earlier ideas into French music of this period gave rise to some valuable aesthetic hypotheses. He also specializes in the history of music in Switzerland and has prepared the published work-lists of the composers Albert Jenny (Zürich, 1985), Oswald Jaeggi (with E. Jaeggi, Zürich, 1990), Reinhard Peter (with B. Hangartner, Stans, 1992) and Paul Huber (St Gallen, 1993).

JÜRG STENZL

Lutosławski, Witold (Roman) (*b* Warsaw, 25 Jan 1913; *d* Warsaw, 9 Feb 1994). Polish composer.

1. LIFE, 1913–45. He was born into a distinguished family of the Polish landed gentry which had its estates in and around Drozdowo, on the river Narew, north-east of Warsaw. He was the youngest son of Józef Lutosławski (1881–1918), an accomplished amateur pianist who had taken lessons with Eugene d'Albert. Together with four of his brothers, Józef was active in the politics of the

National Democracy Party, Endecja, which sought to align Poland with Imperial Russia in order to counter the expansionism of Imperial Germany. On the outbreak of World War I, many Poles associated with Endecja sought refuge in Russia. The Lutosławski family, who found themselves directly in the path of the invading army, left for Moscow, where Witold spent his next three years of childhood: he later recalled witnessing the commotion in the streets at the time of the 1917 February and October revolutions. Both before and during the revolutionary period, Józef Lutosławski was away from Moscow helping to organize the formation of Polish military units under the cover of the Imperial administration. But after the October revolution, the Poles found themselves in direct conflict with the victorious Bolsheviks. Józef and his brother Marian were arrested and, in September 1918, executed by firing squad. After her husband's death Maria Lutosławska left Moscow with her three sons, taking refuge at her family home in the Ukraine. Once the German occupation of Warsaw had ended on 13 November 1918, the family returned briefly to Drozdowo, the estates of which had been ravaged during the occupation, before settling again in the centre of Warsaw.

It was in Warsaw that Witold's musical education began. At the age of six he started to have lessons with a well regarded piano teacher, Helena Hoffman, who gave him a secure grounding in piano technique and music theory. His mother's financial difficulties, however, forced her to curtail the lessons after two years. In 1921, the family returned to Drozdowo, and Lutosławski resumed piano lessons with a local teacher. The training was not of the same calibre as that provided by Hoffman; nevertheless he was encouraged to compose, and, by the age of nine, had produced his first piano piece.

In 1924 Maria and her sons returned to live in Warsaw, where Lutosławski entered the prestigious Stefan Batory high school and continued his piano studies with Józef Śmidowicz (1888–1962). Two years later, in 1926, he began violin studies with an eminent teacher, Lidia Kmitowa (1888–1967), and, after six years, had gained sufficient proficiency on the instrument to be able to perform solo works by Bach, as well as Mozart concertos and the Franck sonata. Perhaps the most significant musical experience from his adolescence was a 1924 concert performance in Warsaw of Szymanowski's Symphony no.3 'Song of the Night' (1914–16). This was apparently his first exposure to the live orchestral sound in that rich, post-Debussian harmonic vocabulary characteristic not only of Szymanowski but also of Ravel and early Stravinsky. These figures, together with Debussy, were to influence the development of Lutosławski's sound language. Some aspects of Szymanowski's musical aesthetic, such as his 'orientalism' and his effusive emotionalism, were later to repel him. Lutosławski's cooler, more controlled temperament was inclined more to the anti-Romanticism of Stravinsky than the post-Romanticism of his compatriot.

In 1927 Lutosławski entered the Conservatory as a part-time student, while still attending the Stefan Batory high school, but had to suspend his studies there after a year because of the combined pressure of schoolwork and violin studies. In the meantime, however, he had made sufficient progress in composition to write a *Poème* for piano, on the strength of which he was accepted as a private composition pupil of Maliszewski. He then proceeded, in 1930, to write *Taniec Chimery* ('Dance of the Chimera'), for piano, which was his first publicly performed piece. His first attempt at an orchestral piece, a Scherzo, also dates from that year, but, like the piano pieces, it has not survived. Maliszewski's teaching in the area of musical form was to prove one of the strongest and most enduring influences on Lutosławski. His approach, taught through analysis of the works of Haydn and Beethoven in particular, was to examine musical forms as different kinds of abstract drama. He identified four basic kinds of musical 'character' within a large-scale form: introductory, transitional, narrative, and concluding. The psychological journey through the piece would be analysed according to the interaction of these types of formal function. Lutosławski's recollection of Maliszewski's teaching that 'only in the Narrative is content the most important thing to be perceived, while in all the other three the role of the given section in the form of the music is more important than the content' provides a vital clue to understanding his own approach to large-scale form. Maliszewski's four basic 'characters' can be identified in many of Lutosławski's large-scale forms; in certain works, such as *Jeux vénitiens* and *Livre pour orchestre*, they can be associated directly with the individual movements of a four-movement form.

After passing his final high school examinations in 1931, Lutosławski enrolled at Warsaw University to study mathematics, while continuing to study privately with Maliszewski, Kmitowa and Śmidowicz. That year he composed incidental music for a dramatization of *Haroun al Rashid*. In 1932, he formally entered Maliszewski's composition and analysis class at the Warsaw Conservatory; he also discontinued his violin studies in order to concentrate on the piano, enrolling at the Conservatory as a student of Jerzy Lefeld (1898–1980). The following year he curtailed his studies of mathematics, withdrawing from Warsaw University in order to devote himself fully to a musical career.

The most immediate result of his new concentration on composition was the first performance of an orchestral piece (lost at the end of the war): a revised version of a dance from *Haroun al Rashid* was conducted by Józef Oziminski at the Warsaw Philharmonic Hall. The most significant piece from these student years is also his earliest extant work, the Piano Sonata, completed in December 1934. Lutosławski gave several performances of the piece himself, notably in Riga and Wilno (now Vilnius) in 1935. It was at one of the Riga performances that he had his one and only meeting with Szymanowski.

In 1936 Lutosławski received his piano diploma from the Warsaw Conservatory, and in the following year he was awarded his composition diploma on the basis of a portfolio that included two fragments of a requiem, Requiem aeternam and Lacrimosa, of which only the latter survives. He had in the meantime begun work on the Symphonic Variations, which he completed, after his compulsory year of military service, in 1938. They received their first performance in a Polish Radio broadcast in April 1939, and their first concert performance two months later in Kraków by the Polish RSO under Grzegorz Fitelberg, who became a significant champion of Lutosławski's work. Since his graduation in 1937, Lutosławski had hoped to continue his studies with Nadia Boulanger in Paris; but military service had already intervened once, and by the middle of 1939 general

mobilization was ordered and Lutosławski found himself back in uniform as an officer cadet in the signals and radio unit. He was eventually taken prisoner by the German Wehrmacht near Lublin, but after eight days in captivity, managed to escape and make his way back to Warsaw. (His less fortunate brother Henryk was taken captive by the Red Army and died in the Gulag Archipelago in 1940.) Lutosławski remained in Warsaw until 1944, earning his living by performing in cafés, first with a cabaret group and later in a piano duo with his composer contemporary Panufnik. Together they made numerous arrangements for two pianos: Lutosławski's set of Variations on a Theme by Paganini (1941), based on the famous A minor Caprice, dates from this period. Just before the launch of the heroic but ill-fated Warsaw uprising of August–October 1944, Lutosławski and his mother left the city to seek refuge with relatives at Komorów. He was able to take only a handful of works, including his sketches for the First Symphony, a few student pieces (including the Piano Sonata), the Two Studies for piano, the Symphonic Variations and the Paganini Variations. All his other scores were left in Warsaw where they perished during the final destruction of the city. While in Komorów, Lutosławski occupied himself by writing a series of contrapuntal studies, mostly canons and interludes for wind instruments. Elements of this material were to find their way into the First Symphony as well as a Wind Trio.

2. Life, 1945–94. With the absence of musical life in Warsaw in 1945, cultural and artistic activity transferred to Kraków where there was still an infrastructure. From 29 August to 2 September the first congress of the new Polish Composers' Union (ZKP) was held, together with a festival of new music, at which Lutosławski's Wind Trio was first performed. He was elected secretary and treasurer of the ZKP and held these honorary positions until the political deterioration of 1948. For a brief period immediately after the war, Lutosławski held the position of music director at Polish Radio. He also embarked on a series of projects for Polskie Wydawnictwo Muzyczne (PWM), the new Polish publishing house for music, based in Kraków. In 1946 he wrote incidental music for two films, one of which, *Suita Warszawska*, is a particularly good example of his deft treatment of folk sources and imaginative use of small orchestral resources.

On 26 October 1946 Lutosławski married Danuta Bogusławska, daughter of the architect Antoni Dygat, and sister of the writer Stanisław Dygat. They moved into a cramped apartment with their respective mothers and the son from his wife's first marriage. In order to support this extended family, Lutosławski composed a large quantity of 'functional music' of various kinds, including children's songs (primarily for Polish Radio), songs and instrumental pieces based on folk material, commissioned by PWM; popular songs and dances under the pseudonym 'Derwid', and much incidental music for the theatre (principally the Teatr Polski in Warsaw) and for radio plays. It is important to distinguish between these modest but numerous functional pieces, and the concert pieces, especially cantatas and other vocal works, which other composers wrote in order to satisfy the criteria of socialist realism. (This issue re-emerged during the politically turbulent period of the early 1980s, when an attempt was made to discredit Lutosławski by falsely suggesting that he had composed a 'cantata' in praise of the Stalinist regime.) Lutosławski's use of folk material after the war was not a response to the new political climate: indeed the folk-influenced pieces he composed in 1946 predated the political pressures, which began in earnest only in 1948. He soon became a victim of those pressures nonetheless. In November 1948 he was dropped from the committee of the Polish Composers' Union, and in August 1949 his First Symphony became the first significant Polish composition to be branded as 'formalist' and thus proscribed. It was not performed again in Poland until the late 1950s.

During the 1950s Lutosławski survived the changes in political climate by pursuing three parallel strands of activity. The first of these involved a substantial output of functional pieces for immediate consumption (including many little popular pieces written under the pseudonym 'Derwid'). The second yielded a small number of modest concert pieces, based on folk material, which were far removed from the 'serious' musical projects on which he would have preferred to work. The third strand was hidden from public view, and concerned his private investigations into new elements of compositional technique. Aspects of these techniques were tested in a few of the functional pieces (for example, his technique of melodic interval-pairing, which appeared in certain children's songs), but his more radical techniques of pitch organization (such as 12-note chords) were not able to progress beyond his private sketch materials. It is thus entirely misleading to suggest, as did many western European commentators in the 1960s and 70s, that Lutosławski changed his style as a result of the post-Stalin 'thaw' and the events that followed (such as the establishment of the Warsaw Autumn Festival in 1956). His sketches show that his style and technique were continuing to develop throughout the late 1940s and 1950s, but the political circumstances of the time prevented him from applying the elements of his new harmonic language in concert pieces until works of the late 1950s, such as the Five Iłłakowicz Songs, and in *Muzyka żałobna* (*Musique funèbre*, 1954–8). The folk-music period reached its high point with the Concerto for Orchestra (1950–54), and its conclusion with the Dance Preludes (1954).

The Concerto for Orchestra established Lutosławski's reputation in Poland as the leading composer of his generation, especially since Panufnik, his most eminent contemporary, had defected to England. Four years later, his *Musique funèbre* brought him international acclaim, an acclaim that was further enhanced in 1961 by *Jeux vénitiens*, the first piece to adopt his particular approach to aleatory techniques. In 1963 Lutosławski returned to the podium as conductor of the orchestra in the first performance of his *Trois poèmes d'Henri Michaux*. His previous experience of conducting had been in radio studios with broadcasting orchestras, but from 1963 he was to be increasingly active conducting his own works in concert performances. His main motivation for doing this was to overcome difficulties presented by his aleatory technique. He was thus able to explain in rehearsal how such sections should operate and could direct the ensemble with his technique of left-hand and right-hand cues (as distinct from conventional, metred conducting). Not only did his work as a conductor enable him to promulgate internationally his particular approach to ensemble coordination in aleatory passages, but it also fed back into his work as a composer. Perhaps paradoxically it led, from

the mid-1970s until the end of his career, to a gradual reduction in his use of aleatory techniques in his orchestral works. The promotion of his music outside Poland and the Soviet bloc was also furthered by his signing in 1966 with the Chester publishing house in London. The hard-currency royalties yielded by the new contract enabled the composer and his wife to buy a detached house in the exclusive Żoliborz area of north Warsaw, which was to provide Lutosławski with the ideal working conditions he enjoyed for the rest of his life, away from the noises and disturbances of flat-dwelling.

The decade from the late 1970s to the late 80s witnessed the birth, suppression and ultimate victory of the Solidarity movement in Poland. Lutosławski's position in relation to the events of this period is significant in that he found himself among an élite group of internationally acclaimed Polish figures in whom a kind of unofficial moral leadership became invested. His address to the Congress of Culture in early December 1981 included open references to the damage caused by the Stalinist cultural dictates of the 1950s (under which he and many others had suffered). During the period of severe oppression which followed the imposition of martial law that same month, Lutosławski was one of the most high-profile figures to observe the artists' boycott of the state media, and he remained true to it throughout the decade by refusing to conduct his music in Poland, declining to meet government ministers and refusing offers of state prizes and other financial inducements. The integrity of his stance was recognized by the award of the Solidarity Prize in 1983. Only after the suppression of Solidarity was lifted, leading to the free elections of 1988–9, did Lutosławski end his boycott, resuming his participation in Polish public life and joining a number of advisory committees set up by the newly-elected president, Lech Wałęsa. Wałęsa's presidency saw the reintroduction of the Order of the White Eagle, an award which had not been made during the communist period. The first recipient was Pope John Paul II; the second, in January 1994, a month before his death, was Lutosławski.

3. Works up to 1956. Tracing Lutosławski's early development is problematic, given the small number of pieces which survived the war. Of those that did, the Piano Sonata and the Symphonic Variations are the most substantial. The Piano Sonata (1934) exists only in manuscript; except for the war it might have been published, but by 1945 Lutosławski evidently felt that it was no longer representative of his style and so consigned it to his bottom drawer, where it remained except for a single postwar performance. The sonata is cast conventionally in three movements, the first of which is in sonata form. The piano writing is accomplished and idiomatic, and foreshadows later works in its characteristic partitioning of registral space into three layers, each with particular harmonic characteristics. The harmonic language of the piece is post-Debussian, and shows a clear affinity with the music of Ravel, a composer whose influence was largely absent from his music of the 1960s and 70s, not re-emerging until such late works as the Piano Concerto and the song-cycle *Chantefleurs et chantefables*. If Debussy and Ravel were the principal influences on the Piano Sonata, the Symphonic Variations (1936–8) bear the unmistakable imprint of early Stravinsky. That imprint is again apparent in the first movement of the First Symphony (1941–7). The slow, second movement, on the other hand, alludes to three different composers: Bartók, in the curling chromatic lines which result from the manipulation of intervallic cells; Prokofiev, in the parodied march theme for clarinets; and Roussel, the slow movement of whose Third Symphony it resembles both dramatically and structurally as well as in its harmonic idiom. The scherzo and trio features a 12-note melodic line, but it is not treated serially.

The proscription of the First Symphony as 'formalist' prompted Lutosławski to concentrate on producing functional music together with some modest pieces based

Witold Lutosławski, 1979

on folk material. The Concerto for Orchestra (1950–54) grew out of this work on folk music, and was originally intended as a piece on a more ambitious scale than the *Little Suite* (1950), but not the grand work that it turned out to be. It is a summation of Lutosławski's technique up to this time, but without the 12-note pitch techniques on which he was now working in private. The first section of the finale is a passacaglia which provides the first example of the so-called 'chain technique' which he explored in more thoroughgoing fashion in the 1980s. After the Concerto for Orchestra, Lutosławski composed the set of five *Dance Preludes*, for clarinet and piano (1954), which he described as his 'farewell to folklore'.

4. The period of transition, 1956–60. The Five Songs (1957, orchd 1958), to poems by Kazimiera Iłłakowicz, mark a radical change of style and compositional technique, and were his first pieces to employ 12-note chords. 12-note chords, used as structural elements in their own right without recourse to serial techniques, were to remain the cornerstone of his compositional technique for the rest of his career. Lutosławski's most characteristic 12-note sonorities are those in which the musical space is subdivided into three musical registers (high, middle, low), each containing particular kinds of four-note chord configuration (according to the principle of pitch complementation, whereby three four-note chords provide 12 pitches without duplication). The songs are studies in this type of harmony.

In his next work, *Musique funèbre*, Lutosławski reserved the full density of vertical 12-note harmony for the third section of the piece (Apogeum). In the piece as a whole it is the influence of Bartók, to whose memory the work is dedicated, that underlies both the dramatic shape and the distinctive intervallic vocabulary. The dramatic unfolding of the piece resembles that of the first movement of Bartók's Music for Strings, Percussion and Celesta, which also reaches its climax close to the point of the Golden Section. Whereas the Bartók is fugal, the Lutosławski is canonic, at least in the first and fourth sections. Both pitch and rhythm are tightly organized, the pitch organization being governed in the canonic sections by a 12-note row consisting exclusively of alternating tritones and semitones. Lutosławski had experimented with this type of interval-pairing in several earlier pieces, such as the *Dance Preludes*, but never before had he used it as the primary material for a whole work. Moreover the use of the technique in conjunction with a 12-note row makes *Musique funèbre* a significant landmark in Lutosławski's career. After completing the work he embarked on another orchestral project: the Postlude no.1 (1958–60), which turned out to be another Bartókian piece, both in terms of its manipulation of intervallic cells and its dramatic shape (which climaxes at the Golden Section). But while working on the project Lutosławski, now with highly developed and sophisticated resources for harmonic organization, found himself dissatisfied with his handling of rhythm and polyphony. The suggestion of a way out of this impasse came from an unexpected source.

5. Stylistic maturity, 1960–79. Lutosławski's decision to adopt aleatory techniques was prompted in part by hearing a radio broadcast of the Concert for Piano and Orchestra by John Cage, and he expressed his gratitude to his American colleague by presenting him with the autograph manuscript of *Jeux vénitiens*, the work in which he first employed them. However, the nature of Cage's influence on Lutosławski's techniques has often been misconstrued. Some commentators have erroneously associated them with more general principles of indeterminacy when in fact they involve no improvisation, nor any opportunity for players to choose what or when to play during a performance. In Lutosławski's aleatory passages pitch material is fully specified, as is the rhythmic material of each individual part. Only the rhythmic coordination of parts within the ensemble is subject to an element of chance. For this reason the technique is often described as 'aleatory counterpoint', and this remains the most accurate term for it. Along with its characteristic notation of conducted cues (both hands for the beginnings and endings of tutti sections, and left-hand cues for the entrances and exits of individual parts or groups of parts), it has been extensively imitated and adapted by other composers, particularly those of younger generations. It has become part of the stock-in-trade of advanced compositional studies both in Poland and abroad. His techniques of pitch organization, however, have hitherto been less well explored and exploited by others.

In each of Lutosławski's works from the 1960s the aleatory and textural elements nonetheless form only part of the total picture and are at the service of a serious treatment of formal considerations. In *Jeux vénitiens* (1960–61), for example, the often discussed aleatory 'game' which he played in the first movement can be seen as a variant of the scheme of refrains and episodes which he later explored in several other works. The progress of the fourth movement, which unfolds through a succession of overlapping textural blocks, functions in a broader sense as the climactic phase of the four-movement design.

The range of possibilities opened up by aleatory counterpoint was explored to different ends in Lutosławski's next two major works. The *Trois poèmes d'Henri Michaux* (1961–3) is the only choral work of Lutosławski's mature style, and also the only work in which pitch is not always specified within aleatory sections, the voices here being required not only to sing, but also to recite, speak, whisper and shout. The second work, the String Quartet (1964), has earned a place as one of the most outstanding contributions to the quartet literature since Bartók. Lutosławski's neglect of chamber music during the 1960s and 70s, to which the quartet constitutes the singular exception, can be explained by his desire to explore fully the possibilities of aleatory technique in works for medium or large forces. Yet paradoxically, the quartet uses aleatory technique more extensively than any of his other works. Because of this the composer found it difficult to produce a full score; it had been conceived and composed in separate parts.

The quartet was the first of Lutosławski's works to be composed according to his characteristic two-movement form, whereby the first movement is introductory, hesitant and episodic, and the second is developmental, goal-orientated and climactic. Here the two movements are simply subtitled 'introductory movement' and 'main movement', whereas in the Second Symphony (1965–7), the two movements are given subtitles, 'Hésitant' and 'Direct', which encapsulate the dialectical principle of contrast at the heart of the scheme. The first movement uses the form of refrains and episodes which occurs in various guises in many of Lutosławski's works. The second movement, on the other hand, moves inexorably

towards a colossal, awe-inspiring climax. There is nothing conventionally 'melodic' in this symphony, unlike in each of the other three. The first movement exploits contrasts of timbre between distinct instrumental groupings and the complementation of pitch sets, while the second concerns the gradual movement of sound masses, long-range rhythmic acceleration, climax and subsidence. The form becomes the content. In spite of the rather overlong first movement, and some excessively dense textures in the second, the work is rightly regarded as one of the finest symphonic achievements of the late 20th century.

Lutosławski's next orchestral work, *Livre pour orchestre* (1968), rather than adopting the two-movement scheme, reworks the four-movement structure used in *Jeux vénitiens*. The orchestral writing is less dense than in the Second Symphony, with fewer 'sound masses' and more clearly defined harmonic sonorities in the different registers. This new harmonic clarity was achieved thanks to a refinement of Lutosławski's technique of constructing 12-note chords. From *Livre* onwards, these chords tend to be subdivided into three complementary subsets, with particular types of four-note chord characterizing each register. The development of characteristic harmonies based on a limited number of interval classes opened up new possibilities of harmonic contrast and differentiation. In *Preludes and Fugue* (1970–72) for 13 solo strings, sections governed by tritones and semitones alternate with others identified by the pairing of whole tones and perfect 4ths or 5ths. This technique of contrasting different types of interval-pairing might be viewed as providing, within the context of an atonal language, an analogy (and compositional substitute) for the functions of key change in a tonal language. *Preludes and Fugue* is another example of the two-movement scheme. The fact that the seven preludes can be played in any predetermined order is made possible by the ingenious device of overlapping complementary pitch sets at the beginnings and ends of the pieces (rather like the 'chain' technique which he was to explore in the 1980s); the work can also be played in an abridged form, with certain preludes or sections of the fugue omitted. In its complete version it is, at around 35 minutes, the longest of Lutosławski's large-scale works.

Two of the works of the mid-1970s rank among Lutosławski's finest achievements: *Les espaces du sommeil*, for baritone and orchestra (1975); and *Mi-Parti* (1975–6) for orchestra. Though Robert Desnos's poem was chosen as much for its abstract formal and dramatic structure as for its poetic content, the work, like the earlier settings of Jean-François Chabrun in *Paroles tissées*, succeeds in conjuring up a surreal dreamscape. The slow, central section of the work is one of the most beautiful passages in Lutosławski's output, and this is due, in part, to the way the pitch material used for the wind and percussion group is separated from the pitches used by the strings and the voice. Although *Mi-Parti*, with its hauntingly beautiful coda, is undeniably one of his finest works, the composer was troubled, when conducting it during the late 1970s, by what he saw as a lack of differentiation (in the opening phases especially) between harmonic background and melodic foreground. After the *Novelette* (1978–9), another work for large orchestra, Lutosławski set himself to address this problem, initially in the context of chamber music.

6. The late works, 1979–94. It was *Epitaph* (1979) for oboe and piano that marked the turning point towards Lutosławski's late style, which was marked above all by more transparent harmony (with 12-note chords reserved for significant staging posts in the form) and restraint in the use and extent of aleatory technique. The simplification of harmony made possible an increasing use of lyrical, expressive melodic lines projected as foreground material, while the fact that a larger proportion of each work was written in conventional metre (rather than aleatory counterpoint) resulted in greater rhythmic pace and energy. Many of the late-period works allude to formal or textural aspects of Baroque music. Lutosławski also looked back within his own output, making allusions to works he had composed before 1960 and realizing compositional projects which had remained unfulfilled since his youth.

Both *Epitaph* and *Grave* (1981) for cello and piano were written as memorial tributes for friends. The more restricted palette of the duo medium appears to have focussed the composer's attention on the relationship between melodic foreground and harmonic accompaniment, and prompted a simpler kind of harmony, still based on 12-note fields but less dense than in previous works. Both *Epitaph* and *Grave* feature the alternation of sections based on contrasted interval pairings, making particular use of the tritone-semitone pairing which had determined the funereal character of his earlier Bartók tribute. The form of the two pieces differs, however: *Epitaph* follows the pattern of refrains and episodes which had been applied in other works, while *Grave* has a scheme of 'metamorphoses' (corresponding to the work's subtitle) which echoes the procedure in the second section of *Musique funèbre*. *Epitaph* acted as a kind of compositional study for the concertante piece which followed it. The Double Concerto (1979–80) for oboe and harp, written for Heinz and Ursula Holliger, has some connection with the Baroque concerto grosso in its first movement scheme of ritornello and episodes, while the final movement's parody of a march theme, with its echoes of Prokofiev, relates back to the slow movement of the First Symphony.

The Third Symphony (1981–3) also brings together past and present moments within Lutosławski's creativity, incorporating as it does material conceived and sketched during the mid- to late-1970s. It thus has a slightly hybrid quality, whereby some passages have the more melodic focus of the late style, whereas others represent the more dense, textural approach of the earlier phase. Though conceived in terms of the same two-movement scheme as the Second Symphony, it differs greatly from its predecessor, above all in that the most memorable material comes after the climax, in the epilogue. The greater melodic focus of the composer's late style contributes to the work's accessibility – it has become one of the most widely performed of late-20th-century symphonies – and helps to project a more sustained thematic argument. In this respect it represents a return to a more traditional approach to the form, though there are no traces of neo-romanticism, either in terms of the work's aesthetic or its content.

The principal formal process of Lutosławski's late style was that for which he coined the term 'chain' technique, to signify a form in which the beginnings and ends of sections or strands of material overlap and interlock like the links in a chain. *Chain 1* (1983) was written for the 14 solo players of the London Sinfonietta and thus has

something of the character of large-scale chamber music. *Chain 2* (1984–5), on the other hand, is a violin concerto in all but name. The chain technique comes in the second movement, where successive, overlapping sections of the form are identified with strongly contrasting intervallic combinations. *Chain 2* was conceived and composed alongside another violin work, the *Partita* (1984), one of the finest works of his late period. It exists in two versions: the original, for violin and piano duo; and a later, concertante version for violin and orchestra. It is in five movements, the second and fourth of which are aleatory interludes which provide episodes of repose and relaxation separating the three main movements. The title acknowledges Lutosławski's fondness for music of the Baroque era, and aspects of the musical content – especially as regards rhythm, phrasing and rhythmic patterning – establish aural connections with music of that period. For the première of *Chain* 2, Paul Sacher, the work's dedicatee, engaged Anne-Sophie Mutter as soloist. So impressed was Lutosławski by her playing that he orchestrated the *Partita* so that she could perform both works in the same programme. Sacher then commissioned a short orchestral *Interlude* (1989) to link the two concertante pieces. As a triptych they last some 40 minutes in performance and occupy a unique position in the solo violin repertory.

Chain 3 (1986) is of interest principally because of the way chain technique is applied in the first stage of the form. There are 12 overlapping 'links' in the chain, and these are differentiated both by contrasted instrumental groupings and by complementation of pitch sets. While *Chain 3* was the last work to bear Lutosławski's new generic designation, it was not the last instance in his output of chain technique, which was featured again in the finale of his next major work, the Piano Concerto (1987–8). Lutosławski had tried to write a piano concerto both before and just after the war, but other projects had intervened. Now, having composed *Grave* and *Partita*, with their prominent piano parts, he felt able to tackle a large-scale concertante work for the instrument. The concerto was received by some commentators as marking a turn towards neo-romanticism (with alleged references to Rachmaninoff and others). But while there are similarities of harmonic sonority to the music of Ravel (as there are in the song cycle *Chantefleurs et chantefables* which followed in 1989–90), and some of the pianistic gestures invite comparison with those of the Romantic repertory, neither the content nor the aesthetic of the piece is neo-romantic. Indeed there are Baroque echoes in certain passages of rhythmic figuration (as in the Partita), as well as in the final movement's chaconne procedure (which recalls more directly the finale of the Concerto for Orchestra).

The last major work which Lutosławski was to complete was the Fourth Symphony (1988–92). Like the Second and Third, it is in two movements, the second following the first without a break. Stylistically, however, it is more homogeneous than the Third Symphony, and while most of its first movement (like that of its predecessor) is introductory and episodic in character, it does not open in his customary 'hesitant' manner, but with material of primary, thematic significance (solo woodwind lines against sustained strings, above a slowly pulsating bass line). The second movement, by contrast, is developmental and climactic: its memorable features include a long, powerful, *cantando* line, which unfolds sequentially, and passages of sophisticated rhythmic layering, which superimpose in Bachian fashion three metrical layers moving at different rates.

After this final symphonic essay, Lutosławski turned once more to the violin. The last work he completed was *Subito* (1992), a four-minute test piece for the 1994 Indianapolis International Violin Competition. While recalling stylistically the outer movements of *Partita*, it has more in common structurally with *Epitaph* in its treatment of the refrain-episode principle. He then set to work on a violin concerto for Mutter. The surviving bundles of sketches indicate that the piece was to be for large orchestra (unlike *Chain* 2) and suggest a four-movement structure, but the material is for the most part too fragmentary to admit the possibility of a reconstruction. The composer left instructions that the piece should not be completed.

Lutosławski is generally regarded as the most significant Polish composer since Szymanowski, and possibly the greatest Polish composer since Chopin. It was not always thus. During the postwar years his contemporary, Andrzej Panufnik had a much higher profile in Poland. This prominence caused Panufnik many difficulties and contributed to his decision to defect to England in 1954. At about the same time Lutosławski's reputation in Poland was enhanced by the success of his Concerto for Orchestra. During the 1960s his name was often linked with that of Penderecki, 20 years his junior, on account of their use of aleatory procedures, together with textural and gestural effects. However the term 'Polish School', under which both composers were assimilated by critics outside Poland, belied the stylistic disparity between their approaches. Comparisons with Penderecki, whose reputation, unlike Lutosławski's, declined after the 1970s, are perhaps ultimately less fruitful than with Panufnik, who had much in common in his treatment of intervallic cells and his productive assimilation of Bartók's influence. Since his death the assessment of Lutosławski's creative achievement has remained much as it was during his last years: he is now acknowledged as one of the major European composers of the 20th century.

WORKS

ORCHESTRAL

Scherzo, 1930, lost
Haroun al Rashid, incid music, 1931, lost
Double Fugue, 1936, lost
Symphonic Variations, 1936–8
Symphony no.1, 1941–7
Odra do Baltyku [Via the Oder to the Baltic] (film score, dir. S. Możdeński), 1945
Suita Warszawska [Warsaw Suite] (film score, dir. T. Makarczynski), 1946
Overture, str, 1949
Little Suite, chbr orch, 1950
Concerto for Orchestra, 1950–54
Muzyka żałobna (Musique funèbre), str, 1954–8
Dance Preludes, cl, orch, 1955 [version of chbr work]
Three Postludes, 1958–63
Jeux vénitiens, chbr orch, 1960–61
Symphony no.2, 1965–7
Livre pour orchestre, 1968
Cello Concerto, 1969–70
Preludes and Fugue, 13 solo str, 1970–72
Mi-Parti, 1975–6
Novelette, 1978–9
Double Concerto, ob, hp, chbr orch, 1979–80
Symphony no.3, 1981–3
Grave: Metamorphoses, vc, str, 1982 [version of chbr work]
Chain 2: Dialogue, vn, orch, 1984–5
Chain 3, 1986

Fanfare for Louisville, 1986
Piano Concerto, 1987–8
Partita, vn, orch, 1988 [version of chbr work]
Symphony no.4, 1988–92
Interlude, 1989
Prelude for GSMD, 1989 [for Guildhall School of Music and Drama]

VOCAL

Vocal-orch: Lacrimosa, S, opt. SATB, orch, 1937 [frag. of requiem]; Requiem aeternam, chorus, orch, 1937, lost [frag. of requiem]; Tryptyk Śląski [Silesian Triptych] (Silesian folk texts), S, orch, 1951; Wiosna [Spring] (cycle of children's songs, W. Domeradzki, J. Korczakowska, H. Januszewska, L. Krzemieniecka), Mez, chbr orch, 1951, nos.2, 4, arr. 1v, pf, no.4 arr. SSA, pf; Jesień [Autumn] (4 children's songs, Krzemieniecka), Mez, chbr orch, 1951; [4] children's songs, 1v, chbr orch, 1954; Spijze, śpij [Sleep, Sleep] (Krzemieniecka), Idzie nocka [Night is Falling] (J. Osińska), Warzywa [Vegetables] (J. Tuwim), Trudny rachunek [Difficult Sums] (Tuwim); 5 Songs (K. Iłłakowicz), 1v, orch, 1958 [arr. of songs for 1v, pf]; 3 poèmes d'Henri Michaux, chorus, orch, 1961–3; Paroles tissées (J.F. Chabrun), T, chbr, orch, 1965; Les espaces du sommeil (R. Desnos), Bar, orch, 1975; 20 Polish Carols (M. Mioduszewski, O. Kolberg, trans. C.B. Rae), S, female chorus, chbr orch, 1984–9 [version of 20 koled, 1v, pf]; Chantefleurs et chantefables (Desnos), S, chbr orch, 1989–90

Songs (1v, pf, unless otherwise stated): 2 songs (Iłłakowicz), S, pf, 1934, lost: Wodnica [Water-Nymph], Kolysanka lipowa [Linden Lullaby]; Pieśni walki podziemnej [Songs of the Underground Struggle] (S. Dobrowolski, A. Maliszewski, Z. Zawadzka, anon.), 1942–4; 20 kolęd [20 Carols] (Mioduszewski, Kolberg), 1946; 6 piosenek dziecinnych [6 children's songs] (Tuwim), 1947; 2 children's songs (Tuwim), 1948; Spózniony słowik [The Overdue Nightingale], O Panu Tralalińskim [About Mr Tralaliński]; Lawina [The Snowslide] (A. Pushkin), 1949; Słomkowy łańcuszek i inne dziecinne utwory [Straw Chain and other Children's Pieces] (song cycle, trad., J. Porazińska, T. Lenartowicz, Krzemieniecka), S, Mez, wind qnt, 1950–51; 7 Songs (T. Urgacz and others), 1950–52, no.4 arr. unacc. male chorus, 1951, nos.2, 4, 5, arr. unacc. mixed chorus, 1951

10 polskich pieśni ludowych na tematy żołnierskie [10 Polish Folksongs on Soldiers' Themes] (Kolberg, anon.), male chorus, 1951; 2 children's songs (A. Barto), 1952, arr. Mez, chbr orch, 1953: Srerbna szybka [Silver Window-Pane], Muszelka [Cockle-Shell]; 3 pieśni żołnierskie [3 Soldiers' Songs] (S. Czachorowski, A. Rymkiewicz, M. Dołega), 1953; Children's Songs, 1953: Pióreczko [Little Feather] (Osińska), Wróbelek [Little Sparrow] (Krzemieniecka), Pozegnanie wakacji [Goodbye to Holidays] (Krzemieniecka), Wianki [Wreaths] (S. Szuchowa); 5 pieśni (Iłłakowicz), S, pf, 1957, orchd 1958; 3 children's songs (R. Pisarski), 1958, unpubd: Na Wroniej ulicy w Warszawie [On Wronia Street in Warsaw], Kuku, kuku, [Cuckoo, Cuckoo], Piosenka na prima aprilis [Song on April Fools' Day]; Piosenki dziecinne [Children's Songs] (J. Porazińska), 1958; 3 piosenki dziecinne (B. Hertz), 1959, unpubd; Nie dla ciebie [Not for You] (Iłłakowicz), 1981; Tarantella (H. Belloc), Bar, pf, 1990

CHAMBER AND SOLO INSTRUMENTAL

2 Sonatas, vn, pf, 1927, lost; 50 contrapuntal studies, ww, 1943–4, unpubd; Trio, ob, cl, bn, 1944–5, unpubd, lost; Recitative e arioso, vn, pf, 1951; Bukoliki [Bucolics], va, vc, 1962 [arr. of pf work]; Dance Preludes, cl, pf, 1954, orchd, 1955, arr. 9 insts, 1959; Str Qt, 1964; Sacher Variation, vc, 1975; Epitaph, ob, pf, 1979; Grave: Metamorphoses, vc, pf, 1981, orchd, 1982; Mini-Ov., hn, 2 tpt, trbn, tuba, 1982; Chain 1, chbr ens, 1983; Partita, vn, pf, 1984; Fanfare for CUBE, 1987 [for Cambridge University Brass Ensemble]; Przezrocza [Slides], chbr ens, 1989; Fanfare for Lancaster, brass ens, side drum, 1989; Subito, vn, pf, 1992

Pf (solo unless otherwise stated): Prelude, 1922, lost; Poème, 1928, lost; Taniec Chimery [Dance of the Chimera], 1930, lost; Sonata, 1934, unpubd; Prelude and Aria, 1936, unpubd; 2 Studies, 1940–41; Wariacje na temat Paganiniego [Variations on a Theme by Paganini], 2 pf, 1941; Melodie Ludowe [Folk Melodies], 12 easy pieces, 1945; Bukoliki, 1952; Miniatura, 2 pf, 1953; 3 Pieces for the Young, 1953; Invention, 1968

Incid music, radio scores, songs and inst pieces based on folk material

CHARLES BODMAN RAE

Lutyens, (Agnes) Elisabeth (*b* London, 9 July 1906; *d* London, 14 April 1983). English composer. A daughter of the architect Sir Edwin Lutyens, she began serious music studies at the Ecole Normale, Paris, in 1922 and subsequently entered the RCM, where she studied composition with Harold Darke and the viola with Ernest Tomlinson. Her first important public performance was that of the ballet *The Birthday of the Infanta* in 1932. This score has been withdrawn, as have other works of the period performed at the Macnaghten-Lemare Concerts: indeed, Lutyens's stylistic evolution was a slow and arduous process worked out, she claimed, without knowledge of radical developments outside England. An important experience was her introduction to the Purcell string fantasias. Their independence of part-writing was to lead her to a personal brand of serialism in the Chamber Concerto no.1 (1939), one of the most innovatory British works of the period. The rigorously chromatic thematicism of this piece – and also the extremely attenuated textures – immediately marked Lutyens off from her English contemporaries. Her sense of isolation at this point seems to have been complete: she was driven to battle against the incomprehension of the English musical establishment, and she was not helped by her turbulent domestic life. In 1939 Lutyens left her first husband, the singer Ian Glennie, for Edward Clark, the influential BBC programme maker (1927–36) who had introduced most of the avant-garde composers of the time to British listeners. He was never to hold a steady job, however, and Lutyens was forced to compose for film and radio to support her four children. The situation lasted over twenty years and seriously hindered her artistic development. She was always to consider her commercial work artistically insignificant.

At the beginning of this period, which embraced World War II and after, she explored in many directions. The romantic Expressionism and the bold dramatic outlines of the Three Symphonic Preludes, for example, contrast strongly with the unrhetorical First Chamber Concerto, while the neo-classical concertos for horn and bassoon are quite different again. Yet with each work Lutyens approached a little nearer the sensibility and style of her maturity. By the end of the war she was using with commanding ease a fully developed 12-note technique: *O saisons, o châteaux!* (1946) marked a new important stage in her development. Here the refined sensuousness and magical feeling of Arthur Rimbaud are embodied in a completely individual harmony. It only remained for her to evolve an equally original rhythmic style, and the seeds for this had already been sown in the Chamber Concerto no.1.

Three works mark her final steps to maturity. The *Concertante for Five Players* (1950) employs a new sparseness of texture with greater ease and freedom than in the Chamber Concerto, and it includes the first writing typical of her later work. This newly won ground was to some extent confirmed in the Sixth String Quartet (1952) where the rhythmic freedom and the independence of parts show a considerable advance over the music of the previous decade. Lutyens's next work, the Motet on words of Ludwig Wittgenstein, at last took up the challenge of the First Chamber Concerto. Canonic and tightly organized in melodic flow, the Motet is based on a 12-note series itself formed from a three-note cell, so allowing quasi-Webernian symmetries.

Lutyens was now on the point of writing her finest music, yet her personal life was at a low ebb – as she related in her autobiography *A Goldfish Bowl* (London, 1972) – and the direction taken by her work had led to an almost total neglect. Her use of 12-note technique seems to have been considered almost morally reprehensible by some in England in the 1950s, but in the more sympathetic climate of the following decade Lutyens achieved a greater measure of recognition. Even so, works of her first full maturity, such as the chamber opera *Infidelio* (1954) and the very fine cantata *De amore* (1957), were not performed until 1973. These and other pieces of the period foreshadow lines of development that were to occupy her for some years. *Music for Orchestra I* (1955), however, is backward-looking in that its warm Expressionism brings to fruition that vein that had run through other works back to the Three Symphonic Preludes. In *De amore* the emotional warmth is still present but now somewhat objectified. The process of refinement shortly yielded two of her finest works, *Six Tempi* (1957) with its impressively lean flow of events, and *Quincunx* (1959), whose balanced architecture presents a classically controlled passion and grandeur. A continuously evolving monody, scattered widely across the orchestra, coalesces into, or is punctured by, harmonic incidents of varying density. This sombre and elegiac work marked a new level of achievement, a level maintained in Lutyens's later work.

The Wind Quintet (1960) aligned her new linguistic freedom with classical discourse, using in its first movement the palindromic form that became a preoccupation. The Symphonies for Solo Piano, Wind, Harps and Percussion (1961), however, explored further aspects of Lutyens's imposing splendour, objective in its rhetoric and drama. Yet new ground was reached in *Catena* (1961) where atmospherically evocative and picturesque music illuminates a wide variety of texts. This was the first of several vocal anthologies, using various chamber ensembles, which constitute an important part of Lutyens's later music. *Music for Orchestra II* (1962), in which the strongest feelings are rigidly controlled, is one of her most uncompromisingly objective works but also one of her most deeply moving. A headlong Allegro, coloured by the searing sound of a large clarinet and saxophone section, subsides into a chorale which closes with a whisper – a swift cataclysm opposed by the colourful romantic drama of *Music for Orchestra III* (1963). The refinement of Lutyens's language at this time is epitomized in *The Valley of Hatsu-se* (1965). Here the extreme concentration of the Japanese poems is matched by lyrical traceries shorn of rhetoric and expansion.

At about this time there was a change of direction in Lutyens's work: a widening of vocabulary admitted more repetitive and simply patterned ideas; pictorial and atmospheric writing came to co-exist with more abstract music, as in *Akapotik Rose* (1966). The less complex harmony, the simpler gestures and the block structuring of *And Suddenly it's Evening* (1966), for example, provide a strong contrast with the fluidly evolving lyricism of previous works. The full implications were realized in the magnificent choral and orchestral *Essence of our Happinesses* (1968) where airy textures and intercalated silences are crucial. Repetition and reduced eventfulness are carried to daring limits, giving a sense of timelessness and exactly conveying the metaphysical texts from Donne and Islam. Most of Lutyens's major works of the 1960s and early 70s involved words, and from increasingly various sources. *Vision of Youth* (1970) finds a new context for triadic progressions and extended homophony in its valedictory settings of Joseph Conrad. *Islands* (1971), though perhaps too reliant on illustrative effect and on a loose succession of moods, presents a riot of colour and at times a wildness that is far from the emotional monotone of *Vision of Youth*. *The Tears of Night* (1971) combines Renaissance and modern vocal and instrumental resources in an intense nocturnal sadness, and *Counting your Steps* (1972) uses primitive poetry to create a starkly simple ritual with hypnotic repetition.

Before 1965 Lutyens had written two short chamber operas: *The Pit* (1947), concerning trapped miners, and *Infidelio* (1954), the story of a broken love affair traced back from the girl's suicide to the first meeting. Now, however, she began a series of three full-length works, of which the first staged was *Time Off? Not a Ghost of a Chance!* (1967–8). Described as a charade, it deals with ideas rather than events. Riddles, puns and free associations move from the nature of time to the workings of chance, from the ages of man to his spiritual existence; every facet of Lutyens's music is called upon, including parody. The first of the operas to be composed had been *The Numbered* (1965–7), one of Lutyens's most cherished projects and the climax to the period of purity of language. The text, based on Elias Canetti's *Die Befristeten*, treats the problems of a society in which everyone knows his time of death but is sworn to keep his age secret; it drew some of Lutyens's most powerful music. Her third opera, *Isis and Osiris* (1969–70), is a ritual of the seasons and of life and death. Appropriately it uses her simpler, more hard-edged manner with repetitive figures and much block harmony.

In this phase of predominantly dramatic and vocal music Lutyens wrote few instrumental pieces, but in 1972 she embarked on the *Plenum* series, in which her scope and individuality, and her keen awareness of contemporary trends, enabled her to assimilate greater rhythmic flexibility in free notation. After 30 years of consistently excellent and often radical achievement Lutyens received some measure of official recognition with the award in 1969 of the City of London Midsummer Prize; in the same year she was made a CBE. It is unfortunate that during the last decade of her career a certain fading of the impulse that had energized her previous music took place. The rhythmic freedom led to a lack of structural focus. But she was still capable of arresting ideas and concentrated thought, and it was touching that, crippled by

arthritis, she was able to produce in her last year the marvellously fresh and pointed *Triolets*.

WORKS

A list of published works only. Most MSS, including many unpublished works, are held at *GB-Lbl*

STAGE

The Pit (dramatic scene, W.R. Rodgers), op.14, 1947; concert perf., London, Wigmore Hall, 18 May 1947; stage, Palermo, Teatro Massimo, 24 April 1949

Penelope (music drama for radio, Lutyens), 1950, unorchd

Infidelio (op, 7 scenes, T.E. Ranselm [Lutyens]), op.29, 1954; London, Sadler's Wells, 17 April 1973

The Numbered (op, prol, 2, M. Volonakis, after E. Canetti: *Die Befristeten*), op.63, 1965–7, unperf.

Time Off? Not a Ghost of a Chance! (charade, 4 scenes and 3 interruptions, Lutyens), op.68, 1967–8; London, Sadler's Wells, 1 March 1972

Isis and Osiris (lyric drama, Lutyens, after Plutarch), op.74, 1969–70; London, Morley College, 26 Nov 1976

The Linnet from the Leaf (music-theatre work, Lutyens), op.89, 1972; BBC, 11 Nov 1979

The Waiting Game (op, 3 scenes, Lutyens), op.91, 1973, unperf.

One and the Same (scena, Lutyens), op.97, 1973–4; York, 21 June 1976

The Goldfish Bowl (ballad op, Lutyens), op.102, 1975, unperf.

Like a Window (op, after letters of V. Van Gogh), op.109, 1976; BBC, 24 Nov 1977

VOCAL

Choral: Motet 'Excerpta Tractatus logicophilosophici' (L. Wittgenstein), op.27, chorus, 1953; De amore (cant., G. Chaucer), op.39, S, T, chorus, orch, 1957; Encomion (*Apocrypha*), op.54, chorus, brass, perc, 1963; Motet 'The Country of the Stars' (H. Boethius, trans. Chaucer), chorus, 1963; Magnificat, Nunc dimittis, male chorus, 1965, rev. SATB, 1970; Motet 'The Hymn of Man' (A.C. Swinburne), op.61, male chorus, 1965, rev. SATB, 1970; The Essence of our Happinesses (Abü-Yasïd, trans. R.C. Zaehner, J. Donne, A. Rimbaud), op.69, T, chorus, orch, 1968; The Tyme doth Flete (Petrarch and Ovid, trans. T. Wyatt), op.70, chorus, ad lib prelude and postlude for 2 tpt, 2 trbn, 1968; Verses of Love (B. Jonson), chorus, 1970; Voice of Quiet Waters, op.84, chorus, orch, 1972; Counting your Steps (African trad.), op.85, chorus, 4 fl, 4 perc, 1972; It is the Hour (Byron), op.111a, SSTB, 1976; The Roots of the World, op.136, vv, vc, 1979

Solo v(v) with orch or inst ens: O saisons, o châteaux! (cant., Rimbaud), op.13, S, mand, gui, hp, str orch, 1946; Nativity (W.R. Rodgers), S, str orch/org, 1951; 3 songs and incid music for Group Theatre 'Homage to Dylan Thomas', S, (fl, va)/accdn/pf, 1953; Quincunx (after T. Browne), op.44, S, Bar, orch, 1959–60; Catena, cant., op.47, S, T, 21 insts, 1961; The Valley of Hatsu-Se (Jap.), op.62, S, fl, cl, vc, pf, 1965; Akapotik Rose (E. Paolozzi), op.64, S, fl + pic + a fl, cl + b cl, cl + t sax, vn, va, vc, pf, 1966; And Suddenly it's Evening (S. Quasimodo, trans. J. Bevan), op.66, T, inst ens, 1966; A Phoenix (Ovid, trans. A. Goulding), op.71, S, cl, vn, pf, 1968, arr. as op.71a, S, pf, 1968; Anerca (Inuit trad.), op.77, spkr/actress, 10 gui + perc, 1970; Vision of Youth (J. Conrad), op.79, S, 3 cl + b cl, pf + cel, perc, 1970; Islands (Sophocles trans. Volonakis, P.B. Shelley, R.L. Stevenson, F. Rabelais trans. T. Urquhart and P.A. Motteux), op.80, S, T, nar, 8 insts, 1971; Requiescat [in memory of Stravinsky], (S, str trio)/(Mez, 2 cl + b cl), 1971; The Tears of Night (14th century, G. Stein, J. Joyce, D. Thomas), op.82, 6 S, Ct, 3 inst ens, 1971; Dirge for the Proud World (T. Merton), op.83, S, Ct, hpd, vc, 1971; Chimes and Cantos (R. Herrick), op.86, Bar, 2 tpt, 2 trbn, perc, 4 vn, 2 db, 1972; Laudi (Lutyens), op.96, S, 3 cl, pf, perc, 1973; Concert Aria, op.112, female v, orch, 1976; Cascando (S. Beckett), op.117, C, vn, str orch, 1977; Chorale Prelude and Paraphrase (J. Keats), op.123, T, str qnt, 3 perc, pf, 1977; Elegy of the Flowers (C. Cavafy, trans. R. Devlen), op.127, T, 3 inst ens, 1978; Echoi, op.129, Mez, orch, 1979; Cant. (U. Vaughan Williams), op.130, S, inst ens, 1979; Cant. (C. Baudelaire), op.134, S, C, B, inst ens, 1979; Echoes (H. Sudo), op.138, C, a fl, eng hn, str qt, 1979; Concert Aria: Dialogo (Quasimodo), op.142, S, inst ens, 1980; Mine Eyes, my Bread, my Spade (T. Tanner), op.143, Bar, str qt, 1980; Fleur du silence (R. de Gourment), op.150, T, inst ens, 1980

Solo v(v) with 1 inst or unacc.: The Virgin's Cradle Hymn (S.T. Coleridge), 1v, pf, 1939; 2 Songs (W.H. Auden), S/Bar, pf, 1942; 9 Songs (S. Smith), Mez, pf, 1948–53; In the Temple of a Bird's Wing (Tanner), op.37, Bar, pf, 1956, rev. 1965; The Egocentric (index I, *Oxford Book of English Verse*), T/Bar, pf, 1968; The Supplicant, B/Bar, pf, 1969–70 [from Isis and Osiris, op.74]; In the Direction of the Beginning (Thomas), op.76, B, pf, 1970; Lament of Isis on the Death of Osiris, S, 1970 [from Isis and Osiris, op.74]; Oda a la tormenta (P. Neruda), op.78, Mez, pf, 1970; Dialogo (Quasimodo), op.88, T, lute, 1972; Roads (Lutyens), op.95, 2 S, Ct, T, Bar, B, 1973; The Hidden Power (Shelley), 2 equal vv, 1974; Of the Snow (F. Martens), 3 equal vv, 1974; Sloth – One of the 7 Deadly Sins (Lutyens), 2 Ct, T, 2 Bar, B, 1974; 2 Songs (D.H. Lawrence), 1v, 1974; Nocturnes and Interludes (R. Burns, R. Kipling, A. Tennyson, R. Graves, C. Marlowe, Lutyens, J. Milton, H. Newbolt, G. Peele), op.111, S, pf, 1976; Variations: Winter Series – Spring Sowing (U. Vaughan Williams), op.115, S, pf, 1977; By all These (R. Jeffries), op.120, S, gui, 1977; She Tells her Love while Half Asleep (Graves), op.13, S, 1979; That Sun (G. Flaubert, trans. J. Cohen), op.137, C, pf, 1979; The Singing Birds (W.B. Yeats, Lutyens, after M. Silverthorne, after Plato), op.151, actress/spkr, va, 1980

ORCHESTRAL

3 Pieces, op.7, 1939; Chbr Conc. no.1, op.8/1, ob, cl, bn, hn, tpt, trbn, str trio, 1939; Chbr Conc. no.2, op.8/2, cl, t sax, pf, str orch, 1940–41; 3 Sym. Preludes, 1942; Chbr Conc. no.3, op.8/3, bn, str orch, 1945; Chbr Conc. no.4, op.8/4, hn, chbr orch, 1946–7; Chbr Conc. no.5, op.8/5, str qt, chbr orch, 1946; Va Conc., op.15, 1947; Music for Orch I, op.31, 1955; Chorale (Hommage à Stravinsky), op.36, 1956; Symphonies for Solo Piano, Wind, Harps and Percussion, op.46, 1961; Music for Orch II, op.48, 1962; Music for Orch III, op.56, 1963–4; Music for Pf and Orch, op.59, 1964; Novenaria, op.67/1, 1967; The Winter of the World, op.98, vc, 2 inst ens, 1974; Eos, op.101, small orch, 1974–5; Rondel, op.108, 1976; 6 Bagatelles, op.113, chbr orch, 1976; Nox, op.118, pf, 2 chbr orchs, 1977; Tides, op.124, 1978; Wild Decembers, op.149, chbr orch, 1980; Music for Orch IV: Gone Like a Sea-Covered Stone, op.152, chbr orch, 1981

INSTRUMENTAL

3 or more insts: Str Qt no.2, op.5/5, 1938; Str Trio, op.5/6, 1939; Str Qt no.3, op.18, 1949; Concertante for 5 Players, op.22, fl + pic, cl + b cl, vn + va, vc, pf, 1950; Str Qt no.6, op.25/3, 1952; Nocturnes, op.30, vn, vc, gui, 1955; Capriccii, op.33, 2 hp, perc, 1955; 6 Tempi, op.42, fl, ob, cl, bn, tpt, hn, pf, vn, va, vc, 1957; Wind Qnt, op.45, 1960; Str Qnt, op.51, 1963; Wind Trio, op.52, 1963; Fantasie-Trio, op.55, fl, cl, pf, 1963; Str Trio, op.57, 1964; Scena, op.58, vn, vc, perc, 1964; Music for Wind, op.60, double wind qnt, 1964; The Fall of the Leafe, ob, str qt, 1966; Music for 3, op.65, fl + pic + a fl, ob, pf, 1966; Horai, op.67/4, vn, hn, pf, 1968; Driving out the Death, op.81, ob, str trio, 1971; Rape of the Moone, op.90, wind octet, 1973; Plenum II, op.92, ob, 13 inst, 1973; Plenum III, op.93, str qt, 1973; Kareniana, op.99, solo va, fl + a fl, ob, cl + b cl, tpt, trbn, hn, hp, pf + cel, 2 perc, 1974; Fanfare for a Festival, 3 tpt, 3 trbn, 1975; Go, Said the Bird, op.105, elec gui, str qt, 1975; Mare et minutiae, op.107, str qt, 1976; Fantasia, op.114, a sax, 3 inst ens, 1977; O Absalom, op.122, ob + eng hn, vn, va, vc, 1977; Doubles, op.125, str qt, 1978; Trio, op.135, cl, vc, pf, 1979; Str Qt, op.139, 1979; Rapprochement, op.144, solo hn, solo hp, fl + a fl, ob, cl + b cl, 2 perc, cel, pf, vn, va, vc, 1980; Str Qt: Diurnal, op.146, 1980; Six, op.147, cl + b cl + E♭-cl, B♭-tpt + D-tpt + flugel hn, perc, pf, vn, db, 1980; Branches of the Night and of the Day, op.153, (hn, vn, 2 va, vc)/(hn, 2 vn, va, vc), 1981; Str Qt no.12, op.155, 1981; Str Qt no.13, op.158, 1982; Triolets: op.160a, cl, vc, mand, op.160h, vc, hp, mar, 1982

1 or 2 insts: The Check Book (12 Pieces for Children), pf, 1937–8; Sonata, op.5/4, va, 1938; 5 Intermezzi, pf, 1941; 9 Bagatelles, vc, pf, 1942; Suite gauloise, vn, pf, 1944, arr. wind octet, movt 1 arr. chbr orch; 5 Little Pieces, cl, pf, 1945; Aptote, vn, 1948; 3 Improvisations, pf, 1948; Ninepins, 2 vn, 1948; Prelude and Capriccio, op.20, vc, 1949; Valediction [in memory of Dylan Thomas], op.28, cl, pf, 1953–4; Sinfonia, op.32, org, 1955; 3 Duos, op.34: (1) hn, pf, (2) vc, pf, (3) vn, pf, 1956–7; Variations, op.38, fl, 1957; Piano e forte, op.43, pf, 1958; 5 Bagatelles, op.49, pf, 1962; Présages, op.53, ob, 1963; Helix, op.67/2, pf 4 hands, 1967; Scroll for Li-Ho, op.67/3, vn, pf, 1967; Epithalamion, op.67/5, org, S ad lib (E. Spenser), 1968; Temenos, op.72, org, 1969; The Dying of the Sun, op.73, gui, 1969; 3 pièces brèves, chbr org, 1969 [from Isis and Osiris, op.74]; The Tides of Time, op.75, db, pf, 1969; Plenum I, op.87, pf, 1972; Tre, op.94, cl, 1973; Plenum IV, op.100, org 4 hands, 1974; This Green Tide,

ANTHONY PAYNE (work-list, bibliography with TONI CALAM)

Lutz, (Johann Baptist Wilhelm) Meyer (*b* Münnerstadt, 16 May 1828; *d* Kensington, London, 31 Jan 1903). English composer, conductor and organist of German descent. He was the second of eight children of a Münnerstadt music teacher and schoolmaster, Georg Joseph Lutz, and his wife Magdalena; his elder brother, Johann von Lutz, became the prime minister of Bavaria who committed Ludwig II. Lutz played the piano in public with an orchestra at the age of 12, and when his family moved to Würzburg he attended the Gymnasium and later the university there, studying music with Franz Xaver Eisenhofer and Max Keller but training for a career in medicine. In 1846 he went to Birmingham with a German orchestra. Among several German musicians to find employment opportunities in England after Catholic emancipation, he became deputy organist of the Roman Catholic cathedral in Birmingham, St Chad's, before moving to St George's Roman Catholic Cathedral, Southwark (London) as its first organist and choirmaster, in which post (1848–74) he gave performances of numerous orchestral masses, including his own, with professional forces. He also served briefly at St Anne's, Leeds, and as a freemason was appointed organist in Grand Lodge (1890) by Edward, Prince of Wales.

Not uncommonly for musical directors of his period and indeed earlier and later ones in Britain, Lutz moved between three worlds: the church, the theatre and the resort. His seaside work was mainly in Scarborough, where he conducted the Spa band and taught for the 1867 to 1879 and 1884 to 1892 summer and autumn seasons, transferring to the New Spa at Bridlington for the last ten years of his life. As an operatic practitioner Lutz conducted an annual season at the Surrey Theatre, London (1851–5), acted as musical director to various English opera companies in the 1860s, oversaw stage and concert tours by Giulia Grisi and G.M. Mario, Louisa Pyne and William Harrison, and others, and composed light operas 'in the school of Auber'. He made his greatest mark in the popular musical theatre in London, however, where he was a force in the development of the musical. In February 1869 he was appointed director of music at the new Gaiety Theatre, where he proved an invaluable support to the manager, John Hollingshead, for 17 years. He then served under Hollingshead's successor, George Edwardes, who began to present original scores (rather than pasticcios) by Lutz. In 1893 Lutz relinquished the post to another immigrant, Ivan Caryll.

In Lutz's day the Gaiety purveyed burlesque, parodying opera and current literature in what now suggests itself as a grotesque manner, yet with the greatest stars of the time. Hence the titles of his scores – *Faust Up-to-Date*, *Carmen Up-to-Data*, *A Model Trilby, or A Day or Two after Du Maurier* – and the unrecoverable crossover of taste in *Carmen Up-to-Data* which could embrace both 'coon' song and Bizet in 'Hush! the Bogie!', one of his popular successes. (He also wrote and arranged for the Christy's Minstrels). But hence, too, the affection with which his era was remembered, for example by P.G. Wodehouse. Lutz conducted Alfred Cellier *Dorothy* at the Gaiety but just missed composing whole musical comedy scores in the new vein: Caryll's own *The Shop Girl* was his successor's first assignment. Nevertheless, his 'Pas de quatre' from *Faust Up-to-Date*, which became the Gaiety's signature tune and was enormously popular, helped secure a tripping lightness of style for musical comedy with its rhythmic topic of which echoes can be heard in the musical theatre as late as 'Wouldn't it be loverly?' from *My Fair Lady* (1956).

Lutz was wedded to the stage in every way, and in marrying his deceased wife's sister (in Jersey, because of English law) twice became brother-in-law to the opera singer Thomas Aynsley Cook (himself father-in-law of the second generation Eugène Goossens).

WORKS

(*selective list*)

all publications are vocal scores published in London; theatrical works first produced in London, unless otherwise stated; for fuller list of stage works see GänzlEMT

Operas and operettas: The Charmed Harp (1, J. Courtney), Surrey, 30 Aug 1852; Mephistopheles, or Faust and Marguerite, Surrey, 16 May 1855; Zaida, or The Pearl of Granada (O. Summers), Liverpool, Amphitheatre, 14 Feb 1859; Blonde or Brunette (1, J.P. Wooler), Royalty, 19 May 1862; Felix, or The Festival of the Roses (1, J. Oxenford), Royalty, 23 Oct 1865; The Miller of Millberg (1, M. Lutz), Gaiety, 13 April 1872; Frasquita (W. Godfrey), Gaiety, 29 May 1893

Burlesques, first produced at Gaiety Theatre unless otherwise stated: Little Jack Sheppard (H.P. Stephens, W. Yardley), 26 Dec 1885; Miss Esmeralda, or The Monkey and the Monk (F. Leslie, H. Mills), 8 Oct 1887; Frankenstein (R. Butler, H.C. Newton), 24 Dec 1887 (1888); Faust Up-to-Date (G.R. Sims, H. Pettitt), 30 Oct 1888 (1889); Ruy Blas and the Blasé Roué (Leslie, H.F. Clark), Birmingham, Grand, 3 Sept 1889 (1890); Carmen Up-to-Data (Sims, Pettitt), Liverpool, Shakespeare, 22 Sept 1890 (1891); Cinder-Ellen Up too Late (Leslie, W.T. Vincent), Melbourne, 22 Aug 1891 (1892), collab. O. Carr, L. Monckton, others; Don Juan (J.T. Tanner, A. Ross), 28 Oct 1893 (1894); A Model Trilby, or A Day or Two after Du Maurier (1, C.H.E. Brookfield, W. Yardley), Opera Comique, 16 Nov 1895

Cantatas: Herne the Hunter (O. Summers) (1863); King Christmas (1864); Legend of the Lys (R. Reece) (1873)

Motets for the Year, a Collection of Offertories (*c*1875); other sacred works

STEPHEN BANFIELD

Lü Wencheng [Ley Mensing] (*b* Zhongshan, Guangdong, 1898; *d* Hong Kong, 1981). Chinese musician and composer. Along with musicians such as Qiu Hechou (Yau Hokchau) and He Dasha (Ho Daeso), Lü Wencheng was a prolific composer of the new style of instrumental music evolving in colonial Guangzhou (Canton), Hong Kong and Shanghai in the 1920s and 30s, influenced by Western jazz and the new film industry as well as traditional Cantonese styles. Brought up in Shanghai, Lü popularized the new Cantonese style with national tours and many recordings. In 1932 he moved to Hong Kong, where he continued to record prolifically.

Lü created a modified version of the *erhu* bowed fiddle called *gaohu*, using high positions and glissandos, which became a distinctive voice of the Cantonese ensemble. He was also a noted singer of Cantonese opera. Among his most popular instrumental pieces are *Pinghu qiuyue* ('Autumn Moon over Lake Ping') and *Bubu gao* ('Stepping High').

STEPHEN JONES

Luxembourg. *See* LOW COUNTRIES, §I, 6.

Luxon, Benjamin (*b* Redruth, Cornwall, 24 March 1937). English baritone. He studied at the GSM and in 1963 joined the English Opera Group, for which his roles included Britten's Sid, Tarquinius and Demetrius, and Purcell's King Arthur (1970). He created the title role in Britten's television opera *Owen Wingrave* (1971), subsequently recording the part with the composer, and took the roles of the Jester, Death and Joking Jesus in the première of Maxwell Davies's *Taverner* at Covent Garden (1972). Other roles he sang there included Owen Wingrave, Yevgeny Onegin, Wolfram, Marcello, Falke (*Fledermaus*) and Diomede (*Troilus and Cressida*). At Glyndebourne (1972–80) he sang Monteverdi's Ulysses, Count Almaviva, Don Giovanni, Papageno, the Forester (*The Cunning Little Vixen*) and Ford. With the ENO (1974–90) he sang Posa, Papageno, Falstaff and Gianni Schicchi. He sang Wozzeck in Glasgow (1983), Sherasmin (*Oberon*) in Edinburgh (1986), Captain Balstrode in Philadelphia (1987) and Wozzeck again in Los Angeles (1988), where he returned as Falstaff (1990). His strong personality and warm, expressive voice were as effective in contemporary works as in his most famous role, Yevgeny Onegin, which he sang at the Metropolitan (1980), Frankfurt (1984), La Scala, Geneva (1986), Amsterdam, Paris and Prague. Luxon was also a sympathetic interpreter of lieder and of Russian and, especially, English songs, as can be heard on several recordings. He was made a CBE in 1986.

ALAN BLYTH

Luynes, Charles Philippe d'Albert, Duke of (*b* 1695; *d* 1758). French courtier and diarist. His memoirs, like those of his grandfather, the marquis de Dangeau, are among the most illuminating of musical life at the French court. Given that his wife was a lady-in-waiting to the queen, Maria Leczynska, Luynes had unrivalled access to the intimacies of court life. Covering the years 1735–58, his diary records the emergence of Rameau as an operatic composer and a courtier and the passion for music of Louis XV's queen and of his mistress, Mme de Pompadour. The musical tastes of the dauphin, for whom Royer composed, and of the second dauphine, Marie-Josèphe de Saxe, are observed. Luynes detailed the increasing significance of dance music and the divertissement as entertainments, recording the names both of librettists and composers. He also reported details of the chapel music, episodes of the long-running battle between the *sous-maîtres de la chapelle* and the *surintendants* over rights to conduct the Te Deum on ceremonial occasion, and the detailed financial arrangements made between the leading musical figures at court, such as Royer, Collin de Blamont, Rebel, Bury and Antoine Blanchard (23 Sept 1753). Luynes also kept a close eye on the increasing Italian influence in musical life and preserved colourful accounts of the visits to the court of Farinelli (29 Sept 1737, 21 June 1752), Caffarelli (13 June, 6 July 1753) and other musicians.

Luyr, Adam. *See* AQUANUS, ADAM.

Luython [Luiton, Luitton, Luthon, Luythonius, Luyton], **Carl** [Carolus, Charles, Karl] (*b* Antwerp, 1557/8; *d* Prague, Aug 1620). Flemish composer and organist. He spent nearly all his life in the service of the Habsburg imperial chapel in Vienna and Prague. In 1566 he was recruited as a chorister for the court of the Emperor Maximilian II in Vienna; his music teachers there may have been Jacobus Vaet, Alard du Gaucquier and Philippe de Monte, while he must have studied the organ either with the first court organist Wilhelmus Formellis or with one of the sub-organists, Wilhelm von Mülin or Paul van Winde.

On leaving the chapel on 30 July 1571 after his voice changed, Luython was given the usual honorarium of 50 guilders. He travelled to Italy to work and further his education, as had other imperial court singers such as Jacob Regnart. On 18 May 1576 he returned to the employ of the imperial court as a 'chamber musician' (probably as organist rather than singer) with a salary of 10 guilders a month. He was one of the first members of the newly founded *Kammermusik*, a parallel establishment to the court chapel and the military band.

In 1577 Luython was retained as a chamber organist in the newly established court of Maximilian's successor Rudolf II, which was transferred to Prague. Between 25 February 1580 and 28 February 1581 he augmented his meagre salary with that of a junior official in the imperial wardrobe (*unndergwardaroba*). When the first court organist Formellis died on 4 January 1582, Luython was retroactively appointed third court organist as from 1 January 1577, with a monthly salary of 25 guilders. Later in 1582 he accompanied Rudolf to the Diet at Augsburg as second court organist, and at that time he published in Venice his first and only book of madrigals, dedicated to the Augsburg magnate Johann Fugger. This excursion began the rise of Luython's reputation.

Luython collaborated with the organ builder Albrecht Rudner on the reconstruction of the organ in Prague Cathedral. The two disagreed on several matters, and in court records between April 1581 and 22 December 1590 Luthon's objections are spelt out in great detail. His first collection of motets, *Popularis anni jubilus*, was published in Prague in 1587, with a dedication to Rudolf II's brother Archduke Ernst on the occasion of his consecration as bishop. On 1 April the same year Luython was granted a minor coat of arms (*Wappen mit Lehenart*) in recognition of his services as court organist. He probably served in effect as first court organist from 1594, when Paul van Winde left for the Netherlands; he was officially appointed to the post when van Winde died in 1596.

When Monte died on 4 July 1603, Luython succeeded him as court composer, with an increase in salary of 10 guilders a month. He published in Prague another volume of motets in 1603, a book of Lamentations in 1604, and a collection of masses in 1609 (twice reprinted in Frankfurt). The dedication of the masses to Rudolf II brought Luython a gift of 500 guilders. On 16 May 1611 he was awarded a yearly pension of 200 guilders in recognition of 35 years of loyal service to the imperial court. But like many of Rudolf's employees, Luython had trouble collecting what was owed him; his salary had been 1600 guilders in arrears in 1591, and during Rudolf's lifetime he was hard pressed to collect his pension. After Rudolf's death in 1612, his brother and successor Matthias disbanded the court chapel and disclaimed responsibility for debts to its members. Luython, who had never married or taken holy orders, died a pauper in 1620, leaving 2400 guilders in arrears of salary and pension to his brother Claude and sisters Clara and Sibella; his will was never executed.

Praetorius gave a description of a remarkable harpsichord owned by Luython; he called it 'clavicimbalum universale seu perfectum'. The instrument had a four-octave enharmonic keyboard on which all five of the regular raised keys in each octave were split, and raised keys tuned as E♯ and B♯ were inserted between E and F and between B and C; it could play in the chromatic and enharmonic genera as well as the diatonic. The sliding keyboard could be set at any of the seven enharmonic steps spanning a major 3rd. Poverty forced Luython to sell his harpsichord for 100 guilders in 1613.

Luython's vocal music largely reflects the influence of Monte. Ten of the 11 madrigals in his first book set poems by Petrarch, but the sixth, *Sacro monte mio dolce*, is a homage to Monte whose text may have been written by Luython. The four parody masses of the nine in his first book are all based on motets and madrigals by Monte. Another mass, the seven-voice *Missa super basim 'Caesar vive'*, reinforces the volume's dedication to Rudolf II; its cantus firmus is a short melody composed for the purpose. The remaining four masses are all entitled *Missa quadlibetica*, a term used also by Vaet and Regnart. They share a rapid, mostly syllabic declamation of the words and a notable degree of thematic unity within each setting. The 'Osanna' section of the Sanctus is always elided with the 'Pleni sunt caeli', and the Agnus Dei is given a single rather than a threefold setting. The thematic concentration suggests that the 'quodlibet' masses may be parodies of existing compositions, but no models have been identified. While the three- and four-voice examples are simpler in texture and structure, the six-voice *Missa quodlibetica* is contrapuntally complex and expansive in form. Luython's *Missa 'Tytire tu patule'*, not included in the printed volume, is probably one of the masses dedicated to Maximilian II mentioned in documents of 1575 and 1576.

Luython was less conservative in his composition for instruments, which reflects the ideas of forward-lookiing contemporaries; he is perhaps best remembered for the handful of keyboard pieces in which he anticipated later fugal procedures. His *Fuga suavissima* has been compared to similar pieces by Sweelinck and Frescobaldi; it is divided into three sections and based on three subjects. All his other instrumental works are of the ricercare type.

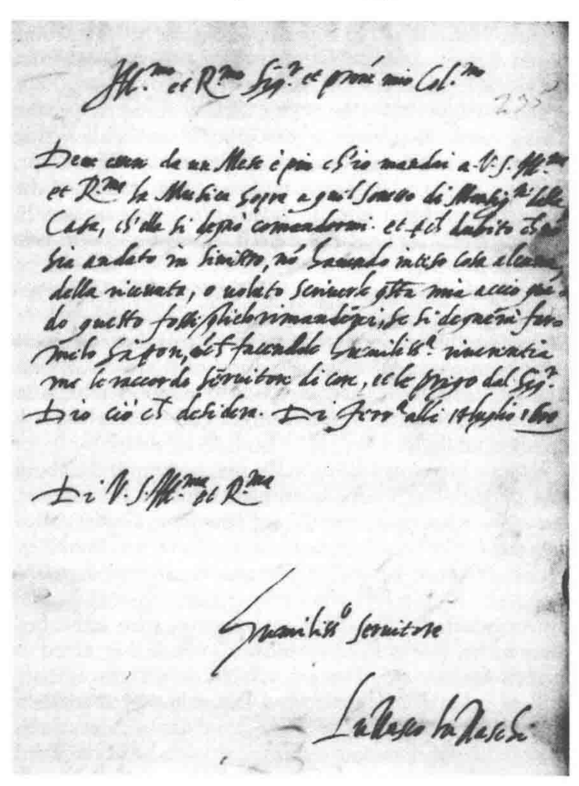
CARMELO PETER COMBERIATI

Luzern (Ger.). *See* LUCERNE.

Luzzaschi, Luzzasco (*b* Ferrara, ?1545; *d* Ferrara, 10 Sept 1607). Italian composer, organist and teacher. He was the leading musician at the Ferrara court in the later 16th century, a noted teacher and keyboard player and an influential madrigalist and composer of instrumental music.



1. LIFE. He appears to have lived his entire life in Ferrara. According to his own testimony he was a pupil of Rore. He probably studied the organ with Jacques Brunel and may also have studied composition with Alfonso dalla Viola after Rore left Ferrara in 1558. In May of 1561 he became an organist at the Este court, and in 1564, after the death of Brunel, he was appointed first organist. Although this always remained his official title, his responsibilities were broadened to include the direction of one of the court orchestras, the training of musicians placed under him, and composing for the court. Bottrigari, who was in Ferrara from 1576 to 1587, reported that his authority was equal to that of the court *maestro di cappella*, Ippolito Fiorini; in fact, Duke Alfonso II's musical establishment was so large that it required two *maestri di cappella*, which in effect it had. Luzzaschi was also organist at Ferrara Cathedral and held a similar title in the Accademia della Morte. His many services to the court were rewarded by gifts of land and a house.

Some time before 1570 Luzzaschi took charge of Duke Alfonso's private *musica da camera*, the most celebrated aspect of which became known as the *concerto di donne*. The 'singing ladies' of Ferrara, the three best-known of whom, Lucrezia Bendidio, Tarquinia Molza and Laura Peverara, were famous throughout Italy, performed a secret repertory jealously guarded by the duke, at least some of it composed by Luzzaschi. Many accounts exist of the duke's private concerts, which were Luzzaschi's responsibility and at which he played keyboard instruments and to which numerous outsiders were invited. Both madrigals and instrumental music were performed in abundance, but the remarkable virtuoso singing of the women, singly and in duets and trios, seems to have been the most impressive feature. Luzzaschi's *Madrigali per cantare et sonare a 1–3 soprani*, published in 1601, some years after the concerts had ceased, contains pieces from the secret repertory.

Little is known about Luzzaschi's career after the demise of the Este court in 1597, but it seems likely that he remained at Ferrara and served the papal governor, Cardinal Pietro Aldobrandini, who took charge of the state. Letters from him (in *I-Ma*) show that he was in contact with Cardinal Federico Borromeo and sent him compositions between 1599 and 1601, but there is no evidence that he ever visited Milan. He was in Aldobrandini's retinue when he visted Rome in 1601, when, perhaps with the support of Cavalieri, arrangements must have been made for his publication of that year. At his funeral his body was accompanied by 80 musicians, who further honoured him by placing a gilded laurel wreath on his catafalque.

Luzzaschi was much lauded by his contemporaries both as a player of keyboard instruments and as a composer. Because of his excellent playing Vincenzo Galilei called him one of the very best musicians in Italy, and Banchieri declared him to be one of the two finest organists (the other was Merulo). Further praise was bestowed on him by Antegnati and by Girolamo Diruta, who published three of his works in *Il transilvano*, where they acted as models for the art of organ playing. His extraordinary skill as a keyboard player and harmonist even made it possible for him to perform on Nicola Vicentino's *archicembalo*; Bottrigari reported that he had composed special compositions for it which he managed most delicately, and Cerone recalled that such perfect harmony had never been heard as when he played the instrument. G.C. Monteverdi listed him among the composers of the *seconda pratica* in the *Dichiaratione* published in his brother Claudio's *Scherzi musicali* (1607). Several other writers wrote admiringly of him. He must have had many pupils, but only a few are now known. The most renowned of them was Frescobaldi, who praised him as a musician and teacher in his publications of 1624 and 1630. Others were Girolamo Belli, Fabio Ricchetti, who became organist of Modena Cathedral, and Carlo Mentini, who was organist at S Marco, Venice, and Einstein believed that Alfonso Fontanelli must have studied composition with him. His instrumental music was influential and instructive well beyond Ferrara: in both Naples and Rome the imitative contrapuntal style of his keyboard works was central to the formation of schools of instrumental composition.

2. WORKS. In addition to the explicit praise given to Luzzaschi's music, the high regard in which his five-part madrigals were held is evident from their frequent appearance in anthologies and in the publications of other composers. The posthumous collections of madrigals drawn almost entirely from his earlier books were probably arranged for by Gesualdo, who was much influenced by him and whose admiration for him is well documented. Luzzaschi's sixth book of madrigals (1596) contains a remarkable aesthetic statement that in some respects adumbrates ideas expressed shortly afterwards by Monteverdi, Giulio Caccini and Marco da Gagliano. It begins by affirming the closeness of poetry and music, which he described as twins that resemble one another in manner and style, but he stressed that poetry, born first, always takes precedence and that music must always follow. It continues with an extended account of the

Ill.mo et R.mo Sig.r et pron mio Col.mo

Di Ferrara alli 14 luglio 1600

Di V.S. Ill.ma et R.ma

Humiliss.o Servitore

Luzzasco Luzzaschi

Autograph letter (14 July 1600) from Luzzaschi to Cardinal Federico Borromeo, referring to a sonnet by Giovanni della Casa and showing that the composer was commissioned to set specific texts chosen by his patron (I-Ma G.186.Inf.f.235)

affective affinity between the two arts. Finally, Luzzaschi declared that composers had achieved in his day a hitherto unknown perfection in madrigal composition that he attributed to the new compositional means and methods used by himself and his contemporaries. Though he was not specific, some of these new techniques are surely well represented in the more progressive of his own madrigals.

Though his contemporaries acclaimed him as a keyboard player, only a handful of keyboard works by Luzzaschi survive. There is evidence that he published at least three volumes of four-part ricercares that are now lost, though the contents of one survive in manuscript. The madrigals for one to three voices with keyboard accompaniment belong to the 16th-century tradition of pseudo-monody and are elaborate virtuoso pieces that can best be regarded as *a cappella* madrigals recast. The shift in aesthetic attitude underlying the appearance of genuine monody, with its polarity in both character and function between voice and accompaniment, is wholly absent in these works, which, despite their late date of publication (1601), were probably written in the 1580s. Luzzaschi's surviving works otherwise consist chiefly of unaccompanied five-part madrigals, which fall into an early and a late style, reflecting to some extent the 12-year hiatus between his third and fourth books. The stylistic metamorphosis that can be observed in his works may be summarized generally as a movement from a musically amorphous and barely differentiated style to one that is clarified and sharply defined in all its aspects.

In Luzzaschi's earliest madrigals, melody is basically of two kinds. One is rather awkward in character, with leaps of 4ths and 5ths and somewhat unvocal contours, the other covers a narrower range and includes frequent use of repeated notes. In both types the text is most often set syllabically. In the later madrigals the first type has evolved into a longer, more graceful, lyrical melody with an increased use of melisma, sometimes for purposes of word-painting (which is now much more prevalent), the second into a more confined and repetitive declamatory line that is sometimes recitative-like. Something of a combination of these attitudes occurs in the later works with the use of a contrasting motif – a melodic line, mannerist in character, that includes abrupt shifts of contour and the close juxtaposition of extremes in rhythmic values. The contrasting motif may be seen as presenting in extreme form and in microcosm an attitude towards rhythm that informs Luzzaschi's later works, which are rhythmically much more flexible than the early works and show no sign of their steady motor pulse. The most dramatic stylistic change between his early and late madrigals concerns texture, which was perhaps the aspect of composition that interested him most in his last works. Contrapuntal texture dominates his earlier works, with only occasional chordal writing impeding the polyphonic flow; but he was not as a rule interested in strict imitation, preferring instead a loosely imitative procedure in which each voice may have a slightly different version of a motif. A typical illustration of this is the opening of *Non fu senza vendetta* (in book ii), in which the cantus and bass, the highest and lowest voices and the first and last to enter, are more closely related, thus unifying the passage and giving the impression that there is more imitation within the ensemble than there actually is. Strict imitation, even double counterpoint, is not unknown, but it is rare in the early works. *Mentre gira soave i chiari lumi* (book ii), like many of the other early madrigals, uses two pairs of voices. One enters after the other, and they are imitative within and between each pair; the result is a contrapuntal duet very similar to paired imitation but loosely knit in polyphonic treatment.

Luzzaschi's later madrigals are particularly marked by decisive changes in texture, with a greater emphasis on homophony, which from book iv is no less important than counterpoint. At its simplest it appears as chordal writing, but when the text is set in accordance with speech rhythms a choral recitative results, and when the ensemble is homophonic, with one voice highlighted, the resulting texture might best be described as choral or ensemble monody – monodic texture achieved through purely vocal means. Although imitative passages are usually more strictly organized in the later madrigals, many contrapuntal sections are now conditioned by homophony. The most frequently encountered texture is one in which two voices are set in note-against-note style to form a homophonic vocal unit, which is then manipulated in contrapuntal combinations with single voices or with another similar unit, as in *Quando miro me stessa* (book iv) and *Tra le dolcezze* (book v).

Harmony is the one stylistic factor that changed little in the course of Luzzaschi's madrigal production. Most often he used a subdued, traditional harmonic language, but occasionally he used chromaticism, even of an extreme kind, sometimes for brief passages, sometimes for an entire madrigal, as in *Quivi sospiri* (book ii; ed. in Einstein, *The Golden Age of the Madrigal*, 53), where for a harsh text he chose harsh chromatic expression. His use

of chromatic language probably reached its apotheosis in *Itene, mie querele* (book vi and *Seconda scelta*; ed. in *EinsteinIM*, iii, 262) in a harmonic style of brilliant contrasts and surprises. It should be stressed, however, that, despite his command of it, he reserved chromaticism for relatively few highly expressive moments in his madrigals. His contemporary reputation as a chromaticist must have derived chiefly from his keyboard performances. Modern historians have been misled in categorizing Luzzaschi as a chromatic composer by the disproportionate number of madrigals in an extreme chromatic style among the small number published in modern editions.

Luzzaschi's later madrigals are remarkable for their very rich use of colour and sonorous contrast. In his last works the use of the full ensemble, but more frequently of a variety of smaller groupings drawn from it within a single madrigal, further varied and contrasted by differences among them in melody, rhythm and texture, presents a brilliant concertato display. The degree of sectionalization and the great variety of contrasting portions of musical material produce, as in *Itene, mie querele*, a veritable musical patchwork. It could indeed be said that for Luzzaschi in his late madrigals the quest for contrast at all levels is the chief compositional motivation and the aesthetic goal.

The influence of a variety of contemporaries, older and younger, northern and Italian, can be discerned in Luzzaschi's music. In many ways his early style resembles that of his teacher Rore, and he must certainly have been strongly influenced at an early date by Wert. Three Italians, Giovanni Gabrieli, Marenzio and Monteverdi, may be seen as strongly affecting his style and as prime external agents in its metamorphosis. Like these three, he was a master composer and a progressive musician, but unlike them he was not an innovator or even very daring. He is a quiet but stimulating complement to the dramatic musical events that took place in the world around him.

WORKS

SECULAR VOCAL

Il primo libro de madrigali, 5vv (Ferrara, 1571)

Secondo libro de madrigali, 5vv (Venice, 1576–7); 1 ed. A. Einstein, *The Golden Age of the Madrigal* (New York, 1942), 53; some ed. in Strainchamps and in Spiro

Terzo libro de madrigali, 5vv (Venice, 1582); some ed. in Strainchamps, Spiro and in *NewcombMF*

Il quarto libro de madrigali, 5vv (Ferrara, 1594) [incl. 2 works previously pubd 1582[5], 1590[15]]; ed. R. Nielsen, *Dodici madrigali del scuola ferrarese su testi di Torquato Tasso* (Bologna, 1954); some ed. in Strainchamps, Spiro and in *NewcombMF*

Quinto libro de madrigali, 5vv (Ferrara, 1595); some ed. in Spiro

Sesto libro de madrigali, 5vv (Ferrara, 1596); 1 ed. in Einstein, some in Spiro

Madrigali ... per cantare et sonare a uno, e doi, e tre soprani (Rome, 1601); ed. in MMI, ii/2 (1965); 1 ed. R. Nielsen, *Dodici madrigali del scuola ferrarese* (Bologna, 1954)

Settimo libro de madrigali, 5vv (Venice, 1604); some ed. in Spiro

Madrigali di Luzasco Luzaschi, et altri autori, 5vv (Naples, 1611) [anthology of previously pubd madrigals]

Seconda scelta delli madrigali, 5vv (Naples, 1613) [anthology of previously pubd madrigals with 1 new work]

Madrigal, 4vv, 1588[17], ed. H.B. Lincoln, *L'amoroso ero*(Albany, NY, 1968); 5 madrigals, 5vv, 1582[5], 1590[15], 1591[9], 1592[14], 1604[8] [2 repr. in Il quarto libro de madrigali, 5vv]; 2 madrigals, 6vv, 1583[10], 1586[10]; 1 canzonetta, 4vv 1597[14]

SACRED VOCAL

Sacrarum cantionum liber primus, 5vv (Venice, 1598)

Mass, 5vv, *I-Mb* (formerly attrib. Luzzaschi, probably not by him)

INSTRUMENTAL

Canzona, 1608[24], ed. in Bartholomew, ii, 27; 2 ricercares, toccata, 1593[9], 1609[9], ed. in Ladewig, 1978, Newcomb, 1979; ricercare, *I-Tn*, Foà, ed. in Ladewig, 1978; 2 ricercares (doubtful) *Rvat*, ed. in Ladewig, 1978; dance, inc., *Mc*; ricercares, a4, 3 pubd bks, lost; Secondo libro de ricercare a 4, *Bsf*, ed. M. Pascale, Rome, 1981

EDMOND STRAINCHAMPS

Luzzi, Luigi (*b* Olevano di Lomellina, nr Pavia, 28 March 1828; *d* Stradella, 26 Feb 1876). Italian composer. He

studied medicine and humanities at the University of Turin. In 1853 he made his début at the Teatro Nazionale, Turin, with his opera *Chiarina*. He was a member of the Accademia Filarmonica in that city, and he published there a number of songs and piano pieces. A fervent patriot, he dedicated many of his scores (including his opera *Tripilla*) to members of the Savoy family, and he composed a funeral march for Cavour (1861). Also in 1861 he was among the signatories of a petition for a state conservatory to be established in Turin.

The operas of Luzzi are valuable examples of the survival of *opera buffa* and *opera semiseria* in the mid-19th century; *Tripilla*, in particular, is a delightful free adaptation of the age-old subject of 'l'inutil precauzione' which had also served Rossini in *Il barbiere di Siviglia*. His songs show an individual melodic vein and polished harmonization, while his piano pieces, some of them requiring considerable technical skill, are among the first products of a reawakening interest in instrumental music in Italy.

WORKS

Ops: Chiarina (P.A. Balestrini), Turin, Nazionale, 1853; Tripilla (L. Scalchi), Turin, Carignano, 1858; Fra Dolcino, unperf.; La ventola, unperf.

Orch: Sinfonia a grande orchestra, Marcia funebre in morte di Cavour (1861)

Pf pieces, incl. Le grazie, Un sogno

It. songs, incl. Mia madre!, La derelitta, Lia!, Ave Maria (1863)

FRANCESCO IZZO

Luzzo, Francesco. *See* LUCIO, FRANCESCO.

L'viv (Pol. Lwów; Ger. Lemberg). City in Ukraine. From 1349 to 1772 it belonged to Poland; from 1772 to 1918 the city was the capital of the Austrian province of Galicia. Between 1918 and 1939 it was part of the newly independent Poland, and from 1939 to 1991 it was the capital of the Ukrainian SSR (under German occupation, 1941–4).

1. To 1939. 2. Since 1939.

1. TO 1939. From the Middle Ages onwards the city was a major cultural centre, reaching its peak between the 16th and early 18th centuries. Marcin Leopolita (1540–89), one of the most significant composers of the Polish Renaissance, was a native of the city and returned there after serving at the court of King Zygmunt August in Kraków. From the late 16th century, the city became an important centre for printing, publishing and bookselling. The ensemble of singers at the Dominican monastery created at the end of the 16th century (to which instruments were later added) had a high reputation. From the second half of the century polyphony was gradually introduced in the Orthodox churches.

Significant Polish composers connected with the city from the late 17th century were S.S. Szarzyński, who was active at the turn of the 18th century, J. Staromiejski, who was at the Dominican chapel in the years around 1740, and Adalbert Dankowski (*b c*1760), who moved to the city in 1792. In 1793 a university, named after King Stefan Batory, was founded as a successor to the Jesuit academy which had existed since 1661.

After 1772, when the city came under Austrian rule, there was a rapid influx of musicians. Two theatre companies were established, one German (1776–1872), and one Polish (1780), and L'viv became an important centre for drama and opera. Noted Kapellmeister at the Polish theatre included the composer Józef Elsner (1792–9) and the virtuoso violinist K.J. Lipiński (1810–14). Operas, Singspiele and vaudevilles were given by the Polish theatre company, whose most influential directors were Franciszek Bull (1789–94) and Wojciech Bogusławski (1795–9). The latter did much to develop a national theatre, and encouraged local composers, including Elsner and K.K. Kurpiński, to write operas. Subsequent directors of the Polish theatre included Henryk Jarecki (1873–1900) and Stanisław Niewiadomski (1886–7 and 1918–19).

During the 19th century the cultural life of the city developed along with its institutions. Significant events in the concert life of the city were the founding of the Philharmonic Society by Elsner, the public concerts organized by Johann Mederitch (1803–12 and 1817–30), and the founding in 1826 of the Cäcilien-Verein by F.X.W. Mozart (known as Wolfgang Amadeus the younger), who lived in the city from 1808 to 1814 and from 1822 to 1838. The focus of Polish intellectual and cultural life in the city during the years of Austrian rule were the theatre, the university (re-established in 1817) and the publishing house Zakład Narodowy im. Ossolińskich (the Ossoliński National Institution), founded by J.M. Ossoliński in 1817. One of the most important 19th-century societies was the Gesellschaft zür Beförderung der Musik in Galizien (1838), successively renamed the Galicyjskie Towarzystwo Muzyczne (Galician Music Society, 1848) and the Polskie Towarzystwo Muzyczne we Lwowie (Polish Music Society of Lwów, 1919); the society financed the conservatory (from 1870), several choirs and an amateur symphony orchestra. Eminent musicians associated with the society included Karol Mikuli, a student of Chopin, who was the society's artistic director from 1858 to 1887 and a director of the conservatory; Stanisław Niewiadomski, a professor of theory and history of music at the conservatory from 1887 to 1914; Mieczysław Sołtys, director of the conservatory from 1899 to 1929; Henryk Melcer-Szczawiński, a professor at the conservatory from 1897 to 1899; Józef Koffler, who taught classes in composition from 1928 to 1941; and Adam Sołtys, son of Mieczysław, director of the conservatory from 1929 to 1939. Under the direction of Adam Sołtys the conservatory choir became the best in Poland.

In 1864 the Ukrainian Theatre was founded in the city; it was supported by Lavrivs'ky, Anatol' Vakhnyanyn and other Ukrainian musicians. Under the successive direction of Jarecki (1874–1900), Tadeusz Pawlikowski (1900–06) and Ludwik Heller (1906–18) the Polish theatre in L'viv became, after Warsaw, the most important Polish opera house. Internationally famous singers who started their careers there included Salomea Krusceniski, Adam Didur and Aleksander Myszuga. Having achieved success at La Scala, Didur returned to the city in 1932 and became director of the Opera and professor of singing at the conservatory. In 1900 a new building was opened, the Teatr Wielki (Grand Theatre), which during the interwar period was one of three opera houses in Poland (along with Warsaw and Poznań) to remain permanently open.

At the end of the 19th century two important choirs were founded: Lutnia (1880) and Echo-Macierz (1887). These two choirs inspired the formation of similar choirs in other Polish cities and in Polish communities abroad, and helped to maintain a sense of national identity during the period of foreign occupation. Ukrainian choirs were also founded, notably Bojan (1890) and Bandurzysta (1905). In 1902 the Philharmonic Orchestra was founded under the direction of Henryk Melcer; this survived only a short time but was revived in 1921. In 1902 the Karol Szymanowski Music School was opened as a successor to the Lwów Music Institute, and in 1903 the Lysenko Music Institute (Ukrainian) was founded. From 1913 the Stefan Batory University opened a department of musicology, directed until 1941 by Adolf Chybiński. With Zdzisław Jachimecki in Kraków, Chybiński was responsible for establishing Polish musicology as a modern scientific descipline.

Musical journalism in the city blossomed during the 1920s and 30s. Notable periodicals included *Wiadomości artystyczne* ('Arts news', 1896), *Gazeta muzyczna* (1918), *Lwowskie wiadomości myzyczne i literackie* ('Musical and literary news from Lwów', 1925–34) and *Echo* (1936–7). Leading music critics between the wars were Seweryn Barbag, Józef Koffler and Stefania Łobaczewska. The most important musical institutions founded during this period were the Związek Muzyków we Lwowie (Lwów Musicians' Union, 1919), the Polskie Towarzystwo Muzyki Współczesnej (Polish Society for Contemporary Music), which was affiliated to the ISCM from 1930, and the Lwowskie Towarzystwo Miłośników Muzyki i Opery (Lwów Society for Lovers of Music and Opera, 1933), which organized regular concerts.

In 1939 the city was invaded by the Soviet Red Army and incorporated into the Ukrainian SSR. Education was reorganized along Soviet lines; this led to the fusion of three institutions (the conservatory, the Lysenko Music Institute and the Szymanowski Music School) into the Lysenko Conservatory. Among the professors of the reconstituted conservatory were Adam Sołtys, Józef Koffler, Zofia Lissa and Adolf Chybiński.

2. Since 1939. The establishment of Soviet power in L′viv, although a mixed blessing culturally, strengthened Ukrainian aspirations not only by introducing a strong music education system, but also by financing the Philharmonic Society (with its symphony and chamber orchestras) and the opera house and establishing the L′viv branch of the Composers' Union of the USSR, into which Stanislav Lyudkevych, Adam Soltys, Filaret Kolessa and A.J. Kos-Anatols′ky were integrated. However, Vasyl′ Barvyns′ky, an important creative force, was arrested during the purges of 1948 and imprisoned for ten years in a Mordovian labour camp before returning to L′viv. In the 1960s L′viv's cultural and musical activities produced two important new voices, those of Andry Nikodemowich and Myroslav Skoryk, and in the 1980s Yury Lanyuk began to create the highly refined works that have brought him international attention.

Musical life in L′viv centred on three institutions: the conservatory, the Philharmonic Society and the opera house. During the 1960s and 70s L′viv had an excellent secondary music school system, producing many superb musicians, among them the pianist Aleksandr Slobodianyk and viola player Yuri Bashmet. Since 1991 the principal music school has been the L′vivs′ky Vyshchy Derzhavny Muzychny Instytut imeni Lysenka (the Lysenko High State Music Institute, in L′viv), formerly called the Lysenko Conservatory (formed in 1939). In the year 2000 the name was changed to the L′viv Music Academy. The activities of the Philharmonic Society (founded in 1939, then re-established in 1944) include concerts by the symphony orchestra, the Trembita choir, a chamber orchestra and various folk ensembles. The existence of a state symphony orchestra was vital in developing an orchestral repertory by western Ukraine's composers.

The opera house has always been an important cultural focus in L′viv. In 1939 the Grand Theatre was renamed the L′vivs′ky Derzhavny Teatr Opery ta Baletu (L′viv State Theatre of Opera and Ballet) and reopened on 21 September 1940, staging 11 works. Productions continued during the German occupation, when the theatre was known as the L′vivs′ky Operny Teatr. Ironically, it was during this period that Ukrainian opera was relatively free of external artistic interference. With the return of Soviet rule, it again became the L′viv State Theatre of Opera and Ballet and in 1956 was renamed the L′vivs′ky Akademichny Teatr Opery ta Baletu imeni I. Franka (Franko Academic Theatre of Opera and Ballet) and, together with similar theatres in Kiev, Kharkiv and Odessa, became one of the most important in Ukraine. Premières of Ukrainian operas there have included Vitaly Kyreyko's *Forest Song* (1958), Yuly Meytus's *Stolen Happiness* (1960) and *Rikhard Zorge* (1976), the revised version of Borys Lyatoshyns′ky's *The Golden Ring* (1970), Volodymyr Zahortsev's *Mother* (1985) and Mark Karmins′ky's *One Day Left* (1987).

Since independence, L′viv's musical institutions have had to overcome many crises in the post-colonial world. A variety of new programmes are being tried and important archival collections have been established; prominent among these is the Lyudkevych Musical Memorial Museum, opened in 1995 as a branch of the Solomiya Krushel′nyts′ka Musical Memorial Museum, begun in 1991. In 1996 the museum acquired the archives of Modest Mentsyns′kyi and the unique collection of gramophone recordings of the early 20th century of the violinist Yaroslav Hrytsay. International exchanges and tours are encouraged, and a number of festivals have been firmly established, two of them attaining international recognition: Virtuosos (annual since 1990), and the international contemporary music festival Contrasts (annual since 1995).

JOLANTA GUZY-PASIAKOWA (1), VIRKO BALEY (2)

L′vov. Russian family of scholars and musicians.

(1) Nikolay Aleksandrovich L′vov (*b* Cherenits′i estate, Tver′ province, 4/15 March 1751; *d* Moscow, 22 Dec 1803/3 Jan 1804). Russian poet and scholar. He lived in St Petersburg from 1769 but travelled widely as a diplomat. Active also as an architect, he designed several churches as well as the Nevsky Gate to the Peter-Paul Fortress in St Petersburg. L′vov's knowledge, creativity

and love for the arts attracted a circle of artists, poets and musicians in St Petersburg. He regarded folksong as the kernel of Russia's national identity and national music, and included it in his libretto for Fomin's one-act comic opera *Yamshchiki na podstave* ('Postal Coachmen at the Relay Station'); this may have been first performed at the Municipal Theatre in Tambov in 1788, where the libretto was published in the same year. Some of his poems, like the incomplete *Dobrïnya, bogatïrskaya pesnya* ('Dobrïnya, Song of a Bogatïr') published posthumously in 1804, are also written in a folk idiom. Three further opera librettos by L′vov are known. L′vov collaborated with J.G. Pratsch to produce the *Sobraniye narodnïkh russkikh pesen s ikh golosami* ('Collection of Russian folktunes with vocal parts', St Petersburg, 1790; enlarged 2/1806/*R*1987 with Eng. introduction by M. Mazo, ed. M.H. Brown; 6/1986), which contains an unsigned preface by L′vov, 'O russkom narodnom penii' (On the nature of Russian folk singing), the first extensive discussion of Russian folksong in print. This collection of 100 songs, taken from rural and urban sources, served for over a century as a source of Russian folksong for both Russian and Western composers, including Beethoven, Rossini, Musorgsky and Stravinsky.

(2) Fyodor Petrovich L′vov (*b* 1766; *d* 1836). Scholar and musician, nephew of (1) Nikolay Aleksandrovich L′vov and father of (3) Aleksey Fyodorovich L′vov. In 1825 he succeeded Bortnyans′ky as director of the imperial court chapel choir, a post which he occupied until his death. His book, *O penii v Rossii* ('On singing in Russia'), was published in St Petersburg in 1834.

(3) Aleksey Fyodorovich L′vov (*b* Reval [now Tallinn], Estonia, 25 May/5 June 1798; *d* nr Kovno [now Kaunas], Lithuania, 16/28 Dec 1870). Composer and violinist, son of (2) Fyodor Petrovich L′vov. He received a broad musical education and learnt to play the violin at an early age. After studying at the Engineering Institute he enlisted in the army in 1818, serving in the Novgorod government and, from 1826, in St Petersburg as adjutant to Count Benckendorff, Nicholas I's chief of security police. In 1834 he was appointed personal adjutant to the tsar, and in 1837 he succeeded his father as director of the imperial court chapel choir. Even before he took over this post Aleksey L′vov was actively involved with music. In 1831 he arranged Pergolesi's *Stabat mater* for four-part choir and orchestra, and in 1833 he responded to the tsar's request to compose a Russian national anthem. This famous hymn, *Bozhe, tsarya khrani* ('God Save the Tsar'), with words by Zhukovsky, has unfortunately largely obscured L′vov's other compositions, most of which represent his two principal interests, liturgical music and the violin. Because of his high social and military rank L′vov was unable to perform publicly in Russia. In 1849 he travelled to Leipzig; there, unfettered by social convention, he gained a reputation as a fine soloist, and earned high praise from Schumann, who heard him play first violin in quartets by Mozart and Mendelssohn. He performed Mendelssohn's Violin Concerto in the Gewandhaus, with the composer himself conducting, and it is likely that he also played his own violin concerto. This highly virtuoso piece in three movements was unusual for its time in that the first movement is in A minor, the last in C major. For the violin L′vov also composed 24 caprices and, for violin and cello, a dramatic fantasy entitled *Le duel*.

However, a greater proportion of his musical output consists of sacred pieces, which he wrote for the imperial chapel choir, the conducting of which he delegated to assistants, including Glinka. He composed a large number of *kheruvimskiye pesni*, the hymns sung during the communion in the Divine Liturgy of the Orthodox Church, and also at least one setting of the Lord's Prayer. In 1851 he composed a *Stabat mater*, which, with Latin and German words, was published in Vienna by Glöggl. The third number in this piece, 'Quis inter homines', is of special interest, for it is set in the manner of a Russian church chant (*znamennïy*). In 1852, by order of Nicholas I, L′vov arranged for four-part choir the Lenten hymns of the Orthodox Church.

L′vov composed some eclectic secular songs and also a number of operas, the first of which was *Bianca und Gualtiero*; four months after its première it was performed in an Italian translation in St Petersburg. It received only two performances. The libretto of L′vov's next opera, the three-act *Undina*, is again based on a French text later used by Tchaikovsky for his own ill-fated opera on the same theme. A German translation by Otto Prechtler was given in Vienna on 30 October 1852 under the title *Die Tochter der Wellen*. The overture was later re-orchestrated by Balakirev. Much more successful than its predecessor, *Undina* remained in the repertory until the 1860s. L′vov's final stage work, *Starosta Boris* ('Boris the Head Man'), was an effective vehicle for the great bass Osip Petrov.

Towards the end of his life L′vov wrote two short literary works: a pamphlet *O svobodnom ili nesimmetrichnom ritme* ('On free or asymmetrical rhythm', 1858) and *Sovetï nachinayushchemu igrat′ na skripke* ('Advice to a beginner in playing the violin', 1859). In 1861 L′vov was compelled by increasing deafness to resign the directorship of the imperial chapel choir; he retired from musical life in 1867.

WORKS

OPERAS

Bianca und Gualtiero (2, J.C. Grünbaum, after J. Guillau), Dresden, 13 Oct 1844; as Biancae Gualtiero, St Petersburg Bol′shoy, 28 Jan/9 Feb 1845
Undina (3, Sollogub, after F. de La Motte Fouqué), St Petersburg, Bol′shoy, 8/20 Sept 1848; as Die Tochter der Wellen, Vienna, 30 Oct 1852
Starosta Boris, ili Russkiy muzhichok i frantsuzskiye marodyorï [Boris the Head Man, or The Russian Peasant and the French Marauders] (comic op, 3, N.I. Kulikov), St Petersburg, Aleksandrinsky, 19 April/1 May 1854 (St Petersburg, *c*1855)

VOCAL

Bozhe, tsarya khrani [God Save the Tsar: Russian national anthem], 1833
Otche nash [Our Father] (?St Petersburg, *c*1850)
Stabat mater, solo vv, orch (Vienna, 1851)
Irmosï [Collection of Lenten hymns] (St Petersburg, 1852)
38 short choral pieces (?St Petersburg, *c*1855; *GB-Lbl*)

INSTRUMENTAL

Violin Concerto, a, 1840 [arr. vn, pf, pubd in IRMO, iii (Moscow, 1970), 272ff]
Le duel, vn, vc (Berlin, *c*1840)
Divertimento, vn, vc, pf/org (Berlin, *c*1840)
Divertimento, vn, vc, orch/str qt/pf (Berlin, *c*1841)
Overture, C (St Petersburg, *c*1850)
24 caprices, vn (Moscow, *c*1850)

Lyadov [Liadov], **Anatoly** [Anatol] **Konstantinovich** (*b* St Petersburg, 29 April/11 May 1855; *d* Polïnovka, Novgorod district, 16/28 Aug 1914). Russian composer, teacher and conductor. His first teacher was his father, conductor at the Mariinsky Theatre from 1850 to 1868, but lessons were irregular and unsystematic. In 1870 he entered the junior classes of the St Petersburg Conservatory with the piano and the violin as his principal studies. He soon forsook both instruments, but remained an accomplished pianist. He transferred to Johannsen's classes in counterpoint and fugue, where he developed a lasting interest in contrapuntal techniques. Rimsky-Korsakov recalled that he and Lyadov each wrote a fugue a day on the same subject during the summer of 1878 and, according to Rimsky-Korsakov's pupil, Jāzeps Vītols, the Canons op.34 were composed during breakfast in the conservatory common room. In 1873 Musorgsky described Lyadov to Stasov as 'a new, unmistakable, original and Russian young talent'; his songs op.1 date from this time. He was admitted to Rimsky-Korsakov's composition classes but before long was expelled (together with his great friend Georgy Dütsch) for failure to attend. Lyadov was however readmitted early in 1878 to prepare his graduation composition, the final scene from Schiller's *Die Braut von Messina*, which was performed with great success on 23 May/4 June. Of the many influences on this work, the most interesting is Cui's opera *William Ratcliff* (1861–8), which had been composed with much help from Balakirev, and it is not surprising that Cui's and Stasov's reviews were complimentary.

In September 1878 Lyadov became a teacher of elementary theory at the conservatory, taking over the instruction of advanced counterpoint in 1901, and, in 1906, composition. In 1905 he resigned in protest at Rimsky-Korsakov's dismissal, but returned when Rimsky-Korsakov was reinstated; among his students at this time was the young Prokofiev, who found him likeable but dry and fastidiously pedantic. From 1885 Lyadov also taught theory at the court chapel, at a time when Balakirev was musical director and Rimsky-Korsakov his assistant. His ideas on teaching harmony formed the basis for Rimsky-Korsakov's textbook on the subject (1886); and in the late 1870s he had collaborated with Balakirev and Rimsky-Korsakov in preparing an edition of Glinka's operas.

Lyadov made numerous appearances as a conductor without holding a permanent appointment. During the 1890s he conducted many of the Imperial Russian Music Society concerts. He was associated with the Moguchaya Kuchka ('The Five') in the 1870s, tolerating Balakirev's attempts at religious indoctrination. To Balakirev's disapproval, he became a founder-member of the Belyayev circle which met on Friday evenings in the 1880s. The joint compositions resulting from these gatherings were published by Belyayev under the title *Pyatnitsï* ('Fridays'). When Belyayev founded a publishing house in 1884, Lyadov acted as one of his advisers, and he was appointed to the board of management as a trustee (with Rimsky-Korsakov and Glazunov) on Belyayev's death in January 1904. As such an important figure in this circle, he must be at least partially responsible for the tame and pallid nature of much of the music by young Russian composers published by Belyayev, although, at Glazunov's instigation, he did agree that the firm should publish Stravinsky's songs *Favn i pastushka* ('Faun and Shepherdess'), which had been rejected by Balakirev's publisher J.H. Zimmermann. In 1889 he visited Paris to hear two of his works performed at the Exposition Universelle. He undertook a journey to collect folksongs for the Imperial Geographical Society in 1897, and subsequently published several volumes of folksong arrangements. Through his marriage in 1884 he obtained a country property at Polïnovka where he spent his summers in idleness, making sporadic attempts at composition. After three years of ill-health he died there in 1914.

Lyadov's indolence was not the only factor to limit his compositional output. He felt himself to be overshadowed by Rimsky-Korsakov, referring to him as a gigantic mountain in comparison with 'present-day grains of sand and pottery shards' (Yastrebstev, 1959–60). Moreover, he was a severe self-critic who doubted both the quality of his ideas and his ability to develop them, and many of his pieces are essentially a series of variations on pre-existing motifs, such as folksongs (*Variations on a Polish Folk Theme* op.51; *Huit chants populaires russes* op.58; numerous arrangements of folk melodies); other composers' themes (*Variations on a Theme by Glinka* op.35; his contribution to *Parafrazï*); or a cantus firmus (12 Canons, 1914). Although his fascination with variation techniques and canonic devices suggests that he was interested in the problems of creating abstract musical forms on a small scale, he generally preferred to rely on a programme as the basis for his structures. He was little concerned with the expression of human emotion in music, but, like Rimsky-Korsakov, he possessed a highly developed sense of orchestral colour and gift for musical characterization in an admittedly limited sphere of fable and fantasy. The three descriptive orchestral pieces based on Russian fairy tales, *Baba-Yaga*, *Kikimora* and *Volshebnoye ozero* ('The Enchanted Lake'), are among his most successful and justly popular works. Here the lack of purposeful

harmonic rhythm (less obvious in *Baba-Yaga* and *Kikimora* because of the purely superficial but nonetheless exhilarating bustle and whirl), a serious fault in much of his music, produces a sense of ageless unreality akin to that induced by the telling of an oft-repeated and much-loved fairy tale. Other fine works include the epic piano piece (later orchestrated) *Pro starinu* ('About Olden Times'), reminiscent of Borodin's *Song of the Dark Forest*, in which Lyadov finds himself firmly in the tradition of The Five; *Idylle* in D♭ (1891), an imaginative piece that Lyapunov was soon to use as the starting-point of his study of the same name, op.11 no.7. In the late piano pieces op.64 and his last symphonic piece *Skorbnaya pesn'* ('Threnody'), he forms, together with Skryabin, a link with a new generation of composers such as Myaskovsky.

Lyadov came from a family of professional musicians notorious for their loose living and slipshod attitude to work. He broke away only partly from this pattern; his personal integrity was beyond reproach, but he never succeeded in applying himself wholeheartedly to his work for more than a short period. Although he possessed considerable technical facility, it was sheer indolence that led to his expulsion from the St Petersburg Conservatory in 1876, and his unreliability was such that Rimsky-Korsakov, an admirer of his talents, was unwilling to allow him to become director of the Free School concerts in 1880. His lifelong reputation for procrastination was confirmed for posterity when, after much dithering, he turned down Diaghilev's request to write a ballet score to be based on *The Firebird*, thus providing Stravinsky with one of his first important commissions. Yet he was held in great affection by his fellow musicians, and, although he never completed a work of any size or scope, the best of his miniatures assure for him a permanent niche in the history of Russian music.

WORKS

published in St Petersburg until 1884, thereafter in Leipzig by Belyayev

ORCHESTRAL

op.	
16	Scherzo, D, 1879–86 (1887)
19	Sel'skaya stsena u korchmï [Village Scene by the Inn], mazurka, 1887 (1887)
49	Polonaise, in memory of A.S. Pushkin, 1899 (1900)
55	Polonaise, D, for unveiling of statue of A.G. Rubinstein, 14 Nov 1902 (1903)
56	Baba-Yaga, ?1891–1904 (1905)
58	8 chants populaires russes (1906)
62	Volshebnoye ozero [The Enchanted Lake] (1909)
63	Kikimora, 1909 (1910)
65	Danse de l'Amazone, 1910 (1910)
66	Iz Apokalipsisa [From the Apocalypse], 1910–12 (1913)
67	Skorbnaya pesn' [Threnody] (Nénie) (1914)

CHORAL

28	Final scene from Schiller: *Die Braut von Messina*, 4 solo vv, chorus, orch, 1878 (1891)
—	Velichaniye V.V. Stasova [In Praise of Stasov], female vv, 1893 (1894) [for Stasov's 70th birthday]
47	Slava, female vv, 2 hps, 2 pf (8 hands) (1899)
50	Proshchal'naya pesn' vospitannits Instituta imperatritsï Marii [Farewell Song of the Pupils of the Empress Maria Institute], female vv, pf, 1900 (1900)
54	Hymn, G, mixed vv, for unveiling of statue of A.G. Rubinstein in the St Petersburg Conservatory, 1902 (1903)
60	Soeur Béatrice (Maeterlinck), incid music, 1906 (1908)
61	10 arrs. from the Obikhod, unacc. vv (?1909)
—	Yezhechasnaya molitva svyatitelya Iosafa Gorlenko [The Hourly Prayer of Prelate Iosaf Gorlenko], unacc. vv, pubd in A. Malyarevsky: *Svyatitel' Iosaf, èpiskop Belgorodskiy* [Prelate Iosaf, Bishop of Belgorod] (1910)

SONGS

1	Chetïre romansa [4 Songs], 1873–4 (1876): Ne poy, krasavitsa, pri mne [Do not sing in my presence, my beauty] (Pushkin); Pesnya [Song] (A.K. Tolstoy); Iz Geine (Iz slyoz moikh) [From my Tears]; Vot bednaya ch'ya-to mogila [There is some poor person's grave] (Maykov)
14	Shest' detskikh pesen na narodnïye slova [6 Children's Songs with Folk Texts], i, 1887 (1887): Zaychik [Little Hare]; Soroka [Magpie]; Zabavnaya (Skok-poskok) [Amusing Song: Galloping Pace]; Petushok [Cockerel]; Zabavnaya (Kosoy bes) [Amusing Song: Cross-eyed Demon]; Kolïbel'naya [Lullaby]
18	Shest' detskikh pesen na narodnïye slova [6 Children's Songs with Folk Texts], ii, 1887 (1887): Ladushki [Beloved Ones]; Zhil-bïl zhuravl' da ovtsa [Once upon a time there lived a crane and sheep]; Kolïbel'naya (U kota, kota) [Lullaby: Next to the Cat]; Zabavnaya (Bom, bom, bom) [Amusing Song]; Dozhdik, dozhdik! na dyadinu pshenitsu [A Shower, a Shower! on Uncle's Wheat]; Zabavnaya (Galki, voronï) [Amusing Song: Jackdaws, Crows]
22	Shest' detskikh pesen na narodnïye slova [6 Children's Songs with Folk Texts], iii (1890): Kolïbel'naya (Kotinka-kotok) [Lullaby: Little Cat]; Zabavnaya (Mikayla Kortoma) [Amusing Song]; Oklikaniye dozhdya [The Call for Rain]; Moroz [Frost]; Zabavnaya (Luchina) [Amusing Song: Torch]; Zabavnaya (Tatarki) [Amusing Song: Tatar Women]

PIANO

2	Biryul'ki [Spillikins], 14 pieces, 1876 (1876)
3	Shest' p'yes [6 Pieces], 1876–7 (1877): Prelude, D; Giga, F; Fugue, g; 3 mazurkas, G, B, C
4	Arabesques, 4 pieces, 1878 (1879): c♯, A, B♭, E
5	Etude, A♭, 1881 (1881)
6	Impromptu, D, 1881 (1881)
7	Two Intermezzos, D, F, 1881 (1882)
8	Two Intermezzos, B♭ (1883), no.1 orchd 1902 (1903)
9	Dve p'yesï [2 Pieces], 1883 (1884): Waltz, f♯; Mazurka, A♭
10	Tri p'yesï [3 Pieces], 1884 (1885): Prelude, D♭; 2 Mazurkas, C, D
11	Tri p'yesï [3 Pieces], 1885 (1886): Prelude, b; Mazurka in the Dorian mode, a; Mazurka, f♯
12	Etude, E (1886)
13	Four Preludes, G, B♭, A, f♯ (1887)
15	Two Mazurkas, A, d (1887)
17	Two Bagatelles, 1887 (1887): Stradaniye (La douleur), b♭; Pastoral, b
20	Novinka [Novelette], c, *c*1882–9 (1889)
21	Pro starinu [About Olden Times], ballade, D, 1889 (1890), orchd 1906 as op.21b (1906)
23	Na luzhayke (Nabrosok) [In the Glade: Sketch], F, 1890 (1890)
24	Dve p'yesï [2 Pieces] (1890): Prelude, E; Kolïbel'naya (Berceuse), G♭
25	Idylle, D♭ (1891)
26	Malenkiy val's [Little Waltz], G, 1891 (1891)
27	Three Preludes, E♭, B, G♭ (1891)
29	Kukolki [Marionettes], E♭, 1892 (1892)
30	Bagatelle, D♭, 1889 (1889)
31	Dve p'yesï [2 Pieces] (1893): Derevenskaya mazurka (Mazurka rustique), G; Prelude, b♭
32	Muzïkal'naya tabakerka [A Musical Snuffbox] (1893)
33	Tri p'yesï [3 Pieces]: Prelude on a Russian Theme, A♭, 1889 (1914); Grotesque, C, 1889 (1914); Pastoral, F, 1889 (1889, 1914)
34	Three Canons, G, c, F, 1894 (1894)
35	Variations on a Theme by Glinka, B♭, 1894 (1895)
36	Three Preludes, F♯, b♭, G (1895)
37	Etude, F, 1895 (1895)
38	Mazurka, F, 1895 (1896)
39	Four Preludes, A♭, c, B, f♯, 1895 (1896)
40	Etude, c♯, and 3 Preludes, C, d, D♭ (1897)
41	Two Fugues, f♯, D, 1896 (1897)

42	Two Preludes, B♭, B, and Mazurka on Polish themes, A, 1898 (1898)
44	Barcarolle, F♯ (1898)
46	Four Preludes, B♭, g, G, e (1899)
48	Etude, A, and Canzonetta, B♭ (1899)
51	Variations on a Polish Folk Theme, A♭ (1901)
52	Tri baletnïkh nomera [3 Ballet Numbers], E♭, C, A (1901)
53	Three Bagatelles, B, G, A♭ (1903)
57	Tri p'yesï [3 Pieces], *c*1900–05 (1906): Prelude, D♭; Waltz, E; Mazurka, f
64	Chetïre p'yesï [4 Pieces], 1909–10 (1910): Grimace, C; Sumrak (Ténèbres), c; Iskusheniye (Temptation), E; Vospominaniye (Réminiscence), B
—	Prelude-Pastoral, 1894 (1894)
—	Twenty-four Canons (1898)
—	Sarabande, g (1899)
—	Tanets komara [Gnat's Dance], Russ. song, pubd in *Galchonok* (1911), no.2
—	Fugue on La–do–fa, 1913, facs. in 'Pis'ma A.K. Lyadova k A.V. Ossovskomu', *RMG* (1916), no.11
—	Twelve Canons on a cantus firmus (1914)

COLLABORATIONS

Parafrazï, pf (3 hands), collab. Borodin, Cui, Rimsky-Korsakov, Shcherbachov; excerpts, 1878 (1879)

Scherzo from B–la–f, str qt, 1886 (1887) [other movts by Rimsky-Korsakov, Borodin, Glazunov]

Velichaniye [Song of Praise], from Imeninï, 1887 (1899) [other movts by Glazunov, Rimsky-Korsakov]

Slavleniya [Celebration] (Les fanfares), brass, perc, 22 Dec 1890 (1891), collab. Glazunov [for Rimsky-Korsakov's 25th jubilee]

Shutka [Joke], quadrille, pf 4 hands (1891), collab. N. Artsïbushev, J. Vītols, N. Sokolov, Glazunov, Rimsky-Korsakov

Slavleniya [Celebration], pf 4 hands (1894), collab. F. Blumenfeld, Glazunov [for Stasov]

Pyatnitsï [Fridays] (1899), collab. Sokolov, Glazunov, Rimsky-Korsakov, Kopïlov [incl. Lyadov's Polonaise, Sarabande, Fugue, Mazurka (all for str qt), Trio]

Variations on a Folk Theme, str qt (1899), collab. Artsïbushev, Skyrabin, Glazunov, Rimsky-Korsakov, Vītols, Blumenfeld, Sokolov, V. Ewald, A. Winkler

Variations on a Russian Theme from Abramïchev's Collection (1900), collab. Rimsky-Korsakov, Winkler, Blumenfeld, Sokolov, Vītols, Glazunov

Variations on a Russian Theme, orch, 1901 (1903), collab. Artsïbushev, Vītols, Sokolov, Glazunov, Rimsky-Korsakov

Cantata in Memory of M. Antokol'sky, T, chorus, orch, 1902 (1906), collab. Glazunov

OTHER WORKS

Zoryushka, op, sketched before 1909, material used in opp.62–3 (see 'Orchestral')

Leyla i Adelay, ballet, *c*1912–13, inc.

Muzïkal'naya tabakerka [A Musical Snuffbox], arr. picc, 2 fl, 3 cl, hp, bells, op.32 (1897), orig. for pf

Allegro, str qt, not pubd

ORCHESTRATIONS, ARRANGEMENTS

Excerpts from Borodin: Polovtsian Dances from Prince Igor, 1879; part of 2nd version of Cui: Kavkazskiy plennik [Prisoner of the Caucasus], 1881–2; Dargomïzhsky: Paladin, song, 1881, ?lost; excerpts from Musorgsky: Sorochinskaya yarmarka [Sorochintsy Fair], 1881–1903 (1904): Vstupleniye [Introduction], Dumka Parubka, Pesnya Khivrï [Khivra's Song], Gopak

Shcherbachov: Serenade for Orchestra op.23, ?1893 (1894) [pubd anon.]

A.G. Rubinstein: 5 pieces from op.93, orch, *c*1899 (1899): Sarabande, Serenade, Minuet, U okna [By the Window], Kolïbel'naya [Lullaby]

Schumann: Carnaval, 1902 (1956), collab. Arensky, Winkler, Vītols, Glazunov, others

Tchaikovsky: V tyomnom ade [In Dark Hell], song, orch, op.16 no.6, 1909 (1910)

Many folksong arrs., (1v, pf)/choir, incl. opp.43, 45, 59, some ed. B.V. Budrin: *Russkiye narodnïye pesni v obrabotke A. Lyadova* (Moscow, 1965)

JENNIFER SPENCER/EDWARD GARDEN

Lyapunov [Liapunov], **Sergey Mikhaylovich** (*b* Yaroslavl, 18/30 Nov 1859; *d* Paris, 8 Nov 1924). Russian composer, pianist and conductor. His father, a mathematician and astronomer, was head of the observatory near Yaroslavl', but died when Sergey was about eight. In 1870 he and his mother moved to Balakirev's home town, Nizhniy Novgorod, where he attended the *gimnaziya* (grammar school) and, from its foundation in 1873, the classes of the local branch of the Russian Musical Society, whose first director was V.Yu. Villoing (nephew of A.I. Villoing, who had taught the Rubinstein brothers). Lyapunov's mother was an excellent pianist, and Lyapunov's early piano lessons from her were of far more use to him than Vasily Villoing's; the latter, unlike his uncle, was primarily a violinist, and allowed Lyapunov to develop bad technical habits which had to be eradicated when, on the advice of Nikolay Rubinstein, he enrolled in the Moscow Conservatory in 1878. His piano teachers included Klindworth, who had been a pupil of Liszt. As far as composition was concerned, he was just in time to attend the last classes given by Tchaikovsky before his resignation from the conservatory. Tchaikovsky's classes were taken over by Nikolay Gubert, but Lyapunov's most influential lessons were from Sergey Taneyev. He graduated in both composition and piano in 1883, and first met Balakirev at the end of that year. He moved permanently to St Petersburg in 1885, and became the most important

member of Balakirev's latterday circle. Balakirev and Lyapunov thought highly of one another, and Balakirev encouraged the shy and self-effacing young man, urging him to take composition seriously and ceaselessly trying to get his works published, achieving only occasional success until his highly satisfactory arrangement with the publisher J.H. Zimmermann was established in 1899.

Meanwhile, in 1893, Lyapunov, with Balakirev and Lyadov, was commissioned by the Imperial Geographical Society to collect folksongs from the regions of Vologda, Vyatka and Kostroma, to the north-east of Moscow. They collected nearly 300 songs, which were published by the society in 1899; some were also published in arrangements by Lyapunov with piano accompaniment. He did not have the experience or personality to succeed Balakirev on his retirement in 1894 as director of music at the imperial chapel – Balakirev recommended Arensky for the post – but instead he succeeded Rimsky-Korsakov as assistant director that year; he resigned in 1902 because of his dislike of the increasingly alcoholic Arensky, accepting the post of inspector at the Yelena Institute (until 1910). He became a director of Balakirev's Free School of Music in 1905, later becoming its head (1908–11). After Balakirev's death in 1910, Lyapunov allowed himself to be persuaded to teach theory and piano at the St Petersburg Conservatory (until 1917), and in 1919 he became a lecturer at the new State Institute of Art. But the stormy times in which he lived had taken their toll, and, having emigrated to Paris in 1923 and directed a school of music for Russian émigrés there, he succumbed to a heart attack the following year.

Before World War I he had made several tours in Germany and Austria as a conductor and pianist, and the critic and musicologist M.-D. Calvocoressi had helped his music to gain a foothold in Paris (where his First Piano Concerto was performed by Josef Hofmann in 1907) as well as translating some of his songs into French and English. But for the war, he might have enjoyed an Indian summer of composition such as Balakirev had experienced. As it was, some of the compositions after 1914 show a definite falling off in comparison with the rich vein he had struck between 1910 and 1914. Lyapunov prepared for publication Dargomïzhsky's *Rusalka* and, with Balakirev, the complete works of Glinka. He edited Balakirev's correspondence with both Tchaikovsky and Rimsky-Korsakov, and wrote a series of articles on Balakirev.

The second of Lyapunov's three daughters, Anastasiya (A.S. Lyapunova, 1903–73), published articles on her father and Balakirev as well as an edition of the correspondence between Balakirev and Vladimir Stasov. She was the music specialist in the archives division of the library in which Stasov had worked for many years in St Petersburg (now *RUS-SPsc*). The manuscripts and documents relating to her father that she gave to the library are to be found in Fonds 451 and 1141; some documents, however, were placed in a special archive, to remain closed until 25 years after Anastasiya's death. Lyapunov's correspondence is expected to be released for eventual publication.

Lyapunov was born between the members of The Five together with Tchaikovsky, on the one hand, and the radical composers of the later period, including Skryabin, Stravinsky, Prokofiev and Shostakovich, on the other. The difficulty for Lyapunov and other composers of what may be called this interim period was whether or not they should continue with the nationalist or Tchaikovskian idiom; and, if not, what line they should take. Many followed a bland path, safe rather than sorry.

But Lyapunov, as we have seen, chose Balakirev as his mentor, and when he had moved to St Petersburg in the mid-1880s he was put to work on a symphony, just as Rimsky-Korsakov and Borodin had been two decades earlier. The resulting work was as inferior to Borodin's First Symphony as it was superior to Rimsky's. Lyapunov's smaller-scale orchestral works such as the Solemn Overture on Russian Themes and the Ballade for orchestra are more successful, but even here the considerable influence of Balakirev is all too apparent in the way the material is worked, the structure and the orchestration. Lyapunov's talent did not lie in that direction, and even with Balakirev's assistance he was unable to stitch over the seams between the sections. Yet these and other orchestral works written during Balakirev's lifetime all have a certain quality which is contrasted by the Second Symphony (1917), a work of monumental proportions that reflects the troubled times in which it was written. It perhaps reveals the path he might have taken, as the former pupil of Taneyev at the Moscow Conservatory, had not Balakirev taken him firmly in hand. In his concerted works, too, he was unable to sustain a prolonged movement convincingly, though his First Piano Concerto did receive a Belyayev Glinka Prize in 1904 (together with Rachmaninoff's Second Concerto, Arensky's Piano Trio in D minor, Skryabin's Third and Fourth Piano Sonatas and Taneyev's C minor symphony). Lyapunov's Second Piano Concerto has little that is new to say, and his Rhapsody on Ukrainian Themes for piano and orchestra, dedicated to Busoni, derives much from Rimsky-Korsakov, starting in a similar way to the latter's Piano Concerto, and in the same key of F♯ minor.

It is in his compositions for piano, and to a lesser extent his songs, that Lyapunov comes into his own. His masterpiece is the op.11 group of 12 transcendental studies dedicated to the memory of Liszt, a project that took eight years (1897–1905). Like most of Liszt's, these studies are given French titles, their Russian titles being translations. They complement Liszt's, which ascend through the flat keys, while Lyapunov's descend through the sharp keys, starting with F♯ major and finishing with E minor. Lisztian piano techniques are used throughout, and a number of the studies have their equivalents in Liszt. For example, *Tempête* has much in common with Liszt's Etude in F minor, as has Lyapunov's *Rondes des sylphes* with *Feux follets*. More often the connections are more tenuous, as is the case with Liszt's *Paysage* and Lyapunov's *Idylle*, whose origins are to be found not so much in Liszt as in Lyadov's *Idylle* (1891), op.25, and *Prelude-Pastoral*, without opus number (1894). Nevertheless, *Idylle* is a charmingly lyrical piece in its own right, and demonstrates Lyapunov's characteristic style to great advantage. The introduction is integrated into the piece with skill, and one version of it includes a felicitous false relation (ex.1).

Besides the obvious influence of Balakirev in *Lesghinka*, subtitled 'style Balakirew', where comparison with Balakirev's *Islamey*(1869) is inescapable, the magnificent *Térek* has a Balakirevian thrust while maintaining its individuality; it demonstrates that Lyapunov was capable of controlling strict and succinct sonata form in a relatively

Ex.1 *Idylle* op.11 no.7, bars 19–21

short piece. Another influence to be found in this G♯ minor study is Borodin's song *More* ('The Sea') (1870), like *Térek* a stormy piece and also in G♯ minor, written as it were in the wake of Balakirev's *Islamey*. Only one authentic folksong is used in the set, *Iz-za lesu, lesu tyomnogo* ('Out of the Forest, the Dark Forest'), collected by Lyapunov on his 1893 expedition and employed as the main theme in *Chant épique*. The second theme of this study is almost more folklike than the genuine article, although it was composed by Lyapunov. (Borodin similarly combined a real and a pseudo-folksong in the slow movement of his First String Quartet, which Lyapunov much admired.) Other Russian influences include the use of the *idée fixe* that represents the eponymous hero in Rimsky-Korsakov's *Antar* Symphony as the second theme in *Tempête*. But all these derivations and influences are fully absorbed and never swamp Lyapunov's originality, with only the last study falling short of the high standard of inspiration to be found in the others.

Besides many short piano pieces, Lyapunov wrote some more extended works of distinction such as the single-movement Piano Sonata op.27. This is modelled structurally on Liszt's Sonata and, as had been the case with the studies, owes much to his keyboard style as well; nevertheless, like the studies, it also contains original material of a high order, and the piano writing, though very difficult in places (for example in the scherzo section), is never awkward. After Balakirev's death, Lyapunov, having completed the unfinished finale of that composer's E♭ Piano Concerto, composed some of his best music. The Scherzo in B♭ minor and the magnificent Variations on a Russian Theme op.49, which culminate in a superb fugue, are good examples, but perhaps the finest of all is the Prelude and Fugue in B♭ minor op.58 (1913). Although the fugue may have had as its starting-point the first subject of the finale of Borodin's First Quartet, which contains the elements of a fugal exposition, it is nonetheless a wholly original composition. The momentum in the exposition, and elsewhere in the principal entries of the subject and answer, is inexorable; relative repose is achieved only during the episodes, some of which contain examples of the characteristic Lyapunov false relation. This fugue is undoubtedly one of the finest in the late Romantic piano repertory.

Lyapunov had already demonstrated his contrapuntal dexterity, for example in the version of the Russian Orthodox Church theme heard in canon in the third transcendental study, *Carillon*, in the upper register of the piano. But his finest canon is found in the *Prélude-pastorale* for organ, written in 1913 at the invitation of a French publisher for inclusion in a volume of pieces by many composers. The extraordinary chordal canon with which the work starts is matched by other contrapuntal devices, but these are never intrusive; curiously for an Orthodox Christian with no experience of the organ, Lyapunov cannot be faulted in his writing for the instrument, and his piece is among the best of the volume.

Even in Russia, Lyapunov's songs have failed to achieve the success they deserve. His setting of *Gornïye vershinï* ('The Mountain Peaks') op.52 no.3 is masterly. It was written two years after Balakirev's death; the words are taken from a poem by that composer's favourite poet, Lermontov. The first song in the group is entitled *Pamyati M.A. Balakireva* ('In Memory of Balakirev'); but there is little if any influence of the older composer in *Gornïye vershinï*. Perhaps it was easier to have Balakirev looking over his shoulder spiritually rather than corporeally. The song contains a good example of a typical false relation (bar 17). An interesting earlier song is *Melodiya s beregov Ganga* ('Melody from the Shores of the Ganges') op.32 no.3, which is as fine as anything Rimsky-Korsakov wrote in 'oriental' vein. More passionate is *Speshi, moy yakhont* ('Hurry, my Ruby'), with words by Golenishchev-Kutuzov, the third of the seven songs that constitute op.43 (1911). This is a gem of a song which encapsulates Lyapunov's gift for late Romantic lyricism, quite different from that of Rachmaninoff.

This ripe and piquant lyrical gift, together with Lyapunov's contrapuntal dexterity and the complete mastery in writing for the keyboard which can only be achieved by a good pianist, combine to earn his compositions a small but important place in the repertory of Russian piano music and songs with piano accompaniment. His orchestral pieces, though well orchestrated in the Balakirev manner, are less successful and are sometimes shortbreathed.

WORKS

ORCHESTRAL

op.	
2	Ballade, c♯, 1883, rev. 1894–6 (Berlin, 1898)
4	Piano Concerto no.1, e♭, 1890 (Berlin, c1896)
7	Solemn Overture on Russian Themes, C, 1896 (Moscow, 1899)
12	Symphony no.1, b, 1887 (Leipzig, 1901)
16	Polonaise, D♭, 1902 (Leipzig, 1903)
28	Rhapsody on Ukrainian Themes, f♯, pf, orch, 1907 (Leipzig, 1908)
37	Zelazowa Wola, sym. poem, b, 1909 (Leipzig, 1909)
38	Piano Concerto no.2, E, 1909 (Leipzig, 1910)
53	Hashish, sym. poem after A. Golenishchev-Kutuzov, b, 1913 (Leipzig, 1913)
61	Violin Concerto, d, 1915, rev. 1921
—	orchestration of Balakirev: Islamey, 1916
66	Symphony no.2, b♭, 1917

PIANO

1	Three Pieces, D♭, e♭, A♭, 1887–8 (St Petersburg, 1889)
3	Rêverie du soir, b, 1880, rev. 1903 (Leipzig, 1903)
5	Impromptu, A♭, 1894 (Berlin, 1896)
6	Seven Preludes, B♭, G♭, e♭, B, A♭, f, D♭, 1895 (Berlin, 1896)
8	Nocturne, D♭, 1898 (Leipzig, 1898)
9	Two Mazurkas, f♯, D♭, 1898 (Leipzig, 1898)
11	Douze études d'exécution transcendante (Leipzig, 1900–05): 1 Berceuse, F♯, 1897–8, 2 Rondes des fantômes, d♯, 1897–8, 3 Carillon, B, 1901, 4 Térek, g♯, 1900, 5 Nuit d'été, E, 1900, 6 Tempête, c♯, 1897, 7 Idylle, A, 1901, orchd 1908, 8 Chant épique, f♯, 1903, 9 Harpes éoliennes, D, 1902, 10 Lesghinka, b, 1903, 11 Rondes des sylphes, G, 1905, 12 Elégie en mémoire de François Liszt, e, 1905
17	Mazurka no.3, e♭, 1902 (Leipzig, 1903)
18	Novelette, C, 1903 (Leipzig, 1904)
19	Mazurka no.4, A♭, 1903 (Leipzig, 1904)
20	Valse pensive, D♭, 1903 (Leipzig, 1904)

21 Mazurka no.5, b♭, 1903 (Leipzig, 1904)
22 Chant du crépuscule, b♭, 1904 (Leipzig, 1904)
23 Valse-impromptu, D, 1905 (Leipzig, 1905)
24 Mazurka no.6, G, 1905 (Leipzig, 1906)
25 Tarantella, b♭, 1906 (Leipzig, 1906)
26 Chant d'automne, f♯, 1906 (Leipzig, 1906)
27 Sonata, f, 1906–8 (Leipzig, 1908)
29 Valse-impromptu no.2, G♭, 1908 (Leipzig, 1908)
31 Mazurka no.7, g♯, 1908 (Leipzig, 1908)
33 arrangements of 2 numbers from Glinka: Ruslan and Lyudmila (Kolïbel'naya, Bitva i smert' Chernomora), 1907–8 (Moscow, *c*1908)
34 Humoresque, G♭, 1909 (Leipzig, 1909)
35 [Six] Divertissements, 1909 (Leipzig, 1909): Loup-garou (Serïy volk), E, Le vautor: jeu d'enfants (Igra v korshunï), c♯, Ronde des enfants (Detskiy khorovod), F♯, Colin-maillard (Slepoy kozyol), b♭, Chansonnette enfantine (Detskaya pesenka), E, Jeu de course (Gorelki), b
36 Mazurka no.8, g, 1909 (Leipzig, 1909)
40 Trois morceaux de moyenne difficulté, 1910 (Leipzig, 1910): Prélude, D♭, Elégie, f♯, Humoresque, F
41 [Quatre] Fêtes de Noël (Svyatki), 1910 (Leipzig, 1910): Nuit de Noël (Rozhdestvenskaya noch'), d, Cortège des mages (Shestviye volkhvov), E♭, Chanteurs de noëls (Slavil'shchiki), A♭, Chant de Noël (Kolyada), g♯/A♭
45 Scherzo, b♭, 1911 (Leipzig, 1911)
46 Barcarolle, g♯, 1911 (Leipzig, 1911)
49 Variations on a Russian Theme, d♯, 1912 (Leipzig, 1912)
55 Grande polonaise de concert, c, 1913 (Leipzig, 1913)
57 Trois morceaux, 1913 (Leipzig, 1913): Petite fugue (Malen'kaya fuga), c♯, Chant du printemps (Vesennyaya pesnya), A, Près d'une fontaine (U fontana), étude, c♯
58 Prelude and Fugue, b♭, 1913 (Leipzig, 1913)
59 Six morceaux faciles, 1914 (Leipzig, 1919): Jeu de paumes (Igra v myach), D, Berceuse d'une poupée (Kolïbel'naya kukla), c, Sur une escarpolette (Na kachelyakh), G, A cheval sur un bâton (Verkhom na palochke), B♭, Conte de la bonne (Nyanina skazka), e, Ramage des enfants (Detskaya boltovnya), D
60 Variations on a Georgian Theme, A, 1914–15 (Moscow, 1915)
65 Sonatina, D♭, 1917 (Moscow, 1922)
70 Valse-impromptu no.3, E, 1919 (Moscow, 1922)
— Six Very Easy Pieces, 1918–19 (Moscow, 1931)
— Toccata and Fugue, C, 1920 (Moscow, 1949)
— Canon, e, 1923 (Moscow, 1949)
— Allegretto scherzando, G, 1923 (Moscow, 1949)
— Two Preludes, D♭, G, 1923 (Moscow, 1949)

VOCAL

for solo voice and piano unless otherwise stated

10 Russkiye narodïye pesni [30 Russian Folksongs], arr. 1901 (Leipzig, 1901)
13 Tridtsat'pyat' pesen russkogo naroda [35 Russian Folksongs], arr. before 1897
14 Romansï [4 Songs], *c*1900 (Leipzig, *c*1901): Sladko dïshit noch' levkoyem [The night smells sweet of gilly-flower] (after H. Heine), F♯, Posledniye tsvetï [The Last Flowers] (A.S. Pushkin), b♭, Nachtstück (A. Khomyakov), D♭, Vostochnïy romans [Eastern Romance] (Khomyakov), F♯
15 Dve russkiye pesni [2 Russian Songs], mixed vv, *c*1900
30 Romansï [4 Songs], 1908 (Leipzig, *c*1908): Tri klyucha [Three Keys] (Pushkin), e♭, Sulamita (P. Burturlin), c♯, Zabelela siren' [The White Lilac] (Burturlin), e, Portret [Portrait] (A. Maykov, after Heine), d
32 Romansï [4 Songs], 1908 (Leipzig, *c*1909): Zvyozdï [Stars] (M.Yu. Lermontov), g♯/A♭, V stepyakh [In the Steppes] (Maykov), A, Melodiya s beregov Ganga [Melody from the Shores of the Ganges] (Maykov), f♯, Dub [The Oak] (S. Makovsky), e
39 Romansï [3 Songs], 1909 (Leipzig, 1910): Utro [Morning] (A. Shenshin), E, Priliv [The Flood] (V. Velichko), B♭, Tayna [The Secret] (Shenshin), D
42 Romansï [3 Songs] (A. Kol'tsov), 1910–11 (Leipzig, 1911): Tak i rvyotsya dusha [How my soul is yearning], b, Mnogo yest' u menya teremov i sadov [I have many towers and gardens], F♯, Ne vesna togda zhizn'yu veyala [Not spring then breathed with life], b
43 Romansï i pesni [7 Songs], 1911 (Leipzig, 1911): Pesnya razboynika [Brigand's Song] (Kol'tsov), g♯, Tsarskosel'skaya statuya [The Statue at Tsarskoye Selo] (Pushkin), g♯, Speshi, moy yakhont [Hurry, my Ruby] (A. Golenishchev-Kutuzov), B♭, Drobitsya i pleshchet [It smashes and splashes] (A. Tolstoy), E♭, Zima [Winter] (Ye. Baratïnsky) F, Menya tï v tolpe ne uznala [You didn't recognize me in the crowd] (Golenishchev-Kutuzov), c♯, Bushuyet burya [The storm is raging] (Golenishchev-Kutuzov), a
44 Romansï [3 Songs], 1911 (Leipzig, 1911): Na lagunakh Venetsii [On the lagoons of Venice] (Golenishchev-Kutuzov), D, Lotos [Lotus] (M. Mikhaylov, after Heine), B, Vopros [Question] (Golenishchev-Kutuzov), f
47 Five Quartets, male vv, 1912
48 Five Quartets, male vv, 1912
50 Romansï [4 Songs] (Golenishchev-Kutuzov), 1912 (Leipzig, 1912): Noch' [Night], D♭, Letnyaya noch' [Summer night], E, Barkarola, F♯, Umolkli sela [The villages fell silent], g♯
51 Romansï [4 Songs], 1912 (Leipzig, 1912): Podlunnaya pesenka [Moonlight Song] (A. Korinfsky), B♭, Ditya moyo, vzglyani [Look, my child] (Golenishchev-Kutuzov), G, Slovno golos list'yev [As if the voice of the leaves] (Golenishchev-Kutuzov), D♭, Lyublyu ya, milaya [I love you, darling] (Golenishchev-Kutuzov), F
52 Romansï [4 Songs], 1912 (Leipzig, 1913): Pamyati M.A. Balakireva [In Memory of Balakirev] (Golenishchev-Kutuzov), f♯, Tishina [Silence] (Golenishchev-Kutuzov), C, Gornïye vershinï [The Mountain Peaks] (A. Lermontov), C, Son [Sleep] (A. Pleshcheyev), e♭
56 Romansï [4 Songs], 1913 (Leipzig, 1913): Vershinï derev'yev [The Tops of the Trees] (A. Smirnov), d♯, V tishine vecherney [In the evening silence] (Afanas'yev), E, Mne snilos' [I dreamt] (Nadson), D♭, Nad spokoynoy kholodnoy rekoy [On the calm, cold river] (Sushkova), e
62 Sacred works and arrs., mixed vv, 1915
64 Psalm cxl, C, 1v, org, hp, 1916, rev. 1923
68 Vechernyaya pesn' [Evening Song] (cant., Khomyakov), T, chorus, orch, 1920
69 Chetïre romansa [4 Songs] (Khomyakov), ?1919: Russkaya pesnya [Russian Song], b♭, Ėlegiya, D♭, K detyam [To the children], A, Kogda glyazhu [When I look], D
71 Romansï [4 Songs], 1919–20: Shotlandskaya pesn' [Scottish Song] (Pushkin), b, Moy golos [My Voice] (Pushkin), F♯, V tumane utrennem [In the morning mist] (V. Solov'yov), c♯, Noch' [Night] (I. Aksakov), B

EDWARD GARDEN

Lyatoshyns'ky, Borys Mykolayovych (*b* Zhytomyr, 22 Dec/3 January 1895; *d* Kiev, 15 April 1968). Ukrainian composer. In 1913 he entered the law faculty of Kiev University and started studying composition with Glière, first privately, then at the newly opened Kiev Conservatory. He taught at this institution for the rest of his life (1919–68, as professor from 1935). He directed the Ukrainian Association of Contemporary Music (1922–5). He later taught orchestration at the Moscow Conservatory (1935–7 and 1943–4); he was also president (1939–41) and then a board member of the Ukrainian Composers' Union. After World War II he travelled extensively, often as a member of international competition juries including that of the Tchaikovsky Competition in Moscow (1958, 1962), the Belgian Quartet Competition in Liège (1956, 1959, 1962) and the Lysenko Competition in Kiev (1965, as president). Awards made to him included two state prizes (1946, 1952), the Polish prize awarded 'for the strengthening of Russo-Polish friendship' (1963) and, posthumously, the Shevchenko Prize (1971).

During the decade following World War I Lyatoshyns'ky initiated the modern musical movement in Ukraine with a series of intense and highly expressive works which, in an individual manner, reflected his central preoccupation with expressionism. During the 1920s and early 30s he composed most of his major chamber works and completed the first Ukrainian music-drama *Zolotyi obruch* ('The Golden Ring', 1929). By the time he composed the Violin Sonata in 1926, the identifying features of his style were firmly established. The music often begins as if suddenly startled out of deep slumber. Tensely, and with hints of apprehension, the themes unfold gradually, propelled by insistent rhythms and extreme dynamics. His melodies are essentially introspective: they are woven out of short phrases and though imbued with often Skryabinesque Romantic ecstasy they frequently seem incomplete. The essential character of the works emerges by the placing of motifs on rhythmic and dynamic waves that cajole the music to open up and affirm itself in defence. The basic method is thus expressionistic, yet this aesthetic stance is complicated by attempts to integrate folk music into the language, something first tried in the *Overture on Four Ukrainian Folk Themes* (1926). The unity of thematic and structural transformations, and the laconic but restless sensibility stimulating continual development both make the Violin Sonata unique in the violin repertory and also one of the most significant works to come out of the Soviet Union in the 1920s. In the Violin sonata and many of the other large-scale works of the 1920s, Lyatoshyns'ky came close to Berg by writing music of fervent emotion while finding solutions to the complex problems of achieving unity in a sonata that utilizes a volatile atonal idiom. A set number of chords and melismas – often stated at the beginning of a piece – serve as a paradigm for the work as a whole. The 3-movement Violin Sonata unfolds with the ingenuity of the triadic dialectical development – from the thesis of the first movement (a dramatic poem) to the antithesis of the second (a lyric verse) to a synthesis in the finale (an epic narrative). Although each movement has its own scenario and its own clashes and dependencies, no single movement is, in itself, complete. Each ending is immediately stated as the next beginning: the final phrase of the first movement (a retrograde of the violin's opening three notes) is also the opening of the second movement, while the last movement begins decisively with the last questioning chord of the second movement. The structural processes revolve around the continual 'melodification' of two chords: G major 7th and B♭ major 7th. But as in Berg's Violin Concerto, where the first eight notes of the series could be described as a G minor-major 7th and an A minor-major 7th, these chords only act as an intermediary between atonality and tonality. They also supply the intonational background from and into which all melodic, harmonic and rhythmic motives emerge and are resubmerged. *Zolotyi obruch* saw his style brought into further conflict by a greater reliance on folk motives. In the monologue of Zakhar Berkut, Lyatoshyns'ky employs an old Galician folksong as a cantus firmus (this same melody was used again in the Third Symphony of 1951) and this music brilliantly demonstrates his ability to unify and transform diverse musical structures – in this case the diatonic naiveté of the folk idiom and the volatile, atonal language of expressionism. The 1930s saw his style undergoing further refinement and the production of one genuine masterpiece, the Second Symphony (1935–6).

In his first mature works (of 1919–36) Lyatoshyns'ky had been influenced by the then prevalent Romantic vitalism, a loosely defined Ukrainian artistic current that shared with other modernist movements of the day an exuberant belief in the dawning of a new age; this aesthetic was seen as an alternative to the primitivization of the arts in the USSR which started in the mid-1920s and which by the early 1930s was enshrined in the dogma of socialist realism. The opera *Shchors*, essentially a commission from Stalin, was a stylistic disaster. In works such as the Ukrainian Quintet, the expressionism which was natural to Lyatoshyns'ky was curdled by socialist realism and naked folklorism. This metamorphosed style is more successful in the Second Piano Trio (1942), where the escape into the picturesque saves the work from the pathos of attempted heroics. Like almost all the works composed during World War II, the trio relies heavily on the melodic, harmonic and rhythmic peculiarities of Ukrainian folk music. However, as with earlier compositions, the mood swings are extreme, verging on the surreal while insistent rhythms seethe as if in constant flux. The culmination of this style can be seen in the epic Third Symphony in which the two sides, the expressionistic and the national, are most successfully integrated. The work was severely criticized at its première and Lyatoshyns'ky was forced to revise it. But in the last decade of his life, spurred by the emergence of a talented group of young Ukrainian composers, many of them his students (Hodzyats'ky, Hrabovs'ky, Huba, Sil'vestrov) he returned to his first style in such works as the Fourth Symphony, the *Polish Suite* (1961) and the phenomenal cycles for unaccompanied chorus. Although Lyatoshyns'ky's originality is not always conspicuous, it becomes abundantly apparent on repeated hearings, as does his intellectual range and rigour. His style – and especially the harmonic language employed in works of the 1920s – bears comparison to that of Kodály and Nielsen as well as that of Berg and Hindemith. Like his slightly younger colleague Shostakovich, he never totally abandoned tonality no matter how much he expanded its meaning. Ukrainian music, stifled by the repressive policies of the Russian tsarist regimes, had not developed a talent of comparable magnitude since Dmytro Bortnyans'ky who died in 1825. Alongside the sculptor Archipenko and the film-maker Dovzhenko, Lyatoshyns'ky is one of just three Ukrainian artists of the first half of the 20th century to have received international recognition.

WORKS

Stage: Zolotyi obruch [The Golden Ring] (music drama, 4, Ya. Mamontov, after I. Franko), op.23, 1929, Odessa, Kiev, Khar'kiv, 1930; rev. version L'viv, 1970; Shchors (op, 5, I. Kochergi, M. Ryl's'ky), op.37, 1937; Kiev, 14 Sept 1938, rev. as Polkovodets [The Commander], Kiev, 18 Feb 1970

Orch: Sym. no.1, A, op.2, 1918–19; Fantasticheskiy marsh, 1920; Uvertyura na chotyry ukraïns'ky narodny temy [Ov. on 4 Ukrainian Folk Themes], op.20, 1926; Zolotyi obruch, suite, 1929; 3 marches, ww, 1933–6; Sym. no.2, op.26, 1935–6, rev. 1940; Poėma vossoyedineniya [Poem of Reunification], op.49, 1949–50; Sym. no.3, b, op.50, 1951, rev. 1954; Taras Shevchenko, suite, op.51, 1952 [from film score]; Slavyanskiy kontsert [Slavic Concerto], pf, orch, op.54, 1953; Romeo i Dzhul'yetta [Romeo and Juliet], op.55, 1955 [suite from incidental music]; Grazhyna, ballad, op.58, 1955; Na berehakh Visly [On the Banks of the Vistula], sym. poem, op.59, 1958; Pol'skaya syuita [Polish Suite], 1961; Slavyanskaya uvertyura, 1961; Sym. no.4, bb, op.63, 1963; Liricheskaya poėma, 1964; Sym. no.5 'Slavyanskaya' [Slavonic], C, op.67, 1965–6; Slavyanskaya syuita [Slavonic Suite], op.68, 1966; Urochista Uvertyura [Solemn Overture], op.70, 1967

Choral: Torzhestvennaya, kantata [Solemn Cant.] (M. Ryl's'ky), 1939; Zapovit [The Commandment] (T. Shevchenko), 1939; 48 Choruses (Shevchenko), 1949–51; 62 Choruses (A. Fet), 1961; 18 folksong arrs.

Vocal: Lunniye teni [Moon shadows] (P. Verlaine, I. Severyanin, K. Bal'mont, O. Wilde), lv, pf, op.9, 1923; Tri stikhotvoreniya P. Shelli [3 Poems of Shelley], 1v, pf, op.14, 1924; 52 songs, 1v, pf; 59 folksong arrs.; 9 folksong arrs., 2vv

Chbr and solo inst: Str Qt no.1, d, op.1, 1915; 8 Preludes, pf, 1920–43; Str Qt no.2, A, op.3, 1922; Pf Trio no.1, op.7, 1922, rev.1925; Pf Sonata no.1, op.13, 1924; Otrazheniya [Reflections], 7 pieces, pf, 1925; Pf sonata no.2/Sonata-ballada, op.18, 1925; Sonata,vn, pf, op.19, 1926; Str Qt no.3, op.19, 1928; Shevchenkivs'ka syuita [Shevchenko Suite], pf, 1942 [incomplete]; Pf Trio no.2, op.41, 1942; Ukrayn'skiy kvintet, pf qnt, op.42, 1942, rev.1945; Str Qt no.4, 1943; Suite, ww qt, 1944; Syuita na ukraynskiye narodnïye temi [Suite on Ukrainian Folk Themes], str qt, 1944

Other: 12 small inst pieces; incid music for stage and film

VIRKO BALEY

Lybbert, Donald (*b* Cresco, IA, 19 Feb 1923; *d* New York, 26 July 1981). American composer. He studied at the University of Iowa (BM 1946), at the Juilliard School with Robert Ward and Bernard Wagenaar (1946–8), at Columbia University with Carter and Luening (MA 1950) and in Fontainebleau with Boulanger (1961). During World War II he served as an officer in the US Navy. He was a teaching fellow at the Juilliard School (1947–8) and from 1954 to 1980 taught at Hunter College, CUNY.

While some works are in part serial, his basic style is freely atonal with an emphasis on audible formal structure. Song settings such as *Octagon* show a fine feeling for clear declamation. He also experimented successfully with microtonality (in *Lines for the Fallen*), asymmetrical metres (*Sonata brevis*) and the combination of recorded electronic sounds with live performance. He wrote (with F. Davis) *The Essentials of Counterpoint* (Norman, OK, 1969/*R*).

WORKS

OLIVER DANIEL/MICHAEL MECKNA

Lyceum (i). Educational movement begun in Massachusetts, USA, in 1826. Its founder Josiah Holbrook (1788–1854) conceived a national network of local groups whose members aimed to improve each others' minds by lectures, discussions and presentations. Soon there were thousands of groups all over the USA, and professional touring speakers largely replaced local presenters. Music was at first only occasionally discussed; among the speakers were Lowell Mason and John Sullivan Dwight.

After the Civil War professional lyceum bureaus were formed to manage the travelling talent. The Redpath Lyceum Bureau, founded by James Redpath (1833–91) in 1868, eventually comprised a dozen semi-independent offices in all parts of the USA and one in Canada. The lyceum movement remained high-minded but now placed more emphasis on entertainment. By the 1900s music had become the largest element in the programmes. Lectures and performances were given throughout the autumn, winter and spring; singers, instrumental soloists and ensembles, choruses and bands appeared. Many of the presenters also appeared on the CHAUTAUQUA circuit. The lyceum movement declined in the 1930s, in many cases giving way to civic music programmes that no longer used the name.

Lyceum (ii). London theatre built in 1772, and reopened in 1834 as the English Opera House. *See* LONDON (i), §VI, 1(i).

Lydian. The common name for the fifth of the eight church modes, the authentic mode on F. In the Middle Ages and Renaissance the Lydian mode was described in two ways: as the diatonic octave species from *f* to *f'*, divided at *c'* and consisting of a third species of 5th (tone–tone–tone–semitone) plus a third species of 4th (tone–tone–semitone), thus *f–g–a–b–c'* + *c'–d'–e'–f'*; and as a mode whose FINAL was *f* and whose AMBITUS was *f–f'* (or *f–g'*). In addition to the final, the note *c'* – the tenor of the corresponding fifth psalm tone – was regarded as having an important melodic function in the fifth church mode.

The Lydian mode was anomalous in two respects. First, the ambitus of each of the other authentic modes, Dorian, Phrygian and Mixolydian, was reckoned as beginning from its subfinal, which lies a tone below the final. But the note below the final of the Lydian mode, *e*, makes the interval of a semitone with the final, and 'because of the deficiency below of [that] semitone', as Guido expressed it in chapter 13 of the *Micrologus* (1025–6), the final *f* itself was normally stipulated as the lower limit of the mode. Second, despite the theoretical scale type of the Lydian, in particular its third species of 5th *f–g–a–b–c'*, theorists from as early as Hucbald (*De Harmonica Institutione*, ed. C.V. Palisca and trans. W. Babb, New Haven, CT, 1978) recognized that in fact it is *b*♭ rather than *b*♮ that is characteristic in the two F modes, and even more so in the HYPOLYDIAN than in the Lydian. Similarly, according to chapter 15 of the *Dialogus de musica* attributed to ODO (*GerbertS*, i, 261), 'in the fifth and sixth [modes] the first ninth degree *b*♭ [reckoned from *A*] will prevail', thus attesting to the prevalence of *b*♭ rather than of *b*♮, the 'second ninth degree'. Phrases in the lower part of the octave *f–f'* are more likely to use the fourth species of 5th (tone–tone–semitone–tone), which gives *b*♭ on the fourth degree (for this reason one invariably finds *b*♭, rather than *b*♮ used in the Hypolydian mode). Marchetto da Padova, in the *Lucidarium* of 1318 (ed. and trans. J.W. Herlinger, Chicago, 1985), gave the following rule of thumb for the use of *b*♮ in the Lydian mode: 'we should sing with *b*♮ when the notes of the fifth tone [i.e. mode] are around *c'* and do not descend below *a*' (bk 11, chap.4).

In Renaissance polyphony a great many compositions end on an F major triad, with parts ranging more or less within the Lydian and Hypolydian ambitus and with prominent cadences on C and A, as well as on F. With rare and special exceptions, these pieces are set in *cantus mollis* (i.e. with a one-flat signature); but here the use of *cantus mollis* does not denote a transposition of the mode up a 4th, as it does in pieces 'in G Dorian'. Rather, it denotes the prevalence of B♭ over B♮ in the F modes. The 16th-century theorists who promulgated the theory that there were 12 modes in music, rather than the traditional eight of Gregorian chant, considered F-mode pieces in *cantus mollis*, however, as transpositions up a 4th from the C modes (IONIAN and HYPOIONIAN). Both Glarean (*Dodecachordon*, 1547, iii/16) and Zarlino (*Le istitutioni harmoniche*, 2/1573, iv/18) cited Josquin's five-part *Stabat mater*, an F-mode piece with a one-flat signature in all voices, as an example of the transposed Ionian. But for the most part 16th-century musicians thought of F-mode pieces in *cantus mollis* as being in the Lydian or Hypolydian mode in the traditional system of the eight church modes. In modally ordered sets of pieces, they are found between the E-mode and G-mode compositions. For instance, of Palestrina's modally ordered settings of stanzas from Petrarch's *Vergine* canzone no.266, which comprise nos.1–8 of his *Madrigali spirituali* (1581), nos.5–6 are F-mode compositions in *cantus mollis* with higher voice ranges. No.5 has higher voice ranges, corresponding to the authentic Lydian mode, indicated

by CHIAVETTE; no.6 uses standard clefs to indicate the lower range of the plagal Hypolydian mode.

In the 19th and 20th centuries composers often used exotic scales and harmonies foreign to the conventional tonal major and minor modes to evoke peasant, nationalistic, mysterious or religious associations. One of the earliest such evocations is the slow movement of Beethoven's Quartet op.132, which bears the inscription 'Heiliger Dankgesang eines Genesenen an die Gottheit, in der lydischen Tonart'. Its principal sections are set in F, but without a key signature; the consistent use of B♮ (usually in secondary dominant harmony), together with an avoidance of accidentals throughout each of the principal sections, give the tonality its Lydian character.

Modern scholars use 'Lydian mode' to designate the scale type of a folksong or non-Western melody that uses the modern major scale with the fourth degree raised by a semitone.

For the early history of Greek-derived modal names *see* DORIAN. *See also* MODE.

Lympany, Dame **Moura** (*b* Saltash, 18 Aug 1916). English pianist. She studied at Liège and won the Ada Lewis Scholarship to the RAM, London, where she studied with Coviello. Further studies were with Paul Weingarten, Mathilde Verne, Edward Steuermann and, more extensively, Matthay. Her début was at Harrogate at the age of 12, in Mendelssohn's First Concerto. In 1938 she placed second to Gilels in the Ysaÿe Piano Competition in Brussels, beating both Flier and Michelangeli. She gave the première performance of Khachaturian's Concerto in Britain, introduced the work to London (1940) and other European cities and also gave numerous performances abroad of concertos by Delius, Ireland, Rawsthorne and Arnell. On 31 October 1969 she played Cyril Scott's Concerto in the presence of the composer at his 90th birthday concert. Among Lympany's many recordings are the first complete Rachmaninoff preludes, concertos by Khachaturian and Saint-Saëns and the Rawsthorne Concerto no.1. Although a Rachmaninoff specialist, her musical interests were wide (her repertory encompassed 60 concertos); she brought a deep understanding and comprehensive command to all her performances. For many years she directed the Festival des Sept Chapelles in Rasiguères, near Perpignan, which she founded with Prince Louis de Polignac. She has received honours from the French and Belgian governments, and was made a DBE in 1991.

FRANK DAWES/BRYCE MORRISON

Lynn, Frank. *See* SCHILLINGER, JOSEPH.

Lynn, [née Webb], **Loretta** (*b* Butcher Hollow, nr Van Lear, KY, 14 April 1935). American country singer and songwriter. Attracted to country music in her childhood, she married at the age of 13 and began to sing locally. A talent contest brought her to the attention of a Canadian lumberjack, who financed her first record, *I'm a honky-tonk girl* (1960), in which the influence of Kitty Wells is evident. When the record became a success she moved to Nashville, where she was championed by Patsy Cline. She soon became a regular performer on the 'Grand Ole Opry' radio show and, by the late 1960s, she was well established nationally.

Lynn became famous when country music was caricatured as 'redneck' and conservative, and its practitioners ridiculed. She and her peers, proud of their working-class origins and culture, helped it win respect and a wider audience. Her early life of material deprivation and human warmth was chronicled in her most celebrated song, *Coal Miner's Daughter*, also the title of her autobiography (Chicago, 1976) on which was based an award-winning film (1980).

Although not of the feminist movement, her support for women's rights is reflected in many of her songs, including *Don't come home a-drinkin' (with lovin' on your mind), Your squaw is on the warpath* (an acknowledgment of her Cherokee blood) and *The Pill*. She has won numerous awards from the Country Music Association and, in 1971, a Grammy. Her sister, Crystal Gayle (Webb, Brenda Gail; *b* Paintsville, KY, 9 Jan 1951), has also pursued a successful career as a country and popular singer.

LIZ THOMSON

Lynn [Welch], Dame **Vera** (*b* London, 20 March 1917). English popular singer. She sang in working men's clubs from an early age and later with the bands of Joe Loss and Ambrose in the late 1930s before launching a solo career in 1940. Through her BBC radio programme 'Sincerely Yours' she established a lifelong connection with the armed forces, gaining the soubriquet of 'the forces' sweetheart', and is particularly associated with such wartime songs as *We'll meet again* and *White Cliffs of Dover*. She was a popular variety performer throughout the 1950s and 60s and had several chart successes in both the UK and the USA. Although principally associated with romantic ballads of the 1930s and 40s, delivered in a rich mezzo-soprano with elegant phrasing and diction, her repertory was extended to include pop songs of the 1960s and country songs on the album *Vera Lynn in Nashville* (1977). She has increasingly restricted her appearances to those associated with World War II veteran associations. She was made an OBE in 1969 and a DBE in 1975, and has written an autobiography, *Vocal Refrain* (London, 1975).

□

Lyon, Gustave (*b* Paris, 19 Nov 1857; *d* Paris, 12 Jan 1936). French piano maker. He took control of the firm of Pleyel, Lyon et Cie after his father-in-law Auguste Wolff's death in 1887. *See* PLEYEL (ii).

Lyon, James (*b* Newark, NJ, 1 July 1735; *d* Machias, ME, 12 Oct 1794). American composer and tune book compiler. In 1759 he graduated from the College of New

Jersey (Princeton University). The following year he gave lessons in singing in Philadelphia and before the end of 1761 published his tune book *Urania*. Licensed to preach in 1762 by the Presbyterian Synod of New Brunswick, New Jersey, he devoted the rest of his life to the church, moving to Nova Scotia in 1764 and accepting a pastorate in Machias, Maine, which he held from 1772 until his death. Lyon is known to have written only nine musical compositions; his main importance is as a compiler. *Urania*, his greatest achievement, is a landmark in American psalmody. Larger than any earlier American tune book, it was the first to contain English fuging tunes and anthems and the first to identify native compositions. It was drawn primarily from British sources, but also included the first printed compositions of Lyon and Francis Hopkinson and was the earliest American publication to print compositions by William Tuckey. Reprinted at least five times, *Urania* served as a source for a generation of American compilers.

Lyon & Healy. American firm of instrument manufacturers and music dealers. Founded in 1864 in Chicago by George Washburn Lyon and Patrick Joseph Healy as a Midwest outlet for the publications of the Boston company of Oliver Ditson, the firm rapidly expanded to include retail distribution of music from publishers and musical instruments of all types. Under Healy's direction (Lyon retired in 1889) the store became widely known in Chicago and throughout the USA for its broad range of merchandise and advanced advertising and selling methods. It was one of the first businesses in the USA to appraise instruments. From about 1890 the firm used the marque 'George Washburn' for its better fretted instruments. In about 1928 the trade name and activities other than piano and harp manufacture were acquired by the Tonk Bros. Co., which continued to sell instruments under the name into the 1930s. Tonk Bros. was acquired by C.G. Conn in 1947.

As an instrument manufacturer, the firm is best known for the Lyon & Healy harp, first placed on the market in 1889. Healy was interested in developing a harp that would be better suited to the rigours of the American climate than the available European models, and his engineers, basing their instruments on Erard's pedal harp, succeeded in producing a harp notable for its strength, reliability of pitch, and freedom from unwanted vibration. When Wurlitzer stopped producing harps before World War II, Lyon & Healy remained the sole large-scale harp builder in the USA. Other contributions made by Lyon & Healy include innovations in the style of the instrument, notably the modern Salzedo model of 1935, and the development of a small, lever harp, the Troubador, in 1962.

In 1977 Lyon & Healy was bought by CBS, which at the time also owned Steinway. Under CBS, Lyon & Healy decided to focus exclusively on harp production and music publishing. Following this decision CBS closed all Lyon & Healy retail stores in 1979, and the name of the firm was changed to Lyon & Healy Harps. In 1985 Steinway Musical Properties (SMP), a Boston-based holding company, acquired Lyon & Healy Harps. In 1987 SMP sold Lyon & Healy to a Swiss-based holding company, Les Arts Mechaniques, which also owned the European firm Salvi Harps. The two firms then worked together, with two distinctive lines of pedal and lever harps. In 1990 pianos began to be sold under the Lyon & Healy name again, the firm carrying a European-made model.

In the mid-1980s the firm brought out the Folk Harp and in the mid-1990s the Prelude, both being lever harps. They introduced the Electric Harp in 1993, which emits an electronic signal designed to emulate the sound of the acoustic harp. A combination instrument, the Electro-acoustic harp, was introduced in 1997.

Lyon & Healy is also identified with several international harp competitions. The company donates the first prize (a concert grand harp) for the Israel Competition and the USA International Harp Competition held in Bloomington, Indiana. In addition, they sponsor the biannual Lyon & Healy International Jazz and Pop Harpfest held in the USA.

ANNETTE FERN (with JAY SCOTT ODELL)/
JOAN LAUREL FERGUSON

Lyons (Fr. Lyon). City in France, situated at the confluence of the Rhône and Saône.

1. Early history. 2. Medieval and Renaissance music. 3. Music publishing in the 16th century. 4. 1600–1800. 5. From 1800.

1. EARLY HISTORY. Under the Romans (from 43 BCE) Lyons was the capital of Gaul. In the 2nd century it was the first place in Gaul to be converted to Christianity; under Christian government it became the seat of the primate of France. In 1271 the citizens rejected the archiepiscopal rule in favour of the protection of the French crown, but maintained a considerable degree of administrative and fiscal independence until the Revolution. The growth in industry, banking and commerce, which coincided with the decline of the church's political influence, reached its apogee during the Franco-Italian wars of the early 16th century. By 1550 the increasing activity of the trade fairs, the presence of Italian merchants and bankers (notably Florentine refugees), the frequent visits of the French court and the spread of the printing and silk industries helped to create an environment in which the fine arts flourished. The traditional anti-clerical and liberal feelings of the town council and some of the royal governors made the town safer than Paris for evangelical humanists or neo-Platonists such as Dolet, Des Périers, Barthélémy Aneau, Rabelais and Charles de Sainte-Marthe whose works issued freely from the numerous and active presses. The second third of the 16th century represented an Augustan Age for the city's

literature: the important role accorded to music in verse by Scève, Tyard, La Taissonnière, Pernette du Guillet and Louise Labé was reflected in the output of publishers such as Moderne, Beringen and Granjon. During the second half of the century the spread of Protestantism and relations with nearby Geneva were reflected in a proliferation of vernacular psalm settings and spiritual songs; but the ensuing religious wars reduced the town's cultural life as well as its prosperity.

2. Medieval and Renaissance music. Although the Lyonese liturgy is one of the oldest in Europe and although the choir school (*manécanterie*) of the Cathedral of St Jean dates from the 11th century, the city has no great tradition of church music. Polyphony was proscribed at St Jean, although the clerical organization, with a *maître* and *sous-maître du choeur*, a *chapelain des douze*, several *manécantants* and a *maître d'enfants*, resembles that of the French royal chapel. In the 16th century the churches of St Nizier, St Paul and Notre Dame de Fourvière maintained choirs, while the organs at the churches of the Augustine, Jacobin and Franciscan orders were replaced in 1537, 1570 and 1593 respectively. The most distinguished organists were employed by the Florentine community for the chapel of Notre Dame de Confort built by Tommaso Guadagni in 1523 in the Jacobin church: Francesco de Layolle (*c*1523–38), Piero Mannucci (who composed music for six *intermedi* by Luigi Alamanni performed during a revival of Bibbiena's *Calandra* in 1548), Matthieu de Fleurs (1559), Philibert Ydeux (1573) and Jehan Duprey (1595).

Letters in archives at Florence and Modena respectively suggest the presence at Lyons of Ninot le Petit in 1478 and of Antoine Brumel in 1506. Moreover, despite the absence of definite records, it is certain that some of the musicians of Louis XII and François I, if not the entire royal chapel, travelled to Lyons during the Italian Wars (1494–1525): Louis XII set up court in the town between 1499 and 1503, the Archduke Philip the Fair visited it in June 1503 and Margaret of Austria was often there after her marriage to Filiberto II, Duke of Savoy.

There is more evidence of secular than sacred musical activity at Lyons during the Renaissance. The poets who provided the amorous texts for the composers of the courtly polyphonic chanson described amateur music-making and acknowledged their musical colleagues: thus Des Périers extolled the lutenist Alberto da Ripa; Aneau and Charles de Sainte-Marthe praised the composer P. de Villiers; and the poet–musician Eustorg de Beaulieu admired Francesco de Layolle as much as his patrons did. Documents record the activities of some of the city's professional musicians and instrument makers: chansons and dances were played on the shawm, cornett or violin by Charles Cordeilles, Guillaume de La Moeulle and their fellow waits, enlivening public and private festivities from royal entries and dramatic entertainments to banquets, weddings and carnivals. These same musicians composed four-voice chansons for Jacques Moderne, who monopolized the printing of polyphonic music in the town between 1532 and 1547. Many of the musicians whose works were published solely or mainly at Lyons probably lived in or around the town; but the names of only eight composers – Cordeilles, La Moeulle, Francesco and Alamanne de Layolle, Loys Bourgeois, G.P. Paladino, Philibert Jambe de Fer and Jean de Maletty – have been found in the archives. Yet in tax records for the whole of the 16th century over 100 instrumentalists are mentioned, including 27 organists, 12 lutenists, eight violinists, eight trumpeters, seven flautists, seven drummers, six shawm and cornett players and six rebec players. During the century the town also increased in importance as a centre for the manufacture and sale of musical instruments; more than 50 craftsmen worked there, mostly foreign luthiers, including the famous Gaspar Tieffenbrucker and the flute maker Claude Rafi. This tradition remained strong during the 17th and 18th centuries (P. Demouchi, Lisieux, J. Morliet, Louvet, Mériotte, Micot, Guignon, Saraillac, Collesse and J. Frankii).

3. Music publishing in the 16th century. The first surviving polyphonic choirbook (RISM 1528[1]), a collection of four-voice settings of the Mass Proper printed by Bernard Guaynard, includes music by Francesco de Layolle later music editor to Jacques Moderne who published 75 madrigals, 13 chansons, 20 motets and several masses by him. Layolle was the leading composer at Lyons between his arrival from Florence (*c*1521) and his death (*c*1540). His son Alamanne was active as an instrumentalist and organist at Lyons between 1551 and 1565 when he returned to Florence. Moderne published in the Parangon des Chansons series (see illustration) three pieces by the poet-musician Eustorg de Beaulieu,

who lived in Lyons between 1534 and 1537; but he gave greater prominence to the work of P. de Villiers, publishing 23 French chansons, four motets, one mass, two Italian pieces and a piece in Provençal dialect by him. A number of minor composers whose music was entirely or predominantly published in Moderne's anthologies may have had local connections: Gabriel Coste, Henry Fresneau, Antoine Gardane, P. de La Farge, F. de Lys, Guillaume de La Moeulle, Loys Bourgeois and Charles Cordeilles; but as there were no other significant rivals to Attaingnant's monopoly in France, many composers in the provinces and Italy may have found Lyons a more convenient outlet than Paris. After 1540 Moderne preferred collections devoted to a single composer or tabulator; these include volumes by Layolle, Pierre Colin and the Florentine Mattio Rampollini. Moderne encountered competition during his later years, notably from Godefroy and Marcellin Beringen, brothers of German Protestant origin operating in the rue Mercière between 1544 and 1559. The Beringen press issued psalms by Loys Bourgeois and Simon Joly, psalms and chansons by the younger Didier Lupi, and motets and chansons by Dominique Phinot.

Whereas music represents a significant proportion of the total output of Moderne (55 of 84 signed editions) and Beringen (13 of 62), a number of other printers made exceptional excursions into the field during the latter half of the 16th century. In 1555 and 1556 Matthieu (Macé) Bonhomme published a collection of monophonic noëls and chansons in French or Savoyard dialect by Nicolas Martin of St Jean de Maurienne. Michel du Bois was one of a number of printers whose activity was divided between Geneva and Lyons: between 1555 and 1559 he issued a collection of monophonic psalms by Philibert Jambe de Fer, a Burgundian musician resident at Lyons between 1553 and 1564 when he organized music festivities for the entry of Charles IX. Du Bois also printed his practical treatise *Epitome musical* and a collection of his four-voice psalms dedicated to the Lyonese banker Georg Obrech. In 1559 Robert Granjon published five music collections, two devoted to four-voice chansons and five-to eight-voice motets by Barthélemy Beaulaigue, a choirboy prodigy at Marseilles, two anthologies of favourite four-part chansons (1559[14] and 1559[11]) and a collection of 49 psalm paraphrases by Marot set by Michel Ferrier from Cahors. After preparing a book of guitar intabulations printed by Granjon and Fezandat at Paris in 1551 but dedicated to a Lyonese friend, the lutenist Simon Gorlier obtained his own royal privilege to print music in 1558; during the next few years he issued tablatures for the German flute, spinet, guitar and cittern (all lost) as well as a reprint of a lutebook by G.P. Paladino (1560[27] – reprinted from an edition of 1553 by G. Pullon de Trino), a collection of *chansons spirituelles* entitled *La lyre chrestienne* by Antoine de Hauville (1560) and the chansons and *voix de ville* by Alamanne de Layolle (1561). Although maligned as a 'trougnon d'épinette' in a lampoon published by Loys Bourgeois in 1554, Gorlier remained active in the book trade at Lyons until 1584. Lyons' Italianate taste is reflected in the fact that the lutebooks of Francesco Bianchini (1547[27]), G.P. Paladino (1549[40] and 1560[27]) and Bálint Bakfark (1552[20]) use Italian rather than French tablature (Paladino remained at Lyons until his death in 1566). The lute tradition was carried into the 17th century by Ennemond Gaultier (*c*1575–1651).

The advance of Calvinism, which reached its peak at Lyons in the early 1560s, is reflected in a spate of psalm prints; many included the Genevan melodies and a few were polyphonic settings. The chief publisher, Antoine Vincent, was of Lyonese origin but operated from Geneva with associates such as François Perrin, Jean de Tournes, Jean Maréschal, Charles Pesnot, Augustin Marlorot, Gabriel Cottier, Claude Ravot, Antoine Cercia and Pierre de Mia representing his interests at Lyons. The last two of these collaborated in publishing Jambe de Fer's simple four-voice setting of the complete Psalter; a second edition by the composer himself in association with Pierre Cussonel and Martin la Roche also appeared in 1564. Another complete setting by Richard Crassot was published in 1564 by Thomas de Straton, who had issued an anthology of *chansons spirituelles* by Didier Lupi and others in 1561 (for a later revised edition see RISM 1568[9]). Apart from Alamanne de Layolle's chansons the only secular collection to appear at Lyons during the 1560s was a collection of four-voice madrigals by Giovanni Antonio di Mayo, printed by Antoine Cercia in 1567.

The publications of the next decade were dominated by Jean de Tournes, who in 1572 issued a collection of chansons by Arcadelt with spiritual contrafacta texts edited by Claude Goudimel. De Tournes also published *Le II jardin de musique*, containing chansons and *voix de ville* by Cornelius Blockland, and a collection of four- to six-voice chansons by Gilles Maillard of Thérouanne, who lived at Lyons between 1581 and 1584.

Two books of selected chansons by Goudimel and Lassus were published by Jean Bavent in 1574 (1574[1] and 1574[2]). Three years later Clement Baudin issued the first book of five-voice madrigals (1577[10]) by the Luccan Regolo Vecoli; in the same year Gasparo Fiorino, a musician in the service of Cardinal Filippo d'Este of Ferrara, published a collection of *Canzonetti alla neopolitano* at his own expense.

Charles Pesnot, who had printed an edition of the monophonic Psalter for Antoine Vincent in 1563, returned to music in 1578 with a collection of psalm paraphrases by George Buchanan and three books of chansons (mostly *chansons spirituelles*) set for four to eight voices by Jean Servin. A collection of popular hymns by the Jesuit Michel Coyssard was published at Lyons by Jean Pillehotte (RISM 1592[6]) before appearing in numerous later editions in other cities. Anthologies of sacred music were issued by Jean Didier (RISM 1610[11]) and Louis Muguet (RISM 1615[7]), but thereafter the city lost its position as an important centre of music publishing.

4. 1600–1800. Despite the absence of corporations for civic musicians and the rejection of a Parisian form of organization led by a *roy des violons*, band music continued and expanded at Lyons during the 17th century. The Desbargues family of instrumentalists grew in stature: Mayot and Martial Desbargues were active from 1575; Dominique Desbargues, *maistre en la grand bande* in 1643, was succeeded by his son Charles before 1676; and at the opening of the opera in 1688, three Desbargues, Hugues, Charles and Noel, played among the orchestra's 20 violins. Between 1657 and 1659 Augustin Dandricourt de Sainte-Colombe was employed as *maître de musique des enfants* at the orphanage (L'Hôpital de la Chana). The Académie Royale de Lyon was instituted in 1687 with a three-year privilege granting performing rights (on

payment to Lully's heirs) of *tragédies lyriques* which had already been performed at Paris. The first director was Jean-Pierre Leguay (*c*1655–1731), who engaged as principal singers the Lyonese Jean Journet and his two daughters, Andrée ('Drion') and Françoise; the chorus numbered about 25, mostly male (only the top part being sung by women), and there were eight full-time dancers. In addition to 20 strings, the orchestra had five wind players plus continuo instruments – two bass viols (Pierre Bellon and Jean Rebel, the latter doubling on theorbo) and harpsichord (J.B. Duplessis, who also acted as répétiteur). Its first musical director, Philippe Delacroix, was replaced in September 1688 by Pierre Gautier (ii); Leguay continued to organize the choreography and administration. Performances of Lully's *Phaëton*, *Bellérophon*, *Armide* and *Atys* were given four times a week before the first opera house (a former tennis court in the rue Pizay) was destroyed by fire on 29 November 1688. Opera performances continued at the home of the governor, the Duke of Villeroy (*d* 1730), and a new nine-year privilege was granted in December 1690 to Nicolas le Vasseur, who hired stables in the Place Bellecour from the Chaponay family to construct a new theatre. Meanwhile the company mounted productions at Aix-en-Provence, Avignon, Châlon, Dijon, Grenoble and Marseilles. Leguay resumed the direction in 1694 and continued performances of works by Lully and Desmarets. In June 1699 the theatre walls collapsed, and during the next 12 years Leguay's troupe toured Provence, introducing works by Campra (*L'Europe galante* 1701, *Les fêtes vénitiennes* 1710) and Destouches (*Issé* 1709).

An academy for fine arts, established in 1714 under the patronage of the Duke of Villeroy, promoted both vocal and instrumental music, with weekly concerts including opera excerpts and instrumental music by Lully, Corelli, Mascitti, Senaillé and Jacques Aubert *le vieux*, concluding with a *grand motet* composed in the manner of Lalande. This concert society flourished through the support not only of the Villeroy family – notably the duke's son, the Archbishop Paul-François, who himself composed two *grands motets* (Vallas, pp.123ff) – but also of a number of enthusiastic amateurs, for instance the scientist J.P. Christin (1683–1755) and the lawyer N.A. Bergiron (1690–1768), who organized the motley musical ensemble (including violins, viols, trumpet marine, guitars, lutes, theorbos, mandolins, harpsichord, flutes, recorders, oboes, bassoons, horns, trumpets, serpent, musette and percussion) and the library.

In 1714 Bergiron composed an *Impromptu divertissement* for the Duke of Villeroy (*F-LYm*); a number of similar works were performed at the opera in the course of the ensuing decade and several of his cantatas were published in Lyons by Thomas Marchand in 1729 and in Paris by François Boivin. The new concert society included in its repertory the early motets of Rameau, who was engaged by the council to compose music for the festivities celebrating the Treaty of Utrecht (1713) and for the investiture of the Archbishop Paul-François de Villeroy two years later. By 1715 Rameau had been succeeded as organist at the Jacobins' church by Pietro Antonio Fiocco and Etienne le Tourneur. In 1728 a certain 'Fabry, organiste à Lyon' obtained a privilege to publish in Paris pieces for organ and harpsichord, sonatas, motets and a treatise on accompaniment.

In 1718 Bergiron ceded the direction of the academy to Jacques David, a pupil of Bernier. The academy's success gave rise to a rival association, the Académie des Jacobins, founded by the Intendante Marie Poulletier in 1718, under the musical direction of François Estienne, a prolific composer of *grands motets*. After the death of its founder (1727) the second concert society collapsed, and Estienne moved to the original academy, which had acquired a new concert hall in the Place des Cordeliers, designed by the Milanese architect F. Pietra Santa (it remained standing until 1856). Other locations were occasionally used: the College de la Trinité, where between 1722 and 1764 a newly composed motet was performed annually on 8 August for the 'Voeu de Roi'; and the Hôtel de Ville, where from 1733 during Holy Week and Easter Week the Concert Spirituel was established along the lines of the Parisian model. The library catalogue for this period lists music by Campra, Destouches, François Francoeur and François Rebel, Lully, Morin, Mouret and Montéclair, and also works by local composers such as Mathieu Belouard, Jacques David and the Leclair family. Although the most famous son of Antoine Leclair, Jean-Marie *l'aîné*, had left Lyons in 1722 to seek his fortune at Turin and subsequently Paris, the rest of the violinist family remained, including Jean-Marie *le cadet* (1703–77) whose sonatas and musical entertainments *Le Rhône et la Saône* (1733) and *Divertissement champêtre* (1736) were performed by the academy. The Lyons violinist Etienne Mangean, whose *Concert de simphonie* was published at Paris in 1735, played for the Parisian Concert Spirituel between 1742 and 1755. By 1736 the academy's concert section was virtually independent of the fine arts and sciences section, which organized regular conferences. The orchestra, being more reliant on admission charges and municipal subsidy than membership fees, had become increasingly professional and had appointed more and more violins (the double bass was used from 1727); viols and lutes were rejected so that many of the original participants left but continued to organize amateur concerts on a smaller scale. From 1740 the academy's concerts were directed by the Parisian François Lupien Grenet; the dazzling performances of visiting virtuosos such as Guignon and Mondonville in the summers of 1744 and 1745, though enthusiastically received, were censured by the academy's secretary, the organist Louis Bollioud-Mermet, whose treatise on *De la corruption du goust dans la musique françoise* was published at Lyons by De La Roche in 1746. The old school was also represented by Jean-Baptiste Prin, an actor, dancer and monochord player active at Lyons from 1688, who in 1742 presented to the academy his *Traité sur la trompette marine*. The conferences thrived during the Age of Reason: Bollioud-Mermet and his colleagues, the Jesuits Jean Dumas and C.-P.-X. Tolomas (1706–62), Charles Bordes (1711–71) and C.-J. Mathon de la Cour (1738–98) read papers on composition, harmony, tuning and music history.

After 1713 the opera received civic subsidies and under the direction of Antoine-Michel Desbargues mounted Campra's *Iphigénie* and Destouches' *Callirhoé* at the Hôtel du Gouvernement. When Leguay was recalled as director between 1716 and 1722 he mounted only comedies and ballets including the 'Idylle héroique chantée ... dans l'Académie des Beaux-Arts le 25 de May, 1718', *Le retour de Pyrrhus Néoptolème en Epire* (Lyons, 1718;

manuscript in *LYm*; see Vallas, pp.149ff); the libretto of the Idylle was by Nicolas Barbier and the music by Paul Villesavoye, the Academy's *maître de musique* between 1718 and 1731.

Between 1722 and 1739 the opera was dominated by the Desmarets (Eucher) family: with the chorus cut from 25 to 17 and the dancers from 17 to 13, *comédie-* and *opéra-ballets* by Lully, Bourgeois, Campra, Destouches, Francoeur and Rebel were performed alongside potpourris by local musicians such as François Henry Desmarets. Bergiron and Grenet took charge in 1739, giving way to Jean Monnet in 1745, J.S. Mangot in 1749, and Mathieu Belouard in 1751: these changes in direction reflect the opera's constant financial difficulties, though by 1750 the company had increased to 32 singers and 16 dancers. A highpoint was reached with the presence between 1750 and 1752 and in 1758–9 of the dancer and choreographer J.-G. Noverre; he collaborated in several ballet pantomimes with the composer François Granier, whose cello sonatas were published at Lyons in 1757. In 1756 a new theatre was constructed behind the Hôtel de Ville by J.G. Soufflot; under the direction of the actress Michelle Poncet (Destouches) (1752–79) and her husband, the singer Jean Lobreau, the company presented *opere buffe* in translation, *opéras comiques* by Philidor, Monsigny and Duni. Michelle's half-sister Marie Dunant-Destouches took over the direction between 1782 and 1785, presenting new works by Gluck (*Cythère assiegée*), Piccinni (who personally directed his *Didon* in 1787) and Grétry (who visited Lyons on the eve of the Revolution in May 1789). *Pygmalion* by Coignet and Rousseau was first performed privately at the Hôtel de Ville in 1770.

During the second half of the 18th century the academy's concerts continued to flourish under the direction of J.S. Mangot (1753–6) and A.L. le Goux (1756–65), who with his brother Claude ran a music shop in the rue Grenette and taught composition, singing and the flute. Foreign virtuosos were frequently invited (e.g. Pugnani in 1754) and some remained (e.g. Lorenzo Carminati, 1711–82). In 1757 20 *symphonistes* and 20 singers were on the payroll. The *grand motet* remained the favourite genre: Lalande's and Mondonville's dominated, but many by J.F. Lallouette, F. Pétouille, Henry Desmarets, Collin de Blamont and Laurent Belissen were heard at Lyons before being performed in Paris. Excerpts from operas by Rameau, Rebel and Francoeur, Mouret, Montéclair and Gluck were included alongside *cantatilles* by resident musicians such as Grenet, Itasse and Warin. In 1761 an organ was installed and performances were given of concertos by J.J. Charpentier, the organist at the Hospice de la Charité. Clarinets were added to the orchestra in July 1763 (Baumann taught the clarinet from 1771) and horns were occasionally included. New symphonies by Stamitz, Holzbauer, Fils, Beck, Toeschi, Cannabich, Abel, J.C. Bach, Touchemoulin, Leclair *le cadet* and Gossec were performed during the 1760s and sold by Le Goux. Claude le Goux continued the business and direction of the academy until its collapse early in 1774, caused by lack of subscriptions. The Mozart family spent four weeks at Lyons in November 1766: Wolfgang played the harpsichord but made little impression. A symphony by Haydn introduced by the academy in 1772 did not enjoy the esteem accorded to Manfredi and Boccherini when they performed together in 1767, or to Clementi, who while in Lyons in 1782 fell in love with one of his piano students, Victoire Imbert-Colomès, the daughter of a banker.

Despite the demise of the academy, musical commerce had almost regained the position it had enjoyed at the international fairs during the 16th century. Numerous instrument makers were active during the late eighteenth century including the harpsichord builders Desruisseux, Donzelague and Collesse. The almanachs of the 1760s list some 80 music teachers, including teachers of singing, of composition and of instruments. Most of the music shops were situated in and around the rue Mercière; the earliest, Debretonne's, was established before 1735; the Le Goux firm was acquired in 1766 by J.A. Castaud who published and sold music from the Place de la Comédie. A profitable music printing business was begun by the German C.G. Ghera in 1772 and continued after 1778 by his heirs at the Place des Terreaux. Among the wealthiest private patrons were members of the Dumont family of silk manufacturers, who assembled an amateur orchestra at the Maison Mantes to perform Grétry's overtures and the latest Mannheim symphonies; the group was led by the clarinettist Anton Stadler and included his pupil, the violinist Tony Bauer, who led the concert revival under the Directory in 1795.

5. From 1800. In 1803 Napoleon was entertained with a concert given by Kreutzer, Lamaire and Garat and with a festive opera, *Trajan*, composed by the 16-year-old timpanist of the theatre orchestra, Nicholas Bochsa. Two years later on his return as emperor he and Josephine were regaled with *Le songe d'Ossian*, a cantata by Etienne Foy. By 1820 two opera houses were active with the Célestins presenting opéra comique and *mélodrame* with a group of 17 musicians and the Grand Théâtre offering *grand opéra* and ballet with 34 musicians.

Concert life flourished under the guidance of François Alday and Tony Bauer at the Hôtel du Nord between 1805 and 1820 when the cellist François Hainl and the violinist Guérin took the lead. A permanent orchestra engaged to perform in the new opera house was directed successively by Joseph Hainl (1835–9), François Hainl (1841–63), Joseph Luigini (1863–71 and 1873–5), Edouard Mangin (1811–2) and Alexandre Luigini (1877–97). Visiting artists included Liszt (1837 and 1848), Thalberg (1842, 1846 and 1849), Berlioz (1845 and 1848) and Félicien David (*Christophe Colomb*, 30 June 1847). The tradition of the 18th-century concert societies was revived by Hainl's Concerts Symphoniques (1833), the Concerts Symphoniques Populaires (1873), the Concerts Symphoniques du Grand Théâtre (1884), the Société Symphonique Lyonnaise (1898), and the Association Lyonnaise des Grands Concerts (1904), later known as the Société des Concerts Philharmoniques and now the Société Philharmonique de Lyon. The Ochestre Philharmonique Rhône-Alpes established in 1969 directed successively by Louis Frémaux, Serge Baudo (1971–89), Emmanuel Krivine (1987–99) and D. Robinson. In 1979 the Choeur de l'Orchestre de Lyon was formed under the direction of Bernard Tetu.

Charles Widor was born at Lyons in 1845 and played the organ at the church of St François between 1860 and 1870. The Lamannière music school for young ladies was established in 1803 and soon followed by another in the Place des Carmes (directed by the guitarist Laflèche and the cellist Lefèvre) and in 1826 by a third in the rue Malet. The municipal school begun by Edouard Mangin in 1872

acquired the status of a national conservatory two years later; subsequent directors included Aimé Gros (1874–81), Augustin Savard (1902–22), Florent Schmidt (1922–4), Georges Witkowski (1924–41), Ennemond Trillat (1941–63), Louis Bertholon (1963–73), Michel Lombard (1973–87) and René Clément (1987–). A new Conservatoire National Supérieure de Musique was established in 1979 to provide professional training in music and dance. Its directors have been the organist Pierre Cochereau and the composer Gilbert Amy (1984–). As well as running courses in early music and organ performance it has a department of electro-acoustic music and music information technology. The Lyons Festival held annually in June and July under the direction of Robert Proton de la Chapelle was launched in 1945; based on a programme of music, dance and theatre, it has included an international competition in improvisation since 1968.

The refurbished Grand Théâtre was inaugurated in 1831 with Boieldieu's *La dame blanche*. Enlarged to include a fourth balcony in 1837, it was renamed Lyons Opéra. Although in the second half of the 19th century and in the early 20th, French opera was the backbone of the repertory, with premières of Gounod's *Cinq Mars* in 1877, Saint-Saëns's *Etienne Marcel* in 1879, Chabrier's *Gwendoline* in 1893, Pierné's *Vendée* in 1897 and Mariotte's *Salomé* in 1908, the company's Wagner productions became famous after the local premières of *Lohengrin* (1891), *Tannhäuser* (1892), *Die Walküre* (1894) and *Die Meistersinger* (1896; also the national première), all sung in French.

From 1955 the Lyons Opéra was directed by Paul Camerlo and from 1970 by his nephew, Louis Erlo, who has made it one of the most adventurous opera companies in France. 1981 Erlo has also directed the Aix-en-Provence Festival and arranged a system of co-productions between Aix and Lyons. In summer, performances are sometimes given at the Roma theatre of Fouvières. The Lyons Berlioz Festival (biennially in October), which represented Berlioz's operas in the Ravel Auditorium, was transformed into the Biennale de la Musique Française in 1991.

In 1989 the Opéra was closed for renovation and enlargement, reopened in 1993. The Opéra Studio, directed by Louis Erlo and Eric Tappy, is attached to the Opéra as a training school for young singers, making Lyons one of the few French houses with the basis of a permanent company. The Opéra's music directors have included Theodo Guschlbauer, Serge Baudo, John Eliot Gardiner – who formed the present opera orchestra after the Orchestre National de Lyon, formerly attached to the Opéra, became a permanent symphony orchestra – and, from 1989, Kent Nagano. Several of the most successful productions of the Gardiner and Nagano eras have been recorded. Since 1975 the company has also performed in the Auditorium Maurice Ravel, a large (2055 seats) modern concert hall and opera house situated in the modern district, La Part Dieu.

FRANK DOBBINS

Lyra (i) (Gk. *lura*). The lyre of ancient Greece (it is classified as a chordophone). The Greek word *lura* was used in two ways in classical times: as a general term for any instrument of the lyre family (i.e. the BARBITOS, chelys lyra, KITHARA and PHORMINX), and as the common name for one of the two kinds of lyre made from the shell of the tortoise (*chelus*), namely, the chelys lyra (the other being the barbitos, an instrument with longer arms). *Lura* is not found in Homer; the word first occurs in a fragment of Archilochus dating from the 7th century BCE. Lyres with tortoiseshell soundboxes first appear in paintings on Attic late Geometric period vases (late 8th and early 7th centuries), in scenes showing a lyre player among rows of dancers carrying leafy branches, men to one side, women to the other. Among the small lead votive objects of the 7th century discovered at Sparta are small lyre-playing figures, and one object representing a lyre alone is large enough to show the tortoiseshell markings and the remains of seven strings. Ivory or bone objects that may be plectra were found at the same site.

The Homeric hymn *To Hermes* (dating from the period *c*650–400 BCE) describes how the clever Hermes made the instrument from a mountain tortoise, cleaning out the shell, making holes in it for measured lengths of cane (?the bridge), stretching oxhide over it, fitting the arms in place and joining the crossbar to them, stretching the seven strings of sheep gut over it, and finally plucking them with the plectrum to try the instrument out. Vase paintings from 6th-century Athens and Corinth show the chelys lyra in scenes of processions, banquets, wine drinking, and dancing at wedding and victory celebrations. Theseus held the chelys lyra while celebrating with his companions his victory over the Minotaur (in 5th-century paintings he is rarely seen with the instrument, but centuries later the astronomer Hyginus reported that the constellation Lyra represents the lyra of Theseus,

Three Muses playing lyra (right), kithara (centre) and harp: detail of a volute cup (end of the 5th century BCE*), by the Sisyphus painter, from southern Italy (Staatliche Antiksammlungen und Glypothek, Munich)*

whose own constellation is nearby). Lyres were not used for funeral laments and do not ordinarily appear in such scenes, but in one painting a lyre player stands between two sirens, symbols of both music and death. In other vase paintings the lyre itself seems to symbolize these things: it hangs on the wall above a bed on which lies a shrouded figure, a bearded man with a wreath on his head; in another painting it is held by Nereids mourning over the body of Achilles. Later in the 5th century the lyre appears in other kinds of scene: a painting of a sacrificial procession, and a scene showing Paris interrupted in his solitary lyre playing by the three goddesses whose beauty he must judge.

Writers in the 5th century often mentioned the lyre in connection with schoolboys and their teachers, for the lyre also symbolized education. Singing to the lyre was thought to promote a sense of justice, moderation and courage. The instrument shown in schoolboy scenes on vase paintings is nearly always the chelys lyra; it also figures frequently in depictions of drinking parties, both the energetic *kōmos* ('revel') and the more sedate symposium. Women often played the chelys, as scenes of wedding preparations and other household occupations attest; but artists seldom chose to depict mortal women as lyre players until after about 475 BCE.

The image of the chelys lyra, which is easy to outline and to recognize, is often substituted for that of the other lyres in works of art, especially in small or sketchy representations; for example, it may take the place of the kithara or Thracian (Thamyras) kithara in various mythological scenes. In scenes of one type it is perhaps a metaphor for sudden death: Eos, winged goddess of dawn, seizes or pursues a youth (Tithonus or Cephalus); the youth struggling to elude her carries a lyre that may, as in earlier paintings, symbolize both his musical activities (as a schoolboy) and his death. The chelys lyra may also be a symbol of love and passion, for in many paintings Eros is shown playing the lyre. But in depictions of the Muses where each plays a different instrument (auloi, crotala, syrinx, barbitos and phorminx, as well as the chelys lyra), it is a symbol of creative inspiration (see illustration).

Although kithara players often wore a distinctive costume, players of the chelys lyra had no special garb; in fact, male players, especially at a party, may have worn nothing at all, except perhaps a short cloak draped over their shoulders. In other contexts the player may have worn a long mantle wrapped around his chest and over his shoulder when standing, or around his lower body while sitting. Schoolboy musical contestants wore the long mantle and had wreaths of flowers or leaves (laurel or possibly olive) on their heads; those without wreaths may have had cloth fillets tied around their heads.

A player of the chelys lyra might perform while standing, sitting, reclining or walking, as the situation dictated; the instrument was held at an angle to the body, with the top tipped out, usually at an angle of approximately 30°. The method of playing the instrument was generally the same as that adopted by the kitharist (*see* KITHARA). In most representations of actual playing, the performer is shown holding out the plectrum well beyond the strings, as though just completing a sweep of the strings with his right hand. The left-hand positions suggest that the player is using some fingers to dampen the strings or perhaps create harmonics (the points touched would be of no use in altering the basic pitches), or is using the thumb and sometimes another finger to pluck the strings. The artists seldom bothered to show explicitly that the player was singing, but it seems likely that the chelys lyra was used mostly to accompany singing or the playing of the auloi. Only a few vase paintings show the chelys lyra and any other instrument being played simultaneously; the auloi appear most often with the lyre, typically in processions or dance scenes.

When tuning the lyre, the player tested the sound by plucking the strings with his left hand. His right hand grasped one of the leather strips (*kollopes*) wrapped around the crossbar over which the strings were wound. Whether this procedure served simply to bring the strings into better tune, or whether it might also have been used to change strings to new pitches (i.e. to change *harmoniai*), is not known.

The chelys lyra was on average half as long (tall) again as the player's forearm, elbow to second knuckle (even by this relative measure, the instruments played by children were unusually small), and usually a little over half as wide as it was tall; the taller the lyre, the less the width in relation to height. The soundbox seen in Athenian vase paintings is often not the round or oval shape of the natural tortoise shell; the shell was apparently cut away on both sides above and below the the area where the carapace is joined to the tortoise's 'belly' shell, perhaps to imitate the shape of the skull of an animal with lyrate horns (from which lyres of earlier cultures known to the Greeks were made).

A thin hide over the underside of the shell (now the belly of the instrument) was pulled tight over the edge and held by cord or pins through holes in the edge of the carapace. The bridge, just below the centre of the soundbox, is often shown with feet that rest on the hide and are no doubt supported beneath it by the belly shell or by the lengths of cane mentioned above. The arms have a shape reminiscent of antelope horns, of which they may at one time have been made. They enter the soundbox through the hide at an angle, so that they lean forwards somewhat. At the crossbar the arms are partly cut away and a notch made in which the crossbar rests, with leather-and-pin *kollopes* around it to secure each string. At their lower end the strings are attached to a fastener similar to that of the kithara. The plectrum of horn used to strike them is attached to the base of the outer arm.

Representations of the chelys lyra in the 4th-century, although they are comparatively few and come from a wide geographical area (including eastern Greek settlements and Greek colonies in southern Italy), show that it continued to be constructed and used in much the same ways. In the Hellenistic and Roman periods the image of the chelys lyra can be found on coins and relief ware as well as in wall paintings, but it is seldom seen being played; the image may have been retained mainly as a symbol of music.

MARTHA MAAS

Lyra (ii) [lira]. A term used for various instruments, most often string instruments. The terms 'lyra' and 'lira' in medieval and Renaissance writings designated various string instruments (for instance LIRA DA BRACCIO, LIRONE and LYRA VIOL) as well as the ancient Greek lyra (*see* LYRA (i)). Tinctoris (*c*1487) referred to the lute as 'lyra', and Virdung (1511) used the term for the hurdy-gurdy, which is still called 'lira' in Ukraine, Belarus and Sweden (where it is also known as 'vevlira'). Martin Gerbert (*De cantu*, ii, 1774, pl.5), on the basis of medieval manuscript sources since destroyed, gave an illustration of a rebec-like instrument labelled 'lira', and a similar instrument is called LIRA (*see* LIRA (ii)) in modern Greece. The Italian term LIRA ORGANIZZATA has been applied sometimes to an ordinary hurdy-gurdy, sometimes to that instrument in a late 18th-century French form with added organ pipework and bellows, and hence (like the term 'hurdy-gurdy' itself) to barrel organs. In bands a BELL-LYRA is a portable glockenspiel.

Lyra [leero, leerow, liera, lyro] **viol.** A small bass VIOL popular in England during the 17th century. As an instrument it differed little from the standard consort bass viol. Its importance rests on the large, specialized and musically valuable repertory which was written for it.

Of great historical significance is the position which the lyra viol holds as the connecting link between two aesthetic ideals of instrumental sound and function. It could approximate to the polyphonic textures and self-accompaniment capabilities which helped to raise continuo instruments such as the harpsichord and lute to a high level of esteem during the late 16th and early 17th centuries. On the other hand, it could also produce a rich singing line, the growing taste for which led to the predominance of the violin and the solo voice by the beginning of the 18th century. During its period of popularity the lyra viol successfully performed both roles. At the beginning of the 17th century Hume wrote (to the chagrin of Dowland) that the viol could produce equally well the musical excellencies of the lute. By the turn of the century Roger North was writing that 'all the sublimitys of the violin' were to be found in the music of the viol.

1. Structural characteristics. 2. Sources and nature of the repertory. 3. Notation. 4. Tuning. 5. Ornament signs.

1. STRUCTURAL CHARACTERISTICS. Structurally, differences between the lyra viol and other members of the viol family are neither distinct nor decisive as identifying factors. There were some attempts (but with no lasting influence), particularly during the 17th century in England, to provide the lyra viol with SYMPATHETIC STRINGS. Recent research, however, suggests that a lyra viol with sympathetic strings may have been the evolutionary predecessor of another 17th-century instrument, the baryton (*see* BARYTON (i)). There exists a description of such an instrument played in 1640–41 by the English lyra viol player Walter Rowe (1584/5–1671) who lived in

Mufick's Recreation
ON
The VIOL, Lyra-way:
Being a choice Collection of *LESSONS Lyra-way*. To which is added a *PREFACE*, Containing fome Brief *Rules* and *Inftructions* for young Practitioners.
The Second Edition, Enlarged with Additional New LESSONS.
London, Printed by *A.G.* and *J.P.* for *J.Playford*, and are to be Sold at his Shop near the *Temple* Church. 1682.

1. Title-page of 'Musick's Recreation on the Viol, Lyra-way' (London: John Playford, 4/1682)

Germany from 1614. It is possible that he invented the baryton by having a rank of thumb-plucked strings added to a lyra viol (or, perhaps an existing rank of sympathetic strings converted for this purpose). John Playford (*A Brief Introduction*, 1667) described the lyra viol as the smallest of three kinds of bass viol – consort bass, DIVISION VIOL, lyra viol. From Christopher Simpson (*The Division-Violist*, 1659) we learn that the strings of a lyra viol were lighter and the bridge less rounded than those of the consort bass and division viol. The strings of the lyra viol were fitted more closely to the fingerboard than were those of the consort bass.

It seems clear that although an instrument called lyra viol did exist it was nothing more than a bass viol of small dimensions with some quite minor peculiarities of adjustment. One also finds that a performer in the 17th century, such as Pepys, would not have hesitated to play lyra viol music on any bass viol which happened to be ready at hand. It is, therefore, more to the point to speak of a tradition of playing the viol 'lyra-way' rather than one of playing the lyra viol (fig.1).

2. SOURCES AND NATURE OF THE REPERTORY. There are 18 English sources of printed music for lyra viol, issued from 1601 to 1682. More than 75 manuscript sources also exist of music in tablature for viol from various countries, some mere fragments, others large anthologies. Included in this impressive heritage are works by such notable composers as Coprario, Jenkins, Simpson, Charles Coleman and William Lawes. Fancies and sectional dance types of the period are found. The sources include pieces for one lyra viol, ensemble music for two or three lyra viols, for lyra viol with one or more other instruments, and lyra viol accompaniments for songs. Although some parts are melodic and others chordal, the most characteristic texture of lyra viol music is polyphonic. It is similar to lute music with regard to the free appearance and disappearance of voice parts (*Freistimmigkeit*).

The development of a polyphonic style of music capable of being performed on a bowed viol having a rounded bridge can be traced through extant music back to Ganassi in mid-16th-century Italy. A literary description of the performance of such music, however, goes back as far as Tinctoris's treatise *De inventione et usu musicae* in the late 15th century. The term lyra viol seems to have been adopted in England around the beginning of the 17th century as a result of the notion (expressed by Ganassi) that this way of playing the viola da gamba was similar to the technique of the LIRONE.

3. NOTATION. With the exception of one set of manuscripts (*GB-Ob* Mus.Sch.D.233 and D.236), all lyra viol music is in TABLATURE. The notational symbols are in the style of so-called French lute tablatures, which use a series of letters in alphabetical order to indicate the fret at which any given string is to be stopped (*see* NOTATION, fig.105). Some non-English viol tablatures, on the other hand, are based on systems other than the French. Ganassi (*Regola rubertina*, Venice, 1542–3), for example, used Italian tablature, with numbers instead of letters, the lowest line of the staff representing the highest string, and

2. Lyra viol (supposed) by John Rose, London, 1598 (Ashmolean Museum, Oxford)

Gerle (*Musica teusch*, Nuremberg, 1532) combined letters and numbers in his German tablature.

Since the lyra viol is played with a bow there are certain characteristic differences between its music and that intended for plucked instruments such as the lute. Chords, for instance, in lyra viol tablature always call for adjacent strings only, since it is impossible for the bow to leave out intervening strings. The peculiarities of the bow as sound generator may also be responsible for the more or less frequent appearance in lyra viol music of unison double stops. Sometimes this seems to result from the necessarily close harmonic formations which cause contrapuntal lines to come together at the unison when they might otherwise form an octave. It is also possible that the motivation for unison double stops might have sprung in part from a desire to imitate on a viol the 'unison quality' produced by the lute due to its double courses of strings.

4. TUNING. Perhaps the most curious aspect of the lyra viol tradition is the degree to which variability of tuning was extended. The bowing limitation, which restricts the playing of intervals and chords to adjacent strings only, could be ameliorated by devising tunings that would provide the most important notes of a given key as open strings. Thus, it became the practice to play groups of pieces in one or two closely related keys using the same tuning for all. Nearly 60 tunings in use during the 17th century have been uncovered so far, nine of which have turned up only in non-English sources. With the exception of one seven- and three four-string tunings these all represent variations on the tuning of the standard six strings (for an example, *see* HARP WAY. With the printed sources of lyra viol music as a guide we can see that only three or four tuning variants had achieved popularity during the first 15 years or so of the 17th century. By the third quarter of the century, however, variant tunings had proliferated to such an extent that Thomas Mace could write in 1676, 'The Wit of Man shall never Invent Better Tunings ... for questionless, All ways have been Tryed to do It' (*Musick's Monument*).

Some modern scholars adopt a distinction between lyra viol music (tablature notation requiring a variant tuning) and music for bass viol played lyra way (tablature notation requiring the standard consort viol tuning) as was done, for instance, by Tobias Hume, the 17th-century author of two printed books of lyra viol music. This practice has little to recommend it. The standard tuning possessed no quality requiring a different sort of instrument than that which might be used to play music arranged for one of the numerous other tunings. Nor is there any significant distinction of compositional styles among pieces in tablature based on one or another of the tunings. The fact is that these terms were not used with a consistent meaning during the 17th century. Authors like Robert Jones and John Moss used the term bass viol for tablature requiring variant tunings while Sir Peter Leicester, a person noted for his interest in etymology and careful scholarship, used the term lyra viol for tablature requiring the standard tuning. Hume's apparent attempt to distinguish between two instruments can probably be explained as a simple reflection of common reality. That is, if a person had access to only one bass viol it would be used to play both consort and lyra viol music. On the other hand, if a person owned two bass viols one could be reserved for consort music in the standard tuning while the other could be retuned as required by the demands of the lyra viol repertory. In this latter case, however, it is unlikely that the lyra viol would be used to play tablature requiring the standard tuning. There would be no need to take the trouble of retuning the lyra viol when the consort bass was available to make that task unnecessary.

5. ORNAMENT SIGNS. A number of manuscript sources of lyra viol music are important repositories for signs of ornamentation. Four of them (*GB-Lbl* Add.59869, *Lbl* Eg.2971, *Mp* 832 Vu51, and the Mansell tablature, *US-LAuc*) contain valuable tables of ornament signs. Unfortunately, their meaning is often ambiguous and changeable not only from source to source but even within a given source. One ornament or 'grace' which came to be almost a trade mark of lyra viol playing was the 'thump'. This refers to the practice of plucking open strings with the fingers of the left hand. The thump was usually used in conjunction with certain tunings such as those which provided triads among the open-string pitches. Perhaps it was from this practice that the idea of the left-hand thumb plucked strings of the baryton arose. In some cases the player is instructed to pluck the strings with the fingers of the right hand, thus allowing for the use of stopped as well as open notes. There is also evidence that the viol was sometimes held on the lap and the strings plucked as though it were a lute. The earliest printed source calling for plucking dates from 1605 (Tobias Hume, *The First Part of Ayres*). This is some years before Monteverdi's *Combattimento di Tancredi e Clorinda* (1624), frequently cited as the earliest source of pizzicato. Hume's book also contains the earliest of a number of examples in the lyra viol literature of *col legno* playing.

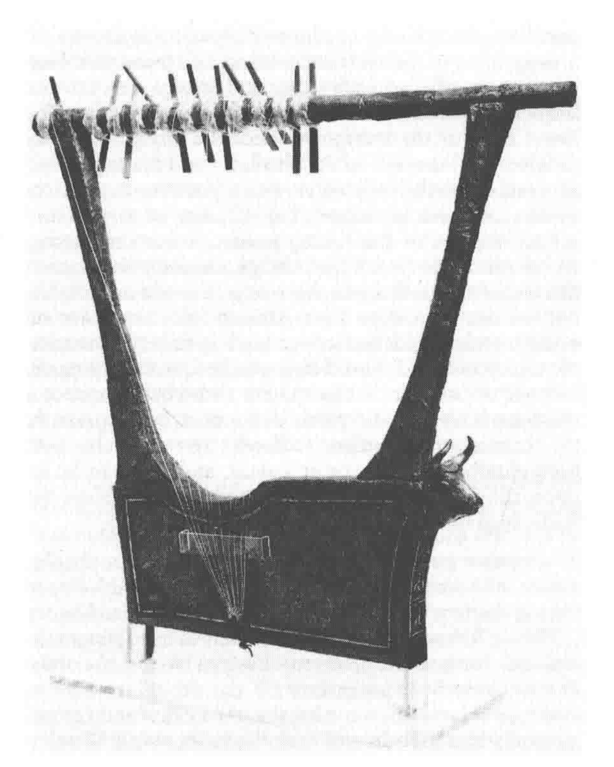
FRANK TRAFICANTE

Lyre (from Gk.; Lat. *lyra*). A string instrument whose strings are attached to a yoke which lies in the same plane as the soundtable (unlike a harp, whose strings lie on a plane at right angles to the soundtable) and consists of two arms and a crossbar. It is this characteristic by which Hornbostel and Sachs, in their classification system of 1914, distinguished lyres from other types of string instrument. Ancient lyres and modern African types, which are more-or-less 'stuck together ' from separate pieces, are stabilized through the tension of the taut strings. This is less true of medieval north European lyres, some of which have fingerboards, nor of the new types of lyre developed since 1926 (see belos, §4): these types are built with a more rigid frame.

The earliest known examples of lyres date from the 3rd millennium BCE, and have been recovered from sites in Mesopotamia. Lyres appeared in several Mediterranean lands in antiquity and subsequently spread throughout medieval Europe. There is also evidence of lyres being played in the East African kingdoms of Kush (*c*650 BCE–325 CE) and Aksum (*c*100–350 CE). With a few exceptions this instrumental tradition has survived unbroken only in modern Ethiopia and neighbouring countries. From its Hellenic associations the lyre has often symbolized music in general (and lyric music in particular) in Western art and literature since the Renaissance.

Most lyres are plucked; for medieval bowed lyres, *see* ROTTE (ii). For further discussion of the lyres of the classical world *see also* LYRA (i) and related article.

1. General. 2. Ancient lyres: (i) Flat-based (Eastern) lyres (ii) Round-based (Western) lyres. 3. Modern Africa. 4. Modern lyres.



1. GENERAL. Hornbostel and Sachs distinguished between bowl lyres and box lyres, according to the shape of the resonator: bowly lyres have a natural or carved-out bowl and usually a membrance belly; box lyres have a resonator that is a built-up wooden box and usually a wooden soundboard. Two further distinctions between lyres should also be made because of their importance in regard to the position of the player's hands during performance: between a symmetrical and an asymmetrical arrangement of the arms and strings, and between strings that run parallel to each other and strings that fan out from their holder at the lower rim of the resonator. The lower ends of the strings are tied to a string holder or tailpiece near the base of the resonator and the upper ends are fastened to the yoke via various types of tuning devices similar to those on harps. The number of strings and certain aspects of the tuning pattern affect the playing technique. Some lyres have a bridge, almost in the manner of a violin bridge, that lifts the strings clear of a soundtable; but on many modern East African lyres there are no bridges and the plucked strings buzz against the soundtable (made of lizard skin). Playing technique, including the manner or holding the instrument and whether or not a plectrum is used, is also partly determined by the presence or absence of a bridge. Different lyres can be held horizontally, vertically or at a slant, and they can be set upon the ground, placed on a knee, rested against the body, held under an arm or supported by a strap.

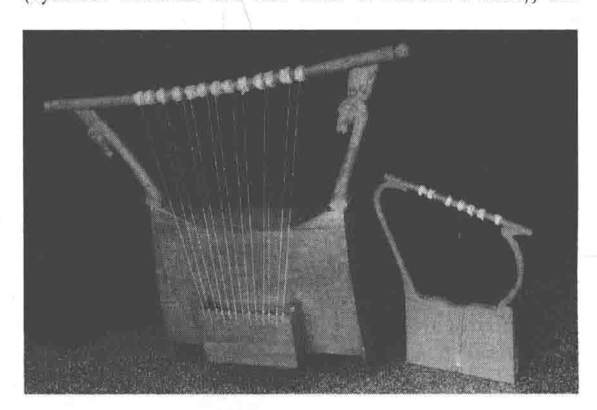
2. ANCIENT LYRES. Iconographical and archaeological evidence shows that many forms of lyre were developed during the first two millennia of the instruments' history (*c*2700–*c*700 BCE), but all fall into well-defined geographical and chronological patterns. Eastern lyres, those of the Fertile Crescent (Mesopotamia – the site of the earliest evidence of lyres – Syria, Anatolia, the Levant and Egypt), generally had soundboxes with flat bases, while Western lyres, those of the Aegean, Greece and Italy, had round bases.

(i) Flat-based (Eastern) lyres. Four main types of ancient eastern lyre may be distinguished: bull lyres, thick lyres, thin lyres and giant lyres. Bull lyres, decorated with one or more bull heads, are known to have existed between 2700 and 2000 BCE (fig.1). They flourished in Mesopotamia and spread to adjacent regions in the most easterly part of the Fertile Crescent (*see* IRAN, §I, 2(ii)).

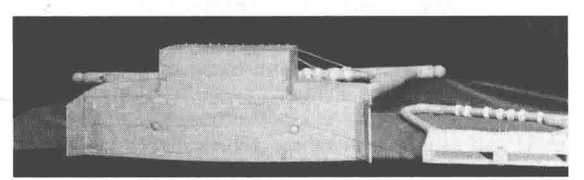
Fig.2 shows reconstructions of two extant flat-based lyres, one with a deep soundbox, the other with a shallow one. Although the originals were both found in Egypt, their outlines are typical of those found all over the eastern region. They demonstrate that flat-based lyres may be classified according to the depth of their soundboxes, since this distinction also affects several other significant details of construction. The fact that both are asymmetrical undermines an older classification scheme devised before three-dimensional structures had been studied. Lyres with thick soundboxes had more strings, a large 'box-bridge' (which also acts as the string-holder), and animal decorations on the arms or yoke. They were similar to bull lyres in size but lacked bull heads. The soundhole was cut in the belly behind the box-bridge. The clearest evidence for these comes from Egypt (2000–100 BCE; fig.3*a*) and Anatolia (*c*1600 BCE). Some large Mesopotamian lyres of 1900–1500 BCE (Lawergren, 1997, fig.21) may also constitute a transitional form of this type. Both thick lyres and bull lyres were plucked by hand without a plectrum; both had wedges at the bottom of the right arm, but the Mesopotamian ones lacked box-bridges.

On thin lyres the base of the resonator was left open, thus acting as a sound hole (further differences are shown in Lawergren, 1993, Table 1). They are first known to have existed in Syria in about 2500 BCE, but were shortly thereafter known throughout the Fertile Crescent. Their

1. Silver bull lyre, found in Ur, Mesopotamia, 2450 BCE *(British Museum, London)*



form remained remarkably unchanged over several millennia. The instrument was supported by means of a sling around the player's left wrist and the base of the lyre's right arm (fig.3*c*). It was played with a plectrum (figs.3*b*, *e* and *f*) that was probably struck across the strings, as it was on later Greek lyres. The arms often bulged outwards asymmetrically (figs.3*b* and *d*). On Egyptian lyres they may resemble a figure 7 and a reversed figure 5; this detail was still present on a late lyre (Samaria, *c*375–*c*323 BCE; fig.3*g*) where it was probably an archaizing element. Besides lyres with curved arms, simpler types were also known (figs.3*e* and *f*). These had straight arms and a perpendicular yoke which formed a rectangular outline, symmetrical in shape or nearly so. Such lyres originated in about 700 BCE in northern Syria or Phoenicia. In certain areas the term *kinnarum* was applied to thin lyres from about 2320 BCE. The biblical *kinnor* was only a late form (1st millennium BCE onwards (*see* BIBLICAL INSTRUMENTS, §3(iv); see also, Lawergren, 1998, pp.58–9).



Giant lyres, larger than standing players and usually played by two people, flourished in Egypt during the reign of Akhenaten (*c*1350 BCE). They were also depicted in the hands of Caananites, but no giant lyres are known from the Levant (*see* JEWISH MUSIC, §II, 2, esp. fig.4). However, there are magnificent examples in Anatolia (*c*1600 BCE fig.3*h*) and Mesopotamia (Uruk, *c*2500 BCE). A giant lyre depicted in Susa (*c*2500 BCE) probably only had one player, as had large Hellenistic lyres in Egypt.

(ii) Round-based (Western) lyres. Like the thin flat-based lyre, the round-based lyre arose in northern Syria and southern Anatolia (figs.4*a* and *b*). However, it virtually died out there (*c*1750 BCE) but reappeared later in the West, where it was the only type of lyre between 1400 and 700 BCE (figs.4*c* and *d*). After 700 BCE lyres with flatter bases began to appear in the Western corpus (figs.4*e* and *g*) but the majority of lyres painted on vases from 800 to 600 BCE were round-based until the Hellenistic period (from about 330 BCE), when few traces of the former segregation remained. Presumably the expansion of the Assyrian and Hellenistic empires and increased trading contributed to the mixing of styles. Western lyres often had ornamental curved parts at the arms (figs.4*c* and *d*). In the earliest instances these may have represented animal parts (as in fig.4*c*) but, when the feature re-emerged on concert kitharas, they probably had a more functional role, acting as springs and hinges that enabled the pitches of the strings to be changed quickly while the instrument was being played.

Several distinct types of Western lyre are known to have existed. Homer used the terms *phorminx* and *kitharis*; some modern scholars have therefore adopted the former to designate any round-based Aegean lyre contemporary to Homer (8th century BCE) and to the age he described in the *Iliad* and *Odyssey* (12th century BCE, a time when no lyre names are known from contemporary documents; *see* PHORMINX). This usage fails to recognize distinct subtypes such as the cylinder kithara, and the fact that the lyres from these two periods look very different (compare figs.4*c* and 5*f*).

The cylinder kithara, as its name suggests, had cylinder-like (and functionless) features at the junction of the arms and the body (fig.5). It was unique in many ways. It first appeared in Ionia (*c*550 BCE) and spread to Athens and Etruria; in the latter region it survived until about 300 BCE. It was also known in the Hellenistic world (see Lawergren, 1993, fig.8). Its shape and construction is known from stone reliefs and vase paintings (*see* ETRURIA, fig.1). It was the dominant form of lyre in Etruria, whereas the concert kithara was the most prestigious chordophone in Athens. The cylinder kithara was earlier called the phorminx and cradle kithara. Neither term is adequate, the former on account of its Homeric associations (cylinder kitharas did not exist in Homer's time), the

2. Reconstruction by Bo Lawergren of a thick and a thin lyre, after examples excavated near Thebes and now in Berlin (c700 BCE*) and Leiden (c1510* BCE*): (a) plain view; (b) from the underside*

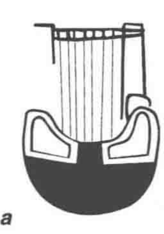
3. Lyres: (a) thick lyre, Egypt, 300–30 BCE; *(b) thin lyre, Thebes, 1400* BCE; *(c) thin, ?Phoenicia, 900–700* BCE *(d) thin, Idalion, Cyprus, 850–825* BCE; *(e) thin, ?Pheonicia, 720–680* BCE; *(f) thin, Zincirli, southern Anatolia, c700* BCE; *(g) thin, Samaria, c375–c323* BCE; *(h) giant, Inandık, Anatolia, c1600* BCE

latter being too general (the 'cradle' shape of the base is a feature common to all round-based lyres, not just one particular type).

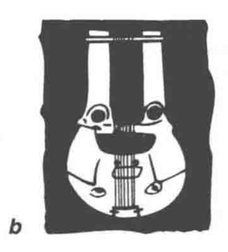
The appearance of the impressive, flat-based, concert kithara (*c*625–*c*400 BCE; for illustration and further discussion, *see* KITHARA) signalled the end of East/West segregation. Its complex arm structure has received little attention, but the curved parts may well have been tuning devices (Lawergren, 1996, fig.14). Its arm would probably pivot slightly sideways, thereby permitting the yoke to move up and down. In this manner the strings could be tightened or slackened and the pitches raised or lowered.

The lyra or chelys was a round-based lyre confined to the West. It was probably not conceived until the 1st millennium BCE (fig.4*g*); it remained popular through the Roman period and was often shown on late mosaics (for further discussion of this type of lyre, *see* LYRA (i)).

3. MODERN AFRICA. In the present day, lyre playing is confined to the eastern and northeastern regions of Africa, and to the coastal regions of the Arabian Peninsula. With a few exceptions (e.g. in northern Europe) this instrumental tradition has survived only in these areas. The lyre is an integral part of a variety of musical contexts and traditions, in spite of its relatively restricted range of distribution: it is played by members of the Nilotic, Cushitic, Semitic, Nubian and Bantu language groups. Its geographical distribution covers an area along the Nile from Egypt in the north to Lake Victoria in the south, including parts of Ethiopia, Somalia, southwest Kenya, northern Tanzania, Uganda, and the north-east of the Democratic Republic of Congo. Outside of Africa, the lyre can be found in the coastal areas along the Red Sea, the Arabian Sea, and the Persian Gulf (Braune, 1997, pp.138–9, 183–4; Wegner, 1982). The lyre, particularly the large ṬANBŪRA (fig.6), which is placed on the ground when played, was brought to the Arabian Peninsula with the slave trade, which disseminated various features of African culture along the sea trade routes as far as the Indian subcontinent. A small lyre (SIMSIMĪYYA) is played by Arabian fishermen and sea merchants in the Suez Canal zone and on the Sinai Peninsula at the Gulf of Suez (see Shiloah, 1972; Braune, 1992). The maritime trade on the Red Sea, which stretches far back in history, makes an exchange of cultural traits between the south of the Arabian Peninsula and coastal Egypt seem probable. The *simsimīyya*, for example, is also played by Yemeni musicians (Braune, 1997, pp.48–9).

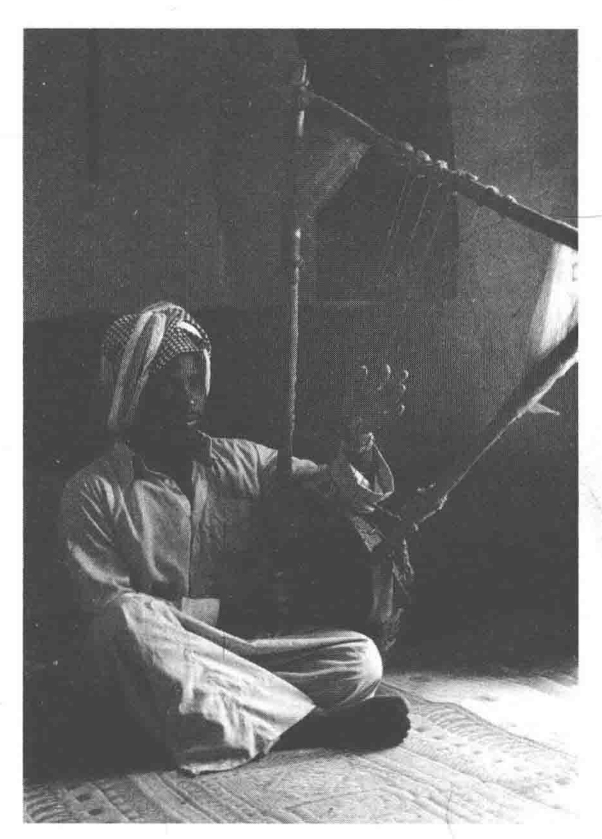


It is impossible to reconstruct all the stations the lyre took during its millennia-long journey southwards from North Africa along the Nile. At some stations its path is indicated by iconographical evidence (rock paintings, frescoes). Nubia will also have played an important role as a mediator between the Middle East and East Africa. The name of the modern form of the Nubian *kisir* lyre



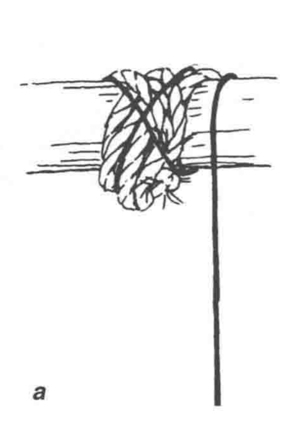
4. *Round-based lyres: (a) Kultepe, Anatolia, c1900–c1800 BCE; (b) ?Mardin, south-east Turkey, c1900–c1750 BCE; (c) Ayia Triada, Crete, c1400–1300 BCE; (d) Kaloriziki, Cyprus, c950–900 BCE; (e) Kom Firin, Eygpt, c900–c700 BCE; (f) Athens, c750 BCE; (g) Karatepe, Anatolia, c700 BCE*

denotes at least a linguistic proximity to the ancient Greek *kithara* (see §2 above). However, it should be noted that the majority of lyres in ancient Orient were asymmetrical box lyres; in present-day Africa bowl lyres with symmetrical arms (but often with the strings arranged asymmetrically within the frame) are the rule. Among the few modern African lyres with a box resonator are the large Ethiopian *beganna* of the Amhara (*see* ETHIOPIA, figs.1 and 2) and the *simsimīyya* of the Suez Canal egion. It seems very likely that Amharic Ethiopia was an important source for the distribution of the bowl lyre (known in Amhara today as the *krar*) to other parts of East Africa. This lyre could have come to Amhara from the Kingdom of Aksum, being passed on from there to western Kenya, becoming established relatively late in the 17th or 18th century among the Nilotic- and Bantu-speaking peoples in southern Uganda (Kubik, 1996, pp.1042–6). Axum (Aksum) in northern Ethiopia is said to be the first place where the box lyre found its stand on the African continent after Israelites, members of the entourage of Menelik I (the legendary son of Solomon and the Queen of Sheba) had brought the instrument there from Jerusalem (Kebede, 1982, p.64).

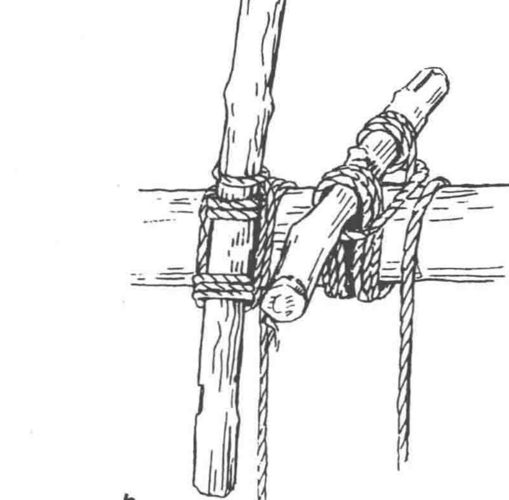


Two basic techniques of string attachment to the yoke can be differentiated. In one method, gut or sinew strings, strips of cotton cloth, banana or bark fibres etc. are bundled together with the string cord around the yoke, forming bulge wrappings (fig.7*a*). This method can be found for instance on the *kisir* in Nubia, the *ṭumbūra* in Egypt, Sudan and Somalia, and the *endongo*/*entongoli* of the Ganda and Soga in Uganda. In the second method, tuning levers are bound together with the string wrappings diagonally across the yoke bar, as on the *beganna* and the *krar* of the Amhara (fig.7*b*). Bulge wrappings were used on Sumerian and ancient Egyptian lyres, and some kinds of Sumerian lyres had tuning levers. Pegs stuck through

5. *Cylinder kitharas: (a) and (b) Etruria, 550–300 BCE; (c) Athens, 520–430 BCE*

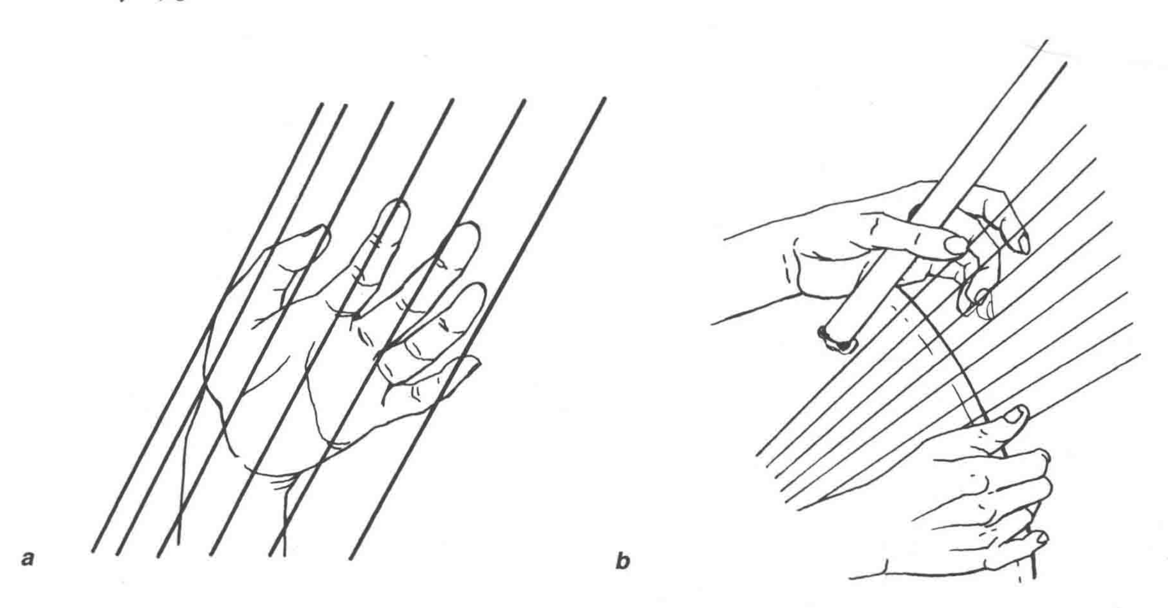


6. *Lyre player with large ṭanbūra, Basra, southern Iraq*



the front of the yoke bar are common on modern African lyres, but within the lyre family as a whole they are more of an exception.

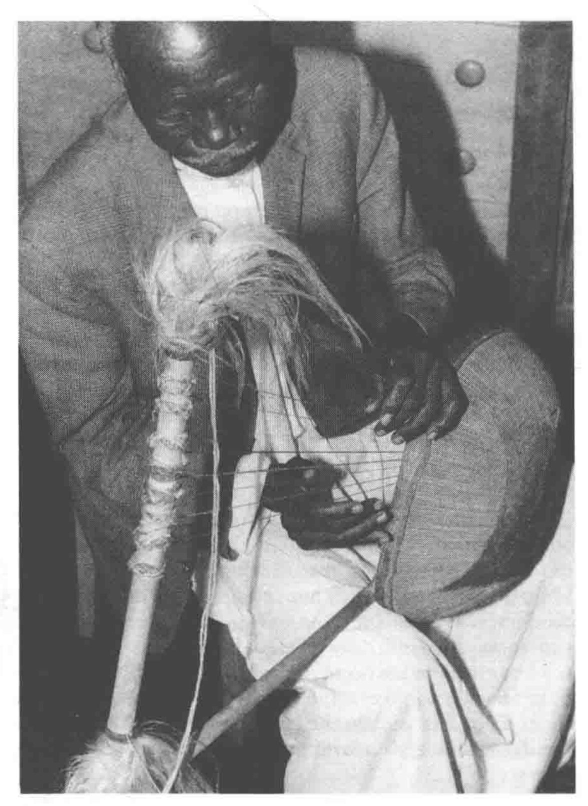
The two basic techniques of plucking the strings, i.e., with a plectrum or with the fingers, are known in contemporary Africa. In the northern and northeastern parts of the main distribution area (Egypt, Sudan, Ethiopia and the coast of Somalia), all the strings are plucked indiidually or are strummed simultaneously over the resonator skin with a plectrum held in the right hand. At the same time, the left-hand fingers, and sometimes the ball of the hand as well, are held against the vibrating strings from behind, thus muting them (fig.8*a*). A clear tone emanates only from that string from which the musician raises a finger. If all strings are hit simultaneously by the plectrum in a back and forth movement, a constant rhythmic accompaniment from the muted strings joins the melodic line that arises from the succession of undamped strings. Lyre players in the west-Asian parts of the lyre area practise the same mode of sound production (fig.6). Ancient Greek musicians used a similar technique on the *kithara*. However, the Gusii, Luo, Ganda (fig.9), Soga and Gaya (fig.10) (among others) in southwest Kenya, southern Uganda and northern Tanzania use a finger plucking technique. Here, the group of strings (usually a total of eight) is subdivided into two separate playing areas for the right and left hands respectively (fig.8*b*). (Defining separate playing areas for each hand is also common in Africa for harps, lamellophones and xylophones.)



Lyres that are struck with a plectrum usually have a bridge, while those instruments plucked with the fingers usually lack one. The strings of the bridgeless instruments lie either directly on the membrane or on decorative parts glued to the surface of the membrane, or else they are adjusted so precisely that they vibrate against the membrane once they start to swing. The result is that the bridgeless lyre's characteristic timbre is coloured characteristically by a loud buzzing as the strings rattle against the membrane. The tunings of the strings can show a linear or non-linear pitch arrangement (for an example of the latter, see fig.11).

The resonator can be constructed from a number of natural materials (e.g. wood, clay, gourd, tortoiseshell) or from various industrial products (enamel bowls, bowls used for eating, frying pans, washing tubs etc.). The Bisharin in Upper Egypt reportedly made the bowl of a

7. *Two techniques of tying strings: (a) bulge wrappings; (b) tuning levers (from Wegner, 1984, p.104)*

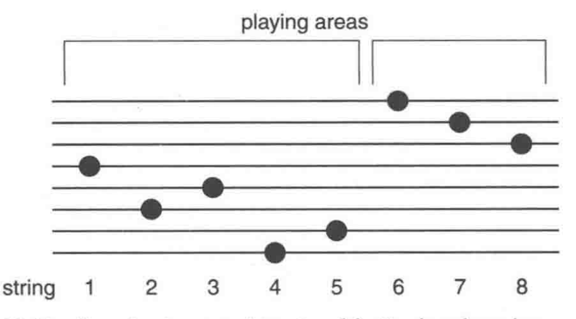


8. Two techniques of sound production on the endongo lyre of the Ganda, south Uganda: (a) strings muted by fingers from behind, while plectrum strikes all strings simultaneously; (b) single fingers of both hands: the right thumb playing strings 1 to 5, the left thumb and forefinger playing strings 6 to 8, with separate playing sections for right and left hands (Wegner, 1984, p.106)

bāsān-kōb out of an old British military steel helmet. Normally the membrane is made by pulling the skin of a mammal or reptile over the opening of the resonator. Westermann described the resonator of a *tom* lyre of the Shilluk being 'made by splitting in the middle a small section of a log and hollowing out the flat side a little. A piece of raw cow hide is stretched wet over this, and the flat side becomes the face of the instrument' (Westermann, 1912, p.xxxii). The Ganda and Soga in southern Uganda use lizard skin, the Nubians in northern Sudan camel or cow hide, and the Gusii and Pokot in Kenya prefer goat or sheep skin. The small Egyptian *simsimīyya* lyre is an exception among African lyres in that the cover of the resonator can be wooden.

Modern materials are also used for strings. African lyres were normally strung with twisted sinew or gut, but today wire or nylon are preferred because they are more easily acquired and more durable. Some lyre players are very resourceful in finding cast-off items to use for strings. For example, Gusii and Luo musicians use the string of fishing nets and tennis rackets for their instruments (Varnum, 1971, p.245). Ganda musicians utilize different materials for each of the two playing areas (i.e. those of the right and left hand) for the sake of the contrast of timbres (see fig.9): twisted sisal fibres for the three high notes, and cow or goat sinew or sheepskin for the lower five strings. In order to make the strings smooth, the Amhara rub the *beganna* strings with garlic, and Ganda musicians rub those of the *endongo* with ashes. The *endongo* strings are waterproofed with castor oil (Trowell and Wachsmann, 1953, pp.396, 403).

African lyres are used mainly for song accompaniments. The human and the instrumental voices sound primarily in unison. About 1980 the number of strings of the *simsimīyya* was increased to 15 or 16, distributed over three octaves, in order to do justice to the musical range of famous Egyptian singers whose songs are nowadays included in the repertoire of *simsimīyya* players (Braune, 1992, p.90). Next to the vocal line there can also be a complex polyrhythmic accompaniment, a musical structure facilitated by the separation of the playing areas and the interlocking of the right and the left hands. The lyre is used less often for solo instrumental renderings, although it is sometimes part of larger instrumental ensembles. In the *omuwanjo gumu* ('ensemble') instrumental group of



9. Evaristo Muyinda, a Ganda, playing the endongo lyre

10. Lyre players, Gaya, Tanzania (Weiss, 1910, p.234, fig.178)

the Ganda, the *endongo* lyre plays a leading part next to two spike tube lutes (*endingidi*), a notched flute (*endere*) and a drum. A similar ensemble is known among the neighboring Basoga (Trowell and Wachsmann, 1953, p.404). In Egypt today the *simsimīyya*, choirs of singers and percussion form one large ensemble; the lyre is electrically amplified . Ensemble forms in which Western popular instruments (accordion, keyboards, violins, trumpets, bongos) are played together with the lyre are known in the Hadramaut and along the coast of the Red Sea (Braune, 1992, p.90; 1997, p.138).

Some African lyres are played in a more specific ritual context: the large *beganna*, the box lyre of the Amhara, whose history can be traced back to biblical times (David is said to have saved King Saul from insanity by playing on a *beganna*; see Kebede, 1982, p.64) is played only by members of the upper class during the fasting period. The instrument serves as the accompaniment for psalm singing, although not within the liturgical framework set down by Ethiopian orthodox church rituals. The large *ṭambūra* is played mainly in *zār* ceremonies on the coast of the Arabian Peninsula and on the African continent from the Somali coast up to Egypt in the north. The *zār* is a healing ceremony of syncretic character in which illness symptoms are interpreted as spirit possessions. Here the lyre acts as a mediator between the spirit world and the human world. The sound of its strings transmits the voice of spirits, who thus communicate with humans (Zenkovsky, 1950). For the Luo in Kenya, communication with the spirit world is conveyed by the *nyatiti* lyre (*see* KENYA, fig.5), which is often played by soothsayers and healers. However, the powers of the *nyatiti* that transcend the earthly world are seen independently from its function as a source of musical sound: broken instruments are still held in honour because they retain their power to prevent harm, and they serve as luck charms even if they can no longer be put to use as a musical instrument.

4. MODERN LYRES. New types of chromatic, diatonic and pentatonic lyres have been developed and built since October 1926. Originally intended as an instrument for use in music therapy, the first modern lyre was conceived by Edmund Pracht (1898–1974) and built by W.L. Gärtner (1902–79), both of whom were pupils of the

12. Contemporary lyre ensemble, Ireland

Austrian philosopher and educator Rudolf Steiner (1861–1925). The initial workshop was in Dornach, near Basle, later moving to Konstanz. Since then thousands of Gärtner instruments have been produced and are used all over the world. In the 1960s, Choroi, an international organization for new instruments, began to build and develop its own models of lyres. By the end of the 20th century there were many individual lyre builders and workshops in Europe, Australia, the USA and South Africa.

Chromatic lyres have a compass of three octaves or more and are built in various sizes. The most commonly used are the soprano (*e–d‴*), alto (*E–f″*) and the 'solo lyre', a soprano instrument with a slightly extended compass (*c–e‴*). Other models are the descant (*c–c⁗*), tenor-bass (*A′–c″*), alto-tenor (*C–d″* or *C–g″*), and concert lyre (*C–f″*), as well as smaller children's versions of the above. Two diatonic contrabass instruments (*E′–a′*) were built in 1928 and 1930 but only one survives (at Sonnenhof, nr Arlesheim). Chromatic lyres have two rows of strings, arranged like a keyboard. The strings, which are parallel, are made of steel and are wound in the lower register. Most lyres are played seated, resting on the lap and held on the left side and supported by the left wrist in an almost upright position, leaving the right hand free to play the front diatonic strings. Ideally, the strings are stroked by the tips of the fingers with a downward movement, rather than plucked. The chromatic strings, at the back, are played by the left hand, as well as the front E and B strings but it is also possible to extend the fingers of either hand slightly to reach through to the opposite row, though this technique is hardly possible in rapid passages. The larger tenor-bass, fitted with a stand, which acts as an additional resonator, is played standing. More lyres are rather limited in dynamics and because of the arrangement of the strings, tempos are generally moderate. Its musical strength lies in the beauty of its clear, resonant, but quiet, tone; the player generally has to damp the strings, which would otherwise reverberate for several seconds.

The pentatonic and diatonic versions were quite quickly applied to the educational field, and all types have increasingly been used for general music-making as solo or ensemble instruments. A great deal of music, from the Renaissance to the present day, has been adapted or arranged for these instruments; there is also a vast body of music specially written for the lyre, much of it unpublished but circulated by various associations of lyre players. These include the Arion Association (Great Britain and Ireland), the Lyre Association of North America (LANA) and the Norddeutscher Arbeitskreis für Leierspiel; all three produce journals devoted to the modern lyre. The principal publishers of lyre music are: Verlag das Seelenpflege-bedürftige Kind (Hessen); Verlag freies Geistesleben (Stuttgart); and the Rose Harmony Association (Chatham, New York).

Lyre-guitar. A plucked, guitar-like string instrument with a sound box shaped in the image of the ancient Greek lyre. It is classified in the Hornbostel-Sachs system as a chordophone. Its popularity grew in mid-18th-century France out of the fashionable infatuation among the upper classes with Greek antiquity. The instrument was also adopted by the emerging middle classes after the revolution, and with the general expansion of French influence during the Napoleonic era it spread to Italy, Germany, Russia, Sweden and, to a lesser degree, to Spain, England and the United States.

Attempts to reproduce the instruments of antiquity resulted in various hybrids whose value were rather more decorative than musical. The lyre-guitar enabled ladies of fashion to assume the gracious pose of Greek kithara players, an image inspired by the contemporary fascination with classicism in architecture, in drama, dance, literature and art. The bucolic symbolism of the peasant's musette, so fashionable in the arts in the earlier decades of the 18th century, no longer conformed to the aristocratic ideal. Many paintings from the time depict scenes in drawing rooms, gardens or river-boats in which elegant young ladies are playing lyre-guitars (fig.1). The fashion

was accompanied by a brief boom in the publishing of banal romances with equally banal accompaniments for guitar or lyre-guitar, but when tastes changed in the first decade of the 19th-century the latter instrument quickly disappeared.

The earliest French instruments of this type were more like true lyres: they were equipped with varying numbers of strings (usually eight or nine) attached directly to the yoke and they often did not have a fingerboard, the strings being tuned diatonically in the manner of a small harp. Later developments included a loosely fitted fingerboard stemming from the yoke but not connected directly to the soundbox. The sound was dull and weak, and these instruments, pretty as they were to look at, were difficult to handle in musical performance. Towards the end of the century more successful models were made with the fingerboard fixed to the body (fig.2). This hybrid, the six-string lyre-guitar, was easier to play and delivered a stronger sound than its predecessors. Parisian makers of the lyre-guitar included Maréchal, Michelot, Pleyel and Pons.

Designed primarily as a decorative object for the salon, the lyre-guitar established a symbiotic relationship with the already fashionable five-course guitar. Most French tutors for the latter instrument from about 1799 to 1810, e.g. those by Charles Doisy, J.-B. Phillis, A.-M. Lemoine and G.-P.-A. Gatayes, were written with an additional section for the lyre-guitar. This situation induced many writers to wonder if the six-string guitar, which by the turn of the century was fast gaining currency, was the model for the lyre-guitar or vice versa. Later guitar tutors devoted to the six-string guitar (e.g. F. Carulli: *Méthode complète de guitarre ou lyre*, editions of 1810 and 1819), still carried references to the lyre-guitar.

The appearance of the lyre-guitar on the Parisian social scene was accompanied by scandal. It was claimed to have been invented by Jean-Baptist Phillis (1751–1823), who had written the earliest tutors for it, published in 1798 and 1804 by Pleyel. A counter-claim was launched by Maréchal, who published a pamphlet entitled *Plagiat dénoncé aux musiciens et aux amateurs des lyres nouvelles* (n.d.) in which he accused Phillis and Pleyel of stealing his design for the lyre-guitar, and related the events connected to the criminal and civil suits he brought against them. Maréchal described his invention as a 'lyre anacréontique', thus associating his instrument with the then fashionable anacreontic poetry in praise of love, friendship and wine.

MATANYA OPHEE

Lyrichord (i). An instrument patented by Roger Plenius in 1741. *See* SOSTENENTE PIANO, §1.

Lyrichord (ii). American record company. It was established in 1950 by Peter Fritsch in New York Village and began mainly with classical music, issuing non-mainstream repertory for the academic community, but also issuing some ethnographic recordings from the start, capturing the work of many of the first ethnomusicologists to employ fieldwork-based methodologies in the theoretical and practical shift from comparative musicological approaches. As that discipline became better established in the 1960s, this aspect of the label's output was secured. Lyrichord has prided itself on being one of the very few to issue international field recordings of the finest quality, offering the researcher – and, increasingly, the general world music enthusiast – a deeper understanding of musical cultures, especially endangered traditions. These recordings have included Colin Turnbull's African pygmy songs, *Music from the Rain Forest Pygmies* (LLCD 7157), featuring music of the Mbuti pygmies from the Ituri forest in the Democratic Republic of Congo recorded in the 1950s and 1960s, and John Levy's *Tibetan Buddhist Rites from the Monasteries of Bhutan* (LYRCD 9001), which won Lyrichord an award from the National Association of Independent Record Distributors and Manufacturers in 1994. At the same time Lyrichord has provided a platform for composers within musical traditions of world cultures; for years its best-selling record – having sold more than 25,000 copies by 1999 – was Jihad Racy's *Ancient Egypt* of 1977, commissioned and composed for the American tour of treasures from the tomb of Tutankhamen (LYRCD 7347).

In 1988 Peter Fritsch's son, Nick, took over the company. Much of his effort has been spent on remixing the original LPs for CD release, but he has also put out new recordings of original music resulting from contact and collaboration between musical cultures around the world. *Asmat Dream* (New Music Indonesia, i; LYRCD 7415) and *Mana 689* (New Music Indonesia, ii; LYRCD 7420), for example, broaden our definitions of world music and contemporary classical music. Still based in New York Village in the late 1990s, the company has proved to be unusually enduring in its field.

JANET TOPP FARGION

Lyric Opera of Queensland. Opera company based in BRISBANE, founded in 1982.

Lyrics. A lyric is a line from a song or the entire set of lines written for a song: lyrics are the words to all the songs written for a score. In a musical play a lyric is written by a lyricist as opposed to a librettist who writes the book or dialogue. The lyrics of popular and pop songs originated as simple tonal compositions whose subject matter was generally light or romantic, and whose range has been progressively expanded.

1. Popular song and musical theatre lyrics. 2. Pop lyrics.

1. POPULAR SONG AND MUSICAL THEATRE LYRICS.

(i) Popular song. Lyrics have always been significant in popular music: whether a story is told or the song just reflects on the human condition, the words must intrigue the listener. No popular song can succeed without a competent lyric because the experience is one of words and music complimenting and reinforcing each other. Stephen Foster was America's first genius of popular song and his lyrics, whether in a folk idiom or in a highly-romanticized poetic form, were as responsible for the songs' appeal as the lilting melodies he created. With musical theatre in the mid-19th century, the lyrics also

tended toward the poetic, often employing formal and flowery language as a way of keeping songs on a highly cultured level. It was not until the boisterous songs of the Harrigan and Hart musicals in the 1880s that lyrics with ethnic and slang terms were introduced. This kind of 'unpoetic' lyricwriting found further popularity in the songs that George M. Cohan wrote for the stage at the turn of the century. His words were brash and conversational and eschewed fancy European poetics. P.G. Wodehouse refined the slang form of lyricwriting in the Princess Musicals of the 1910s and the form reached a climax with the dazzling wordplay of Ira Gershwin, Cole Porter and Lorenz Hart in the 1920s and 30s.

Individual songs that are not tied to a musical play or film and are meant to stand on their own are traditionally called TIN PAN ALLEY songs. These songs, because they must satisfy without benefit of plot, character or sometimes even a recognized singer, must be self-contained. The lyric introduces the subject, pursues an idea or emotion for a limited number of bars of music, and then repeats itself, both musically and lyrically, to reinforce the experience. While some Tin Pan Alley songs, such as narrative ballads, tell a story, most of them are an expression of one emotional idea. Irving Berlin, America's most successful Tin Pan Alley songwriter, once said that the most beloved topics for popular songs were love, home, self-pity and happiness. Because the song has no character associated with it, the lyric's voice is usually vaguely homogeneous, asexual (so that it could be sung by a male or female) and conversational. Tin Pan Alley lyrics utilize current idioms and popular expressions of the day in order to give the song a sense of familiarity. This causes many such songs to date quickly but, for the most part, Tin Pan Alley songs are not written for posterity: only one out of hundreds may remain popular generation after generation.

(ii) Musical theatre songs. The musical theatre song is quite different in purpose from a Tin Pan Alley song although they have similar structure. The musical theatre number is conceived, written and produced as part of a whole. While it may eventually stand on its own and join the ranks of popular hits, its immediate purpose is clear: it must work in the show. Whether it is part of a silly, improbable musical comedy, a loosely structured musical revue or a tightly-knit integrated musical play, the theatre song must justify its existence, or it is cut. The history of the musical theatre is filled with examples of superb songs that were dropped before opening, or discarded songs that finally worked in a later show. The nature of the musical stage dictates that this be so; Tin Pan Alley has no such limitations. The theatre lyricist must be a playwright as well as a songwriter, even if he or she does not contribute to the libretto. This requirement is pragmatic, not high-minded or artistic. A theatre song may advance plot, develop character, set a mood or create dramatic tension. Just as often, however, a song is needed to highlight a star, provide jokes, offer a chorus of pretty girls, add a touch of romance, supply an opportunity for dance or even fill in during scenery changes backstage. These latter reasons are as much a part of musical playwriting as the former ones.

In America, early musical theatre songs on stage were created according to the type of number required. Examples of such types include a chorus number to open the act, a love duet for the lovers once the plot has started, a comic song for the comedian, a torch song for the second act, or a finale ensemble to end the act. But by the 1930s, and increasingly after *Oklahoma!* in 1943, songs became character-driven. The purpose of the song was to reveal character traits rather than fulfil simple song types. So the 'I am' song was developed, an early number in the show in which a major character is established for the audience. Nellie Forbush's revealing 'A Cockeyed Optimist' near the beginning of *South Pacific* or Tony's restless lament 'Something's coming' in *West Side Story* are two classic examples. The love song and the torch song now had to reflect the character singing them rather than just the situation. While a ballad or love duet in the early Rodgers and Hart or Cole Porter shows could be lifted and be plugged into just about any other musical, the later integrated musicals demanded character-specific songs and the lyricist had to become a playwright.

Musicals demand lyrics that can be clearly heard and understood in a large theatre. The old Tin Pan Alley songs were either sung in the parlour around the piano or recorded to be listened to in the home. They could be repeated as often as one liked and the listener could grow familiar with the song over a period of time. The theatre song, on the other hand, must be grasped on a first hearing and perhaps reinforced by a reprise later in the show. Words for sustained notes must have open vowels so that the singer can comfortably support them; clever or tricky wordplay must be clear enough on a first hearing or the song fails; rhymes must be supported by the music and phrases must sit well on the melody otherwise the meaning of the lyric is lost. While light verse can be appreciated in book form, the lyric for a comic song must sound right in order for the humour to surface. Conversely, a lyric on the page may read as rather dull and repetitive but when linked to music, it may become poetic and enlightening. For this reason many lyricists do not like to have their work printed without the music. A Lorenz Hart or Cole Porter lyric reads beautifully on the page but too often an Oscar Hammerstein or Sheldon Harnick lyric seems lifeless when divorced from the music. This is not a matter of quality but of style.

(iii) Structure. What both Tin Pan Alley songs and musical theatre numbers have in common is their lyric and musical structure. Until the 1960s, all popular songs began with a verse, the introductory section of the song. The melody was distinct from the later part and the lyric presented the general problem or issue in the song. During the 19th century the verses were rather long and often told an elaborate story, as in 'After the Ball'. Later the verses became shorter and the second section, the refrain, became the part of the song that became popular. The refrain has the melody that is more satisfying and the lyric develops the ideas of the song, often repeating a phrase or whole line at the end of each stanza to reinforce the song's point. After a few stanzas the song usually moves into a release, a short section in which the melody shifts and the lyric presents an example or an alternate idea. The release keeps the song from becoming musically and lyrically predictable. Then the refrain returns for the last stanza, the familiar melody returns and the lyric concludes the song by repeating or summarizing the main idea of the number. Ballads, torch songs, comic numbers and character songs usually used this format. Chorus numbers and finales were often more simple.

Today theatre songs are written in several different forms. Many lyricists have dispensed with the verse while others have reduced or eliminated the refrains and kept their lyrics on the more informational level as in 19th-century verses. Also, reprises today are rare and many songs seem less immediately memorable because audiences do not have the same kind of familiarity with the numbers as they did with older forms of the musical. Furthermore, the recent popularity of the sung-through musical (shows that have no libretto other than the lyrics of the score) has put a greater emphasis on lyrics as narrative. But regardless of the format, theatre lyrics must still speak to the audience and lyricists must still be playwrights.

2. Pop lyrics.

(i) Expansion of thematic references. Rock and roll brought together country narrative with the performative nature of rhythm and blues. The country song classically placed emphasis on story-telling, the close relationship of words to melody, rhythms and clear formal divisions within the song. As a consequence the voice is consistently afforded centre-stage in country production. However, it was the rhythm and blues song that allowed more space for authentic performative presence, and which was decisive in establishing rock and roll's immediate reference, with Presley and the beginnings of British Beat, both of whom turned to rhythm and blues models. The emerging rock and roll song represented no formal advance, with little experimentation in the lyrics apart from a tendency to mirror the musical energy through syllabic filling-in of line and space. The opening 'Awop-bopaloobopalopbamboom' of Little Richard's *Tutti Frutti* is a classic case.

Songwriting still largely followed the Tin Pan Alley tradition of songs supplied for performing singers. Singer-songwriters (for example Hank Williams, Buddy Holly and Smokey Robinson) were viewed as musicians also able to put together words, and this aspect was to change. Tin Pan Alley reached its last flowering in the Brill Building, a term which covers several songwriting teams of the late 1950s and early 60s. They supplied many songs through the early transition from rock and roll to pop, including Elvis Presley, girl groups, Phil Spector, and eventually constructed 'bubblegum' bands such as the Monkees. Among the teams were Leiber and Stoller, Goffin and King, Barry and Greenwich, and Bacharach and David. Motown's most successful teams could be considered in the same songwriting context: Dozier and the Holland brothers (Eddie and Brian), and Whitfield and Strong. It is worth pointing out that in each team one writes words while the other writes music, but both come together in working towards the central purpose of the particular song.

Brill Building songs utilized essentially standard Tin Pan Alley forms and only small differences are discernible between particular teams; however, certain lyricists, notably Gerry Goffin and Barry Mann, attempted to broaden the range of social reference. Goffin's *Will you still love me tomorrow?* represents a point when the Tin Pan Alley song briefly attempts to grow up. Goffin works with the inherent musicality of the words, true to lyric, but is consciously broadening the thematic reference to include a then-controversial reference to sexual freedom outside marriage.

Many factors made the art of the songwriting team redundant: Phil Spector's opening up of sound as a central category; a renewed emphasis on immediacy and presence through the success of the Beatles and the Beach Boys; Bob Dylan's undermining of the lyric as the pop song's only concern; James Brown's extension of rhythm and blues. Eventually several Brill Building writers (Carole King, Gene Pitney and Neil Sedaka) were re-invented as singer-songwriters in Dylan's wake.

(ii) Dylan and the modernist movement. Bob Dylan brings together the folk-blues form current in the early 1960s, and merges it with a line of modernist poetry, the latter through Ginsberg. In a song like *Subterranean Homesick Blues* (1965) some classic tricks of modernist poetry can be found: juxtapositions of place and time, a sequence of unreliable sentence subjects, characters introduced and disposed of with rapidity, and even an unspoken call to an oppositional social stance, its negativity as much formal as thematic. Dylan's most immediate influence is felt in such self-consciously poetic singers as Joni Mitchell, Neil Young, John Prine and Bruce Springsteen. These songwriters developed an identifiable personae, however authentic, and their subsequent development has been tied to the fate of that persona. Some songwriters stood as a synechdoche for that persona: Tom Waits a certain wasted boho cool; Rickie Lee Jones a confession to a sympathetic analyst; Paul Simon the voice of New York liberal angst; Randy Newman the voice of ironic bigotry; Robbie Robertson the memory of a mythic past; Van Morrison as Yeats incarnate in song. The single auteur is now responsible for words and music. When the songwriter worked as part of a group, as with the Beatles or the Kinks, so the band tended to be regarded as hired hands. Critics were perhaps too ready to elide the emergent songwriters with a residual idea of the romantic poet.

(iii) Orality and technology. A different premise for popular song lay in the tradition of the blues. While this can be traced back at least to the beginning of the century, the possibilities of dissemination opened up by recording technology gave the form greater visibility. The question of the relation of song to performance, as soon as that performance could be fixed in time through recording, became an issue. In song-as-performance the emphasis is less upon a song's stand-alone nature, as expressed in publication as sheet music, and more upon the singular quality of the performer. This affects profoundly the relation of the original to the printed copy, what it is to cover a song, opening up subtle differences between replication of published manuscript and imitation of recorded performance. The emphasis is less upon the selection of words for semantic weight and more for their effect within the sound of the song as a whole, less upon an externally-motivated concept of originality and poetic self-consciousness and more towards the relation of words to the social context from which they arise, to which they refer, and in which they are performed.

For pop music which, by the mid-1960s, was an innovative form expanding in several directions, a key intervention was made by James Brown, in the single *Papa's got a brand new bag* (1965). Above a repetitive and minimal musical background, Brown attended to the thematic range and expressive potential of the song as performance, giving a direction which both paralleled and contrasted with the turn to self-consciousness that

characterized Dylan and the singer-songwriters who followed. Following upon Brown's opening-up of funk, the Last Poets can be seen as constituting a verbal extension of jazz, which had tended in verbal expression either towards the Tin Pan Alley standard or towards poetry without music: within the first minute and a half of *Jazzoetry* (1972) an eight-beat space varies from 'Hypnotizing while improvising is mentally appetizing' to 'More time more time more time more time more time more time more time more time' to 'Smooth cell' with 'Smooth' extended over six beats. With the Last Poets the second strand of the pop lyric's relation to poetry is manifest and, building upon funk's minimizing of musical event, a platform was established for rap, following in turn upon various developments in technology. By the time of Public Enemy, rap had become an important vehicle for observation and communication, using prose statements within a constricted rhythmic and rhymed form.

(iv) Lyrics as anti-lyrics, song as prose statement. As well as picking up from Dylan's example, anti-lyric builds upon many other strands, traced back through the improvisatory nature of words in the oral tradition to 1950s jazz poetry. In anti-lyric, music constitutes a bed of sound on which words are imposed, almost as though read. The words thus tend less towards the practices of poetry and more towards prose itself. Early examples include stories read by John Cale on early albums of the Velvet Underground, David Bowie's use of random assemblages (the 'cut-up' technique of William Borroughs) as song, and, perhaps decisive for punk, Patti Smith's first album, *Horses* (1976). By the 1980s anti-lyric had become a standard pop music practice.

The increasing wordiness of pop music by the 1980s reflected changes in the band itself, now no longer dependent upon musicality as such. Where a group like the Beatles would have been united by musical interest, by 1980 at least one member was driven by the possibility of making statements in carefully-constructed words. The division of labour characteristic of the Brill Building has returned, but without the necessity of a central unifying aim: the musician provides a bed of sound upon which the lyricist-as-author declares the text, Morrissey of the Smiths or Michael Stipe of REM offer good examples. With the increase in visualization offered by video, and pop music as the soundtrack of films, the function of words has subtly shifted. As an art form preserved by songwriters who write for singers who do not write, the lyric still exists. However, lacking the common practice of Tin Pan Alley or of the Brill Building, it is questionable whether the songs are lyrically of a comparable standard. It is questionable too, by extension, whether writers of pop songs could write effectively in the tradition of musical theatre. Important questions are also raised about the relative reliance on words by some pop music genres. It is telling that the literature reflects most interest in Dylan and in rap as two extremities of word-intervention in pop music. This does not necessarily extend to the literatures of gospel, country, soul or metal, where the quality of sound and immediate thematic references are of major concern. Equally questionable in this respect is the popularity of world music: while pop music became open to diversity of sound, language continues to constitute a firm boundary within which the Anglophone pop song works.

Lyrita. English record label. Lyrita Recorded Edition was founded in 1959 by Richard Itter; its main (and soon sole) objective was to record unfamiliar or previously unrecorded British music. An initial series of piano and chamber music by Bax, Ireland, Jacob, Moeran, Tippett and others also featured York Bowen and Franz Reizenstein playing some of their own music. Lyrita became, and remained throughout the 1970s, one of the foremost labels in recording British orchestral music; artists included Sir Adrian Boult, Imogen Holst, Vernon Handley, Raymond Leppard, Norman Del Mar and Bernard Herrmann conducting leading British orchestras. Among pioneering first recordings was music by Ireland, Bax, Finzi, Rubbra, Holst, George Lloyd, Cyril Scott, John Foulds, William Sterndale Bennett and composer-conducted recordings by Arnold, Bliss, Walton, Lennox Berkeley and Alwyn. Awards include: Audio Award (1967 and 1980), Composers' Guild (1973), Leslie Boosey (1984), *Gramophone* (1991) and Cannes (1997). Lyrita's work is continued by The Lyrita Recorded Edition Trust.

LEWIS FOREMAN

Lyrone. *See* LIRONE.

Lyro viol. *See* LYRA VIOL.

Lys, F. de (*fl* 1539–43). French composer. Eight chansons and a motet by him were printed in Lyons by Moderne between 1539 and 1543. His name may have been a pseudonym; the fleur de lys was the French royal device but was also used by many Italian families residing in Lyons. Most of the chansons are amorous *épigrammes* set in the suave style of the contemporary Parisian courtly chanson. *Secouhez moy*, however, is set in a syllabic, patter-song manner, with the opening and closing refrain in triple metre. (For further discussion, see F. Dobbins: *Music in Renaissance Lyons*, Oxford, 1992.)

WORKS
all for four voices

Edition: *Le Parangon des Chansons*, ed. J.A. Bernstein, SCC, xxvi, xxviii (1993) [B i–ii]

Vir inclitus Vincentius, 1539[10]

Contre les dardz pointu et furieulx, 1540[16], B i; En lieu du bien que deux souloi[en]t prétendre (P. Du Guillet), 1540[16] (attrib. 'Quentin' in 1540[9]), B i; La froide mort seul peult remédier, 1543[14], B ii; Le grand désir du plaisir admirable (Du Guillet), 1541[8], B i

Mon cueur entier j'ay donné vrayement, 1539[20], B i; Mon grief souffrir las a trop duel martyre, 1543[14], B ii; Ne pensés pas mesdisans envieulx, 1539[20], B i; Secouhez moy je suis toute pleineuse, 1540[16], B i

FRANK DOBBINS

Lysarden. Presumably the name given in England to the largest members of the CORNETT family, either the tenor or bass size or both. Tenor and bass cornetts, a 5th and an octave or 9th below the treble respectively, were widely used both in England and on the continent. A catalogue of surviving cornetts in museum collections (see Tarr) lists 43 tenor and 4 bass cornetts; Spielmann cites some 55 inventories beginning in the mid-16th century which refer to tenor and bass sizes. The bass cornett is not to be confused with the SERPENT which came into use in the 17th century, is pitched a fourth or fifth lower than the bass cornett, and is not strictly a member of the cornett family, having more conical bore, thinner walls, and no thumb-hole. While both tenor and bass cornetts, as suggested by their reptilian name, were normally S-shaped like the serpent, the orientation of the curve was generally different from that of the later instrument, the plane of the S being perpendicular to the player's body with the finger-holes on the outer side of the curve.

A 'lyserden' is listed in the waits' band of Exeter in 1575 (L.G. Langwill: 'The Waits', *HMYB*, vii, 1952, p.170–83); the Norwich waits owned a 'lyzardyne' in 1585 (W.L. Woodfill: *Musicians in English Society from Elizabeth I to Charles I*, Princeton, NJ, 1953/*R*, p.85); and a 'lysarden' appears in the inventory made in 1602–3 of the instruments at Hengrave Hall, Suffolk, that belonged to Thomas Kytson (F.W. Galpin: *Old English Instruments of Music*, London, 4/1965/*R*, p.204). The references, however, never specify the size of the instruments.

BRUCE DICKEY

Lysberg, Charles Samuel. *See* BOVY-LYSBERG, CHARLES SAMUEL.

Lysenko, Mykola Vytaliyovych [Lïsenko, Nikolay Vital'yevich] (*b* Hrynky, nr Kremenchug, Poltava district, 10/22 March 1842; *d* Kiev, 24 Oct/6 Nov 1912). Ukrainian composer, pianist, conductor and folksong collector. He was first taught the piano by his mother, but was taken to Kiev at the age of nine to have lessons with Panochini and to study theory with Nejnkevič. He attended the Gymnasium at Khar'kiv and then took a course in natural sciences, first at the university there, and then at the University of Kiev (1860–64). He continued his musical education with Wolner, Dmitriyev and Wilczyk, and in Leipzig with Reinecke and Richter. As a child he had been deeply impressed by songs he heard peasants singing, and his nationalist sympathies were stimulated by a volume of Shevchenko's poetry given to him by his grandfather (at the age of 19 he was a coffin bearer at Shevchenko's funeral). As a student he was involved with the anti-tsarist movement, and was much influenced by the philosophers Belinsky, Herzen and Chernïshevsky. His beliefs, however, did not prevent him from becoming a legal adviser in the Imperial Civil Service, a post he relinquished with relief after two years.

During the early 1860s Lysenko collected a large number of Ukrainian folksongs, many from the minstrel Ostap Veresay, and seven volumes of folksong arrangements appeared between 1868 and 1911. In 1867 he wrote a choral work *Zapovit* ('The Testament'), to words by Shevchenko, and he came to realize that he could best express his fervent patriotic and political ideals through music, particularly through settings of Ukrainian poets, and through collecting, publishing and studying the folk music of his country. From 1874 to 1876 he took orchestration lessons from Rimsky-Korsakov in St Petersburg, where he formed a choral group. He later conducted a choir based in Kiev, which made several successful tours. He settled in Kiev in 1876, where he was acknowledged as the leading figure in Ukrainian music circles. However, although he was associated with the Russian Musical Society in the 1870s, in his later years he was almost completely ignored by the society. This neglect has been attributed to official distrust of his political

activities. A supporter of the 1905 revolution (celebrated in his hymn *Vechnïy revolyutsioner*, 'The Eternal Revolutionary'), he was imprisoned for a time in 1907. His determination to aid the revival of Ukrainian by using it in his opera librettos probably lost him the chance of having his epic opera *Taras Bulba* performed outside the Ukraine. Tchaikovsky, who admired the work, had hoped to arrange a performance in Moscow, but was deterred by Lysenko's refusal to authorize a Russian version of the libretto. *Taras Bulba* is now recognized, along with *Natalka Poltavka*, as an important contribution to Ukrainian opera.

Lysenko was an excellent pianist and wrote numerous idiomatic and refined small-scale piano pieces that show the influence of Chopin. His music is based either on authentic folksongs or themes characteristic of Ukrainian folk music. In his operas he showed an aptitude for effective musical characterization, although he tended to think in short paragraphs. His settings of Shevchenko, particularly in the cycle *Muzyka do kobzaryu* ('Music for the Kobzar Player'), on the whole maintain a high level of inspiration. In his writings on folksong, Lysenko attempted to demonstrate the differences between the folk music of the Ukraine and that of Russia. His arrangements of folksongs are rarely marred by an inappropriate harmonic idiom or unsuitable texture.

There were great festivities throughout the Ukraine when Lysenko celebrated 35 years as a composer; financial gifts, intended for his personal use, enabled him to open a Ukrainian School of Music in opposition to the Russian Musical Society's school in Kiev. His death occasioned an outburst of national grief which Gor'ky described with awe. Although his name lives on in his native land and among Ukrainian communities in exile, it is probable that his popularity depends more on his standing as a national leader than on the intrinsic merits of his compositions.

Lysenko's daughter Maryana (1887–1945) was a pianist, and his son Ostap (*b* 1885) a musicologist and professor at the Kiev Academy.

WORKS

A collected edition of Lysenko's works was published in 20 volumes (Kiev, 1950–59).

STAGE

Harkushka, 1864 (op, after Storozhenko), frag.
Andrashiada, 1866 (op-satire, M. Starytsky and Drohomanov), frag.
Utomlena, abo Mays'ka nich [The Drowned Maiden, or May Night], 1871–83 (lyric-fantastic op, 3, Staryts'ky, after Gogol': *May Night*), Odessa, Russian, 2/14 Jan 1885, vs (Leipzig, 1900)
Chernomortsy [Black Sea Sailors], 1872–3 (operetta, 3, Staryts'ky, after Kukharenko: *Chernomorskiy bït na Kubani* [Life on the Black Sea in the Kuban]), orch. I. David, Khar'kiv, Opera House, 1/13 June 1883, vs (Leipzig, 1886)
Rizdv'yana nich [Christmas Eve], 1877–82 (comic-lyric op, 4, Staryts'ky, after N. Gogol'), Khar'kiv, Opera House, 27 Jan/8 Feb 1883, vs (Leipzig, 1883)
Taras Bul'ba, 1880–91 (historical op, 5, Staryts'ky, after Gogol'), orch. L. Shteynberg, Khar'kiv, Opera House, 4 Oct 1924, vs (Kiev, 1913)
Koza-Dereza [The Nanny-Goat], 1888 (comic op for children, 1, Dneprovaya Chayka [L.A. Vasil'yevskaya), Kiev, Hall of Commerce, 8/21 April 1901, vs (Kiev, 1891)
Natalka Poltavka (op, 3, Staryts'ky, after I. Kotlyarevs'ky), Odessa, Russian, 12/24 Nov 1889, vs (Kiev, 1953)
Pan Kots'kiy [Sir Cat], 1891 (comic op for children, 4, Dneprovaya Chayka), orch. V. Nakhabin, Khar'kiv, Opera House, 8 May 1955, vs (Kiev, 1945)
Zima i vesna, abo Snigova kralya [Winter and Spring, or The Snow Maiden], 1892 (fantastic op for children, 2, Dneprovaya Chayka), Kiev, 29 June 1956, vs (Kiev, 1913)
Volshebnïy son [The Magic Dream], 1894 (musical fairy-tale, Starytsky)
Sappho, 1896–1900 (op, Staryts'ky)
Eneída [Aeneid] (musical comedy, 3, M. Sadovsky, after Kotlyarevs'ky), Kiev, Literacy League, 23 Nov/6 Dec 1910, vs (Kiev, 1911)
Letney nochyu, 1912, inc. Noktyurn [Nocturne], 1912 (op-miniature, 1, L.M. Starytskaya-Chernyakhovskaya), Kiev, Municipal, 3/16 Feb 1914, vs (Kiev, 1912)

Incidental music: Shakespeare: Hamlet, 1882; Staryts'ky: Poslednyaya noch [The Last Night], 1892

PIANO

Polka, *c*1851; Nocturne, f, 1859–60; Waltz, e, 1868; Nocturne ('Proshchal'nïy') [Farewell], B♭, 1869; Piano Suite, op.2, 1869; Barcarolle, 1874; Nocturne, 1874; Melancholy Waltz, 1874; Concert Waltz no.1, 1874; 2 concert polonaises, 1875; Rhapsody on Ukrainian themes no.1, 1875; Concert Waltz no.2, 1875; Epic Fragment, 1876; Sonata, a, 1876; Songs without Words nos.1–2, 1876; Scherzino, 1876; Mechta [Daydreams], opp.12–13, 1876; Mazurka, 1876; Rhapsody on Ukrainian Themes no.2, 1877; Nocturne, 1877; Mazurka, 1878; Humoresque, 1878
Heroic Scherzo, 1880; Rondo, 1882; Romance, 1886; S morya [From the Sea], 1888; Gavotte, 1888; Moment musical, 1889; Song without Words no.3, 1892; U kolïbeli [At the Cradle], 1893; Serenade, 1894; Wedding March, 1896; Waltz, 1897; 3 Sketches, 1899; Album, 1900; 3 Pieces, 1901; 2 Pieces, 1902; 3 Pieces, 1902; Impromptu, 1904; Prelude, 1904; Tarantella, 1904; Impromptu ('Slava') [Glory], 1906; Pechal'naya pesnya (Chanson triste), 1909; Intermezzo, 1909

VOCAL

Zapovit [The Testament] (Shevchenko), T, male vv, 1867; Muzyka do kobzaryu [Music for the Kobzar Player] (Shevchenko), cycle, 1868–1903 [incl. songs, choruses, cantatas, dramatic scenes etc.]; Plach Yaroslavnï [Yaroslavna's Lament] (from Slovo o polku Igoreve [The Lay of Igor's Campaign]), 1874; Na pryu, K slavyanam (Staryts'ky), 2 hymns, chorus, 1876; Buyaty porogi [Rushing Waterfalls] (from Muzyka do kobzaryu), cant., 1878; Volnovalas Ukraina [Ukraine was Restive] (Shevchenko), chorus, 1880; Ivan Hus (Shevchenko), 1881; Raduysya, niva [Be Happy, Field] (Shevchenko), cant., 1883; V nebe svetit solntse yarko [The Bright Sun Shines in the Heavens] (from Slovo o polku Igoreve), chorus, 1885
Funeral March, for the 27th anniversary of Shevchenko's death (L. Ukrainka), chorus, 1888; Na vechnuyu pamyat Kotlyarevskomu [To the Eternal Memory of Kotlyarevsky] (from Muzyka do kobzaryu), cant., 1895; Duma [Meditation] (Shevchenko), 1896; Oy, chto v pole [Oh, What is in the Field] (Franko), chorus, 1899; Vechnïy revolyutsioner [The Eternal Revolutionary] (Franko), hymn, 1905; V grudi ogon' [My Breast is Aflame] (Staryts'ky), dramatic monologue, 1906; Cant., for the 50th anniversary of Shevchenko's death, 1911
Also songs and duets to words by Franko, Grebenka, Heine, Mitskevich, Nadson, Rudansky, Shchegolev, Shevchenko, Staryts'ky etc.

OTHER WORKS

Orch: Russian pizzicato, Moldavskaya, str, 1859–60; Sym., 1st movt, 1869; Ov. on folksong theme, lost; Ukraïns'kyy kazak-shumka [Ukrainian Cossack Song], fantasia, 1872–3
Chamber: Str Qt, d, 1869; Str Trio, a, 1869; Fantasy on Ukrainian Themes, vn/fl, pf, 1872–3; Elegiac Capriccio, vn, pf, 1894; Ukrainian Rhapsody, vn, pf, 1897; Elegiya pamyati Shevchenko [Elegy in Memory of Shevchenko], vn, pf, 1912
Incidental music to Prostak [The Idiot], 1864, lost; cadenza to Beethoven: Pf Conc., G, op.58, 1869

FOLKSONG ARRANGEMENTS

7 vols., each containing 40 Ukrainian folksongs, arr. 1v, pf, 1868, 1869, 1876, 1887, 1892, 1895, 1911
12 vols., each containing 10 songs, arr. chorus, 1886, 1887, 1889, 1891, 1892, 1897, 1898, 1898, 1900, 1900, 1903, 1903
5 cycles of ritual songs (for spring, Christmas, weddings etc.), 1874–1903
13 Chumatsky songs [Songs of the Carters], 1874
Molodoshchi [Children's Songs], 1875

JENNIFER SPENCER

Lysy, Alberto (Ivan) (*b* Buenos Aires, 11 Feb 1935). Argentine violinist and chamber orchestra director of Ukrainian parentage. He studied first with his father and then with Ljerko Spiller, making his début at the age of nine. A meeting with Adolf Busch in 1951 was crucial to his development. In 1952 he went to Paris for further study, and in 1955 won sixth prize in the Concours Musical Reine Elisabeth in Brussels. He then became a pupil of Menuhin, with whom he later gave the first performance of Malcolm Arnold's Concerto for two violins (1962) and recorded Bach's Double Concerto. Lysy made his New York début in 1961 and in 1965 organized the Camerata Bariloche chamber orchestra in Buenos Aires. He subsequently directed the Accademia Internazionale di Musica de Camera in Rome. In 1977 he moved to Switzerland, as director of the International Menuhin Music Academy and its chamber orchestra the Camerata Lysy. In Argentina he directs a chamber music centre at Carillo and organizes the annual Lysy Festival in Buenos Aires and other cities. His playing is notable for its technical facility, pliant tone and relaxed musicality. His instruments are a 1706 Guarnerius, which was previously owned by Bériot and Thibaud, and a 1728 Stradivarius, which once belonged to Kreisler.

TULLY POTTER

Lyttelton, Humphrey (Richard Adeane) (*b* Eton, 23 May 1921). English jazz trumpeter, clarinettist and bandleader. He first played jazz while a schoolboy at Eton and continued to perform during his wartime service with the Grenadier Guards. He began playing professionally when he joined George Webb's Dixielanders in 1947, and the following year he formed his own band. Lyttelton's early outlook, as both trumpeter and bandleader, was based on the example of Louis Armstrong, and his group initially adhered to revivalist principles; later, just as his playing reflected the influences of such musicians as Roy Eldridge and Buck Clayton, so his bands moved from the traditional New Orleans style to that used by groups during the swing era. Lyttelton's recorded work 1949–59 is now presented in chronology on his own label Calligraph ('The Parlophones 1949–59') and his later work similarly on this label. From 1949, when he recorded with Sidney Bechet, Lyttelton collaborated with visiting Americans, and in 1963–6 he toured Europe and recorded with Clayton. He has also played the clarinet, and frequently performs duets with his band's regular clarinettists. His band made several international tours for the British Council during the 1970s and travelled widely in Britain.

Lyttelton is also a talented writer and broadcaster: he has published an autobiography, semi-autobiographical works and volumes of record criticism. For nearly two decades he has broadcast the programme 'The Best of Jazz' for BBC radio. Throughout his career he has proved a humorous and perceptive figurehead for British jazz.

CHARLES FOX/DIGBY FAIRWEATHER

Lyttich, Johann (*b* Plauen, between 1581 and 1584; *d* Eisleben, 1611, after 10 April). German composer, music editor and schoolmaster. He was appointed a teacher at the Gymnasium at Eisleben and Kantor of St Nicolai there on 10 April 1611, but he died later that year. On the title page of his *Brautgesang aus dem Hohenlied* (1610) he was still referred to as a student of theology; it is not known where he studied or for how long. His two eight-part settings from the Song of Songs (1610) are his only works to survive complete. The texts of the songs in his two collections *Venus Glöcklein* and *Sales venereae musicales* (both 1610), which also contain dances and of which only one or two partbooks survive, show that he was inspired by Hans Leo Hassler's *Lustgarten* (1601). He is of greater interest as an editor of Italian madrigals with German texts, an activity to which he may well have been stimulated by Valentin Haussmann. His *Musicalische Streitkräntzelein* is a two-volume edition, with three additional numbers – supplied by Erbach, Marenzio and Scandello – and with for the most part freely translated texts, of the celebrated collection *Il trionfo di Dori* (Venice, 1592[11]), comprising 29 six-part madrigals by 29 composers. He did not live to see the publication of his edition; the first part was edited by his brother Daniel and the second part by the Eisleben musician Salomon Engelhard. He almost certainly influenced MARTIN RINCKART, who was briefly his predecessor at St Nicolai and who a few years later published a sacred parody of *Il trionfo di Dori* under the title *Triumphi de Dorothea* (1619[16]).

KURT GUDEWILL

Lytton [Jones], Sir **Henry A(lbert)** [Henri, H.A.] (*b* London, 3 Jan 1865; *d* London, 15 Aug 1936). English baritone. In 1884, with his wife 'Louie Henri', he joined the chorus of the D'Oyly Carte company touring Sullivan's *Princess Ida*. In 1887 he deputized at the Savoy Theatre as Robin Oakapple in *Ruddigore*, and during the 1890s appeared at the Savoy in Gilbert and Sullivan revivals, playing mostly heavier baritone roles. He created roles for Sullivan and German in *The Rose of Persia* (1899), *The Emerald Isle* (1901), *Merrie England* (1902) and *A Princess of Kensington* (1903) before appearing in musical comedy. In 1906–7 and 1908–9 he again appeared at the Savoy under Gilbert, and then from 1909 until 1934 toured with the D'Oyly Carte company in the principal Gilbert and Sullivan comedy roles. He was a versatile performer, with a sound baritone and winning stage presence. He was knighted in 1930.

ANDREW LAMB

Lyudkevych, Stanislav Pylypovych (*b* Yaroslav (now Jaroslaw, Poland), 24 Jan/5 Feb 1879; *d* L'viv, 12 Sept 1979). Ukrainian composer, musicologist and ethnomusicologist. His first music teacher was his mother, who taught him the piano. In 1898 he entered the philology faculty of Lemberg University, graduating in 1901. During this period he studied composition privately with Soltys. He taught Ukrainian in various secondary schools in Lemberg and Peremyshl', and then completed his military service in Vienna (1903–4). After completing his first ethnomusicological work, the two volume *Halyts'ko-rus'ki narodni melodii* ('Galician-Ruthenian Folk Melodies', published in 1906–8) he returned to Vienna to study composition and orchestration with Zemlinsky and Gredener, and musicology with G. Adler (1907–8); he later continued these studies in Munich and Leipzig with H. Riemann. After receiving a doctorate from Vienna University for a dissertation on programme music, he returned to Ukraine and in 1908 became director of the Lysenko Higher Institute of Music in L'viv. From 1939 he taught at L'viv Conservatory; he held the chair of theory and composition from 1945 until his retirement in 1972. He also served as chair of the L'viv branch of the Composers' Union of the Ukrainian SSR (1945–52) and was a member of the Shevchenko Scientific Society from 1935. He received a large number of honours and prizes including the Shevchenko Prize (1964), People's Artist of the Ukrainian SSR and People's Artist of the USSR (1969) and Hero of Socialist Labour (1979).

Lyudkevych belongs to the school of composers (others being Barvyns'ky, Kolessa, Sichyns'ky and Simovych) who developed and worked in Western Ukraine prior to its incorporation into the Soviet Ukraine and USSR. Their primary musical influences came from Prague and Vienna. Lyudkevych's considerable and varied output – nearly all genres are represented – is dominated by a single work, the symphonic cantata *Kavkaz* ('The Caucasus'), a setting of a poem of the same name by Shevchenko composed between 1902 and 1913. It is a symphony in all but name, but one in which the chorus is both a soloist and part of the general ensemble. Inspired, unquestionably, by the choral concerto tradition of 18th-century Ukraine, Lyudkevych created a work of considerable power and originality both in form and content. His style in *Kavkaz* is firmly tonal (as it remained until his death) with a tendency towards monumentalism. Laconic but lyrical themes infused with Western Ukrainian modal folklore (Carpathian, Lemko and Galician) are handled in a

dynamic manner, combining imitative polyphony (fugal writing is fairly common) and sharp tonal juxtapositions. Although the orchestration of *Kavkaz* is essentially conventional, the incorporation of the chorus is realized in an original manner. In addition to a fair number of other large-scale choral works, such as *Zapovit* ('The Testament', 1934) and many arrangements of folksongs and solo vocal compositions, Lyudkevych composed a number of instrumental works which range in scope from the *Elehiya: variatzii na starohalyts'ku pisnyu 'Tam, de chornohora'* ('Elegy: Variations on an Old Galician Song "Where the Black Mountain is"') for solo piano, to chamber and orchestral works. The opera *Dovbush* and *Prykarpats'ka symfoniya* (The Subcarpathian Symphony, 1952) dominate his last creative period (1943–1966). Lyudkevych wrote many theoretical and enthnomusicological works including *Zahalni osnovy muzyky* ('The Basic Principles of Music', 1921). He was active as a critic and writer on music for a variety of journals including *Artystychnyi vistnyk*, *Muzychnyi lystok* and *Muzychnyi vistnyk*. He edited the works by earlier composers including Matyuk, Nyzhankivs'ky, Verbyts'ky and Vorobkevych; he also orchestrated Lysenko's operas *Noktyurn* ('Nocturne') and *Uto Plena* ('The Drowned Maiden'). The last years of Lyudkevych's creative life were marked by scandal: when a major anthology of his writings was published in Kiev in 1973 it was promptly removed from circulation. When a severely abridged – or censored – version appeared in 1976, it consisted of a volume of 212 pages as opposed to the original 416. A photocopy of the original edition was also published that same year in the United States and Canada.

WORKS

Lyzarden. *See* LYSARDEN.

M

Ma. The flattened form of ME in TONIC SOL-FA.

Ma, Yo-Yo (*b* Paris, 7 Oct 1955). American cellist of Chinese origin. He began studying the cello at the age of four and made his professional début when he was five. After his family moved to the USA he studied with Leonard Rose in the preparatory division of the Juilliard School of Music (1964–71) and first appeared in New York at the age of 15; he attracted international attention when Leonard Bernstein presented him on television in a fund-raising programme for the Kennedy Center. He studied humanities at Harvard University from 1972 to 1976 while continuing musical activities in the summer vacation, mainly at the Marlboro Musical Festival. His full-time career began in 1976 and in 1978 he won the Avery Fisher Prize. Ma has performed with major orchestras around the world, including the New York PO, the Chicago SO, the Berlin PO, the LSO and the Israel PO. He has toured internationally as soloist, recitalist and chamber musician with, among others, Leonard Rose, Pinchas Zukerman, Yehudi Menuhin and Emanuel Ax, with whom he has recorded Beethoven's cello sonatas. His repertory, much of which he has recorded, includes most of the Classical and Romantic concerto and recital literature and much chamber music. He has been widely admired for his interpretations of the Bach suites, which have tended to grow more romantically subjective over the years. Between 1994 and 1997 he made a six-part film series in which he explored each of the suites with artists from other disciplines. He has also championed lesser-known works such as the concertos of Barber, Goldschmidt, Richard Damielpour and Christopher Rouse, all of which he has recorded. Ma's playing is known for its mellow tone, decisive characterization and sensitive musicianship based on a faultless technique. He plays a Montagnana dated 1733, and the 'Davidoff' Stradivari dated 1712.

RICHARD DYER/MARGARET CAMPBELL

Maag, (Ernst) Peter (Johannes) (*b* St Gall, 10 May 1919). Swiss conductor. He attended the universities of Zürich, Basle and Geneva and from 1943 to 1946 was engaged at the Biel-Solothurn civic theatre, moving from répétiteur to principal conductor. After assisting Furtwängler and Ansermet, Maag became principal conductor at Düsseldorf (1952–5), then Generalmusikdirektor at Bonn (1955–9), where he encouraged the performance of unfamiliar works such as Schumann's *Genoveva* and Cavalieri's *Rappresentatione di Anima, et di Corpo* as well as 20th-century operas. His British opera débuts were at Covent Garden in *Die Zauberflöte* and at Glyndebourne in *Le nozze di Figaro*, both in 1959. He conducted *Così fan tutte* at the Chicago Lyric Opera in 1961 and was principal conductor at the Vienna Volksoper from 1964 to 1968. His Metropolitan début was with *Don Giovanni* in 1972, and in Italy he held short-term appointments as artistic director at the Teatro Regio, Parma (1972), and the Teatro Regio, Turin (1974), as well as becoming a regular guest at La Scala, Milan. He has also appeared at the Teatro Colón, Buenos Aires, and at major European festivals. He received the Toscanini Medal at Parma (1969), the Verdi Medal (1973) and the Toscanini 'Presentation Baton' (1975). As an orchestral conductor he has held posts with RAI and the Orquesta Nacional de España, and from 1984 to 1991 was chief conductor of the Berne SO.

Maag's performances of Mozart operas have won praise for their combination of natural grace with Classical brio. He is also accomplished in the Italian repertory, his recordings of which include Verdi's *Luisa Miller* and Paer's *Leonora*. In the orchestral field his lithe, disciplined performances of Mozart, Mendelssohn, Dvořák and many 20th-century composers have been admired both in the concert hall and on disc.

JÜRG STENZL/ALAN BLYTH

Maal, Baaba (*b* Podor, Senegal, 12 Nov 1960). Senegalese Fulani singer and guitarist. He studied law as a young man. He received a scholarship to the Ecole des Beaux Arts in Dakar and went on to study the traditional music of Senegal as well as that of neighbouring Mauritania and Mali. He continued his training at the Paris Conservatoire, studying theory and composition. He later formed the bands Daande Lenol (Voice of the People, 1985) and Lasli Fouta with Mansour Seck. In 1985 he began recording for Syllart, and he subsequently recorded for Island (Mango). During the last few years of the 20th century his recordings became more eclectic in style, incorporating elements of reggae, rap and funk; recordings such as *Nomad Soul* are representative of his position as an artist working with both African and Western musical traditions.

GREGORY F. BARZ

Maas, Chris(tianus Joannes) (*b* Grootebroek, 21 Aug 1922; *d* Amsterdam, 4 April 1998). Dutch musicologist. In addition to the organ and piano he studied theory with Ernest Mulder at Amsterdam Conservatory and musicology with Bernet Kempers and Smits van Waesberghe at the university. In 1949 he became an assistant at the Institute of Musicology in Amsterdam and later a research associate. In 1967 he took the doctorate under Bernet Kempers with a dissertation on the history to 1525 of the polyphonic *Magnificat*. In 1971 he succeeded Smits van Waesberghe as professor of musicology at the University of Amsterdam. Maas' main area of study was the music of the Renaissance. He was the general editor of the New Obrecht Edition (Amsterdam, 1983–). He was on the board of the Vereniging voor Nederlandse Muziekgeschiedenis (1968–78), holding the presidency (1971–8), and was also a member of the editorial board of the journal *Tijdschrift voor Nederlandse Muziekgeschiedenis* (1989–96).

ELLINOR BIJVOET/JOOST VAN GEMERT

Maas, Joseph (*b* Dartford, Kent, 30 Jan 1847; *d* London, 16 Jan 1886). English tenor. He started his career as a chorister at Rochester Cathedral, studying singing with the organist, J.L. Hopkins, and later with Susannah (or possibly Louisa) Pyne in London and Sangiovanni in Milan. He made his début in February 1871, replacing Sims Reeves at a concert given by the Henry Leslie Choir. His first stage appearance was as Babil in Dion Boucicault's spectacle *Babil and Bijou* at Covent Garden in August 1872, after which he went to the USA as a member of Clara Kellogg's English Opera Company. In 1878 he sang Gontran in the first performance in England of Brüll's *Das goldene Kreuz* at the Adelphi Theatre under Carl Rosa, who then engaged him as principal tenor. He sang the title role in the English première of *Rienzi* (1879), Wilhelm Meister and Radames in the first English-language performances of *Mignon* and *Aida* (1880), and Des Grieux in the first London performance of *Manon* (1885). In 1883 he sang Lohengrin at Covent Garden, and his repertory also included Faust and Donizetti's Edgar. Maas appeared regularly in concerts and oratorio, especially in the Handel festivals. He was heard in Paris and Brussels in 1884 and 1885; in August 1885 he sang at the Birmingham Festival in the first performances in England of Dvořák's *The Spectre's Bride* and Stanford's *Three Holy Children*. He was an indifferent actor, but his voice was said to be of a pure and beautiful quality, and his cantabile style was greatly admired.

HAROLD ROSENTHAL/GEORGE BIDDLECOMBE

Maas, Walter A.F. Founder of the GAUDEAMUS FOUNDATION.

Maass, Nikolaus (*d* Copenhagen, 1615). German organ builder. He was active in central and northern Germany and in Denmark from 1584 to 1615, and came perhaps from Saxony; the supposition that he was from Brabant is not borne out either by Praetorius, who is a major source of information about him, or by the style of his work. Maass worked in 1584 and 1598 on the organ of the Marienkirche, Prenzlau, built by F. Petersen in 1567, and from 1599 to 1603 on another of Petersen's organs, that of St Nikolai, Greifswald (1575). He was granted citizenship in Stralsund in 1592, where in 1592–4 he built a large organ (three manuals, 43 stops). He built another in the region, in the Marienkirche at Barth, in 1597, and he worked in Grimma, Saxony, at some time before 1598. Maass settled in Copenhagen in autumn 1603 as organ builder to the royal Danish court. He built a large organ in the Nikolaikirche, Flensburg, 1604–9 (three manuals, 38 stops; the case by H. Ringerinck survives). In 1611 he supervised the rebuilding of the Roskilde Cathedral organ, built in 1553–5 by H.R. Rodensteen. His last large organ, 1613–15, in the chapel at Frederiksborg Castle, Hillerød, was completed after his death by his pupil Johann Lorentz from Saxony, who succeeded him as court organ builder. In important characteristics Maass's organs are in the style of the large central German Baroque organs; his principal model seems to have been David Beck. He equipped the *Hauptwerk*, *Rückpositiv* and Pedal each with a complete Principal chorus and a comprehensive group of foundation stops and, especially in the *Rückpositiv* and Pedal, a colourful series of reed stops. Maass's larger organs have, in addition, a separate *Brustwerk* with its own keyboard, which was also provided with three

comprehensive groups of stops – at least that is true of the Stralsund organ; it was a rarity in north German organs of that date. Maass built slider wind-chests; his keyboards have compasses of *CDE–g″a″* or *CDE–d′* (St Nikolaikirche, Flensburg).

HANS KLOTZ

Maastricht. City in the Netherlands. From the Middle Ages it had close connections with Liège and Aachen, and held cultural importance on account of its two main churches: the Onze-Lieve-Vrouwekerk and St Servaas. The Maastricht Easter Play (*c*1200) is preserved in the Meermannianum Museum in The Hague, and there is a Legend of St Servatius (*c*1170) by the trouvère Hendrik van Veldeke. Franco of Cologne, who was to lecture in Paris, studied in the city between 1215 and 1223; humanist Matthias Herbenus (1445–1538) was a later resident. The earliest source of secular music is a manuscript from the last quarter of the 15th century containing some melodies by Maastricht *joculatores* and now contained in the Rijksarchief Limburg in the city. Around 1490 the composer Marbriano de Orto was a prebendary of St Servaas, but there is no evidence of his presence. Ludovicus Episcopus (*c*1525–95), however, was there, and some of his chansons were printed by Jacob Baethen of Maastricht in his *Dat ierste boeck van den niewe duytsche liedekens* (1554). Henri Dumont (1610–84) studied here and was probably a native.

Musical life is better documented from the early 18th century onwards. The large music collection of the Onze-Lieve-Vrouwekerk, now in the municipal records, includes works by the Maastricht composers Marcus Teller (*c*1668–1728), Simon Trico (1678–1757), Hubertus Renotte (*c*1690–1745), François Rouwijzer (1737–1827), Jean-Jacques Renier (1747–1815) and François Rutten (1763–1840). The second quarter of the 19th century was a palmy era for music at both principal churches, which had their own forces and performed large-scale works, including those of the local composers Joannes F.H. Frère (1809–35) and Jan Nicolaas Bartholomeus (1812–73). Other natives of the city included the cellists Alexander Batta (1816–1902) and Joseph Hollman (1852–1926).

Military band music became a favourite civilian pastime during the 19th century, culminating in the work of Guustaaf Francies de Pauw (1867–1943), a prolific composer for brass band and an excellent conductor. His near contemporaries, the Olterdissen brothers Alphons (1865–1923) and Guustaaf (1860–1942), compiled operas in the Maastricht dialect using the music of other composers: *De kaptein van Köpenick* (1907) and *Trijn de begijn* ('Kate the Nun', 1912) are still performed. Guustaaf also wrote a lot of music for children, including four operettas. Charles Smulders (1863–1934), who became a professor at the Liège Conservatoire, produced remarkable works for the male-voice choir Mastreechter Staar.

In 1883 the Maastricht council founded a music school and an orchestra, the Maastrichts Stedelijk Orkest (renamed the Limburg SO in 1955). The composer-conductor Otto Wolf (1849–1917) directed the orchestra until he was succeeded by Henri Hermans (1883–1947), under whose rule (1916–47) it became fully professional and gained a national reputation. Besides being an excellent orchestral trainer, Hermans did much for new music, and introduced his audiences to works by Stravinsky, Hindemith, Szymanowski, Meulemans and Messiaen. He was also head of the municipal music school, which had a professional department from 1924 onwards; his pupils there included the composers Andrée Bonhomme (1905–82) and Matti Niël (1918–89), who went on to study with Milhaud and Webern respectively. Niël in turn stimulated a new generation of Maastricht composers, including Henri Delnooz (*b* 1942).

Subsequent conductors of the orchestra included André Rieu (1949–79), Ed Spanjaard (1981–8) and Shlomo Mintz (from 1994). Maastricht is also the home of the Zuid-Nederlandse Opera, which was founded in 1949 as Operagezelschap Verdi and became fully professional in 1952 under the name Operagezelschap De Zuid-Nederlandse Opera, and which tours nationwide.

HANS VAN DIJK

Maatschappij tot Bevordering der Toonkunst (Association for the Promotion of the Art of Music). Dutch musical organization. The oldest association of its kind in the country, it was established in 1829 and laid the foundations of music education by setting up music schools and after 1881 by instituting examinations for professional musicians. After World War II, when music schools and conservatories in the Netherlands became government institutions, the association was no longer deeply concerned with music education, although it continued to provide grants for gifted music students. Much work is done in forming choirs and in renewing the choral repertory; a federation of youth choirs is attached to the association, and the performance of Dutch choral works is encouraged. In 1982 the society helped to organize the Stichting Nederlandse Korenorganisaties. The association has built up an important library, which since 1955 has been an independent organization; it consists of a loan department for choral and orchestral material and a research department containing valuable historical material (e.g. manuscripts and early music prints). The 1990s saw closer links with the KONINKLIJKE VERENIGING VOOR NEDERLANDSE MUZIEKGESCHIEDENIS.

WOUTER PAAP/JOHAN KOLSTEEG

Maayani, Ami (*b* Ramat-Gan, 13 Jan 1936). Israeli composer and conductor. He studied at the New Jerusalem Academy of Music (1951–3), including conducting with Eitan Lustig, and composition privately with Ben-Haim (1956–60) and at Columbia University, New York, where he specialized in electronic music with Ussachevsky (1961–2, 1964–5). In addition he studied architecture and urban planning at the Israel Institute of Technology, Haifa (BA 1960), and at Columbia (1961–2), and philosophy at Tel-Aviv University (MA 1974). He was a founder and conductor of the Israel National Youth Orchestra (1953–7, 1970–4), the Tel-Aviv Municipality Youth Orchestra (1956–60) and the Technion SO (1958–60). He was also chairman of the Israeli League of Composers and the ISCM Israel section (1970–4, 1981–8) and taught at the Jerusalem Rubin Academy of Music and Dance (1972–3), later becoming assistant director (1975–9) and head of the Tel Aviv Rubin Academy of Music (appointed 1993). From 1983 to 1988 he was on the board of the Israel National Council of Culture and Art. Maayani's music makes use of Near Eastern elements, such as melisma, traditional Bible cantillation, Jewish prayer traditions, tone-colour and some formal and tonal aspects of Arab music. These he has tried (from about 1970) to combine with classical European forms and French Impressionist orchestration; at the same time Near Eastern rhythmic patterns are still prominent though of less importance than in the early works. Other characteristics include experiments with word-painting and new sound combinations. His Toccata for harp was a test piece at the Second International Harp Contest (Israel, 1962) and from then on Maayani's harp music became well known among harpists throughout the world. Among many awards, he received the Engel Prize (1963) for Harp Concerto no.1, the Israel Composers and Authors Association Prize (1974) and the Workers' Union Prize for the Arts (1988).

URY EPPSTEIN

Maazel, Lorin (Varencove) (*b* Neuilly-sur-Seine, 6 March 1930). American conductor and violinist. He studied privately in Los Angeles and Pittsburgh and began conducting as a child, at Los Angeles in 1938 and at the New York World's Fair in 1939, later earning Toscanini's commendation after a 1941 appearance with the NBC SO. He made his début as a violinist at Pittsburgh in 1945, becoming the leader of the Pittsburgh Fine Arts Quartet, then read languages, mathematics and philosophy at the University of Pittsburgh. He joined the Pittsburgh SO as a violinist in 1948 and became its apprentice conductor. His adult conducting début was at Catania in 1953 while in Italy on a Fulbright scholarship to research Baroque music, and he was soon engaged elsewhere in Italy and in Austria and Germany. His London début was with the BBC SO in 1960, when his performance of Mahler was acclaimed for its coherence, scrupulous articulation and expressive power. The same year Maazel was the first American conductor at Bayreuth (in *Lohengrin*) and he returned there for the *Ring* (1968–9). He made his Metropolitan Opera début in 1962 with *Don Giovanni*, first visited the former USSR and Japan as a guest conductor in 1963, and in 1965 both produced and conducted *Yevgeny Onegin* at Rome. That year he became artistic director at the Berlin Deutsche Oper, Berlin (a post he held until 1971), and music director of the Berlin Radio SO (where he remained until 1975). At the Deutsche Oper he gave the première of Dallapiccola's *Ulisse* (1968) as well as conducting the standard repertory, and was admired for his forceful yet secure musical direction.

Following a season (1971–2) as associate principal conductor of the New Philharmonia in London, Maazel was music director of the Cleveland Orchestra, 1972–82, where he widened the repertory and gave the American premières of several European orchestral works and, from 1974, brought staged opera into the Cleveland season. He discussed his approach to the organization and performance of opera in *Opera News* ('A Brave New World for Opera', xl/5, 1975–6, pp.18–21). His Covent Garden début was not until 1978 with Verdi's *Luisa*

Lorin Maazel, 1981

Miller, which he recorded the following year with Royal Opera House forces. He was chief conductor of the French National Orchestra, 1977–82, principal guest conductor there to 1988 and music director from 1988–91.

In 1982 Maazel became the first American to take the dual post of artistic and general director at the Vienna Staatsoper, on a four-year contract. Political and other problems led to this being curtailed in 1984, when he returned to the USA as music consultant to the Pittsburgh SO; he was music director there from 1988–96. When he left Pittsburgh it was reportedly to devote more time to composition, and his music for violoncello and orchestra, written for Rostropovich, was given its first performance in 1996 at one of his last Pittsburgh concerts. In 1993 he was appointed music director of the Bavarian RSO at reportedly the highest fee ever paid to a music director, which occasioned much press comment; but he has also given his services at many concerts to benefit international relief organizations. In 1997 he conducted the première of Penderecki's *Seven Gates of Jerusalem*.

Maazel works as a guest conductor with symphony orchestras throughout the world and makes frequent appearances at La Scala; he also appears as a violinist in concerts, and has made a recording of virtuoso violin pieces. He has recorded his narration for *Peter and the Wolf* in six languages, and has become much involved in filmed opera, conducting for Joseph Losey's production of *Don Giovanni*, Francesco Rosi's *Carmen* and Zeffirelli's *Otello*, among others. He has made over 350 recordings, which include the complete symphonies of Beethoven, Mahler, Rachmaninoff, Sibelius (a notable cycle with the Vienna PO) and Tchaikovsky, and around 40 operas, of which his readings of Ravel's *L'enfant et les sortilèges*, *Fidelio*, and most of the Puccini operas are among the most distinguished. Maazel is generally regarded as a bold, vigorous but variable conductor, admired for his drive and precise control of orchestral detail but sometimes criticized for coolness and calculation. His numerous honours include the Légion d'Honneur and the Grosses Verdienstkreuz der Bundesrepublik Deutschland.

ARTHUR JACOBS, NOËL GOODWIN

Mabellini, Teodulo (*b* Pistoia, 2 April 1817; *d* Florence, 10 March 1897). Italian composer and conductor. The son of Vincenzo Mabellini, a wind instrument maker, he took his first lessons in harmony and composition in Pistoia from the *maestri di cappella* and the organists Giuseppe Pilotti (who had studied with Stanislao Mattei) and Giuseppe Gherardeschi. In 1833 he moved to Florence, where he completed his studies at the Istituto Musicale in 1836. The same year he made his début as a composer with the opera *Matilde di Toledo*, the success of which earned him a scholarship from the Grand Duke Leopold II. He then went to Novara to study with Mercadante, and in 1840 produced *Rolla*, his most successful opera, in Turin. In 1842 he returned to Pistoia, but a year later settled in Florence, accepting an invitation to become director of the orchestra of the Società Filarmonica; this involved him from 1863 to 1880 in directing the grandiose Concerti Popolari (with 100 performers), promoted by Abramo Basevi. These contributed greatly to an increased knowledge in Italy of the great German and Austrian symphonic works. In 1847 Mabellini was appointed *maestro di cappella* to the grand ducal court and in 1848 became conductor at the Teatro della Pergola. The governor of Tuscany finally conferred on him the chair of composition at the Istituto Reale Musicale 'L. Cherubini' in 1859. In 1869 he wrote the 'Lux aeterna' for the abortive Rossini requiem organized by Verdi. He taught until 1887 and trained many promising pupils. The city of Pistoia built a theatre in his honour and gave it his name.

As a composer Mabellini had many strong qualities, notably an ability to work successfully in different genres, a mastery of counterpoint and orchestration, a solid musical grounding, a sure technique and a conscious adherence to the great Classical tradition. But none of these could redeem his numerous works (not even *Rolla* and the Requiem, the most famous of them) from the fundamental lack of an individual, original and genuinely creative musical personality, and they are now completely forgotten. His fame today rests on his promotion of Italian musical culture.

WORKS

Operas: Matilde di Toledo (os, 2) Florence, Alfieri, 27 Aug 1836; Rolla (os, 2, G. Giachetti), Turin, Carignano, 12 Nov 1840, *I-Mr**, vs (Milan, 1841); Ginevra degli Almieri [Ginevra di Firenze] (os, 3, L. Guidi-Rontani), Turin, Carignano, 13 Nov 1841; Il conte di Lavagna (tragedia lirica, 4, F. Guidi), Florence, Pergola, 4 June 1843, vs (Milan, ?1844); I veneziani a Costantinopoli (os, 2), Rome, Apollo, spr. 1844; Maria di Francia (dramma tragico, 3, Guidi), Florence, Pergola, 14 March 1846; Il venturiero (ob, 2, A. de Lauzières), Livorno, Rossini, carn. 1851, collab. L. Gordigiani; Il convito di Baldassarre (os, 3, G. de Toscani), Florence, Pergola, Nov 1852; Fiammetta (ob, 3, G.B. Canovai), Florence, Pergola, 12 Feb 1857, excerpts, pf acc. (Milan, n.d.)

Vocal, solo vv, vv, orch: Eudossia e Paolo, o I martiri (orat, L. Venturi), vs (Florence, 1845); L'ultimo giorno di Gerusalemme (dramma liturgico, G. Barsottini), Florence, 1857; L'Italia risorta (Cempini), inno nazionale toscano, perf. 1847; Michelangelo Buonarroti, sym. ode, perf. 1875; Inno all'arte, 1886

Cants., solo vv, vv, orch: La caccia, 1839, Raffaello Sanzio, 1842, excerpts (Milan, *c*1842); Il ritorno, 1846; L'Etruria, 1849; Cant. elegiaca, 1850; Saul, 1857; Le feste fiorentine delle potenze e degli omaggi all'usanza del secolo XIV (S. Fioretti), 1860, vs (Florence, ?1860); Gli orti oricellari, perf. 1863; Lo spirito di Dante, perf. 1865, arr. org acc. (Milan, n.d.); Le feste rossiniane, 1873

Sacred: 4 masses, solo vv, vv, orch: e, 1843, F, for the wedding of Grand Duke Ferdinand of Tuscany, 1852, b, 1862, F, 1863; Mass, E, solo vv, str orch, 1840; Mass, b, solo vv, orch, 1847; Messa solenne, F, solo vv, vv, org, vc, db, 1882; Requiem, c, 4 solo vv, vv, orch/org (Paris, ?1851); Qui tollis, solo vv, vv, orch, 1872; Quoniam, solo vv, vv, orch, 1872; Agnus Dei, solo vv, vv, orch, 1872; Libera me, 4 solo vv, vv, orch, 1856; Lux aeterna, terzetto, orch, for Rossini requiem, 1869; Ave Maria, T, vv, vn obbl, orch, 1867 (Milan, n.d.); Ecce sacerdos magnus, 4 solo vv, vv, orch, for visit of Pius IX to Florence, 1857; Responsories for Holy Week, 8vv, str orch, 1847 (Florence, *c*1860); Stabat mater; Tantum ergo; Te Deum, 4vv, orch (Milan, n.d.); Domine ad adjuvandum, 1873; Laudate pueri, 1873

Other works: Sinfonia, D, 1838; marches, 6 waltzes, wind insts; Gran fantasia, fl, hn, tpt, trbn, orch, for the installation of Grand Duke of Tuscany, 1846; Conc. per quartino, cl, flugelhorn, tpt, bar saxhorn (Florence, n.d.); Fantasia a terzetto, cl, flugelhorn, bar saxhorn (Florence, n.d.); songs; pf pieces

FRANCESCO BUSSI

Mačák, Ivan (b Gbelce, nr Nové Zámky, 26 Aug 1935). Slovak ethnomusicologist. He studied ethnomusicology under Kresánek at Bratislava University (1953–9), graduating in 1959 with a diploma thesis on the folk music of Turzovka; he took the doctorate there in 1969 with a dissertation on the classification and history of Slovak folk instruments. After working as editor of *Ľudová tvorivosť* (1959–65) he became curator of the musical instruments of the Slovak National Museum, Bratislava (from 1965; director 1991–5). He also served as a part-time lecturer in ethnomusicology at the Bratislava Academy of Music and Dramatic Art (1961–91), and was commissioned by the National Museum of Man, Ottawa, to catalogue its collection of instruments (1970–71). His main areas of research are ethnomusicology and instruments; at the Slovak National Museum he has built up a collection of about 900 instruments and about 7000 items of iconographic material. He is particularly interested in the earliest history of instruments and in problems of methodology in organological research and documentation. With Oskár Elschek and Erich Stockmann he was an editor of the *Annual Bibliography of European Ethnomusicology* (Bratislava, 1965–75).

□

Mácal, Zdeněk (Macal, Zdenek) (*b* Brno, 8 Jan 1936). American conductor of Czech birth. He studied with Břetislav Bakala, František Jílek and Josef Veselka at the Brno Conservatory (1951–6), and at the Janáček Academy (1956–60), from which he graduated with a study of Purcell's *Dido and Aeneas*. He went to Olomouc as conductor of the Moravian PO (1963–7), and in 1965 won the international conducting competition at Besançon; in 1966 he won the Dmitri Mitropoulos Competition in New York and first conducted the Czech PO at the Prague Spring Festival. He toured with the orchestra to Hungary and the Balkan states, and in 1968 to West Germany, Austria and Switzerland. In 1967 he became principal conductor of the Prague SO. The following year he undertook a six-month engagement in the Netherlands, and afterwards decided to make his home in Switzerland. He made his British début with the Bournemouth SO in 1969 in Bournemouth and London. From 1970 to 1974 he was Generalmusikdirektor of the Cologne RSO and from 1975 to 1981 Generalmusikdirektor of the Hanover RO. He made his American début with the Chicago SO in 1972. In 1986, after moving permanently to the USA and taking American citizenship, he was appointed music director of the Milwaukee SO, a post he held until 1996. During this period he considerably raised the orchestra's standards and reputation. In 1995 he became music director of the New Jersey SO. The following year he appeared again with the Czech PO at the Prague Spring Festival, after a gap of 28 years. Mácal has also worked as a guest conductor with leading orchestras throughout the world, including the LSO, LPO and Berlin PO, and appears regularly at major international festivals. A conductor of strong personality, clarity of purpose and firm structural logic in performance, he has a repertory ranging from the 18th century to the 20th, with a special interest in Dvořák. His recordings include *Má vlast* and works by Glier, Rachmaninoff and Prokofiev.

ALENA NĚMCOVÁ

McAllester, David P(ark) (*b* Everett, MA, 8 June 1916). American ethnomusicologist. He studied at Harvard University (BA 1938) and then at Columbia University (PhD 1949) with George Herzog. He was appointed to teach anthropology and music at Wesleyan University in 1947, retiring as professor emeritus in 1986; he was one of the first ethnomusicologists to offer courses in non-Western music at an American university. One of his students at Wesleyan was C.J. Frisbie, who became a highly accomplished scholar of Navajo music and culture. He was also guest lecturer at other universities in the USA and Australia and taught Amerindian music and culture at secondary schools. He helped to found the Society for Ethnomusicology in the 1950s and served as its president 1964–6.

McAllester led the generation of American scholars who, beginning in the late 1940s, effected the transformation of comparative musicology into the modern discipline of ethnomusicology. He and his contemporaries emphasized data collection through original field research and the application of anthropological theory and method to music scholarship. His research focussed primarily on Navajo and Apache music and ceremonialism. In his first major publication, *Peyote Music* (1949), he took a descriptive and historical approach. He broke new ground with his most influential work, *Enemy Way Music* (1954), the first study of Amerindian musical aesthetics in relation to broader value systems within a culture. He began working with the Navajo singer Frank Mitchell in 1957, a collaboration that continued until Mitchell's death ten years later. In 1976 McAllester embarked on the study of contemporary Navajo music; he was one of the first ethnomusicologists to treat Amerindian popular music in a scholarly way. The author of five books and nearly a hundred articles, he remains one of the most important ethnomusicologists of his generation.

VICTORIA LINDSAY LEVINE

MacArdle, Donald W(ales) (*b* Quincy, MA, 3 July 1897; *d* Littleton, CO, 23 Dec 1964). American musicologist. He was educated at the MIT (BS in chemistry, MS in chemical engineering), and worked for most of his life as a chemical and management engineer. He studied music at the Longy School in Cambridge, Massachusetts, and the Juilliard Institute in New York, and also musicology at New York University (under Martin Bernstein, Curt Sachs and Gustave Reese). To gain experience in listening to music he served as an usher at Symphony Hall and the Opera House in Boston during his adolescence, and later he became junior music critic for a Boston newspaper and a national music magazine. He also conducted amateur and semi-professional orchestras, choruses and operatic groups, wrote for gramophone companies, conducted weekly radio programmes and lectured on music. During World War II MacArdle served in the US Army. As a colonel in the Corps of Engineers, US Army Reserve, he was stationed during 1944–5 in London, where he took part in choral groups and other musical activities. All his spare time in Europe was spent in research, already begun at home, in Beethoven biography and bibliography, a field in which he became a leading specialist. His work made available a vast amount of significant new information, and his meticulous annotated edition of Anton Schindler's *Beethoven as I Knew him* (1966) was welcomed as an indispensable tool for Beethoven scholars, as was the posthumously compiled *Beethoven Abstracts* (1973).

ERIC BLOM/RAMONA H. MATTHEWS

Macbride, David (Huston) (*b* Oakland, CA, 3 Oct 1951). American composer and pianist. He studied at the Hartt College of Music (BM 1973) and Columbia University (MA 1976, DMA 1980). He first came to public attention as a founder and director of Gageego, which was a New York-based trio dedicated to the performance of a wide range of 20th-century music. In 1984 he was appointed to a teaching position at Hartt College and became

increasingly involved in the musical life of Hartford, Connecticut, writing works for the local symphony, for students in the public schools and for outdoor performances in Hartford parks. His best works are characterized by a mixture of complexity and clarity, a direct lyricism that informs even the most knotty passages and a personal aesthetic that combines Western chromaticism with Asian elements. His awards include the George Enescu International Composition Prize (1987), two Leo Snyder Memorial Composition Prizes (1986, 1988) and the Composers Inc. Prize (1990).

WORKS

Stage: The Pond in a Bowl (op, 1, P. Qiu, H. Hung, H. Yu and S. Qin), 1980; Rose Garden (musical pageantry), 1990

TIM PAGE

McBride, Robert (Guyn) (*b* Tucson, AZ, 20 Feb 1911). American composer and instrumentalist. At an early age he learnt, mostly by himself, to play the clarinet, the oboe, the saxophone and the piano, performing locally in jazz bands and school music groups. He studied composition with Luening at the University of Arizona (BM 1933, MM 1935), where he later taught (1957–76). He also taught at Bennington College (1935–46) and in various summer music programmes. He has appeared as an oboe and clarinet soloist both live and on New Music Quarterly Recordings. In 1941 he toured South America as a member of the League of Composers Woodwind Quintet. During the years 1945–7 he was a composer and arranger for Triumph Films in New York, producing scores for *Farewell to Yesterday*, *The Man with My Face* and a number of short subjects. In 1952, on commission by F. Campbell-Watson, he reorchestrated George Gershwin's *Second Rhapsody*. Among the honours he has received are a Guggenheim Fellowship, commissions from the League of Composers and the New York City Ballet, and awards from the American Academy of Arts and Letters, the Composers Press and the University of Arizona. The titles and musical idioms of his works reflect his interest and involvement in jazz and theatrical music.

WORKS

Ballets: Show Piece (E. Hawkins), 1937; Punch and the Judy (M. Graham), 1941; Furlough Music, pf, 1945; Jazz Sym., 1954; Brooms of Mexico (A. Gordon), 1970

Orch: Fugato on a Well Known Theme, 1935; Mexican Rhapsody, 1935; Prelude to a Tragedy, 1935; Workout, chbr orch, 1936; Swing Stuff, cl, orch, 1940; Stuff in G, 1942; Strawberry Jam (Homemade), 1943; Sherlock Holmes Suite, band, 1945–6; Conc. for Doubles, cl, b cl, a sax, orch, 1947; Variety Day, vn conc., 1948; Hollywood Suite, band, *c*1950; Panorama of Mexico, 1960; Hill-country Sym., wind orch, 1962; Country Music Fantasy, wind orch, 1963; Sym. Melody, 1968; Folksong Fantasy, 1973; Light Fantastic, 1976–7; Sportmusic, band, 1976–7; film scores, incl. STEVEN E. GILBERT

McBurney, Mona (Margaret) (*b* Douglas, Isle of Man, 29 July 1862; *d* Melbourne, 4 Dec 1932). Australian composer. She received early musical training in Edinburgh with MacKenzie before emigrating to Australia with her family. Her brother, Samuel McBurney, completed the doctorate in music in Dublin and became an authority on solfège. She studied at the University of Melbourne (BMus 1896), becoming the first female graduate in music. Her early distinction as a composer grew with the completion of her opera, *The Dalmatian*, which gained her a reputation as the first Australian woman opera composer. From 1918 she taught languages at the University Conservatorium, Melbourne, as well as teaching the piano privately. At the time of her death she had completed 40 works.

McBurney was drawn to Nordic and classical themes in her programmatic and vocal music. Her larger-scale compositions reveal a mixture of influences, including 19th-century German Romanticism and English choral music. Her songs, written in the style of the English and French art song, and her idiomatic piano pieces were well known during her lifetime; *The Dalmatian* and *A Northern Ballad*, a fantasy for piano and orchestra, were also performed several times.

WORKS
(*selective list*)

Inno à Dante, chorus, orch, 1902; A Bardic Ode, hp, pf, *c*1905; The Dalmatian (op, 3, McBurney, after F.M. Crawford), 1905; A Northern Ballad, pf, orch, *c*1908, lost, arr. 2 pf, pubd; Song on May Morning, SSAATB, *c*1912; An Elizabethan Madrigal (N. Downes), 1920; pf pieces, mostly lost; *c*30 songs and duets

MSS in *AUS-PVgm*

FAYE PATTON

McCabe, John (*b* Huyton, 21 April 1939). English composer, pianist and writer on music. At the age of two he was severely burnt in an accident leaving him susceptible to illness during his childhood. He discovered music early through records, leading him to compose 13 symphonies by the age of 11. At Manchester University he studied composition with Procter-Gregg (1958–60), then with Pitfield at the RMCM (1961–2, where he was a piano pupil of Gordon Green) and with Genzmer at the Munich Hochschule (1964). From 1965 to 1968 he was

pianist-in-residence at Cardiff University, after which he successfully pursued a dual career as pianist (including a milestone recording of all of Haydn's piano sonatas) and composer. He has held a number of posts for the ISM, including that of president, 1982–3; the Royal Philharmonic and Performing Rights societies; the Association of Professional Composers, of which he was chairman, 1985–6; and the Musicians' Union. From 1983 to 1990 he was principal of the London College of Music; he later became visiting professor of composition both there and at the RAM. He has also lectured at the universities of Cincinnati and Melbourne. A (piano) prizewinner in the Gaudeamus competition in the Netherlands in 1969, he received a Composers' Guild of Great Britain special award for his services to British Music in 1975; and in 1985 he was made a CBE.

His over 150 works cover every genre from solo instrumental to opera, but he relishes most the concerto form's challenge of solo versus tutti. His nearly two dozen concertos (for most standard orchestral instruments) are the mainstay of his output, just as the symphony and string quartet were to his friend Robert Simpson. McCabe's output for his own instrument centres on six Alkan-sized studies (1969–80), though his most accomplished piano works are the *Haydn Variations*, written in 1983 to celebrate the 250th anniversary of Haydn's birth (as was his String Quartet no.4), and *Tenebrae* (1992–3).

McCabe's music is characterized by vivid instrumentation and a dynamic, dramatic use of tonality, with a range of influence taking in Bartók, Stravinsky and Vaughan Williams. In early works, such as the Hartmann variations (1964) and *Notturni ed Alba* (1970). McCabe used serialism though rarely as strictly as in his *Bagatelles* (1963); when writing the *Stabat Mater* (1976) he abandoned it completely. Several of his works have enjoyed considerable success, among them the Concerto for Orchestra, *Cloudcatcher Fells* for brass band, and the award-winning ballet *Edward II* (choreographed by David Bintley). So successful was this last that he has extracted his Fifth Symphony from it for concert use and was commissioned to write two further full-length works for Bintley and the Birmingham Royal Ballet on the subject of King Arthur.

WORKS
(*selective list*)

DRAMATIC AND ORCHESTRAL

The Lion, the Witch and the Wardrobe (children's op, 4, G. Larner, after C.S. Lewis), 1968; Mary, Queen of Scots (ballet, 2, choreog. P. Darrell), 1975; Edward II (ballet, 2, choreog. D. Bintley), 1994–5; Arthur: Pt 1 (ballet, 2, choreog. D. Bintley), 1998–9; Arthur: Pt 2 (ballet, 2, choreog. D. Bintley), 1999–2000

GUY RICKARDS

Maccari [Macari], **Giacomo** (*b* Rome, *c*1700; *d* ?Venice, after 1744). Italian composer. His Roman origin is asserted by Goldoni, who knew him, but Maccari was in Venice at least by 15 December 1720, when he became a *musico tenore* for the ducal chapel at S Marco. He may have been related to the sisters Antonia and Costanza Maccari, both opera singers from Rome; Costanza was popular in Venice (where she lived a scandalous private life) between 1715 and 1718.

Maccari wrote an early serious opera, *Adaloaldo furioso* (1727), but most of his theatrical work, like that of Salvatore Apolloni, his colleague at S Marco, was connected with Giuseppe Imer's company of comedians at the Teatro S Samuele from 1734 to 1743. During these years he is known to have composed two intermezzos and he is also thought to have written other comic works for Imer and his amateur singers (one of whom was Zanetta Casanova, mother of the writer and amorist). However, it is unlikely that the settings of Goldoni intermezzos considered by Ortolani to be possibly by Maccari are the composer's work (or the work of Apolloni); the authorship of these intermezzos is not known, although the opera *Aristide* has been attributed to Lotavio Vandini (an anagram of the name Antonio Vivaldi; Weiss considered it highly improbable that Vivaldi could be the composer). None of this music survives, but Goldoni said that its 'easy, clear style was well-adapted to the needs of those performing it'. He also had some repute as a contrapuntalist, but a solo cantata indicates only a middling talent: a florid display piece, it exploits the pathetic possibilities of the minor scale with some skill but reveals rhythmic

insensitivity. In 1744 he contributed some arias to the pasticcio *La finta schiava*.

WORKS

first performed at S Samuele, Venice, unless otherwise stated

Adaloaldo furioso (melodramma, A. Lucchini), S Moisè, carn. 1727
Ottaviano trionfante di Marc'Antonio (dramma comico, P. Miti), S Salvador, carn. 1735
La fondazione di Venezia (divertimento per musica, prol and 11 scenes, C. Goldoni), aut. 1736
Lucrezia Romana in Constantinopoli (dramma comico, 3, Goldoni), carn. 1737
La contessina (commedia per musica, 3, Goldoni), carn. 1743

La pupilla (int, Goldoni), 1734
Il conte Copano (int, A. Gorì and G. Imer), 1734

Cant., A, bc, *I-Nc*

Doubtful: La birba (os, Goldoni), carn. 1735; L'ippocondriaco (int, Goldoni), Oct 1735; Aristide (Goldoni), aut. 1735 [also attrib. Lotavio Vandini]; Monsieur Petiton (int, Goldoni), carn. 1736; La bottega da caffè (int, Goldoni), Oct 1736; L'amante cabala (int, Goldoni), aut. 1736

JAMES L. JACKMAN

McCartney, Sir **(James) Paul** (*b* Liverpool, 18 June 1942). English pop singer, songwriter, instrumentalist and composer, member of the BEATLES. His first major assignment away from the Beatles was the music for the film *The Family Way* (Decca, 1966). His solo album *McCartney* (Apple, 1970) marked the group's demise, and set a pattern for the future: where even the most celebratory Lennon-McCartney songs had included a sense of loneliness and alienation, McCartney's 1970s work turned cosily domestic. The amateurish *WildLife* (Apple, 1971) was the first to appear under the imprimatur of Wings, and the group's albums *Band on the Run* (Apple, 1973) and *Venus and Mars* (Cap., 1975) were major commercial achievements which helped to restore McCartney's credibility. In 1977 the Arcadian single *Mull of Kintyre* sold over 2·5 million copies in Britain alone. From the 1980s McCartney reasserted himself as a solo artist and maintained a high international profile through duets with Stevie Wonder and Michael Jackson. His most artistically successful albums were *Tug of War* (Parl., 1982), on which he again worked with the Beatles' producer George Martin, and *Flowers in the Dirt* (Parl., 1989), which benefited from the acerbic co-writing of Elvis Costello.

In the post-Beatle period, McCartney successfully broadened his range, without however recapturing the aesthetic consistency and emotional resonance of his songwriting partnership with John Lennon. His work continues to encompass straightforward rock and roll, sentimental ballads and those strangely affecting, oddly distanced vignettes of ordinary life which resurface in the *Liverpool Oratorio* (EMI, 1991). That score, co-written with Carl Davis, remains his most extended, although the preoccupation with the outward forms of classical music has continued, notably in the symphonic poem *Standing Stone* (EMI, 1997). He was knighted in 1997.

DAVID GUTMAN

Macchetti, Teofilo (*b* Venice, 3 March 1632; *d* Pisa, 1714). Italian music historian and composer. He studied music at Ravenna and then with Legrenzi in Venice. He joined the Camaldoli branch of the Benedictine Order, entering their monastery at Vangadizza, near Rovigo, in 1669. He was in Venice in 1672 and 1673, and in Rome during the period 1675–9. On 15 May 1681 he became *maestro di cappella* of Pisa Cathedral. He made trips to Rome, some time between 15 January 1690 and 24 June 1691, Capannoli (October 1696), and various other cities in Tuscany (August–September 1699, and for one-day excursions to organize performances). While in Pisa he wrote *Curiosità musicali*, probably the first attempt at a history of music in Italian, and one which would later interest Padre G.B. Martini. The erudite manuscript reveals him to have had a comprehensive knowledge of medieval theory and practice, as does his correspondence with G.A. Bontempi. From 1694 to 1713 Macchetti kept a musical diary (three fascicles misleadingly catalogued simply as *Conti di musiche*), an extremely valuable account of his many duties at the cathedral, and of his direction of music in 15 other churches in Pisa. Moreover, since for many occasions he listed the works performed and the singers and instrumentalists who participated as well as their fees, his diary offers a rare insight into the musical activities of Pisa; it is also an excellent source on sacred music performing practice in general. In 1711 Macchetti made arrangements that his music be sold to the Opera del Duomo after his death, a transaction which was carried out on 12 December 1715. However, although the diary indicates that his works were numerous, and were judged by one contemporary to have been composed 'con molta armonia', his only extant works are those published in *Sacri concerti di salmi*, and a manuscript of Responses for funeral services.

CAROLYN GIANTURCO

Macchi, Egisto (*b* Grosseto, 4 Aug 1928; *d* Montpellier, 4 Aug 1992). Italian composer. He studied the piano,

singing and the violin, and composition under Vlad (1946–51) and Scherchen (1949–54). From 1950 to 1952 he was engaged in research into micro-intervals at the physiology institute of Rome University, where he took a degree in literature. He assisted in the foundation and direction of reviews, theatre groups, avant-garde concert associations and electronic studios (such as the Studio M4 established in Rome in 1973). He was a founder member of both the Associazione Nuova Consonanza (1960) and the Nuova Consonanza improvisation group (1965).

After an isolated attempt at serialism (*Composizione no.2*), Macchi adapted himself to newer techniques, immediately reassessing the formal stability and expressive exuberance that had, in a traditional manner, characterized his previous compositions. The outcome was, beneath a characteristic freedom of technique, a careful attention to the effective matching of ends and means, as well as a functional use of the more challenging devices, such as aleatory writing in *Composizione no.3* and the transformation of the orchestra into a chorus in *Composizione no.5*. His interest in new theatrical developments further removed any experimental abstraction from Macchi's typical mixtures of media and styles, fixing them to ideas that were consistently up-to-date, thought-provoking and rich in meaning. From 1969 he was absorbed in writing music for the cinema and television, in which he displayed a sort of applied experimentalism, similarly able to reconcile ingenious sound-research with the greatest evocative immediacy. In more than 1000 documentaries and 20 films he never yielded to the merely superficial; linking image to sound, he maintained the mixture of organizational rigour and expressiveness found in his concert music.

WORKS
(*selective list*)

Stage: Anno Domini (2 parts, A. Titone), 1962, Palermo, 1965; Parabola (1, Titone), 1963, inc.; A(lter) A(ction) (2 parts, A. Artaud and M. Diacono), Rome, 1966; Venere e il leone (chbr op, 1, N. Badalucco), 1985, unperf.; A Matra (chbr op, 1, Badalucco), 1987, unperf.

Orch: 3 evocazioni, 1953; 2 variazioni, 1955; 4 espressioni, 1956; Composizione no.1, 1958; Composizione no.2, 4 groups, 1959, inc.; Composizione no.5, 1961; Morte all'orecchio di Van Gogh, amp hpd, chbr orch, tape, 1964 [after text by A. Ginsberg]

Vocal: Requiem, 1940; Voci (Ungaretti), chorus, 1963; Cadenza 1–2 (Diacono), S, 1967 [1 from A(lter) A(ction)]; Composizione no.6 (Kleines Dachau-Requiem) (Lat.), boys' vv, 1968; songs, etc.

Other inst: Candomblé a Oxala, ens, 1954; Micropolittico, ens, 1955; Schemi, various combinations, 1960, collab. Guaccero; Composizione no.3, 12 insts, 1960; Composizione no.4, 9 insts, 1961; Per cembalo, hpd, 1965; Comica con happy end, 4 wind, 1967; Composizione no.7, double wind qnt, str, 1968

Film scores: The Assassination of Trotsky (dir. J. Losey), 1972; Il delitto Matteotti (dir. F. Vancini), 1973; La villeggiatura (dir. M. Leto), 1973; Mr. Klein (dir. Losey), 1975; Padre padrone (dir. P. and V. Taviani), 1977; over 1000 scores for the cinema and television

CLAUDIO ANNIBALDI

Macchiavelli, Ippolito (*b* Bologna, 28 May 1568; *d* Rome, 14 May 1619). Italian composer. He served Antonio Facchinetti della Noce, Cardinal of Santi Quattro and great-nephew of Innocent IX, from 1574 to 1606. On 1 February 1607 he entered the household of Cardinal Montalto. At some point he received a benefice, which, together with the title 'Don', suggests that he took minor religious orders but was not a priest. The libretto of *Amor pudico* (Rome, 1614), to which he contributed music, indicates that he was a theorbo player. All ten of his surviving compositions are settings of Italian poetry for solo voice with thoroughbass accompaniment. Nine are strophic variations: six to canzonetta texts, two to octave stanzas and one to a sonnet. The canzonetta settings have rhythmically active basses, which accompany vocal lines with predominantly one to three notes per syllable together with a few extended and very rapid melismas. Extreme contrasts between rapid and slow delivery of the text and between recitational and lyrical styles lend drama to his works. (J.W. Hill: *Roman Monody, Cantata and Opera from the Circles around Cardinal Montalto*, Oxford, 1997)

JOHN WALTER HILL

Maccioni, Giovanni Battista [Giambattista] (*b* ?Orvieto; *d* ?Rome, *c*1678). Italian composer, harpist and librettist. The libretto of a *commedia* of 1615 entitled *I pazzi prudenti* (in *I-Rn*) is by a 'Gio. Battista Maccioni da Orvieto'. Rudhart and others assumed that this Maccioni is the same person who arrived in Munich on 12 May 1651 and received an appointment as court chaplain and harpist. In the following year, the Elector Ferdinand Maria married Princess Adelaide of Savoy, who enthusiastically supported Italian artistic endeavours in Bavaria. Maccioni soon won Adelaide's favour and became an important cultural adviser. He not only collaborated with her in the preparation of several librettos but also taught her the harp and possibly the guitar. In August 1653 the Emperor Ferdinand III was honoured during a visit to Munich by the performance of a brief allegorical composition, *L'arpa festante*, for which Maccioni wrote both text and music (in *A-Wn* 16889; 3 extracts ed. in Schiedermair, 1903–4, pp.461ff). Librettos by him for at least four other works performed in Munich survive (in *D-Mbs*). Two of these, each described as 'Introduttione per il balletto', date from 1657; Sandberger assumed that Ludwig Wendler composed the music, which is lost. The first was commissioned for the birthday (16 January) of the Dowager Electress Marie Anna. Adelaide inspired both texts and participated in the performance of the second introduction, *Li quattro elementi*. She was also responsible for the basic ideas of Maccioni's last two librettos, *Applausi festivi* (28 August 1658) and *Ardelia* (1660), a *dramma musicale*; J.K. Kerll appears to have composed the music for both texts, but it has not survived. The earlier work was an introduction to a tournament performed in honour of the Emperor Leopold I. Lipowsky (who has been followed by others) indicated that Maccioni also wrote the libretto for an *opera pastorale* entitled *Celaroso*, allegedly performed at Munich in 1657, but no evidence has been found that an opera with this title was

actually staged. Maccioni appears to have left Munich about 1661. By 1662 he was in Rome, where he served as an envoy for Munich and became a resident at the papal court. Correspondence between him and Ferdinand Maria, dating from the years 1662–74, reveals his influence in securing musicians for the Munich court; they included the castratos Ferrucci and Boni and the composer Ercole Bernabei.

Maccioni's *L'arpa festante* marks the beginning of opera at the Munich court, where Italian dramatic music flourished for the rest of the Baroque era. It consists of a single extended scene. The music calls for five soloists and includes brief recitatives, arias and duets and a final chorus. The florid arioso patterns and snatches of melodic chromaticism indicate that Maccioni was familiar with contemporary techniques. His librettos are occasional texts, except for *Ardelia*, which shows Venetian influence.

LAWRENCE E. BENNETT

McClary, Susan (Kaye) (*b* St Louis, 2 Oct 1946). American musicologist. She received the BMus in piano from Southern Illinois University in 1968 and took the doctorate in musicology in 1976 at Harvard, where she worked with Nino Pirrotta, Anthony Newcomb and Earl Kim. After teaching at Trinity College, Connecticut (1977) and the University of Minnesota (1977–83) as an assistant professor, she was appointed associate professor at Minnesota in 1983 and professor in 1990. She was then professor at McGill University (from 1992), and in 1994 she joined the faculty at UCLA, where she was made chair of the music department in 1995. She was also Ernst Bloch Visiting Professor at the University of California, Berkeley in 1993, when she presented the lecture series, 'Conventional Wisdom: the Content of Musical Form'. In 1995 she was awarded the John D. and Catherine T. MacArthur fellowship.

One of the major figures in feminist musicology, McClary attracted widespread attention in the late 1980s with work done while she was a member of the University of Minnesota committee on the press (1986–90). Provocative essays accompanying Jacques Attali's *Noise* (1985) and Catherine Clément's *Opera, or the Undoing of Women* (1988) were followed by her landmark collection of essays, *Feminine Endings* (1991), in which she outlined new directions in musicology inspired by feminist thought. Provocative and sometimes controversial, McClary has had a major influence on thinking about gender constructions in music, the role of the body in musical meaning and the significance of popular music.

JANN PASLER

MacClintock, Carol (Cook) (*b* St Joseph, MO, 19 Nov 1910; *d* Bloomington, IN, 3 Jan 1989). American musicologist. Trained in the piano, violin and singing, she received the BMus in 1932 from the University of Illinois and the MMus in 1935 from the University of Kansas. In

1955 she took the PhD under Apel at Indiana University, with a dissertation on the five-part madrigals of Giaches de Wert. She also studied at the Juilliard School of Music and the American Conservatory in Fontainebleau; her teachers included Casadesus for the piano. She taught at Colorado Woman's College (1936–40), Stephens College (1940–41), the University of Illinois (1941–4), Indiana University (1944–6) and Southern Illinois University (1959–64). In 1964 she was appointed professor of musicology at the University of Cincinnati.

MacClintock was particularly noted for her work on Giaches de Wert, whose complete works she edited with Melvin Bernstein for the American Institute of Musicology. Her studies and translations of Italian theorists of the late 16th and early 17th centuries are important to the study of the performance of madrigals and early monody.

PAULA MORGAN

McClymonds, Marita (Martha) P(etzoldt) (*b* St Louis, 4 Dec 1935). American musicologist. She studied at Culver-Stockton College (BA 1956), and later under Daniel Heartz and Alan Curtis at the University of California, Berkeley (MA 1971, PhD 1978). Prior to her graduate work she taught music privately and in public schools in Missouri and Illinois. Her academic career began in 1981, when she was appointed professor of music at the University of Virginia, where she was also chair of the music department (1988–95, 1998–9). Her dissertation on Jommelli's last years proved to be the starting point for extensive, wide-ranging studies on 18th-century Italian opera, in particular treating the innovations and modifications in *opera seria* during the second half of the century; these studies have thrown new light on the background to the operas of Mozart, Haydn and Gluck, and have focussed scholarly attention on the librettist Mattia Verazi.

PAULA MORGAN

MacColl, Ewan [Miller, Jimmie] (*b* Salford, Lancs, 1915; *d* 22 Oct 1989). English folk singer, songwriter and collector. He inherited a large repertory of traditional Scottish songs from his parents, William Miller and Betsy Hendry. During the early 1930s he wrote satirical songs. In 1934 he married Joan Littlewood, with whom he formed several theatres, the most famous of which was Theatre Workshop. He changed his name during the Lallans movement in Scotland in the 1940s. He married the dancer Jean Newlove in 1950, with whom he had Hamish and Kirsty MacColl; both became singers and musicians.

MacColl was one of the architects of the Folk Music Revival (*see* ENGLAND, §II; FOLK MUSIC, §3), which began in England in the early 1950s. In 1953 he founded (with Alan Lomax, Bert Lloyd, Seamus Ennis and others) the Ballads and Blues Club in London, later to become the Singers Club. In 1956 he met Peggy Seeger (*see* SEEGER),

with whom he embarked upon a life partnership; their three children, Neill, Calum and Kitty, are all singers and musicians. From 1957–89, they gave concerts, conducted workshops and toured in Britain and abroad as singers of traditional and contemporary songs. They recorded extensively and initiated projects such as *The Long Harvest* (a 10-volume series of traditional ballads) and *The Paper Stage* (a two-volume set of Shakespearian sung narratives). They formed their own record company, Blackthorne, and issued discs of their own renditions of traditional and topical songs.

From the 1930s MacColl worked with experimental producers in radio. In 1957, collaborating with Peggy Seeger and Charles Parker, he wrote a series of musical documentaries for BBC radio which became known as the 'radio ballads'; these were released on CD in 1999. A combination of recorded speech, sound effects, new songs and folk instrumentation, they included the programmes 'Singing the Fishing', 'The Big Hewer' and 'Songs of the Road'. In 1965 MacColl and Seeger founded the Critics Group, a company of revival singers whom MacColl trained in vocal and theatrical techniques. For five years the Critics staged annually *The Festival of Fools*, a dramatic musical revue of the year's news.

MacColl and Seeger collected extensively from traditional singers in Britain. In addition to books of his own songs and various small collections, MacColl produced with Seeger two anthologies of the music of Britain's nomadic people: *Travellers' Songs of England and Scotland* and *Doomsday in the Afternoon*.

As a songwriter, MacColl is best known as the author of *The First Time Ever I Saw Your Face*, *Dirty Old Town*, *The Shoals of Herring*, *Freeborn Man* and *The Manchester Rambler*. He wrote more than 300 songs and performed songs of the industrial cities, Scots history and the English countryside.

In 1987 he was presented with an honorary degree by the University of Exeter. He was awarded a posthumous honorary degree by the University of Salford in 1991. The Ewan MacColl and Peggy Seeger Archive is housed at Ruskin College, Oxford.

CAROLE PEGG

McCorkle, Donald M(acomber) (*b* Cleveland, 20 Feb 1929; *d* Vancouver, 6 Feb 1978). American musicologist. He attended Brown University and Bradley University, where he took the BMus in 1951. At Indiana University he worked with Willi Apel and Paul Nettl, and took the MA (1953) and the PhD (1958), with a dissertation on Moravian music in Salem. From 1954 to 1964 he taught at Salem College, Winston-Salem, North Carolina. He was also director of the Moravian Music Foundation in Winston-Salem from 1956 to 1964, when he joined the University of Maryland as professor of musicology. He was professor and head of the department of music at the University of British Columbia, 1972–5, and professor of musicology from 1972.

McCorkle was interested in 18th- and 19th-century historical musicology. He studied and edited the music of the colonial German tradition in the USA, particularly the musical culture of the Moravian settlers of North Carolina. In 1964 he began work on a thematic catalogue of Brahms's works and a descriptive catalogue of the autographs. The catalogue was completed by his wife, Margit, as *Johannes Brahms: thematisch-bibliographisches Werkverzeichnis* (Munich, 1984). He was editor of *College Music Symposium* in 1961–2 and 1970.

PAULA MORGAN

McCormack, John (*b* Athlone, 14 June 1884; *d* Dublin, 16 Sept 1945). Irish tenor, later naturalized American. He began his studies in Dublin, and in 1905 went to Milan to study with Vincenzo Sabatini. The following year he made his stage début under the assumed name of Giovanni Foli in Mascagni's *L'amico Fritz* at the Teatro Chiabrera in Savona, near Genoa. After further engagements in small Italian theatres he made his Covent Garden début as Turiddu (*Cavalleria rusticana*) in the autumn season of 1907, confirming his success the same season in *Rigoletto* and *Don Giovanni*. From 1908 to 1914 he took part in every summer season at Covent Garden, adding to his repertory (often with Tetrazzini or Melba in the cast) *Il barbiere di Siviglia*, *La sonnambula*, *Lucia di Lammermoor*, *Faust*, *Roméo et Juliette*, *Lakmé*, *La bohème* and *Madama Butterfly*. He made his New York début at the Manhattan Opera House in *La traviata* (1909) and took the same role in his Metropolitan début the following year, becoming a favourite with the public in Boston and Chicago as well as New York.

McCormack was already laying the foundations of his future career as a concert singer and soon, being by his own admission a poor actor, he decided to abandon the stage. Thereafter, partly because of his Irish nationalism (which for a time made him unpopular in England), he spent his time mainly in the USA, and in 1917 became an American citizen. His concert work revealed him as a remarkable interpreter, not only of Handel, Mozart and

the Italian classics, but also of German lieder. The preponderance in his programmes of sentimental and popular ballads alienated many musical people as much as it pleased the wider public; but, whatever the song, he never debased his style. Meanwhile his repertory of serious music grew continually.

In 1928 McCormack was made a papal count by Pope Pius XI. By then he had returned to live in Ireland, and for another decade he continued to give concerts in many parts of the world, especially in the British Isles. In autumn 1938 he made a farewell tour, but during the war he emerged from retirement for some broadcasts, and to tour in aid of the Red Cross.

McCormack's numerous recordings show the singular sweetness of his tone and perfection of his style and technique in his prime – for example, in his famous version of Mozart's 'Il mio tesoro' and in Handel's 'O sleep' (*Semele*) and 'Come, my beloved' (i.e. 'Care selve' from *Atalanta*) – while later records of lieder and of Irish folksongs illustrate other aspects of his versatile art. He was always, according to Ernest Newman, 'a patrician artist ... with a respect for art that is rarely met with among tenors'.

DESMOND SHAWE-TAYLOR/R

McCracken, James (Eugene) (*b* Gary, IN, 16 Dec 1926; *d* New York, 29 April 1988). American tenor. His début was as Rodolfo in *La bohème* at Central City, Colorado, in 1952. He made his Metropolitan Opera début in 1953 as Parpignol in the same opera and took many other comprimario roles before leaving for Europe in 1957. He was engaged at Bonn as Max, Radames and Canio. The turning-point in his career was an engagement as Otello with the Washington Opera in 1960; it became, and remained, his most celebrated role, and he recorded it under Barbirolli. He sang in most of the world's leading houses, and his repertory included Florestan, Don José, Calaf, Manrico and Don Alvaro, Tannhäuser, Bacchus (*Ariadne auf Naxos*), Hermann, Samson and John of Leyden (*Le prophète*). A powerful and convincing actor, McCracken had an emotional intensity and a dark-timbred tenor of exceptional fervour. His other recordings include Florestan, Don José and John of Leyden. He married the mezzo-soprano Sandra Warfield, with whom he collaborated on an autobiography, *A Star in the Family* (New York, 1971).

MARTIN BERNHEIMER

McCredie, Andrew D(algarno) (*b* Sydney, 3 Sept 1930). Australian musicologist and teacher. A graduate of the University of Sydney (BA 1951, MA Hons 1958), he also studied at the New South Wales State Conservatorium of Music before leaving for Europe. After studying composition with Lennox Berkeley at the RAM (1953–5), he took up musicological studies at the universities of Copenhagen (1955–6) and Stockholm (1956–7). In Hamburg (1960–63), where he was an Alexander von Humboldt Fellow, he took the doctorate in 1963 with a dissertation on German Baroque opera. In 1965 he was appointed senior research fellow at the University of Adelaide, where he later became professor of musicology (1978–94).

McCredie's initial research was in the fields of German Baroque opera, north German symphonic music from 1770 to 1830, and the sources of Byzantine and eastern European music from 1100 to 1830. However, his many later publications (in English and German) cover an unusually wide range of research, including historical, aesthetic and analytical studies of European music from the Middle Ages to the present day, as well as those dealing with Australasia and the South Pacific region. Other areas of research have been the interaction of musicology with comparative literature and topos theory, German music historiography and music in emigration. His published work on Karl Amadeus Hartmann is of particular importance, including a monograph on the composer and a complete thematic catalogue. McCredie has also contributed significantly to the literature on Australian music with his *Musical Composition in Australia* and *Catalogue of 46 Australian Composers*. In 1965 he founded and edited the annual *Miscellanea Musicologica*, which became one of the main musicological journals in Australia.

Through his own teaching and the many international conferences he organized in Adelaide, McCredie has profoundly influenced the development of musicology in Australia. In 1974 he was awarded the Dent medal, and the following year became the first musicologist to be elected a Fellow of the Australian Academy of the Humanities. In 1984 he was made a Member of the Order of Australia for his contribution to musicology.

DAVID TUNLEY

McCreesh, Paul (*b* London, 24 May 1960). English conductor. He read music at the University of Manchester (1978–81) before founding the Gabrieli Consort and Players. Following his directing début at St John's, Smith Square, London, in 1981, he has become increasingly recognized for performances of Renaissance and early Baroque masterpieces, often within their original liturgical context. He has received special acclaim for recordings based on his own research into 17th-century performance conditions. His first success, 'A Venetian Coronation', speculatively recreating the music performed in Doge Grimani's investiture in 1595, won a Gramophone Award in 1990. His preoccupation with how music adorned the distinctive ceremony and rites of Venice in its heyday of Gabrieli, Grandi and Monteverdi led to reconstructions of a 'Venetian Vespers' and a 'Venetian Easter Mass'. His 'Lutheran Mass for Christmas Morning', complete with Praetorius motets and congregational hymns, was recorded in Roskilde Cathedral, Denmark, in 1994 and arguably exploited the fullest range of acoustic and timbral perspectives yet experienced in a 'period' performance. More recently McCreesh has brought his customary concern for dramatic impact to Handel's oratorios, including vital and compelling recordings of *Messiah* and *Solomon*.

JONATHAN FREEMAN-ATTWOOD

MacCunn, Hamish (James) (*b* Greenock, 22 March 1868; *d* London, 2 Aug 1916). Scottish composer, conductor and teacher. He was the son of a shipowner, and his mother was a former pupil of Sterndale Bennett. In his culturally privileged childhood, MacCunn was encouraged in his musical pursuits, attending a season of concerts at the age of eight given by August Manns at Crystal Palace, London. He won a composition scholarship to the newly opened Royal College of Music in 1883, where he studied composition with Parry and piano with Franklin Taylor. He also played the viola in college orchestras and quartets. In 1886 he resigned from the RCM without taking a diploma.

MacCunn's first compositions of substance were heard at concerts in the RCM (*Cior Mhor*, 1885), but more importantly, through the influence of George Grove, at the Crystal Palace Saturday Concerts under Manns. Many of his major orchestral and choral works date from this period, being performed at the Saturday Concerts and elsewhere. Some songs and smaller works were included in a series of concerts at the house of the artist John Pettie, whose daughter he married in 1888. MacCunn was Professor of Harmony at the RAM from 1888 to 1894 and also gave lessons privately.

In 1889 MacCunn was commissioned by Carl Rosa to write a work for his opera company, and the opera *Jeanie Deans* was first produced at the Lyceum Theatre, Edinburgh, in 1894. It was a huge success and marked the beginning of his association with various operatic companies as a conductor. For two seasons from 1898 he conducted the Carl Rosa Company, including the first English-language productions of Wagner's *Tristan* and *Siegfried*. After Sullivan's death MacCunn took up his position at the Savoy until 1905, conducting the first run of German's *Merrie England*; he also worked with other groups such as the Moody-Manners Company, and towards the end of his life he took on some of Beecham's conducting seasons at Covent Garden (1910) and the Shaftesbury Theatre (1915). From 1912 he taught composition at the Guildhall School of Music.

Most of MacCunn's music was written to a literary stimulus, often generated by his fellow-countryman Sir Walter Scott. The opera *Jeanie Deans*, the cantata *The Lay of the Last Minstrel*, and the overture *Land of the Mountain and the Flood*, easily his most famous work, fall into this category and supplied the composer with suitable nationalist subjects for his music. His other works are similarly descriptive or illustrative and he generally eschewed the use of absolute musical forms, as did his compatriots Mackenzie and Wallace. MacCunn's aptitude for drama in music is best shown in *Jeanie Deans*, a work that stayed in the repertory for over 20 years; it has also been revived in recent times. His later dramatic works lacked its musical intensity and its narrative conviction and were not successful. Many of his stylistic tendencies in the early operas evolved from Wagner, and he has since been described, together with Ethel Smyth, as 'Wagner's most noteworthy British follower'. His orchestral overtures show a distinct technical mastery of form and

orchestration, drawing their stylistic influence from Weber, Mendelssohn, Schumann and Brahms, yet retaining a certain creativity lacking in lesser composers. He also assimilated his native Scottish music into his works without detriment to a more cosmopolitan style.

WORKS

printed works published in London, unless otherwise stated

MSS in GB-Gu, unless otherwise stated

STAGE

Jeanie Deans (grand op, 4, J. Bennett, after W. Scott: *The Heart of Midlothian*), Edinburgh, Lyceum, 15 Nov 1894, *GB-Lcm*, *Lam*, vs (1894)
Diarmid (grand op, 4, Duke of Argyle after Celtic legends), op.34, London, Covent Garden, 23 Oct 1897 vs (London and New York, 1897)

DUNCAN J. BARKER

McDaniel, Barry (*b* Lyndon, KS, 18 Oct 1930). American baritone. He studied at the Juilliard School and at the Stuttgart Hochschule für Musik, and made his recital début in Stuttgart in 1953. After short periods with the opera companies in Mainz, Stuttgart and Karlsruhe, he joined the Deutsche Oper, Berlin, in 1962, and subsequently made guest appearances at the Vienna Staatsoper, the Bavarian Staatsoper and the Metropolitan. His mellifluous voice was heard to particular advantage in Mozart, as Pelléas, and in Strauss (the Barber in *Die schweigsame Frau* and Olivier in *Capriccio* were among his best roles). He was also noted for his performances in 20th-century operas: he created the Secretary in Henze's *Der junge Lord* at Berlin in 1965, and won praise for his witty performance as the Husband in Poulenc's *Les mamelles de Tirésias* at the Munich Festival in 1974. He gave recitals in New York and in all the major European capitals; his interpretations of *Die schöne Müllerin* and *Winterreise* were distinguished by a fine sense of line and an acute understanding and projection of the texts, and he was a noted Bach singer. Richard Rodney Bennett composed his *Tenebrae* for him.

ALAN BLYTH

MacDonagh, (John Alfred) Terence (*b* Woolwich, 3 Feb 1908; *d* London, 12 Sept 1986). English oboist and english horn player. The son of an oboist, he studied in Paris and with Leon Goossens in London. His first posts were with the Scottish Orchestra (1926) and the British National Opera Company (1926–9). A founder-member of the BBC SO as its english horn player (1930), he became principal oboist in 1937. After wartime service he returned to the BBC SO in 1945–6 and again between 1963 and 1973. His artistry reached its prime as Beecham's principal oboist in the RPO (1947–63), with whom he made many distinguished recordings. MacDonagh was also a superb player of chamber music; the unique intensity of his tone can be heard in the Decca recording of Mozart's complete wind music with the London Wind Soloists (1962). From 1945 to 1978 he was professor of oboe at the RCM, where his skill in developing his pupils' natural qualities produced a succession of fine, individual oboists. He was made an OBE in 1979.

JAMES BROWN

MacDonald, Andrew P(aul) (*b* Guelph, ON, 30 Nov 1958). Canadian composer and guitarist. After studying the classical guitar at the University of Western Ontario (BM 1981), he pursued postgraduate studies in composition at the University of Michigan (MM 1982, DMA 1985), where his teachers included William Bolcom, Leslie Bassett, George Balch Wilson and William Albright. He held teaching appointments at Brandon and Wilfrid Laurier universities before accepting a composition post at Bishop's University in 1987. Co-founder and artistic

director of Ensemble Musica Nova, he has also served as vice-president of the Canadian League of Composers.

MacDonald's compositional style is marked by synthetic eclecticism. A rationalized approach to pitch and temporal structures in early works, such as *Run Before the Wind* (1985), was soon tempered by an increasing interest in Quebec folk music, first manifest in *Music for the Open Air* (1990) and *Les oiseaux sauvages* (1991). Awards from the du Maurier Arts Canadian Composers Competition (1992, 1993) and commissions from the CBC and the Manitoba Chamber Orchestra led to a number of neo-tonal orchestral works including: *In the Garden of Gaea* (1991); *Eros* (1994); a Violin Concerto (1991), which won the 1995 Juno Award; and concertos for the piano (1995) and cello (1996). Subsequent works display an interest in astronomy and ancient Greek music.

WORKS
(*selective list*)

Op: The Unbelievable Glory of Mr Sharp (chbr op, K. Keobke), 1989, Toronto, 1989

Orch: Run Before the Wind, 1985; Songs of Life's Complaint, 1986; The Birth of Spring (R. Gustafson), S, SATB, str, 1989; In the Garden of Gaea, 1991; Les oiseaux sauvages, hpd conc., 1991; Vn Conc., 1991; Les vois éternelles, 1992; Eros, 1994; The Great Rock in the Sea, 1994; Pf Conc., 1995; Vc Conc., 1996

Chbr and solo inst: Emerald Mirrors (Sonata no.1), vn, pf, 1986; Kittlin' Hair on Thairms, vn, 1986; Music for the Open Air, cl, str qt, 1990; After Dark, pf, 1991; Quatour pour Camille, str qt, 1993; In the Eagle's Eye, vn, vc, pf, 1995; Hymenaeus, vn, va, 1996; Pythikos nomos, ob, str qt, 1996

TOM GORDON

McDonald, 'Country' Joe (*b* Washington DC, 1 Jan 1942). American country and rock singer, guitarist and songwriter. He made his mark with Country Joe and the Fish, a band that played an important role in the San Francisco psychedelic scene between 1966 and 1969. In 1966 the band issued an EP that was included in an issue of *Rag Baby*, a radical magazine that circulated in the San Francisco/Berkeley area. Its songs 'Bass Strings', '(Thing Called) Love' and 'Section 43' were included on the début album, *Electric Music for the Mind and Body* (Van., 1967). While this clearly displays the band's origins in acoustic blues and folk, it is most noteworthy for its many moments influenced by the use of LSD, particularly on 'Section 43'. According to band accounts, the entire record was designed to enhance the listener's acid trip. The group's next album, *I-Feel-like-I'm-Fixin'-to-Die* (Van., 1968), included the title song, and an outspoken denouncement of the Vietnam War originally recorded in 1965, and 'Fish Cheer', which the band made famous by inserting 'Fuck' in place of 'Fish' at live performances. While *Together* (Van., 1968) brought the group's greatest commercial success, it already marked the musical decline of the band. Since the break-up of Country Joe and the Fish in 1970, McDonald has released a number of solo albums.

JOHN COVACH

McDonald, Harl (*b* nr Boulder, CO, 27 July 1899; *d* Princeton, NJ, 30 March 1955). American composer, pianist, conductor and teacher. He studied with Vernon Spencer, Ernest Douglas and Yaraslav de Zielinsky, and received the BMus at the University of Southern California (1921). Thereafter he studied in Liepzig, at the conservatory and the university (diploma 1922). Returning to the USA in 1923, he toured as a piano soloist and accompanist. He taught at the Philadelphia Musical Academy (1924–6) and at the University of Pennsylvania (1926–46), where he was successively lecturer, assistant professor, professor and director. In addition, he was general manager of the Philadelphia Orchestra (1939–55) and conducted research in acoustics and sound measurement for the Rockefeller Foundation (1930–33), publishing with O.H. Schenck *New Methods of Measuring Sound* (1935), for which he was elected to the scientific fraternity Sigma Xi. His music often follows a written programme; its style ranges from the Impressionist to the objective, employing by turns traditional tonality, contemporary dance rhythms, elements of black American and other traditional musics, extremely dissonant harmonies and harsh tone-colours. He preferred to write music that had an immediate emotional appeal, eschewing what he called 'sterile, intellectual forms and idioms'.

WORKS

BARBARA A. RENTON

Macdonald, Hugh J(ohn) (*b* Newbury, Berks., 31 Jan 1940). English musicologist. He studied under Raymond Leppard at Cambridge (1958–66); after research on the music of Berlioz he was awarded the PhD in 1969 for a dissertation consisting of a critical edition of *Les Troyens*. He was a lecturer in music at Cambridge (1966–71) and at Oxford (1971–80), and was Gardiner Professor of Music at Glasgow University (1980–87). In 1987 he was appointed Avis Blewett Professor of Music at Washington University, St Louis. His chief area of work has been the music of the 19th century, especially in France; a searching yet elegant writer, his scholarship is informed by his keen musicianship. He has been general editor of the new complete edition of the works of Berlioz since its inception in 1967 and has been particularly active in the revival of interest in Berlioz's music.

DAVID SCOTT/R

MacDonald, Jeanette (*b* Philadelphia, 18 June ?1901; *d* Houston, 14 Jan 1965). American soprano. She began her stage career in 1917 as a chorus girl at the Capitol Theater, New York. She played some minor parts in Broadway musicals during the 1920s and had her first starring role in *Yes, Yes, Yvette* (1927). She is best known for her performances in film musicals in operetta style; she first appeared opposite Maurice Chevalier, and then with Nelson Eddy in such films as *Naughty Marietta* (1935), *Rose Marie* (1936), *Sweethearts* (1938) and *New Moon* (1940). Although her voice lacked flexibility and warmth, MacDonald projected an image of charm and beauty appropriate to the romantic heroines she portrayed. She left film work in 1942 in order to make concert tours, radio appearances and recordings. She also began a brief career in opera in 1943, when she appeared with Ezio Pinza in Gounod's *Roméo et Juliette* in Montreal; her only other role was as Marguerite in *Faust* with the Chicago Civic Opera and Cincinnati Summer Opera the following year. MacDonald was married to the actor and composer Gene Raymond, whose songs she performed in her concert programmes.

JEAN W. THOMAS

McDonald, Susann (*b* Rock Island, IL, 26 May 1935). American harpist and teacher. After training in Chicago and New York, she studied from the age of 15 in Paris, at first privately with Henriette Renié, then with Lily Laskine at the Conservatoire, where she gained a *premier prix* in 1955. She won second prize at the first Israel International Harp Contest in 1959. Technically impeccable, she has played as a soloist in Europe, Australia, Japan, Israel and South America, as well as in the USA and Canada, and gives many masterclasses. She has recorded much of the more neglected harp repertory, and given first performances of many works composed for her, including Joseph Wagner's Fantasy Sonata, LaSalle Spier's Sonata, and Camil Van Hulse's Suite, all for solo harp. A teacher of great distinction, she succeeded Marcel Grandjany at the Juilliard School in 1975, continuing to teach there until 1985. From 1981 she also taught at Indiana University where she was chairman of the harp department and where, in 1989, she was named Distinguished Professor of Music. She has been artistic director of the World Harp Congress since its inception in 1975 and is founder and musical director of the triennial USA International Harp Competition.

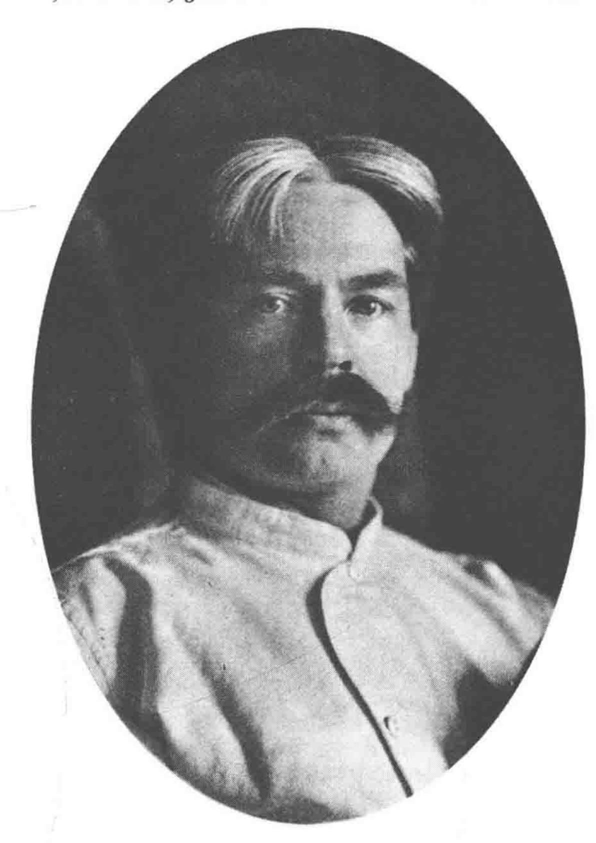
ANN GRIFFITHS

MacDowell [McDowell], **Edward (Alexander)** (*b* New York, 18 Dec 1860; *d* New York, 23 Jan 1908). American composer, pianist and teacher. At the turn of the 20th century he was America's best-known composer both at home and abroad, particularly renowned for his piano concertos and evocative piano miniatures.

1. Life. 2. Views and aesthetics. 3. Orchestral music. 4. Early piano music. 5. Sonatas. 6. Late piano sets. 7. Vocal music.

1. Life. MacDowell's ancestry was English on his mother's side and Scottish-Irish on his father's. Though his father's family had been Quakers, there is little indication that MacDowell practised this or any other religion. He showed skill in drawing and music at an early age, and when he was eight began piano lessons with the Colombian violinist Juan Buitrago. Buitrago introduced him as a boy to Teresa Carreño, who encouraged him



and later became a promoter of his music in the USA and abroad.

In April 1876 his mother took him to Paris to attend the Conservatoire, where he studied the piano with Marmontel. Dissatisfied with the instruction he was receiving, he went on to Germany in 1878, and studied in turn in Stuttgart, Wiesbaden and Frankfurt (at the Hoch Konservatorium with Carl Heymann for piano and Raff for composition). On several occasions in 1879 and 1880 he played for Liszt at conservatory concerts, and this helped further his career. By August 1880 he had left the conservatory and begun to support himself by giving private piano lessons, which he did until 1885, except for a year spent teaching at the Städtische Akademie für Tonkunst, Darmstadt (1881–2). His first seven opus numbers, works either for piano or male chorus, were published under the pseudonym of Edgar Thorn(e).

Meanwhile he continued his association with Raff, who encouraged him to send his *Erste moderne Suite* op.10 to Liszt on its completion in 1881; Liszt recommended the work for performance at a meeting of the Allgemeiner Deutscher Musikverein in 1882 and for publication by Breitkopf & Härtel. This was the beginning of his success as a composer, and other German firms were to publish his music within the next few years. In 1883 Teresa Carreño began playing his (by then) two *Moderne Suiten* in concerts throughout the USA. The next year he married Marian Nevins, a fellow American. They settled first in Frankfurt, then Wiesbaden, and from 1885 to 1888 MacDowell devoted himself almost exclusively to composition. In part because of financial difficulties he decided to return to America in the autumn of 1888.

MacDowell and his wife lived in Boston from 1888 to 1896, and during that period he composed his opp.37–51, which include his 'Indian' Suite and *Woodland Sketches*. These years also saw his rise to public attention as a result of concerts in which he played his own music. In March 1889 he gave the première of his Second Concerto under the direction of Theodore Thomas in New York; the next month he played it again with the Boston SO. There followed performances of his symphonic poems and orchestral suites, as well as of his solo piano pieces. A performance by the Boston SO of his First Piano Concerto and 'Indian' Suite at the Metropolitan Opera House in New York, in January 1896, was a high point in his career; he was critically acclaimed as both performer and composer, and within months was offered an appointment as Columbia University's first professor of music.

He lived in New York from 1896 until his death, working enthusiastically and devotedly at the task of building Columbia's music department, in which he was the sole teacher for two years. He also continued to teach the piano privately, gave concerts during the winter vacations, conducted the Mendelssohn Glee Club (1896–8) and served as president of the Society of American Musicians and Composers (1899–1900). Though he found time to compose only during summer vacations, his works from this time include several important sets of piano pieces, as well as partsongs and solo songs. After his return from a sabbatical year (1902–3), during which he toured the USA and Canada giving concerts, he fell out with Nicholas Murray Butler, the new president of Columbia, and resigned his position in mid-1904.

Edward MacDowell

After this he remained active as a private piano teacher and as a member of the National Academy of Arts and Letters (to which he was elected in 1898), the American Academy of Arts and Letters (he was one of its founders in 1904) and the American Academy in Rome. His health began to deteriorate in 1904, perhaps as a result of a traffic accident he had that year and by the autumn of 1905 he was almost completely helpless, mentally and physically. For the remaining three years of his life he and his wife spent winters in New York and summers at their home in Peterborough, New Hampshire.

2. Views and aesthetics. MacDowell presented his views on music in lectures at Columbia that were published after his death as *Critical and Historical Essays*. In one lecture he discussed music's expressive ability, calling it 'a language, but a language of the intangible, a kind of soul-language'. His music often draws on an external stimulus, indicated by the work's title, but though he admitted the possibility of depicting an object or event, he saw a higher musical development in a work that could communicate the frame of mind or mood experienced by the composer when he contemplated that object or event. A title, motto or poem was affixed to the music only to indicate what the stimulus had been. As for music's expressive powers, he credited those to the expanded harmonic language he had inherited from Wagner and Liszt. He also believed in the continued importance of melody. A related issue was his disinclination to follow abstract forms for their own sake; form for him was 'inherent to the idea'.

His stimuli came from literature on many of the subjects dear to the Romantic imagination: medieval legends, landscapes (especially forests), seascapes, fairy tales. His attraction to Celtic legends may have been fuelled by a renewed interest in them in the later decades of the 19th century by writers such as Standish O'Grady and Fiona Macleod; similarly, Celtic and Norse legends were a favourite subject of such Pre-Raphaelite painters as Edward Burne-Jones, whom MacDowell admired. His interest in Norse legends may also have been spurred on by his communications with Grieg.

In his late sets of piano pieces he tended more and more to add titles and epigraphs of his own creation; many relate to the American landscape, particularly that of New England. Perhaps he was thus answering the nationalistic challenge that preoccupied American composers in the 1890s by conveying the personal impressions of an American reacting to his native land. In 1896 he became a close friend of the American writer Hamlin Garland, who promoted a similar response in literature; Garland devoted some of his writings to the Amerindian, a subject that interested MacDowell as well.

While MacDowell tackled some larger forms (in symphonic poems, concertos and sonatas), he was most individual in short piano pieces for he excelled at compact expression, where a very subtle manipulation of harmony, melodic contour or texture could take on evocative meaning.

3. ORCHESTRAL MUSIC. MacDowell composed relatively little for orchestra. His four symphonic poems were all begun while he was living in Germany, and the *Romanze* for cello and orchestra and two piano concertos were entirely products of his German years. Only the two suites were composed after his return to America, and then soon after: his wife attributed his turn away from orchestral music to the paucity in America of good professional orchestras.

MacDowell's scores reveal great skill in orchestration: in his most characteristic and effective textures the strings play the main thematic material while flutes weave a delicate filigree above, or else there are exposed homophonic wind or brass passages, frequently in dialogue with strings. With respect to their harmonic language, the symphonic poems and the Second Suite are rich in Wagner-Liszt chromaticism. Yet the key schemes for the movements of the suites and piano concertos are conservative in comparison to those of the later piano sets, the movements being related by thirds or fifths.

That MacDowell was drawn to the symphonic poem is not surprising, given that his stay in Germany brought him into contact with two of the genre's great exponents, Raff and Liszt. His first endeavour, *Hamlet, Ophelia* op.22 (1884–5), was conceived as two separate works on Shakespearean characters: op.22 was to include *Hamlet*, *Benedick* and *Othello*, and op.23 *Ophelia*, *Beatrice* and *Desdemona*. Drafts of the discarded movements (as well as of *Falstaff*) are in the Library of Congress. In 1886 MacDowell turned to Tennyson's *Idylls of the King* as the literary background for his *Lancelot und Elaine*; he was to return to this source in his 'Eroica' Sonata of 1894–5. The third symphonic poem, *Lamia* (1887–8), is based on Keats. The fourth (1886–90), consisting of *Die Sarazenen* and *Die schöne Aldâ*, on the Song of Roland; MacDowell intended these two surviving pieces as the middle movements of a symphony on the epic.

Ophelia and *Die Sarazenen* are one-dimensional character sketches. But in *Hamlet* and *Aldâ* MacDowell's approach was like Liszt's in his *Hamlet*: a character's inner conflicts are brought to life by dramatic juxtaposition of diatonic and chromatic materials. In *Lamia* MacDowell adopts a different Lisztian technique to convey various aspects of the character's emotional constitution – thematic transformation – and changes of musical character represent a direct response to the detailed programme printed in the score. In *Lancelot und Elaine* some events are blatantly depicted, and MacDowell, perhaps hesitant about this, withheld the programme when he published the work.

MacDowell had planned to write two other symphonic poems: *Merlin and Vivien* and *Hiawatha and Minnehaha*, the latter projected in 1887. He took up the Amerindian motif, though, in his Second Suite, which is among his most often performed works, and is the only complete work of his to incorporate Amerindian melodies. (Individual movements do so in some of the 'late piano sets'.) The suite uses war songs, festival songs, a love song and a mourning song, taken from Theodore Baker's *Über die Musik der nordamerikanischen Wilden* (1882). MacDowell referred to the *Dirge* movement as one of his most successful pieces. Though nominally the lament of an Amerindian woman on the death of her son, it conveys a universal sense of grief. MacDowell wrote it in response to the death of his mentor Raff. While the love movement is equally universal, the other three movements, *Legend*, *In War-Time* and *Village Festival*, are colourful narratives of Indian life and the drama outsiders connect with it.

MacDowell's earlier suite, op.42, offers five movements unrelated except in their titles' emphasis on nature and the seasons. In contrast to the three dramatic Indian Suite movements, which evolve in a fairly free manner, all the movements of op.42 have a certain classical formal simplicity.

When MacDowell's Second Piano Concerto was performed in New York in 1894, the critic James Huneker made a striking comparison: 'It sounds a model of its kind – the kind which Johannes Brahms gave the world over thirty years ago in his D-minor concerto'. The Second Concerto has remained one of MacDowell's most appreciated works, though in both concertos he was somewhat indebted to other composers. The First, in A minor, opens with a piano passage reminiscent in contour and texture of the equivalent point in Grieg's concerto in the same key; both may trace back to Schumann's concerto. In the Second, MacDowell divides the piano cadenza into three segments over the course of the first movement, as had Liszt in his E♭ concerto. Also, in their piano writing MacDowell's concertos show considerable similarity to Tchaikovsky's. Yet several features give the Second Concerto a distinct flavour. Whereas rhythmic movement in many of the composer's short piano pieces is reserved, the rhythms of the Second Concerto are infectiously alive and vibrant, made particularly so through their use of dance figures and syncopation. MacDowell unusally made his middle movement a scherzo, deriving the music from the discarded sketches for *Benedick*, and strove for a high level of cohesion both within and between movements. Materials from the introduction to the first movement return transformed in its body, and first-movement ideas are both quoted and transformed in the finale.

4. Early piano music. Between 1876 and 1890 MacDowell composed 22 works for piano, only four of them applying traditional formal models: the two *Moderne Suiten*, the *Prélude et fugue* and the *Etude de concert*. The other published works, with the exception of the Serenade, are collections in which individual movements carry fanciful or poetic titles, often with a poem included in the printed music.

MacDowell said that 'the paramount value of the poem is that of its suggestion in the field of instrumental music, where a single line may be elaborated upon'. In his early pieces he turned for inspiration to the poetry of Goethe, Heine, Hugo, Tennyson, Shelley, D.G. Rossetti, Hans Christian Andersen and Bulwer-Lytton. Four sets – *Idyllen* (revised as *Six Idyls after Goethe*), *Sechs Gedichte nach Heinrich Heine*, *Vier kleine Poesien* and *Marionetten* – provide a conspectus of his approaches. In the Goethe set he cultivates the manner he was to master in later piano sets: triggered by the poetry, he provides in each movement his single impression, his personal response to an image of the natural world (under such titles as *In the Woods* and *To the Moonlight*). In the Heine set he brings a psychological dynamic into play, reacting to poems in which the characters dream and reminisce: as a result, these movements unfold with contrasting sections where changes of mode, texture, melody, harmony and rhythm combine to suggest a change of mindset or even an arresting of time. While three of the *Vier kleine Poesien* are essentially simple atmospheric impressions, the fourth – *The Eagle* (after Tennyson) – shows MacDowell's ability to capture the drama of a poem, when, in its final measures, he moves abruptly from *ppp* to *fff*, during a precipitous leap up and descent to depict the eagle's fall. Finally, *Marionetten* is a wonderfully light, whimsical series of character sketches, in which each puppet comes to life in an appropriate musical texture.

5. Sonatas. MacDowell composed his four sonatas between 1891 and 1900. Where the first carries only a title, 'Tragica', the others have also a motto or epigraph to associate them with a legend: for the 'Eroica', the Arthurian tale of Tennyson's *Idylls of the Kings*; for the 'Norse', the heroic legend of Sigurd and his wife Gudrun; for the 'Keltic', the separate legends of Deirdre and of Cuchullin from the Cycle of the Red Branch.

MacDowell's pronouncements on his intentions in these sonatas are found largely in private correspondence. He confirmed that he intended each movement of the 'Eroica' to evoke the mood of some part of the Arthurian legend. Where the 'Norse' and 'Keltic' are concerned, he remarked that 'the music is more a commentary on the subject than an actual depiction of it'. But despite his disclaimers he crossed the boundary between mood evocation and direct representation in the finales of both the 'Eroica' and the 'Keltic'. The former movement, on 'the passing of Arthur', contains a passage that makes sense only in relation to the legend: a two-page murmured insertion depicting Arthur's gradual weakening and death after his battle with Mordred. Similarly in the 'Keltic' the last movement's conclusion depicts Cuchullin's death, as a furious, violent utterance gives way to a passage marked 'broad, with tragic pathos', before a gradual dissipation of sound. In one of MacDowell's most literal uses of tone-painting, a darting two-note motive suggests the bird that lands on Cuchullin's shoulder as he takes his last breath.

In general, though, the movements of these sonatas are mood pieces. Only the 'Tragica' and 'Eroica' contain scherzos, the latter's particularly spirited and elf-like to match the Doré illustration in which a knight of the Round Table is surrounded by elves. The slow movements of the 'Eroica', 'Norse' and 'Keltic' can be considered, according to MacDowell's testimony, tender evocations of Guinevere, Gudrun and Deirdre. Yet each movement evolves with some degree of unrest that results in a forceful, transformed statement of a quiet, tender melody before a return to its initial state – an expression of emotional upheaval. Elsewhere in each sonata the female character is treated as a single essence through the device of calling up her melody. In the first movement of the 'Eroica', MacDowell anticipates the Guinevere movement by using her melody as the lyrical second-theme counterpart to Arthur's forceful first theme; he then evokes her memory after Arthur's death by recalling her theme in the coda of the last movement. Likewise, Gudrun's theme is glimpsed briefly as an interruption within the finale of the 'Norse'.

The opening movements of the 'Eroica', 'Norse' and 'Keltic' project the noble, triumphant side of Arthur, Sigurd and Cuchullin, while their finales summon a sense of reckless drive, of these strong-willed personalities fulfilling their destinies even to death. The 'Tragica' stands apart in its evolution towards a more heroic, resolute mood, though a lingering sense of the tragic is created through MacDowell's recall in the finale of the work's opening gesture – a snap rhythm, now elongated.

This latter feature of the 'Tragica' illustrates MacDowell's tendency to unite the movements of his sonatas. In the 'Tragica', the snap rhythm reappears in the second movement as well as the fourth; in the 'Eroica', the opening chordal music is quoted in two other movements; in the 'Norse', an intricate, unifying key scheme is worked out; and in the 'Keltic', the initial theme's melodic and rhythmic profile is evoked in the second movement, while the theme is recalled intact at the very end of the third. The reappearance of the woman's melody in other movements of the 'Eroica' and 'Norse' has been noted.

MacDowell's sonata forms reveal certain characteristic traits. Several movements reach a third principal key area, either in the exposition ('Norse', second movement), or in the development ('Eroica', 'Norse' and 'Keltic', first movements). Others do not reach a stable secondary key area ('Norse' and 'Keltic', third movements), though developmental principles are evident. There are a few instances of thematic transformation ('Tragica', fourth movement, where the main melody is transformed into a lyrical utterance, coinciding with the secondary key area; 'Keltic', third movement, where the staccato, impetuous melody is transmuted at the start of the coda into a broad, tragic proclamation). In general, MacDowell moved towards a more fluid approach to sonata form in his last two sonatas.

6. Late piano sets. Between 1896 and 1902 MacDowell composed four sets of piano pieces which contain some of his best-known music: *Woodland Sketches*, *Sea Pieces*, *Fireside Tales* and *New England Idyls*. All the individual pieces have titles, and those of the *Sea Pieces* and *New England Idyls* also contain epigraphs or poems, most of them by MacDowell, though several in *Sea Pieces* come from other sources.

The titles show the importance of the American landscape to MacDowell's musical imagination at this time: *To a Wild Rose*, *A Deserted Farm*, *A Haunted House*, *In Deep Woods*, *From a Log Cabin*. Other American references are to Indian motives (*From an Indian Lodge* of *Woodland Sketches* and *Indian Idyl* from *New England Idyls*), to the Uncle Remus tales of Joel Chandler Harris (*Of Br'er Rabbit* from *Fireside Tales* and *From Uncle Remus* of *Woodland Sketches*), and to the country's founding Puritans (*From Puritan Days* of *New England Idyls* and *A.D. MDCXX* from *Sea Pieces*, the latter incorporating a hymn of thanksgiving). But aside from *A.D. MDCXX* the *Sea Pieces* contain no specifically American allusions.

In some pieces MacDowell masterfully captured the essence of an image: the evanescent delicacy of a wild rose through a profusion of short motives with sparingly placed dissonances, or the cathedral-like expanse of the deep woods through soaring materials spaced over six octaves. In others he suggested a vague sort of longing, a hazy memory of sentiment associated with a place: *At an Old Trysting-Place* and *A Deserted Farm* from *Woodland Sketches* achieve this effect through both internal and final repetitions of a motive that lingers on a tone other than the tonic. In all of these examples we gain a sense of what he meant by 'soul-language'. Only in a few pieces did he offer a direct, unreserved emotional expression: in *New England Idyls*, the epigraph lines of *Mid-Winter* – 'And lo! a thread of fate is snapped, a breaking heart makes moan' – are realized at the point when the muffled, low-lying chords have built dramatically to *fff*, to be followed by a gradual dissipation of sound; the mournful mood of *From a Log Cabin* yields to a passionate, exuberant climax before returning to the opening disquiet; and in the final piece of *Sea Pieces*, *In Mid-Ocean*, there is a powerful surge of sound in the penultimate moments.

These collections of pieces work as sets in varying degrees. *Woodland Sketches* has the most interwoven key scheme, with obvious symmetries in the sequence of ten pieces: A–f♯–A♭–F♯–c–F♯–F–f♯–A♭–f. Moreover, the final piece quotes from nos.3, 5 and 8, as though recollecting certain poignant memories one last time. In the *Sea Pieces*, the three movements that deal most directly with the sea, nos.1, 6 and 8, all have the same melodic gesture at the same pitch level. The six *Fireside Tales* follow an imaginative, adventurous key scheme: F–D–A♭–c–f♯–D♭ (note the symmetrically placed augmented fourths). The final D♭ provides balance to the central A♭ and also reawakens the D♭ heard in the middle section of no.1. *New England Idyls* plays with a symmetrical key scheme similar to that of *Woodland Sketches*, and additionally adds a unifying half-step inflection in several of the pieces.

7. VOCAL MUSIC. In addition to 42 solo songs, MacDowell published some 14 partsong collections, primarily for male chorus, and many of them for the Mendelssohn Glee Club, for which he also arranged songs by others. According to Gilman, MacDowell sketched as well one act of a music drama on an Arthurian subject, with comparatively little singing and much emphasis on the orchestral commentary.

MacDowell began composing lieder during his stay in Germany, setting texts of Heine, Goethe, Klopstock and Geibel. These early songs show his indebtedness to the European tradition in their fairly full piano accompaniments that sometimes provide lines complementary to the voice and in their absorption of Wagner's harmonic language. MacDowell turned to English texts in 1886, specifically to those of Burns and contemporary Americans: Margaret Deland, William Henry Gardner, William Dean Howells and, eventually, himself. In his middle period (roughly 1886–90) he preferred very sparse piano accompaniments, putting emphasis on a simple lyricism and a conservative use of harmonic colour, and in some cases (e.g. the cycle *From an Old Garden*) these songs reveal in both text and music a sentimentality associated with the Victorian parlour. Critics of these middle-period songs note that MacDowell treated the voice part with persistent metrical regularity, with little flexibility or freedom of expression.

This criticism was answered in MacDowell's last-period songs (1893–1901), when he turned almost exclusively to poems of his own and the predictability of declamation declines. In an interview published a few years before his death, he said that 'song writing should follow declamation' and 'music and poetry cannot be accurately stated unless one has written both'. Along with the greater declamatory freedom, the harmonic palette is enlivened, though MacDowell's characteristic half-diminished and diminished chords now outweigh the early-period predilection for augmented 6ths and Neapolitan chords. The later songs continue to focus on the composer's predominant themes of ideal love and the serenity of nature, though occasionally, as in op.47, his subject is more emotionally intense and direct: a lost love (*Folksong*), a contemptuous lover (*The West-Wind Croons in the Cedar-Trees*), the powerful sea (*The Sea*). Yet even here the music rarely attempts to be 'an instrument of precise emotional utterance' (Gilman). Only on occasion did MacDowell use the expressive possibilities of the minor mode or of full-fledged modulations, and, despite his avowed concern for words, he excelled as a songwriter when he gave free reign to his lyric gift, in songs such as *A Maid Sings Light* (op.56) and *Confidence* (op.47).

WORKS

Editions: *In Passing Moods: Album of Selected Pianoforte Compositions by Edward MacDowell* (Boston and New York, 1906) [1906]
Stimmungsbilder: Ausgewählte Klavier-Stücke von Edward MacDowell (Boston and New York, 1908) [1908]

DOLORES PESCE (text, bibliography), MARGERY MORGAN LOWENS (work-list)

MacDowell Colony. A working retreat for composers, writers, visual artists, film makers and architects in Peterborough, New Hampshire, USA. The colony consists of 32 studios, three residence halls, a library and a dining and recreation centre on 450 acres of fields and woodland. 200 artists have residencies each year. Founded in 1907 and built around the summer home of the composer Edward MacDowell, it was managed until 1946 by his widow and former pupil, the pianist Marian Nevins MacDowell (1857–1956), who helped support the colony by performing her husband's music throughout the USA. Pageants and music festivals were given there in the early years. Composer-colonists have included Bernstein, Copland, Dello Joio, Foss, Harris, Kubik, D.S. Moore, Gardner Read, Rorem, Schwantner, Talma, Virgil Thomson and Wuorinen. The MacDowell Medal has been awarded yearly since 1960 by the colony to a distinguished composer, writer or artist. The composers so honoured have been Copland (1961), Varèse (1965), Sessions (1968), Schuman (1971), Piston (1974), Thomson (1979), Samuel Barber (1980), Elliott Carter (1983), Bernstein (1987), Diamond (1991) and Crumb (1995).

ARNOLD T. SCHWAB/DAVID MACY

Macé. *See* PAULLET.

Macé [Massé], **Denis** (*b c*1600; *d* after 1664). French composer, lutenist, singer and teacher. He was active in Paris at least from 1630 to 1648. He was best known in his day as a private teacher: in 1643 Gantez spoke of 'Vincent, Métru and Massé, the three most famous and famished masters in Paris' (his actual words are 'fameux et affamez'). Macé's chansons and *airs*, written in syllabic style, have affinities with those of Bataille but lack the depth of feeling of Antoine Boësset's. His *Cantiques spirituels*, in French and for two voices, have remarkable dramatic qualities which foreshadow those of late 17th-century French recitative. His *Reigles très faciles* is simply a little manual for teaching purposes. According to La Borde he also composed 'rather a good mass and several motets', but these are now lost.

WORKS
published in Paris

Airs à 4 parties (1634)
Cantiques spirituels, 2vv (1639), texts by I. d'Eu
12 chansons, 1v, 1639[3]
Recueil de chansons à danser et à boire, 1v (1643, 2/1699 arr. 2–4vv)

Reigles très faciles pour apprendre en peu de temps le plein-chant (1664)

DENISE LAUNAY/DAVID LEDBETTER

Mace, Thomas (*b* ?Cambridge or York, 1612/13; *d* ?Cambridge, ?1706). English lutenist, singer, composer and writer. He must have been born in either 1612 or 1613 since the title-page of his pamphlet *Riddles, Mervels and Rarities, or A New Way of Health, from an Old Man's Experience* (Cambridge, 1698) describes him as 'being now in the Eighty Six Year of his Age'; branches of the Mace family lived in Cambridge and York. As a boy he was probably a chorister. On 10 August 1635 he was appointed a singing-man in the choir of Trinity College, Cambridge. Royalist sympathies no doubt caused him to leave Cambridge during the Civil War; in 1644 he witnessed the siege of York. But he is known to have given singing lessons in Cambridge in May 1647.

He lived through the plague in Cambridge in 1665–6 and afterwards is known to have left there on only two occasions: for a visit to London in 1676 to arrange for the publication of *Musick's Monument* and, at the age of 77, presumably in 1690, when he went to London again for four months to sell instruments and music books which his increasing deafness made less useful to him. In the *Riddles* he still described himself as 'Healthful, Lively, Active and Brisk'. On 17 April 1706 a 'singing-man's' place was 'voided by Mr Mace' at Trinity College: though other Maces were associated with the choir this possibly refers to Thomas following his death.

As well as the *Riddles*, Mace wrote (in 1675) another non-musical work, a discourse concerning the highways of England called *Profit, Conveniency and Pleasure to the Whole Nation.* But it is for *Musick's Monument* that he principally deserves to be remembered. The quaintness of his English style, with its multiple adjectives and his predilection for expressing himself in execrable verse, has sometimes caused it to be read for the wrong reasons. It is in fact an important source of information on a wide range of musical activity in England during the second and third quarters of the 17th century. The book is divided into three sections, on church music, lute music, and viol music and music in general (see illustration).

Mace was a conservative. He believed that church music had reached perfection early in the century, and distrusted and disliked the extrovert qualities of the French style that began to find increasing favour at the Restoration and to oust more traditional forms of English instrumental music. *Musick's Monument*, which he wrote between 1671 and 1675, is in fact a defence of the English tradition and an attempt to recover its values by showing how the decline in the standards of performance of parochial and cathedral music might be reversed.

Mace's primary aim in the second and longest section of the book is explained in its title, 'The Lute made Easie'.

Muſick's Monument;

OR, A

REMEMBRANCER

Of the Beſt

Practical Muſick,

Both *DIVINE*, and *CIVIL*, that has ever been known, to have been in the World.

Divided into Three Parts.

The Firſt PART,

Shews a *Neceſſity of Singing Pſalms Well, in Parochial Churches*, or not to *Sing* at all; Directing, how They may be *Well Sung, Certainly*; by Two ſeveral *Ways*, or *Means*; with an *Aſſurance* of a *Perpetual National-Quire*; and alſo ſhewing, How *Cathedral Muſick*, may be much *Improved*, and *Refined*.

The Second PART,

Treats of the *Noble Lute*, (the *Beſt* of *Inſtruments*) now made *Eaſie*; and all *Its Occult-Lock'd-up-Secrets Plainly laid Open*, never before Diſcovered; whereby It is now become ſo *Familiarly Eaſie*, as *Any Inſtrument of Worth*, known in the *World*; Giving the *True Reaſons* of *Its Former Difficulties*; and Proving Its Preſent *Facility*, by *Undeniable Arguments*; Directing the moſt *Ample Way*, for the uſe of the *Theorboe*, from off the *Note, in Conſort*, &c. Shewing a *General Way* of Procuring *Invention*, and *Playing Voluntarily*, upon the *Lute*, *Viol*, or any other *Inſtrument*; with Two Pritty *Devices*; the One, ſhewing how to *Tranſlate Leſſons*, from one *Tuning*, or *Inſtrument*, to *Another*; The other, an *Indubitable Way*, to *know the Beſt Tuning*, upon any *Inſtrument*: Both done by *Example*.

In the Third PART,

The *Generous Viol*, in *Its Rightest Uſe*, is Treated upon; with ſome *Curious Obſervations*, never before Handled, concerning *It*, and *Muſick in General*.

By Tho. Mace, *one of the Clerks of* Trinity Colledge, *in the* Univerſity *of* Cambridge.

LONDON,

Printed by T. *Ratcliffe*, and N. *Thompſon*, for the Author, and are to be Sold by Himſelf, at His Houſe in *Cambridge*, and by *John Carr*, at His Shop at the *Middle-Temple Gate* in *Fleetſtreet*, 1676.

Thomas Mace: title-page of 'Musick's Monument' (London, 1676)

It is a complete handbook for the instrument, including important information on practical matters such as stringing, fretting and removing the belly, along with a guide for the complete beginner working systematically through the basis of technique. It contains suites in C, F, A minor, D minor, G, E minor and B minor in the French flat tuning, and a supplementary D minor suite in D minor tuning, the so-called New Tuning; because, as Mace said with some sarcasm, 'I suppose, you may love to be in Fashion'. Throughout his book Mace was at once both old-fashioned and innovatory. He wrote for a 12-course lute, the instrument made popular by Jacques Gaultier in the 1620s and 30s, and the basic style of his pieces is that of the Caroline period. He aimed to draw together the best of this Anglo-French style and updated it by the addition to the suites of such forms as the old galliard and the new Tattle de Moy of his own invention, thereby putting the instrument on a new footing. His suites are unified sets of pieces with more in common than merely key and tuning. Indeed, Mace may well have been the first person to have written suites for the lute with a prescribed number of movements to be played in a certain order. He stressed that the movements of a suite 'ought to be something a Kin ... or to have some kind of Resemblance in their Conceits, Natures, or Humours' and should all be in the same key. In a concert there should be a smooth transition between the tonalities of successive items, and to this end he provided modulating interludes for the lute.

Mace was one of the few 17th-century musicians who attempted to convey the importance and nature of the affective aspect of his music. In learning a piece the pupil is to consider its 'fugue' (generally the opening theme), 'form' (the 'shape of the lesson') and 'humour' (its projected affect). Having decided on the 'humour', the principal means available to the player to achieve it are ornamentation, which Mace describes in detail, variation in dynamics and tempo, and the judicious selection of pauses. Mace gives an account of continuo playing on the theorbo, then the primary instrument for the accompaniment of vocal music and also much used in consort music. His theorbo is a 13-course double-strung instrument with a re-entrant top course (tuning: *G′*, *A′*, *B′*, *C*, *D*, *E*, *F*, *G*, *c*, *f*, *a*, *d′*, *g*), described by James Talbot as an 'English Theorbo' and different in many respects to continental instruments, but probably the norm in England at this time.

The third section of the book gives a condensed account of viol technique and a small amount of music. He promised more such music for the viol and probably wrote the 15 manuscript pieces to fulfil his pledge. This section also covers music in general and includes much useful information on consort practice in the Caroline and Commonwealth periods, with hints on the use of organ and harpsicord in consort music. Mace had a particular dislike of 'Squaling-Scoulding-Fiddles', though he did allow that violins could responsibly be used if balanced by 'Lusty Full-Sciz'd Theorboes'. He usefully describes the musical qualities associated with various kinds of instrumental ayre in his day, their proper speeds and manner of notation.

Mace was of an inventive turn of mind and *Musick's Monument* describes a table organ which he developed. Approaching 60 and suffering from increased deafness such that he could not hear his own lute, he constructed the quixotic 'Dyphone: or Double-Lute, The Lute of Fifty

Strings', a lute and theorbo combined in one instrument that was loud enough for him to hear. His plans for a music room, apparently never constructed, show his interest in acoustic problems as well as an awareness that proper accommodation would have to be found for the type of public concerts which had gradually come into existence during his lifetime. Mace's tragedy was that by 1676 the lute's decline in popular esteem was irreversible. Few people probably ever used his book as an instruction method for the lute and many copies remained unsold in 1690.

MICHAEL TILMOUTH/MATTHEW SPRING

Maceda, José (*b* Manila, 31 Jan 1917). Filipino ethnomusicologist and composer. He studied at the Manila Academy of Music and at the Ecole Normale in Paris (1937–41), where his teachers were Dandelot (theory), Boulanger (analysis) and Cortot (piano). From 1940 to 1957 he appeared as a pianist in Paris and in several cities in the USA and the Philippines, introducing new French works. He continued piano studies with Robert Schmitz in San Francisco (1946–50) and studied musicology with Lowinsky at Queens College (New York) and Lang at Columbia University (1950–52). In addition he attended several universities in the American Midwest and read ethnomusicology at the University of California at Los Angeles (1957–8, 1961–3, PhD 1963). In 1958 he worked briefly at the French radio *musique concrète* studios in Paris, where he met Xenakis and Boulez; these and other avant-garde composers influenced his compositional ideas. He taught the piano and music theory in various Manila secondary schools, and in 1946 he was appointed professor of ethnomusicology at the University of the Philippines, becoming chairman of the department of Asian music. He has also lectured internationally and received many awards, including the Ordre des Palmes Academiques (1978), the John D. Rockefeller Award (1987) and the Fumio Koizumi Award (1992). He retired in 1989.

Maceda's creative work has been influenced by his field research, begun in 1953, into the music of the Philippines and south-east Asia, and, to a lesser extent, by his travels in Africa and Brazil undertaken in 1968. *Ugma-ugma* ('Structures', 1963), his first 'advanced' composition, applies avant-garde and ethnic means of production to an ensemble of voices and Asian instruments. Similarly, *Kubing* ('Jew's Harp', 1966) requires a group of male voices to produce glissandos, trills and other novel effects, and has an accompaniment of bamboo percussion instruments. Maceda aims to establish a musical language by applying ideas, laws and structures taken from the natural sciences and linguistics. Another important source for his work is primitive ritual, as is evident in *Pagsamba* for percussion and vocal sounds distributed among the listeners in a circular hall. From 1963 he has appeared as a conductor of avant-garde and Asian ethnic music.

LUCRECIA R. KASILAG

Macedonia. The region known as Macedonia is not a single nation, but is divided between three states: Greece, Bulgaria and the Former Yugoslav Republic of Macedonia. The ancient Macedonian empire in northern Greece expanded eastwards from around 700 BCE onwards. Macedonia became a Roman province and in the late 4th century BCE was divided into two administrative areas: the northern Latinized part with Skopje as its capital, and the southern Graecized part with Saloniki as its capital. From the 9th century Macedonia was successively under Bulgarian, Byzantine and Serbian rule. In 1371 it was conquered by the Turks and became part of the Ottoman Empire. During the 19th century the region was disputed between Serbs, Greeks and Bulgarians, the conflict culminating in the Balkan Wars of 1912 and 1913. In 1918 most of the territory became part of the kingdom of the Serbs, Croats and Slovenians, and in 1945 it was integrated into the Republic of Yugoslavia. In 1991 the Macedonian part of the Republic proclaimed its independence; it became a member of the United Nations in 1993 as the Former Yugoslav Republic of Macedonia. The majority of its population are Orthodox Macedonians, but there are also Muslims (Albanian and Turkish) and Orthodox Serbs, as well as small numbers of Croats, Montenegrins and Bulgarians.

I. Art music. II. Traditional music.

I. Art music

The present discussion covers primarily the territory now known as the Former Yugoslav Republic of Macedonia. The first school in Macedonia to teach Byzantine liturgical chant was founded in Ohrid in the 9th century by Climent and Naum, pupils of St Cyril and St Methodius. There are no records of any Macedonian composers or musical works from the Ottoman period; it has been suggested that traditional music (see §II below) was the centre of attention at this time. Italian and later Spanish influences spread in the coastal areas from the 16th century, and the first theatres where opera performances were given date from the 17th century. The absence of a rich aristocracy in Macedonia probably delayed the development of independent Macedonian art music, which some Macedonian musicologists have linked to 19th-century political and cultural movements that led to an interest in traditional music, seeing in it the basis for a national musical style. Organized musical life in the country dates only from the beginning of the 20th century. Until the middle of the century activity centred on traditional music, with arrangements of traditional songs and the composition of new patriotic songs, particularly between the two world wars. After World War II, development accelerated in the newly created republics. There was a symphony orchestra in Skopje from 1945 and an opera and ballet company from 1947; the Macedonian PO was founded in 1949 and the Academy of Music in 1966. Musicians concerned themselves with Romanticism and neo-romanticism, neo-classicism, neo-Baroque music and Expressionism. Kiril Makedonski-Taskov (1925–84), who was influenced by the Russian school, wrote the first Macedonian opera, *Goce* (1954), two other operas (*Tsar Samuil*, 1968, and *Ilinden*, 1973), four symphonies, chamber music and film scores. Other Macedonian composers of opera have been Toma Proshev (*b* 1931), Sotir Golabovski (*b* 1937), Risto Avramovski (*b* 1943), Blagoj Trajkov (*b* 1944) and Dimitrije Bužarovski (*b* 1952), whose works use electronic and computer media. The conductor of the Skopje SO from 1945 to 1948, Todor Skalovski (*b* 1909), also served as director and conductor of the opera house, and in 1954 he was appointed conductor of the Macedonian PO. His works include a ballet, *Pepeljuga* ('Cinderella'), chamber music and choral songs based on traditional music. Among other outstanding Macedonian composers are Stevan Gajdov (1905–92), Živko Firfov (1906–84, also the founder of Macedonian ethnomusicology), Petre Bogdanov-Kočko (*b* 1913), Gligor Smokvarski (*b* 1914) and Blagoja Ivanovski (*b* 1921). The works of Trajko Prokopijev (1909–79) are strongly influenced by traditional music. He was conductor of the symphony orchestra and at the Skopje opera house, and head of the music department of Macedonian Radio. His works include the ballet *Lobin I Dojvana* (1958), the opera *Rastanak* (1972), and songs, choral cycles and chamber music. Vlastimir Nikolevski (*b* 1925), a music teacher, opera director and music editor, composed works influenced by traditional music in his early Romantic phase; he later adopted a more modern style. Features of his compositions are old modes, melodies derived from spoken intonation, and asymmetrical rhythms.

II. Traditional music

The earliest research into and publication of the traditional music and poetry of this region preceded any organized national Macedonian movement. Texts of traditional music were printed as early as 1860 by Stefan Verkovic, but transcribed melodies were not published until the early 20th century, notably by Marko Cepenkov and Dmitri and Constantin Milandinov. Before this, the preservation of local traditions through oral transmission and dissemination depended upon the extent of a community's geographical and cultural isolation. Features common to the musics of the various ethnic groups in this region derived from shared customs associated with family life, village and town festivities, and ceremonies associated with the seasonal cycles of work.

1. Subject matter. 2. Rhythm. 3. Scales. 4. Settings of traditional songs. 5. Instruments and dance accompaniment. 6. Recent developments.

1. SUBJECT MATTER. The subject matter of Macedonian traditional song is wide-ranging; some songs are performed at certain times of the year, some are associated with particular customs or religious festivals, and others serve a more general purpose. Songs may be categorized by the gender of the interpreter; some laments, for example, are only sung by women, while some revolutionary songs are only sung by men. Many combinations of voices are found in ensembles; the predominance of female singing indicates the important role of women in daily life

and ritual. Harvest songs, love songs and ceremonial songs associated with births, marriages and deaths form the core of the traditional song repertory. *Sedenjka* (working bee songs), which are lyrical in character, are common throughout the region. Revolutionary or patriotic songs are likely to be 'epic' or historical; the earliest *sejmen* (soldiers') songs collected recount the heroic struggles of the *haiduks* against the Turkish army, notably the *Komitska* songs of the Bitola region.

2. Rhythm. Macedonian traditional music is characterized by rhythmic diversity and complexity. This aspect of the music came to be considered a uniquely Macedonian feature in arrangements of Yugoslavian traditional music made after World War II. Simple metres are found almost exclusively in dance melodies or instrumental dance music, while compound metres are common in all forms of traditional music. Assymetric rhythms are created by grouping together small rhythmic units; this is exemplified in the *čoček* (3+3+2) rhythms of the Roma. Irregular subdivisions are commonplace, and it is often possible to discern an underlying pulse. In 7/8, for example, groups of 3+2+2 quavers may produce an accent on the downbeat; the degree of emphasis depends on the tempo. One form of vocal music uses free rhythm in a kind of musical 'blank verse'. In instrumental variations, complex assymetric rhythms are explored through motivic development.

3. Scales. Scales used include the chromatic scale (with frequent use of the augmented 2nd), a modified form of a diatonic scale, and anhemitonic pentatonic scales; the latter show the influences of the modal traditions of the Orthodox Church and the oriental traditions of Asia Minor. Traditional melodies tend to move in conjunct motion; their range is usually a 4th or a 5th, but ornamentation frequently involves pitches that do not belong to the scale from which the melody is derived, and leaps of up to a 7th may be found at cadences. Scale degrees smaller than a semitone are also used; this practice has been linked to the tempered tuning of wind instruments which are used to accompany songs in rural communities. Songs with wider ranges are sung mostly in urban centres and show the influence of Western music.

4. Settings of traditional songs. Strophic organization is common. The versification of the text is followed to some extent – caesurae are carefully observed, for example – but considerable liberty may be taken with the syllabic length of verses. Syllables, words and exclamations may be inserted, truncated or repeated to fit the melody or musical metre and may sometimes be used to accentuate a weak beat. This manipulation of the text is influenced by the speech patterns of local dialects.

Unison and diaphonic singing predominate throughout Macedonia, but the composition of ensembles varies considerably in terms of the numbers and ages of the singers. Ceremonial songs and songs concerning events in everyday life are often performed by a group of three singers. One singer, often called a *kreska* or *viši*, begins a melody and is followed by a second singer, a *slozhe* or *vleče* ('one who pulls'); the second voice may be doubled by the third voice. Parallel movement in 2nds is common, but numerous instances of the use of wider intervals may be found. Verses are passed back and forth between the singers, and the overlapping of their voices often shows great subtlety and craft.

Diaphonic singing may also consist of a melodic line with a drone. Most drones are non-rhythmic in character, but instances have been found in the music of the Skopska Crna Gora and Kriva Palanka regions of drones which imitate the rhythmic character of the melodies that they accompany. In other performances the singer performing the drone may depart from the original drone note to follow the contour of the melody to some extent. The pitch of the leading voice rarely dips below that of the drone; exceptions generally occur just before a cadence at which the voices reach a unison note. Vocal ornamentation is abundant, influenced by the highly developed tradition of ornamentation and improvisation in instrumental music.

5. Instruments and dance accompaniment. Most Macedonian traditional music, both vocal and instrumental, evokes the dance. Dances are either *teške* (slow) or *lake* (fast), and the dancers position themselves in an open or closed circle surrounding the musicians. Asymmetric rhythms, fast tempos and complicated dance steps often demand great technical skill. The *rusali* and *djemalari* sword dances are unique to the Gevgelija region and represent the struggle between good and evil.

Groups of musical instruments can be divided into broad categories on the basis of their use in urban or village settings, indoors or outdoors. The family of flutes belongs to the village tradition and includes the *šupelka* (common near Strumica), and the *kavala* and the small *duduk*. The double-bored *dwjanka* has six holes in each bore and is similar to instruments found in Bulgaria, whereas Serbian instruments have six holes in one bore and three in the other. Much larger *kavali* are common in the regions around Skopje and Kumanovo. The *gajda* or *mešnica* (bagpipe) similarly belongs to a village tradition; its repertory includes thematic variations as well as dance accompaniment. A particular form of ornamentation has developed in the music of the *gajda* and *kavala* deriving from the improvisatory character of the repertory of these instruments.

The three-string bowed *gusla* is commonly found in north-east Macedonia and is often used to accompany vocal music, as is the *tambura* or *četvorka* (a plucked string instrument which is made in various sizes). Percussion instruments such as the *tarabuka* (goblet drum) and the *tapan* (double-headed drum) also vary in size; a solo repertory has developed for these instruments that derives from their potential for rhythmic diversity.

Urban instrumental music is represented by the *čalgija* band, which includes Western instruments such as the violin and the clarinet as well as the *kanun* (zither), the *ut* (lute) and the *tarabuka*. The double-reed *zurla* is played in pairs with a *tapan* and is associated with Roma musicians; it is often played at weddings. Only the Vlachs have no tradition of instrumental music; they believe that such music is evil.

6. Recent developments. Government-sponsored programmes after the foundation of Yugoslavia in 1945 aimed to cultivate and support a Macedonian musical identity. Research programmes renewed interest in the study and collection of indigenous traditions, but many local and regional variants were lost in an attempt to reduce a wealth of musical styles to a few common elements. Changes in methods of agricultural production and the flourishing of the *gradska pesna* (urban song) had

profound effects on music-making in Macedonia. The foundation of an Institute of Folklore (Institut za Folklor) in 1950 and the activities of Macedonian radio and television contributed to the preservation of traditional culture by amassing a substantial collection of archival documents and audio recordings. 'Folklore' festivals in Ohrid and Skopje since 1962 have encouraged the performance of many forms of traditional music. Outside Skopje, notably in Štip, individuals continue the tradition of instrument making. Large diasporas in Australia, Canada and the USA have adapted their musical heritage to their new environments, and traditional music continues to inspire composers and performers of contemporary art music.

INES WEINRICH (I), ORHAN MEMED (II)

Macedonio di Mutio, Giovanni Vincenzo (*b* ?Naples, ?*c*1560–80; *d* ?Naples after 1606). Italian composer. He was the son of Muzio Macedonio and may be the G.V. Macedonio, Marchese of Roggiano Gravino, who in 1630 owned an island in the bay of Naples. On 3 December 1603 Macedonio dedicated his *Primo libro de madrigali a cinque voci* (Naples, 1603) to Scipione Dentice, with whom he may have studied, according to Eitner; G.D. Montella was, however, more probably his teacher. Macedonio borrowed eight texts from Montella's books, and his *Madonna io ben vorrei* of 1603 is modelled on Montella's setting in his *Primo libro* (1595); his chordal style may also be the result of Montella's influence. Macedonio's *Secondo libro de madrigali a cinque voci* (Naples, 1606, inc.) was dedicated to the Marchese of Bracigliano, probably Alessandro Miroballo, and relies heavily on chordal texture and repetition.

KEITH A. LARSON

Macero, Teo [Attilio Joseph] (*b* Glens Falls, NY, 30 Oct 1925). American composer. He attended the Juilliard School (1949–53, BS and MS), where he was a pupil of Henry Brant. After teaching for several years he became a producer for Columbia Records in 1957, remaining in that post until 1975 when he became president of the recording company Teo Productions. As a producer he has specialized in jazz recordings. He was awarded two Guggenheim fellowships (1953–4, 1958) and an NEA grant (1974) for composition and has received commissions from the New York PO, Buffalo SO, Kansas City SO and the Juilliard School. Especially prolific as a composer of jazz, he has recorded several hundred of his original jazz works. His other interests include ballet, television and film; he has written numerous scores for the Pennsylvania Ballet, Joffrey Ballet, London Ballet and other companies, as well as music for over 80 documentary films. His scores for *The Body Human* series (1977) and the *Lifeline* series (1979) received Emmy awards. Macero's innovations in writing for films and television, particularly his use of microtones and original orchestral devices, have been influential in bridging the gap between standard, avant-garde and more popular styles of film scoring. He performs both as a saxophonist and as a conductor.

WORKS

Stage: several ops, incl. The Heart (B. Ulanov), 1970, The Share (R. Capra), 1978, Twelve Years a Slave (B. Winder); over 80 ballets, incl. Ride the Culture Loop (Anna Sokolow Ballet), 1970, Mr. B. (Joffrey Ballet), 1983, Jamboree (Joffrey), 1984

DAVID COPE

McEwen, John (Blackwood) (*b* Hawick, 13 April 1868; *d* London, 14 June 1948). Scottish composer. He studied at Glasgow University (MA 1888) and the RAM (1893–5), where his teachers included Prout, Corder and Matthay. Active as an organist in Glasgow and Lanark (1885–91) and Greenock (1895–8), he also taught at the Athenaeum School, Glasgow before returning to the RAM to teach in 1898. A promoter of new music, he co-founded the Society of British Composers (1905) and served as president of the Incorporated Society of Musicians. Upon

his appointment as principal of the RAM in 1924 he exerted a liberalizing influence, assisted in his efforts by Henry J. Wood and Lionel Tertis. His awards included honorary degrees from the universities of Oxford (MusD 1926) and Glasgow (LLD 1993), and membership in the University of Helsingfors. He was knighted in 1931, and retired from the RAM in 1936.

McEwen's music synthesizes Scottish (and sometimes French) folk idioms and the Romantic legacy of Berlioz, Liszt, Wagner, and the French and Russian schools; Debussy was particularly influential. His extensive output reached its climax in the large-scale compositions written before World War I. In the *Three Border Ballads* (1905–8) his mastery of form and orchestration, backed by a powerful emotional impetus, rivals mature Elgar: *Grey Galloway*, the second ballad, stands out for its thematic distinction and rhythmic drive. The *Hymn on the Morning of Christ's Nativity* (1901–5) is monumental yet intimate and engaging; like *Grey Galloway* and *A Solway Symphony* (1911) it can be considered among his finest works. McEwen's mature style, best exemplified by *A Solway Symphony*, institutes textures and colours with a precision comparable to that of Florent Schmitt and the later works of Korngold and Walton. After suffering a breakdown in 1913, he concentrated on smaller forms. His 19 string quartets and seven sonatas for violin and piano are impressive additions to the chamber music repertoire; particularly notable are the String Quartet no.6 'Biscay' in A (1913), the String Quartet no.13 in C minor (1928) and the Sonata-fantasia no.5 (1922).

WORKS
(*selective list*)

ORCHESTRAL

Sym., a, 1892–8; Suite, E, 1893; Suite, F, 1893; Comedy Ov., 1894; Va Conc., 1901; 3 Border Ballads, 1905–8: Coronach, Grey Galloway, The Demon Lover; Sym. 'Solway', c♯, 1911; 7 Bagatelles 'Nugae', str, 1912 [arr. BERNARD BENOLIEL

Macfarren, Sir **George (Alexander)** (*b* London, 2 March 1813; *d* London, 31 Oct 1887). English composer. He was the son of George Macfarren (1788–1843), a London dancing-master and dramatist who was also active in music, and his wife Elizabeth Jackson (*b* 1792). Macfarren learnt music from his father and Charles Lucas before entering the RAM in 1829, where he studied composition with Cipriani Potter. His first important work, a symphony in C, was performed at an RAM concert on 2 October 1830. He left the RAM in 1836, but after a short time at a school in the Isle of Man returned as a professor in 1837. He resigned that position in 1847 when his adherence to Alfred Day's theory of harmony was condemned by the other professors, but was recalled by Potter in 1851. Meanwhile he had been active in the founding of the Society of British Musicians in 1834, and of the Handel Society in 1844, and had begun to make his name as a composer of operas. In January 1845 he became conductor at Covent Garden. One of his most successful operas, *King Charles II*, was produced at the Princess's Theatre in 1849, with Edward Loder conducting. In reviewing the work in *The Times* (29 October), his friend J.W. Davison said: 'Perhaps, of all our native musicians, Mr Macfarren is the one who has most highly and variously distinguished himself'. His only other notable success in the theatre was *Robin Hood* (1860), which Edward Dent wanted to revive; several of his operas never reached the stage because of the bankruptcy of the theatre company. He was never able to match the triumphs of Balfe, Wallace, Benedict or Loder. In later years his cantatas and oratorios were much in demand at provincial festivals: 'Few composers have written better for massed choral voices', in Nigel Burton's opinion (see Temperley, 1981).

Macfarren had begun to have trouble with his eyesight as early as 1823; it became steadily worse, and in 1860 total blindness overtook him. But this in no way diminished his musical activity, except for conducting. He continued almost to the end of his life to write, lecture and compose, with the help of a series of amanuenses, and to teach. Honours and distinctions crowded upon him in his last years: in 1875 he succeeded Sterndale Bennett as professor of music at Cambridge and as principal of the RAM; he received honorary degrees from

Cambridge, Oxford and Dublin, and was knighted in 1883.

Macfarren must be accounted one of the most prolific composers of the 19th century. He was the only English composer of his generation to persevere in writing symphonies, undaunted by their almost inevitable failure to command public attention. A kind of puritanical self-discipline drove him on. As he put it when an old man, he had 'worked hard, not for the sake of work, but for the love of work'. His overriding ambition was to be a successful opera composer. He did, in fact, have some modest successes in that line, but, finding opportunities decreasing, he turned to cantatas, to oratorios and, in his last years, to chamber music. Throughout most of his life he published large numbers of songs and partsongs. Perhaps his best-known work was the overture *Chevy Chace*, composed for an opera in 1837 but withdrawn when Macfarren found that the bills described the music as 'composed, selected and arranged by Mr T. Cooke'. Mendelssohn conducted it at Leipzig in 1843, and reported its popularity, though he withheld his own praise. On the other hand Wagner, who conducted the work in London in 1855, enjoyed it 'on account of its peculiarly wild, passionate character' – though he did not get on well with its composer 'Mr. MacFarrinc, a pompous, melancholy Scotsman'.

Macfarren regarded Mozart as 'the greatest musician who has delighted and enriched the world' and remarked that 'Beethoven was sometimes weak, Mozart never'. Yet it is Beethoven who springs to mind most frequently in Macfarren's symphonies. He composed three fine piano sonatas, and several pieces for concertina. His *Romance* in A for concertina and piano, all that survives of a *Romance and Allegro agitato* for concertina and strings, is in Allan Atlas's words 'the single most exquisite work ever written for the concertina'. The operas contain much music that is genuinely dramatic, and show a pertinent sense of word-setting, but they are lacking in lyrical warmth; many a promising melody is spoilt by a curious twist. *Robin Hood* is perhaps his best opera, notable for its clever musical characterization and for its confident deployment of the orchestra. The most promising for revival are his unpretentious chamber operas written for the Gallery of Illustration at Marylebone. Some of his songs have a certain charm, such as *Pack, clouds, away* and *The Widow Bird*, both with optional clarinet obbligato. Macfarren's oratorio *St John the Baptist* (1872) has a number of novel features; in Smither's view, supported by a detailed analysis, it 'breaks through the Mendelssohnian domination of Victorian oratorio'.

He found time to lecture and to write on almost every conceivable subject, but here again he failed to win a great following. His views were one-sided and dogmatic, and his enthusiasms were largely negative. He was, however, a passionate musical nationalist – perhaps England's first. He promoted and edited English folk-songs, chose English topics for his later operas in a period of continental domination, and tried to develop a distinctively English idiom. As a critic he was inclined to be pedantic. Shaw ridiculed him for using the programme note of a Philharmonic Society concert to denounce Goetz's *Frühlings-Ouvertüre* because it contained 'unlawful consecutive sevenths'. Yet on a personal level Macfarren was warmhearted and encouraging, especially towards his pupils.

His wife, Clarina Thalia Andrae (*b* Lübeck, 1828; *d* Bakewell, 9 April 1916), whom he married in 1844, was a contralto and linguist who, as Natalia Macfarren, translated many operas and songs into English.

WORKS

printed works published in London unless otherwise stated

unpublished MSS in GB-Cfm except where noted

STAGE

LCG – *Covent Garden*
LDL – *Drury Lane*

NICHOLAS TEMPERLEY

Macfarren, Walter (Cecil) (*b* London, 28 Aug 1826; *d* London, 2 Sept 1905). English pianist and composer, younger son of George Macfarren and brother of George Alexander Macfarren. He was a chorister at Westminster Abbey (1836–41) and entered the RAM in 1842, where he studied the piano with W.H. Holmes and composition with his brother and Potter. From 1846 until 1903 he was a professor of piano at the RAM, and also for many years lectured there, and conducted the orchestral concerts from 1873 to 1880. He was highly esteemed as a teacher and as a pianist, being regarded as 'a sound performer of the older school'. Among his piano pupils were Tobias Matthay, Stewart Macpherson and Henry Wood. He composed extensively for his instrument, and also produced a substantial amount of vocal music. He also edited Mozart's piano music, Beethoven's sonatas and a series of 'Popular Classics' for the piano which reached 240 numbers. From 1862 until shortly before his death he was music critic to *The Queen*; he was also active in the Philharmonic Society, of which he was treasurer from 1877 to 1880.

Macfarren's concert overtures, Symphony in B♭ and other large-scale compositions had no lasting impact, but his songs, partsongs and piano sonatas, preludes and studies made a contribution to the musical life of his time. They are technically accomplished, and pleasing in a style reminiscent of Mendelssohn and Sterndale Bennett. His caprice *L'amitié* (1884) is reprinted in *The London Pianoforte School*.

NICHOLAS TEMPERLEY

McGegan, Nicholas (*b* Sawbridgeworth, Herts., 14 Jan 1950). English conductor, flautist and harpsichordist. He studied at Oxford and Cambridge, and established himself as a conductor of Baroque opera with performances of Rameau for the English Bach Festival (1979–81). He settled in the USA, where he became the first music director of the Philharmonia Baroque Orchestra in Berkeley, California, in 1985. This followed a pioneering performance of Handel's *Teseo* at the Boston Early Music Festival in the same year. His career has since been inextricably linked to the resurgence of interest in Handel's dramatic music, of which he is a renowned champion. He has made many recordings, notably of Handel oratorios (*Judas Maccabaeus*, *Messiah*, *Susanna* and *Theodora*). As music director of the Göttingen Handel Festival from 1990 he has conducted many opera performances, of which he has recorded *Ariodante*, *Giustino*, *Ottone*, and *Radamisto* with the Freiburg Baroque Orchestra. McGegan regularly conducts at major American and European opera houses, including Covent Garden, in works ranging from Monteverdi to Stravinsky, and was much praised for his conducting of *Ariodante* at the ENO in 1993. He was principal conductor of the Drottningholm Slottstheater (1983–5) and became principal guest conductor of Scottish Opera in 1993, embarking on a Mozart series with the company in 1998. He has also frequently

collaborated with the choreographer Mark Morris in works such as Rameau's *Platée*.

JONATHAN FREEMAN-ATTWOOD

McGibbon, William (*b* ?Glasgow, early April 1696; *d* Edinburgh, 3 Oct 1756). Scottish composer and violinist. He was long believed to have been born in Edinburgh, the son of the oboist Malcolm McGibbon (*d* Edinburgh, 29/30 December 1722; see Tytler), but it is more likely that Malcolm was his uncle and that his parents were the violinist Duncan McGibbon and his wife Sarah Muir, which would place his birth in Glasgow. Tytler states that he 'was sent early to London ... and studied many years under [William] Corbet[t]', while Campbell records that he studied and worked in Italy. (Campbell gives *c*1745 as the date for this; assuming a confusion between the two Jacobite rebellions, the correct date would be *c*1715.) Thus it appears that he studied in London from about 1709, accompanied Corbett on his Italian travels from 1711 and settled in Edinburgh in the early 1720s.

From 1726 he was employed as a violinist by the Edinburgh Musical Society, a post he held until his death. He became the best loved and most respected violinist and composer in Edinburgh, a position comparable to Corelli's in Rome. His playing ranged from technical brilliance to extreme simplicity, and ran to innovative bowings to clarify phrasing and a masterly command of melodic decoration. Davie printed his personal 'graces' for the opening movement of Corelli's Sonata op.5 no.9.

McGibbon's sonatas vary in quality, but at their best combine a variety of influences (Corelli, Handel, Veracini, Purcell) to produce a sophisticated and deeply-felt individuality. Around 1740 his work changed direction: he was drawn into an Edinburgh fashion for arranging Scots tunes. His settings, however, outdo rival ones in their subtle blend of Scottish and Italian musical styles. McGibbon left his estate to the Edinburgh Royal Infirmary (whose director, Lord Provost George Drummond, had subscribed for his 1740 sonatas and was the chief mourner at his funeral). However, the infirmary sold the plates of his Scots-tune collections to the publisher Robert Bremner. The ensuing reprints secured McGibbon's fame until well into the 19th century, when Max Bruch included *Thro' the wood, laddie* in his *Fantasie unter freier Benutzung schottischer Volksmelodien* (1880).

WORKS

6 trio sonatas, 2 vn/fl, bc, *c*1727, *US-Wc* (inc., 2nd vn pt missing)
6 Sonatas, nos.1–5, vn/fl, bc, no.6, fl/rec, vn, bc (Edinburgh, 1729)
6 Sonatas, 2 vn/fl, bc (Edinburgh, 1734), no.5, ed. K. Elliott (London, 1963), nos.3, 4, 5, ed. P. Holman (Edinburgh, 1991)
Sonatas on John come kiss me now and La folia, vn, bc, *c*1735, *GB-En* (vn pts only), La folia, ed. D. Johnson (Edinburgh, 1989)
6 Sonatas or Solos, vn/fl, bc (Edinburgh, 1740), nos.2, 3, 5, ed. P. Holman (Edinburgh, 1991)
129 Scots-tune arrs., vn/fl, bc, 3 bks (Edinburgh, 1742, 1746, 1755), 4 ed. in Johnson (1984, 2/1997)
6 Sonatas, 2 vn/fl, bc (London, *c*1745), only 1st vn pt survives
6 Sonatas, 2 fl (London, 1748)
7 miscellaneous marches and dance tunes included in *GB-En* 2084–5

Lost, listed in Edinburgh Musical Society library catalogue, 1765, *Eu*: 3 concs.; 1 ov.; concerti grossi, arr. from Corelli's sonatas op.3 no.1, op.5 no.2

DAVID JOHNSON

McGlashan, Alexander (*b* Perthshire, *c*1740; *d* Edinburgh, May 1797). Scottish violinist and composer. He was one of a number of violinists who contributed valuably to the upsurge of Scots-fiddle playing in the last third of the 18th century. He seems to have left Perthshire for Edinburgh at an early age, since his name is first given in an Edinburgh concert advertisement in 1759. Known as 'King' McGlashan from his 'stately and dressy appearance' (Glen), he led the most fashionable dance band in Edinburgh during the 1780s, and published there three collections of strathspeys, reels and other dance pieces, including original compositions of his own, in 1780, 1781 and 1786. He appears to have retired from playing around 1787, and the leadership of his band to have passed to William Gow.

A John McGlashan who taught the piano in Edinburgh and published a set of 'strathspey reels' in 1798 was probably Alexander McGlashan's brother.

DAVID JOHNSON

McGranahan, James (*b* nr Adamsville, PA, 4 July 1840; *d* Kinsman, OH, 7 July 1907). American composer of Sunday-school and gospel hymns, and hymnbook compiler. He studied with G.J. Webb, F.W. Root and George Macfarren, and in 1875 became a teacher and director of the Normal Musical Institute in New York, founded by G.F. Root. In 1877 he joined the evangelist Daniel Whittle as music director. He compiled numerous song collections for use in their revival meetings, often composing the tunes while Whittle supplied the texts. That year he also became an editor, with Sankey and Stebbins, of the already successful series *Gospel Hymns and Sacred Songs*, collaborating with them on volumes iii–vi (Cincinnati, 1878–91, repr. in *Gospel Hymns nos. 1–6 Complete*, 1894/*R*). The most successful of McGranahan's more than 150 tunes, including those for the hymns *Hallelujah for the cross* (1882), *I know whom I have believed* (1883), *Christ receiveth sinful men* (1883), *Showers of blessing* (1883), *I will sing of my Redeemer* (1887) and *The banner of the cross* (1887), were printed in these collections. Often employing compound rhythms and varied harmonies, his tunes reflect a growing sophistication in early gospel hymnody.

MEL R. WILHOIT

MacGregor, Joanna (*b* London, 16 July 1959). English pianist. She read music at Cambridge University where her teachers included the composer Hugh Wood, who later wrote a piano concerto for her which she first played at the Proms in 1991. She continued her piano studies at the RAM with Christopher Elton and at the Van Cliburn

Piano Institute in Texas. In 1985 she was selected for representation by the Young Concert Artists Trust, which helped to establish her wide-ranging concert career. MacGregor has built up a reputation for unusual and innovative programmes, incorporating elements of jazz and contemporary works by such composers as Berio, Xenakis, Ligeti, Murail, Takemitsu and Dillon; in 1993 she gave the first performance of Birtwistle's *Antiphonies* with the Philharmonia Orchestra under Boulez. She founded the Platform Contemporary Music Festival which took place at the Institute of Contemporary Arts from 1991 to 1993. In 1996 she gave a recital at the Queen Elizabeth Hall including Nancarrow's *Etudes for Player Piano*, which she performed live with pre-recorded tape and two video screens showing her hands in close-up, one pre-recorded with tape, the other relayed live. She has maintained a longstanding interest in the theatre and has written a radio play, *Memoirs of an Amnesiac*, based on the writings of Erik Satie.

JESSICA DUCHEN

M'Guckin, Barton (*b* Dublin, 28 July 1852; *d* Stoke Poges, 17 April 1917). Irish tenor. He studied in Dublin with Joseph Robinson and in Milan with Trevulsi. After appearances in concerts from 1874 to 1877, he made his stage début with the Carl Rosa Opera Company in 1878, singing regularly with them until 1887. After an American tour (1887–8), he rejoined the Carl Rosa, remaining until 1896. He created many roles in operas by British composers, including Phoebus in Goring Thomas's *Esmeralda* (1883), Orso in Mackenzie's *Colomba* (1883), Waldemar in Thomas's *Nadeshda* (1885), Oscar in Corder's *Nordisa* (1877) and the title role in Cowen's *Thorgrim* (1890). He was the first Des Grieux in England in Massenet's *Manon* (1885, Liverpool), and sang other roles in the French repertory, including Wilhelm Meister (*Mignon*), Faust, Don José and Eléazar (*La Juive*) with much success. He also sang in several provincial festivals and the old Popular Concerts. After retiring from the stage he taught; his pupils included his son, Noel Fleming. From 1911 to 1912 he acted as librarian for Oscar Hammerstein at the London Opera House.

HAROLD ROSENTHAL

McGuire, Edward (*b* Glasgow, 15 Feb 1948). Scottish composer and flautist. He was a junior student at the Royal Scottish Academy of Music and Drama (1964–5) before going on to study composition with James Iliff at the RAM in London (1966–70), where he was awarded the Hecht Prize in 1968. The following year he won the National Young Composer's Competition with *Chamber Music*. In 1971 a British Council scholarship enabled him to study in Stockholm at the Royal Swedish Academy of Music with Ingvar Lidholm. While in Sweden McGuire came to question his then relatively complex musical style, a reappraisal which resulted in a series of piano pieces for white notes only. Since then he has sought a synthesis between an idiosyncratic approach to 12-note method and modal or tonal elements often deriving from Scottish folk music. These elements, like the repeating units used to build up instrumental textures, are often derived from a single 12-note row. The polarity which results between chromaticism and modality or tonality may be heard in a variety of works, from the orchestral piece *Calgacus* (1976), which makes striking use of a bagpipe soloist, to *The Spirit of Wallace* (1997). He has toured internationally with the folk group The Whistlebinkies.

WORKS
(*selective list*)

Dramatic: Peter Pan (ballet, 3, choreog. G. Lustig), orch, folk ens, 1988, Glasgow, 24 Feb 1989; The Loving of Etain (op, 3, M. Carey), 1990, Glasgow, 9 Nov 1990; Cullercoats Tommy (op, M. Wilcox), 1993, Newcastle, 16 July 1993; Helen of Braemore (op, P. Isaac), 1996, Wick, 10 Sept 1996; Caketalk (op, Carey), 1996, Glasgow, 7 Nov 1996

FRANCIS J. MORRIS

Mácha, Otmar (*b* Ostrava, 2 Oct 1922). Czech composer. One of the leading pupils of Řídký at the Prague Conservatory (1945–8), he was music adviser to Czech radio in Prague (1945–55) and was then appointed secretary of the Czech Composers' Union. In 1982 he was awarded the title Artist of Merit. Mácha's early compositions, from the end of World War II, are deeply romantic. There is a strong feeling for folk style in the song cycles of 1945–7, but the sonatas for violin and cello that followed are harder and harmonically more adventurous. The *Symfonická intermezza* and the symphonic poem *Noc a naděje* ('Night and Hope'), which won prizes at the 1960 Jubilee Competition, are of greater originality, though the Orchestral Variations (1964) again draw on folk music. This is not the case in the stage works *Polapená nevěra* ('Infidelity Unmasked'), a piece based on 17th-century Czech farces and showing a keen sense of characterization, and *Jezero Ukereve* ('Lake Ukereve'). The latter is a powerful piece in which, against the violent background of the colonization of Africa, German doctors and biologists unsuccessfully attempt to combat an epidemic of sleeping sickness; the score makes interesting use of tapes within the orchestral texture.

WORKS
(*selective list*)

STAGE

Polapená nevěra [Infidelity Unmasked] (operatic farce, prol, 5 scenes, epilogue, Mácha, after Old Cz. anon. text, 1608), 1956–7, Prague, D 34, 21 Nov 1958

Jezero Ukereve [Lake Ukereve], 1960–63 (op, 5, Mácha, after V. Vančura), 1960–63, Prague, National, 27 May 1966
Růže pro Johanku [A Rose for Johanka] (ballad and musico-dramatic fantasy, 2, J. Pávek), 1971–4, Brno, Janáček, 8 Jan 1982
Svatba naoko [The Mock Wedding], 1974–7 (comic op, 4, V. Trapl and S. Kinzl), unperf.
Metamorphoses Promethei (TV op, J. Kolařík), 1981, Czechoslovak TV, 3 Oct 1982
Broučci (ballet, A. Jurásková and V. Harapes, after J. Karafiát), 1992, Prague, Estates, 22 Dec 1992

OTHER WORKS

Orch: Moravské lidové tance [Moravian Folk Dances], 1948; Sym., 1948; Slovenská rapsódie, 1949; Kopaničářské tance, 1950; Symfonická intermezza, 1958; Noc a naděje [Night and Hope], sym. poem, 1959; Variace, 1964; Varianty, 1968; Sinfonietta no.1, 1971; Double Conc., vn, pf, orch, 1978; Sinfonietta no.2, 1981–2; Vn Conc., 1985–6; Sinfonietta da camera, str, 1993
Vocal: Písně na lidové texty ukrajinske [Songs on Ukr. Folk Texts], 1v, pf, 1947; Písně mužů [Songs of Men] (R. Kipling), 1v, pf, 1947; Dopisy Karla Buriana [Letters of Karel Burian], 1v, pf, 1947; Lidové balady, S, T, pf/orch, 1949; Dětské sbory [Children's Choruses], 1955; Odkaz J.A. Komenského [Legacy of J.A. Komenský] (orat), Mez, SATB, orch, org, 1955; 4 monology, S, Bar, orch, 1966; Janinka zpívá [Janinka Sings], S, orch, 1970; Malý triptych [Little Triptych], S, small drum, fl, 1971; Conc. grosso, S, Mez, A, T, Bar, B, orch, 1980; Testament (J.A. Komenský), S, cl, str qt, 1995
Chbr and solo inst: Sonata, vn, pf, 1948; Sonata, vc, pf, 1949; Sonata, bn, pf, 1963; 3 toccaty, org, 1963–79; Pláč saxofonu [Saxophone Weeping], sax, pf/chbr orch, 1968; Variations, fl, pf, 1977; Preludium árie a toccata, accdn, 1978; Str Qt no.2, 1982; Elegie, vn, pf/str, 1982; Apollon a Marsyas, fl, vn, 1984; Eiréné, ob, pf/str, 1986; Rapsodie, cl, pf/str, 1987; Balada, va, pf, 1988; Variace na Seikilovu píseň [Variations on Seikl's Song], vn, 1990; Pražská fantazie, org, 1993; Hommage à Josef Suk, pf/str, 1996

BRIAN LARGE (text), MOJMÍR SOBOTKA (work-list, bibliography)

Machabey, Armand (*b* Pont-de-Roide, 7 May 1886; *d* Paris, 31 Aug 1966). French musicologist. He studied classics and music in Paris, concentrating on composition, but eventually devoted himself to musicology. His teachers included d'Indy and Pirro. In 1928 he took the doctorate at Paris University with a dissertation on the evolution of musical forms in the Middle Ages, for which he was awarded the Bernier Prize of the Académie des Beaux-Arts in 1930. For more than 20 years he was an examiner for the Paris Conservatoire. His writings cover a wide range of musical history, with special emphasis on topics of late antiquity and the Middle Ages. He wrote monographs on Ravel, Bruckner, bel canto and dance music, as well as a brief popular survey of musicology and several studies of notation. His studies of Machaut and Frescobaldi and his translation of Tinctoris's treatise are perhaps his best-known works. With Dufourcq and Raugel he edited the encyclopedia *Larousse de la musique* (Paris, 1957, rev. 2/1982 by A.Coléa and M. Vignal). His compositions include six short preludes for piano, six pieces for violin and piano, incidental music for films and *Quatre-vingts dictées dans le style chromatique*.

□

Machado, Augusto (de Oliveira) (*b* Lisbon, 27 Dec 1845; *d* Lisbon, 26 March 1924). Portuguese composer. He studied first in Lisbon, and, intending to become a pianist, went in 1867 to Paris, where he was taught by Lavignac and Danhauser. Back in Lisbon he composed his first works; dissatisfied with the predominating Italian influence in his style, however, he returned to Paris in 1873, and while there was in contact with Massenet and Saint-Saëns and was considerably influenced by them. His new French stylistic orientation is most clearly evident in the opera *Lauriane* (on a French libretto by Guiot, after George Sand); it was successfully produced in 1883 at Marseilles, and later at Lisbon and Rio de Janeiro, and marked the beginning of his international fame. Surprisingly, in the operas that followed (notably *I Doria*, 1887,

and *Mario Wetter*, 1898) he reverted to composing in an Italian manner to Italian librettos; in his last stage works he turned to operetta. His other compositions include the symphonic ode *Camões e os Lusíadas* (1880, unperformed), songs, piano and organ pieces. Machado taught singing at the Lisbon Conservatory from 1893 and was director there from 1901 to 1910; he also directed the Teatro de S Carlos and was a music adviser to the Ministry of Education.

JOSÉ CARLOS PICOTO

Machado, Diogo Barbosa. *See* BARBOSA MACHADO, DIOGO.

Machado, Manuel (*b* Lisbon, *c*1590; *d* Madrid, 18 April 1646). Portuguese composer and instrumentalist resident in Spain. He studied with Duarte Lobo and in 1610, after mastering several instruments, joined his father, Lope Machado, a harpist, in the royal chapel at Madrid. On 31 August 1639 he was appointed a royal chamber musician and on 10 August 1642 was rewarded 'for his long services and for those of his father' with added emoluments, payable against House of Burgundy funds. All 20 of his extant works are secular songs with Spanish texts, which equal in expressiveness those by native Spanish composers of the period. His harmonies are exceedingly rich and his changes of metre and tempo exactly reflect the shifting moods of the love poetry that he set. Whether for the pathetic *Bien podéis coraçón mio* (marked *aspacio*, 'slow'), *Salió a la fuente Jacinta* with its *double entendre* or the jaunty *Qué entonadilla que estaba la picara* (marked *picadito el compas*, 'in strict time'), he always found precisely the right musical means to underline the sense. He added *estrivos* and *coplas* to his *romances*, thus adhering to the most up-to-date Baroque formal practice.

His Christmas villancicos in King João IV's library included a *negro* adhering to African call and response practice; a soloist being answered by an eight-voice chorus, *Manuelica sa en Bele, Turo pleto*.

WORKS

20 secular songs, 3–4vv (5 inc., S only), *D-Mbs, E-Mn, I-Rc*; 4 ed. in Aroca; 3 ed. in MME, xxxii (1970); 17 ed. in PM, ser.B, xxviii (1975)

Salve regina, 8vv; Lamentation for Good Friday, 4vv; 7 villancicos, 1–8vv: lost, cited in *Primeira parte do index da livraria de musica do muyto alto, e poderoso Rey Dom João o IV. nosso senhor* (Lisbon, 1649/*R*); ed. J. de Vasconcellos (Oporto, 1874–6)

ROBERT STEVENSON

Machado, Marianella (*b* Caracas, 4 Aug 1959). Venezuelan composer. After studying composition with Mastrogiovanni in Caracas, she studied with Orrego-Salas at Indiana University, Bloomington (MA 1986). For the next three years she worked in Caracas as a teacher and composer, collaborating with the National Library, the Instituto Universitario de Estudios Musicales and the Centro de Estudios Latinoamericanos Romulo Gallegos, and writing for chamber ensembles, dance groups and film projects.

In 1989 she returned to the United States to take a doctorate at the Cincinnati College-Conservatory of Music (1993). In 1996 she embarked on a doctoral degree in Hispanic literature, studying the relationship between music and poetry and the application of poetic techniques of creation and analysis to her work as a composer. She engaged in discussions of her theories with the Latin American writers Octavio Paz and Armando Romero. Her recent work applies her concepts to both her compositions and to her literary criticism. She has also composed a series of pieces with contemporary techniques for young performers.

CARMEN HELENA TÉLLEZ

Machado e Cerveira, António (Xavier) (*b* Tamengos, nr Anadia, diocese of Coimbra, 1 Sept 1756; *d* Caxias, 14 Sept 1828). Portuguese organ builder. His father was the organ builder Manuel Machado Teixeira, who was first married to Thereza Angelica Taborda (mother of the architect and sculptor Joaquim Machado de Castro, who supervised the reconstruction of Lisbon following the earthquakes of 1755) and later to Josepha Cerveira of Aguim, the mother of Machado e Cerveira. In 1781 Teixeira completed a large organ for the Hieronymite monastery at Belém, Lisbon (74 stops, 4010 pipes), with his son as assistant. For his work in the chapel of the Palácio de Queluz and the basilica of Mafra (completed 1807), Machado e Cerveira was elected to the Brotherhood of St Cecilia on 22 November 1808, and was made organ builder to the royal household. He worked almost until his death, retired ill to Caxias and was buried at Belém. The business, though run for a short time after his death by his widow, Maria Isabel de Fonseca Cerveira, and an apprentice, José Theodora Correia de Andrade, soon closed down.

Machado e Cerveira was one of the most important and prolific Portuguese organ builders. His work was of the highest calibre. He is known to have built at least 105 instruments, of which about 30 survive. In later years he became famous as an artist and fine woodworker. He was perhaps the first of Portugal's 'secular' builders who

viewed their activity as both a business and an art, and who designed and produced complete instruments.

Apart from a few early instruments in Baroque style, he preferred to work in neo-classical traditions. His later work includes many small single-manual instruments, of about 20 half registers. One of his largest and most impressive organs is that in the church of the Cistercian convent of Lorvão (1795, op.47; two manuals, 61 stops). It is unusually mounted on an arch dividing the nave with two façades, one facing the altar, the other facing the nuns' choir. Many of Machado e Cerveira's organs were built for export to the Azores (including those of S Francisco, Terceira, op.22, 1788; the Jesuit college, Angra, op.56, 1798; and S Sebastião, Ponta Delgada, op.102, 1828). It is generally believed that some instruments were sent to Brazil and other Portuguese colonies.

Machado e Cerveira documented all the instruments he produced, leaving the signature, number and date of manufacture of each organ on a plate above the keyboard. The list of identified works in Lisbon includes instruments in the following churches: S Roque (1784); Mártires (op.3, 1785; recently restored); the Basílica da Estrela (op.23, 1789); Chapel of the Dukes of Palmela (op.27, 1790); and the Palácio da Bemposta (op.37, 1792).

W.D. JORDAN

Machaut [Machau, Machault], **Guillaume de** [Guillelmus de Machaudio] (*b* Reims or Machault, Champagne, *c*1300; *d* Reims, April 1377). French composer and poet.

1. Introduction. 2. Life. 3. Transmission, chronology and stylistic development. 4. Statements on self-awareness and about production. 5. Motets and lais. 6. Mass and Hocket. 7. Ballades and rondeaux. 8. Virelais. 9. Reception.

1. INTRODUCTION. Machaut is the most important poet and composer of the 14th century, with a lasting history of influence. His unique oeuvre, contained, thanks to the composer's own efforts, in manuscripts that include only his works, stands in many respects for itself: in terms of its volume, its poetic and compositional formulation and quality, but also in the number of genres in whose development Machaut played a crucial role. In the compilation and ordering of his works as well as in the testimony of the texts themselves there is a wealth of information about Machaut's self-awareness and about the production of his works and manuscripts. This ranges from general remarks about poetics and other aesthetic concepts to details about the composition of particular pieces, questions about their fixing and transmission in writing and their realization in sound. Biographical details also allow the works to be placed in a social context.

The greater part of the manuscripts containing his works is taken up by poetry that is not set to music. This comprises over 15 lengthy narrative *dits* (each with up to 9000 lines) and a collection of lyric poetry known as *Loange des dames*. Most of the *dits* are concerned with those members of the high nobility with whom Machaut was in close contact. They bring together allegorical representation, in the tradition of the *Roman de la rose*, and additional *exempla* related to historical events and individuals (for example, from the *Ovide moralisé*), in an instructive framework, to which the author's repeated designation of the works as 'traité' corresponds. Thus the *Remede de Fortune* (written before 1342) contains nine compositions presented as paradigms of lyric genres. The collection of lyrics 'ou il n'a point de chant' ('where there is no music') – its title of *Loange des dames* comes from a rubric given in one of the posthumously copied complete-works manuscripts – contains about 280 poems from the tradition of *amours courtois*, its content occasionally overlapping with the collection of musical works and *dits*. It is made up principally of approximately 200 ballades and exactly 60 rondeaux.

In the history of polyphonic music, Machaut is the first artistically important composer of polyphonic music to be known by name. His output holds a key position in the transition between the new ideas that took hold in the decade around 1300 and the music of the late Middle Ages; as a poet-musician he brought together the traditions of secular monophony and the new techniques of the Ars Nova. His 19 extensive lais are a high point in the – by then – long history of this form; the 23 motets take up the achievements of Philippe de Vitry; his Mass is the first cyclic, through-composed setting of the Ordinary. As with the *Hoquetus David*, the *Complainte* and *Chanson royale* (the latter two set to music only in the *Remede de Fortune*) represent a paradigmatic involvement with older forms. It is critical for the assessment of Machaut's historical position that for the first time French texts are set in subtly-composed works of distinctive and individual character and that functional and structural differentiation between the three so-called *formes fixes* is now evident: the new polyphonic ballade, of which Machaut wrote 41, making up the bulk of his lyrics set to music, the 22 polyphonic rondeaux and the virelai, called 'chanson baladee' and, in the case of the monophonic works, linked with dance-song. How much these new departures had been instigated by Vitry is unclear, owing to the small portion of his works that is now extant. In any case, however, Machaut must have played a decisive role in shaping these genres of the later Middle Ages.

2. LIFE. The details of Machaut's life and social position as well as the themes, form and purpose of Machaut's works clearly define his position as a 'clerc-écrivain' (Cerquiglini, 1985) in the courtly-aristocratic structure of the late Middle Ages. The two parts of his biography that are backed up by documentary evidence as well as illustrated in numerous statements in the *dits* support this: the first, that from about 1323 he was in the service of Jean de Luxembourg, King of Bohemia, and the second, that from April 1340 he was a canon of Reims Cathedral. Both encourage hypotheses about the undocumented details of his early life: the date of his birth, which must have been between 1300 and 1302; his bourgeois background, his education (probably in Reims), and possibly study for the *magister artium*. However, the title of *magister* is not mentioned either in Machaut's texts or in official ecclesiastical documents. That Machaut was named in a Reims document of 1452 along with other 'magistri' and by Deschamps in unofficial sources as

'maistre' is evidence of the position and renown that he had by that time won.

For about 17 years Machaut's life was shaped by his position in the service of Jean de Luxembourg; this in its turn is critical for the understanding of his poetry. As a *clerc* in the narrow circle of 'domestici familiares' he first of all took the post of *aumonier*, then of *notaire*, and lastly *secretaire*. The *dits* make it clear that for lengthy periods during this time he shared the restless life of his master: this involved visits to the French court (which in 1323–4 could have led to Machaut meeting Philippe de Vitry), and often swift movement between the home lands of the Luxembourgs in the West and Jean's Bohemian domain in the East, and journeys through much of central and eastern Europe (in particular to Lithuania in 1327–9); but also spending more peaceful periods in Durbuy, Jean's favoured western residence south of Liège, on the bank of the Ourthe. 'Li bons roi de Behaigne' is presented as the ideal of a ruler-knight in Machaut's texts, and thereby as a representative of the courtly world around which Machaut's poems are based. His earliest dits, *Le dit dou vergier* (1330s) and in particular *Le jugement dou roy de Behaigne* (before 1346), document the role of the poet at court. The chronological order of musical compositions of this time is not at all clear, but the composition of motets and possibly the first lais belong to this period.

As a royal servant, Machaut benefited from the economic security ensured for royal 'familiares' through prebends. Machaut is shown to have been in possession of such income, granted to him without the need for his presence in the parishes, in papal documents from 1330 onwards (starting with bulls of John XXII). Before this date he already held a position in Houdain, and the prospect of canonicates in Verdun (1330), Arras (1332), Reims (1333) and a prebend in Saintt Quentin (date unclear). After Benedict XII's action in 1335 to reduce the large numbers of canonicates 'in expectatione', Machaut retained only the canonicate in Reims. He took this up 'per procurationem' on 30 January 1337 and then in 1340 by his residence in Reims, where he is recorded for the first time as being present on 13 April of that year.

The office of a canon, who lived in a house 'extra muros', was linked to liturgical duties, but at the same time offered a material basis and a new kind of space for literary and musical activities. In the forefront of such activity is the long list of increasingly extensive *dits* (comprising over 40,000 lines of text in total), also associated with the lives of the high nobility. 'Moult la servi', said Machaut of Bonne, Jean de Luxembourg's daughter, who was already a highly supportive patron before her father's death in 1346. She is connected with the *Remede de Fortune* and possibly also with Machaut's cultivation of the new forms of lyrics set to music, as well as with the first extant collection of Machaut's works. Other patrons associated with Machaut included Charles II, King of Navarre, Jean, Duke of Berry, Philip the Bold, Duke of Burgundy and Pierre de Lusignan. Documented contacts include the Dauphin's (later Charles V) stay in Machaut's house in 1361. The *dits* also mention more traumatic events, such as the arrival of the plague in 1348–9 and the siege of Reims by the English in 1359–60.

The years 1363–5 saw the writing of *Le livre dou voir dit* (the *Voir dit*), with interpolated letters and musical works. Aside from its (at least partly fictitious) setting of the meeting of and love between the elderly poet and his young admirer 'Toute Belle' (Peronne), this *dit* represents a rich documentary source for the events of those years (with details of journeys to different places), for the production and transmission of Machaut's works, his self-awareness and self-depiction, and above all for the process of setting lyric texts to music (chronological overview of the lyrics with musical settings in Leech-Wilkinson, 1993). In Parisian celebrations in early 1368, possibly the scene of a meeting between Machaut and Froissart, Amedee VI of Savoy acquired a 'roman', probably a collection of Machaut's works.

In the last decade of his life the redaction and completion of his oeuvre was Machaut's primary concern, and the two-part *Prologue* (comprising four ballades and a verse passage in *dit* form), dating from about 1372, was written in connection with this. In the same year Machaut's brother Jean – who had also served Jean de Luxembourg, had been a canon of Reims since 1355 and had lived in the same house as Guillaume – died. In April 1377 Guillaume de Machaut died. The two brothers had established a richly endowed *anniversarium*, with which the *Messe de Nostre Dame* is thought to be linked, and were buried in the same grave.

3. Transmission, chronology and stylistic development. The transmission of Machaut's works documents in a unique way the central role of the book as a planned collection of the complete oeuvre, for the self-awareness of the poet-composer as well as the diffusion of his compositions. The first signs of such 'collecting tendencies' can be found in French poetry from the late 13th century onwards (Huot, 1987), for example with the works of Adam de la Halle (*F-Pn* fr.25566). Machaut's concern with his 'livre ou je met toutes mes choses' is in evidence from about 1350, and he clearly involved himself in all aspects, including the programme of miniatures for the richly illuminated presentation manuscripts, prepared mostly for aristocratic patrons. The most important sources for Machaut's music are six large books from the 14th century, which all relate to collections made by the author and must have been copied in part under his supervision. They show different redactions. *F-Pn* fr.1586 (C) offers the earliest accessible state of his work, possibly representing the first complete-works collection, dating from shortly after 1350. The redaction in *US-NYw* (*Vg*) and its copy, *F-Pn* fr.1585 (*B*), dates from about 1370. *F-Pn* fr.1584 (*A*) contains the only slightly later, last authoritative ordering of the works, with the indication 'Vesci l'ordenance que G. de Machaut wet qu'il ait en son livre'. Two further collections were clearly copied after his death: *F-Pn* fr.22545–6 (*F–G*) offers a slight accretion in the number of works, while *F-Pn* fr.9221 (*E*), copied for Jean, Duke of Berry, contains additional voice-parts, at least some of which are probably not by Machaut. These sources preserve the basic order of narrative *dits*, followed by unnotated lyric poetry in the *Loange des dames* and then music, the latter itself ordered by genre: in manuscript *A* the lais come first, then motets, Mass and Hocket, followed by ballades, rondeaux and virelais. Just as isolated examples of lyrics not set to music appear in the music section, so musical compositions used as examples are integrated among the poems in the *Remede de Fortune*. Transmission of musical pieces

TOTAL	40	20	32

in 'repertoire manuscripts' stretches into the 15th century but is limited to about 25 pieces.

Because of this specific transmission situation, it is likely that Machaut's literary and musical works have been preserved practically complete. Beyond that, most of the works can be placed at least roughly into specific creative phases. In this respect the critical factor is the internal order of several groups of works, in principle determined by the order in which they were written. Exceptions to this pattern include the first work in a series and the arrangement of works related to each other. Indications of such groups come from *dits* that have internal dates or to which dates can be assigned. The basis for the chronological layering of the musical works is the increase in the number of works between C and G. More detailed chronological indications are provided in the *Voir dit* (*c*1362–5) for the compositions associated with it. For the earliest period of musical creativity, further layers are revealed by the only partial ordering by genre of the musical works in C: this allows the refrain form compositions (ballade, rondeau and virelai) from the period before 1349 (CI) to be distinguished from those dating from the beginning of the 1350s (CII).

Only the 19 lais are spread more or less evenly over Machaut's entire composing career. The motets belong in a first phase, with 19 compositions definitely written before 1356 and only four more included in *Vg* and subsequent manuscripts. The most varied picture is offered by the refrain forms: Table 1 (following the work of Ludwig, Günther and Earp) shows the content of CI and the growth in the number of works from CII onwards (not including the compositions in the *Remede de Fortune*).

As with the *dits*, of which only the *Dit dou vergier* dates from before the Reims years, there is some evidence that the new polyphonic ballades were only written from 1340 onwards. 19 of the 20 virelais in CI are monophonic; thereafter polyphony predominates in this genre as well. Thus the ballade is not only numerically in the foreground of Machaut's oeuvre, but also with regard to the beginning of his composition of polyphonic songs. And it is precisely in the ballades that the chronological layering is linked with a change in compositional style. This is immediately obvious in the number and function of voices, in the tendency to extend the two-voice cantus and tenor framework and, later, the change in emphasis from triplum to contratenor. (See Table 2, showing ballades added from CII onwards; without the later added voice-parts; not including the *Remede de Fortune*). The development from the two-voice (cantus-tenor) framework, through its extension to include a triplum, to the three-voice works with contratenor, corresponds to developments in rhythm and other aspects of composition. Such changes often support external grounds for dating and would in many cases, even without the external information, allow a work to be assigned a chronological position. Through analysis, it is thus possible to assess stylistic change in the tangibly personal idiom of Machaut's songs over a period of 35 years.

4. STATEMENTS ON SELF-AWARENESS AND ABOUT PRODUCTION. Machaut is the first and, for a long time, the only composer to comment in differentiated fashion on the making, transmission, reception and evaluation of individual works, as well as on music in the wider context of poetics; such remarks afford a specific notion of the approach to music of the 'faiseur', the poet and composer of material in French. The two-part *Prologue*, which Machaut added to the beginning of his complete works about 1372, is typical of his self-reflection – a fundamental aspect of the literary work – as well as of self-portrayal and self-awareness: it is presented in four ballades with a supplementary prose text as well as the long section of narrative verse. In the dialogue of the ballades Machaut accepts the task given to him by Nature personified to portray 'les biens et honneurs qui sont en Amours' more than had been done before. 'Scens', 'Retorique' and 'Musique' serve both as a requirement and as a means for realizing the aim (fig.1).

The ensuing appearance of 'Amours' delimits the subject matter ('matere') to courtly love. In the second part of the *Prologue* the music is clearly in the foreground: from a catalogue of forms to an all-encompassing classification that, following the typical pattern of the Latin tradition of music theory, begins: 'Et musique est une science'. Interpretation of this retrospectively formulated central text should take account of numerous similar passages from other *dits*, from as early as the *Remede de Fortune* to the *Dit de la harpe* (probably written in the late 1360s).

Comments on individual works are mostly to be found in the *Voir dit*. Here it is clear that the normal compositional procedure was to formulate the text first and then its musical setting; but there is also evidence of the quasi-simultaneous conception of text and music based on the 'sentement' of a specific situation – from that constantly repeated aspect of the creative process, 'experience'. Information about notating, dictating and copying, about the transmission of single works as well as about the process of copying larger parts of his oeuvre is combined with detailed observations about working conditions and the external circumstances of production.

The remarks on R17 are typical of the terms by which Machaut rated his compositions: he stated that for seven years he had completed 'ni si bonne chose ni si doulces a oir' ('nothing so good or so sweet to listen to'). Recurring allusions to novelty and specific quality are occasionally varied: so, for example, B33 is characterized as 'moult estranges', but with the general comment that it is made in the style ('a la guise') of a 'res d'Alemaigne' (a term

1. *Guillaume de Machaut visited by Nature, who comes to order him to write new poems about Love and offers three of her children, Sense, Rhetoric and Music, to advise and assist him: miniature from MS 'A', c1375 (F-Pn fr.1584, f.E)*

whose meaning is not altogether clear). The lower voice-parts ('tenures') are described as 'aussi douces comme papins dessalés' ('as sweet as unsalted gruel'), and Machaut advised Peronne to listen to the melody 'de bien longue mesure', without changes ('sanz mettre ne oster'), as could happen in an instrumental adaptation (*Voir dit*, letter 10). Evidence of deliberate working out of specific polyphonic solutions corresponds to the role of listening as a basis for aesthetic perception ('plaire'), but also as a final control over the result. Thus Machaut stated that he never let anything out of his hands until he had heard it; referring to B34 (conceived as a four-voice work), he said that on repeated listening it had pleased him very much. But also in the *Voir dit* we find an interesting case of the later addition of two lower voices to a rondeau melody (in R18).

Such comments on individual works correspond to the key words 'divers et deduisans', mentioned with respect to music in the part of the *Prologue* that deals with the three aspects of formal creation: *Scens*, *Retorique* and *Musique*. As can already be seen at the beginning of the second section of the *Prologue*, these key words can be interpreted in the light of further texts: rather than forming a mere succession, these aspects interact in a hierarchy in which *Scens* is dominant (see Cerquiglini, 1985). One indication of this is the centrality of the Orpheus figure in Machaut's works, both as poet ('le poete divin' in the *Dit de la harpe*) and as musician, who with a tuned instrument, the harp (also a reference to harmony) and as a singer demonstrates the wondrous effect of music; the interconnection of such aspects is evident even in the choice of words, as in the *dit* section of the *Prologue*: 'Cils *poete* dont je vous *chant* / harpoit si tres joliment / et si chantoit si doucement'.

In the wider sphere of Machaut's theoretical reflections on art, the key word 'soutil', the emphasis on 'maniere' and the aspect of 'aourner' are all significant in relation to music. Such differentiation allows the use of categories through which interpretations can be made of individuality, innovation and poetic and compositional techniques as characteristic elements of the oeuvre, and which further provide the conditions for a proper understanding of the links between aesthetics and analysis.

5. Motets and lais. The motets and the lais are the only large groups of works in which Machaut directly followed older forms; he had a specific impact on both. In the case of the motet this encompasses a phase of the development of this genre between the new methods of formal structuring present in the *Roman de Fauvel* and especially in the works of Philippe de Vitry, and the fully isorhythmic compositions of the last third of the century.

The motets constitute the oldest extant part of Machaut's musical oeuvre. Only the last three (M21–23), which are datable from references to political events of the years 1358–60, can be shown to have been composed after the middle of the century. 19 were already written by the time of the first available redaction of his works (in C); M4, first transmitted in *Vg*, may have been erroneously omitted from *C*. Early involvement with this genre is confirmed by M18, written for the appointment of Guillaume de Trie as Archbishop of Reims in 1324. The beginning of the motet series with the triplum 'Quant en moy vint premierement Amour' must, as in other work groups, be seen as programmatic. Following this – without indications of chronological layering, but often organized according to structural or thematic relationships – there come first of all those works with French upper-voice texts and then works with Latin texts (the latter from

M18 on), with the exceptions of M9 (Latin) and M20 (French). Two motets (12 and 17) combine a Latin motetus with a French triplum.

Those characteristics of Machaut's motets which correspond to aspects of the genre as he found it include three-part texture, only rarely expanded to four parts (only four of Machaut's motets have a contratenor); the intertextual relationship of the two text-carrying upper parts and the semantic connotations of the liturgical tenor melody; also the basically strophic disposition resulting from the interaction between text structure, text-setting and melodic-rhythmic organization of the tenor into *color* and *talea*. The same is true of the integration of *refrains* and other quotations, and the use of specific techniques – such as articulation through the use of short passages of hocket – and also of the three works with non-isorhythmic song melody tenors (M11, 16 and 20), of which one (M16) is fully texted. The melody of M13, 'Ruina', is identical to a corresponding tenor in the *Roman de Fauvel* (*Super cathedram/Presidentes*). An intensive engagement with the achievements of Philippe de Vitry has been shown for the four four-voice motets (M5, M21–23; Leech-Wilkinson, 1989).

The importance of Machaut's motets in the history of the genre lies in their rhythmic and tonal formulation on the basis of the 'quatre prolacions' (*see* NOTATION, §III, 3(iii)) and systematic formulation of harmonic progressions according to the rules of *contrapunctus* on the one hand, and on the other the structural interconnection of all voices through rhythmic and partly also melodic correspondences. The isorhythmic organization of the tenor shows a tendency towards longer rhythmic segments and increasingly complex intersections between *color* and *talea*. In ten motets the last section is in diminution (mostly in half-values). Even in works without an isorhythmic tenor, rhythmic and melodic relationships between the upper voices created by hocket and other significant features represent deliberately applied organizational devices. In passages of diminution such correspondences extend in many cases over large sections. In M13 almost the entire composition is thus structured; M15 is one of the earliest examples of a 'pan-isorhythmic' motet.

Semantic interpretation of individual compositions as specific text-settings is still some way off, however; recent research has exposed a broad spectrum of ways in which Machaut, as a poet-musician, used the specific compositional possibilities of this genre.

Machaut's 19 lais mark the final phase of a longstanding tradition. As in the motets there are further indications of his engagement with the *Roman de Fauvel*, yet although the composition of these works stretches into Machaut's late years. That the lais in manuscript C are transmitted with miniatures emphasizes their importance in Machaut's oeuvre (see Huot, 1987; also on the order of pieces). In their integration of the new rhythmic procedures of the Ars Nova into a defined musical structure (generally in 12 sections, of which the last refers to the first, often by way of transposition), Machaut's lais elevate a now old genre, offering unique solutions for large-scale text-setting in monophony. The expansion of the form into polyphony is a further part of this process: polyphony is indicated in two cases by rubrics (L16 and L17; 11 and 12 in Schrade) and in two more (L23 and L24; or 17 and 18 in Schrade) is implicit in the traditional method of successively notating sections of melody that are to be performed simultaneously.

6. MASS AND HOCKET. Both of these compositions are unique in the 14th century and among Machaut's works. The three-voice *Hoquetus David* is the last example of its kind. Like the Mass it is transmitted for the first time in *Vg* (it actually appears immediately following the Mass) and must have been composed in the 1360s. It may well have close connections with Reims; it was possibly associated with the coronation of Charles V there in 1364. It is based on an isorhythmically worked setting of the passage 'David' from the Alleluia verse *Nativitas gloriose virginis*.

The four-part Mass represents the earliest instance of a Mass Ordinary setting (including the *Ite Missa est*) that is stylistically coherent and was also conceived as a unit. Research on the Ordinary melodies used and the mass foundation has confirmed that this composition can be linked to a Saturday Lady Mass instituted in Reims Cathedral in 1341; this corresponds to a rubric in its oldest source: 'Ci commence la Messe de Nostre Dame'. Machaut's Mass, probably written in the early 1360s, was connected with the Reims celebration and on the death of his brother it was transformed into a memorial mass. It continued to be performed after Machaut's death, perhaps continuing into the 15th century (see Robertson, 1992). In the Mass, isorhythm and diverse other compositional techniques of Machaut's late period are brought together in one work that is outstanding in terms of artistic merit and belongs among the most impressive works of the Middle Ages.

7. BALLADES AND RONDEAUX. Machaut's ballades are the first available evidence of a genuinely new genre of French song, one that remained of central importance in text-setting until the middle of the 15th century. The beginnings of this new kind of ballade cannot be traced before about 1340 (even through indirect witnesses). And its specific combination of features in the context of the newly differentiated *formes fixes* suggests that Machaut, even if he was not the instigator of the new form, played a crucial role in its development.

Its newness lies in the bringing together of features of different origins. The texts take on a formal, fixed structure that was already evident in the 1330s in the works of Jehan Acart de Hesdin and Jehan de le Mote. In language the ballade adopts the high style of *grand chant*. The interaction of the new types of voice-parts, conceived in relation to each other, is founded rhythmically on the 'quatre prolacions' and tonally on the deliberate exploitation of the qualitative differences between perfect and imperfect intervals, as they would be described in the teaching of *contrapunctus* and here used in such a context for the first time. Until the late 14th century Machaut was alone in his use of these means for 'subtle' text-setting in which every aspect of the text is expressed, from form to semantics, and in the latter case even as far as the meaning of individual words. In this regard only the monophonic songs of Jehannot de Lescurel offer any comparable examples of text-setting.

As with the number of voices and the expansion of a two-voice texture through the addition of triplum and/or contratenor (see §2 above), so also rhythmic procedures and the introduction of different compositional techniques can be used to demonstrate a clear change between the

(c) Characteristic melodic flourishes

earlier and later compositions. Nonetheless, even the earliest ballades exhibit a specific compositional quality; in the 14th century this is distinctive, and contributes considerably to the impression that, in the sense of a personal style, the works of Machaut can be separated from those of others (of which many composed within his lifetime remain extant). His extreme control of material suggests a high level of reflection. Analytical findings allow the examination of aesthetic criteria, through key concepts such as richness of association, *varietas*, multi-layered structures, balance on all levels and in particular the interaction of parameters already discussed: from melodic to harmonic to formal (see for example the discussion of B7 by Fuller, 1987). Different solutions to the text-music relationship correspond to the individualization of each composition in terms of an emphatic understanding of 'the work'. This individuality determines the boundaries of the examination of isolated aspects and the findings of such investigations. But it offers, at the same time, an essential basis for text-critical studies (most of which have yet to be undertaken).

The status of the new genre is underlined by its position at the beginning of the songs in the complete-works manuscripts. Its breadth and importance is emphasized by the evidently programmatic opening of the series: B1 is the only ballade with an 'isorhythmic' structure, and the works that follow it also have specific points of compositional interest; B2 offers an equally singular construction created from the tension between two sonorities; B3 has an intertextual reference as homage to Jehan de le Mote; B4 demonstrates a striking grasp of compositional art in the use of different mensurations (notated in coloration) and a complex pattern of suspensions.

The beginning of B14 is typical of the regular declamatory rhythm of the early ballades (see ex.1*a*). Rests on the caesura and at the end of a phrase correspond to the formal characteristics of the text-line. The structural sonorities (shown in ex.1*b*) lead after the caesura in the first text-line to an open sonority (bars 4–5), but then move (with the syntax) at the end of the line (bar 7) through the 3rd on *f♯–a* (an interval described in contemporary theory as 'tendere', i.e. 'striving' or needing resolution) towards the emphasized central word 'Amour'. Dissonances are integrated in short melodic

motifs ('Floskeln', ex.1*c*), which themselves provide consonant series of structural sonorities, even where the consonant notes do not sound together, as for example in bar 10. At the same time, bar 10 marks off a repetition of the sonorities of the opening bars (1–5) after the mid-point of this part of the song (bars 11–13). This balances the asymmetrical relationship in the length of the text-lines and also in the altered repetition of the progressions of bars 7–9 in bars 14–16, itself underlined by the same progression in minims (quavers in transcription) in bar 13. The articulation and emphasis of particular words by the musical structure corresponds in further strophes to a rhetorical stress on key words in the discourse of the poem as a whole.

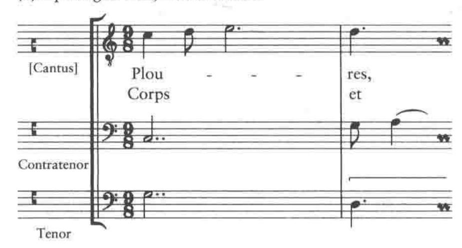
The degree to which semantics can be understood to operate in each individual setting is shown at the beginning of B6 (ex.2): in the significant melodic descent of the cantus firstly through an octave (bars 1–4) and then through a minor 6th (bars 5–6), in the underlying declamatory rhythm in long note values and above all in the use of the 'tendere' imperfect consonances. They are employed to emphasize the word 'oy' ('hear') with the written accidental *g*♯ (bar 2) and the surprising opening of the second text-line 'A toy' with *b*♭*–g* (after the previous *e–g* sonority).

One of the key features of text and music of this new genre is the role of the refrain which can be understood in traditional fashion on the one hand as a highlighted résumé at the end of a strophe and on the other hand as a starting-point for the poem and the composition – regardless of whether it is formed from pre-existing material (e.g. in B12 for text and music and in B13, at least for the text) or is completely new. The beginning of B13 (ex.3*a*) clarifies the relationship between refrain (ex.3*b*) and strophe in text and music ('Esperance' represents a concretization of the refrain; the music also corresponds). The 'indirect preparation' by the opening of the 4th in bar 2 (ex.3*a*), the deliberate placing of rests (bars 5 and 7) and the emphasis of the words 'sans per' by the use of a high tessitura and inserted syncopated hemiola demonstrate Machaut's subtle use of different musical devices. In this way the text-setting opens the way to readings of the text, showing for instance that Machaut uses the verb 'asseurer' transitively and not intransitively, as the punctuation of the editions would suggest (for further discussion see Arlt, 1982).

The expansion of the musical texture by the addition of a triplum and, later, of a contratenor voice-part resulted in greater complexity, in particular in the higher propor-

Ex.2 Opening of B6, *Doulz amis oy mon compleint*

Ex.3
(a) Opening of B13, *Esperance qui m'asseure*



tion of dissonances arising from interval progressions (to what extent the triplum and contratenor in works transmitted in four parts should be seen as alternative extensions of a two-voice work can only be clarified through analysis, and is a matter for debate). However, greater diversity results from the use of multiple levels of mensuration (for instance perfect *tempus*, major *prolatio* or perfect *modus*, imperfect *tempus*, minor *prolatio*), syncopation or more varied declamation. The re-use of material in different sections (and not just in similar endings of the musical rhyme in a long 'recapitulation') points to a concern with questions of form. For example, in the series of ballades 26 to 28, issues about the use of specific melodic patterns can be studied. But here again the particular demands of the individual text form the starting-point for the composition. The fact that, for B26, *Donnez signeurs*, both an older and a revised version of the work are preserved, allows glimpses into the compositional process. A comparison of the two versions shows how the systematic reworking of all three voices achieved subtlety on many levels of the definitive version, and therefore allows conclusions to be reached about Machaut's musical and poetic compositional art (see Arlt, 1993, and Bullock). A series of songs from the period of the *Voir dit* show that Machaut's working-out of specific compositional problems was significant even beyond the ballade genre (Leech-Wilkinson, 1993). Rhythmic and harmonic interaction between the voices is typical of the complexity of the compositions of this period, demonstrable through, for example, the way in which the contratenor supports the 4th between cantus and tenor at the beginning of B32 (ex.4*a*); in the same piece the interwoven lower voices provide both rhythmic foundation and cross-rhythmic activity against the cantus (ex.4*b*); and in B36 the changing relationships between voices as a result of the treatment of dissonance (ex.4*c*). In contrast, the later

ballades (38 to 40) exhibit the traits of a late compositional style.

In the rondeaux (which, like the ballades, are mostly polyphonic) Machaut took up an already established compositional form that had been associated since the 13th century with three-voice settings. Yet here also, the

(c) B36, *Se pour ce muir,* bars 32-3

Ex.5 Opening of R1, *Doulz viaire gracieus*

first piece in the series, with its structural use of imperfect consonances, points clearly to a new kind of composition (ex.5). The fact that the basically syllabic declamation of R1 is untypical of Machaut's treatment of the song-form also emphasizes its special position. In general, the greater use of melisma and concentration on compositional innovations along with many-layered correspondences between the two musical parts can be directly associated with the shorter texts and bipartite musical layout (with refrain repeated at the end). The late R19, in which the use of different mensurations in the cantus and lower voices is combined with a long 'isorhythmic' recapitulation structure (see Günther, 1962–3, with partial reproduction of the original notation), shows the greater compositional freedom afforded by the form. In an extreme and unique way, the specific formal qualities of the rondeau form are exploited in R14, first transmitted in *B* (missing from *Vg*). Here the text *Ma fin est mon commencement* provides the clue to a realization in which the triplum is created by reading the cantus line in reverse and the second half of the lower voice consists of its first half read in reverse.

8. VIRELAIS. As a result of the creation of the new ballade and Machaut's differentiation between the three *formes fixes*, the old dance-song function associated with the term 'ballade' became concentrated in the virelai or 'chanson ballade'. Statements such as 'Ainssi doit elle

2. Five ladies and five men dance a round dance to a virelai: miniature from the 'Remede de Fortune', MS 'C', after 1350 (F-Pn fr.1586, f.51r)

Et vos - tre sim - ple chie - re
Plin de plai - sant ma - nie - - re

estre clamee' in conjunction with the latter term ('thus should it be named'; *Remede de Fortune*, line 3450) point to a delimitation that is by no means self-evident. Nevertheless, the simple musical form of the early monophonic virelais and the fact that in the *Remede de Fortune* only this form is explicitly connected with dancing (fig.2), correspond to the delimitation. This narrow concept of the form is unique in the 14th century, and was later abandoned by Machaut in favour of more complex musical formulations, including polyphonic settings.

With their formulaic rhythm and the use of a higher tessitura in the second section (see ex.6, showing V1), the early virelais show restricted scope for manipulation of form. The formulaic rhythmic patterns are varied for the first time in V5, which – characteristically – is melodically based on an earlier *chanson de toile* (ex.7). From *Vg* onwards polyphonic settings are also found. The beginning of V36 (V30 in Schrade) exposes aspects of virelai construction which differ from those of ballades and rondeaux (see ex.8): for example, the use of an upbeat, the equal pitch-range of the voice-parts, and also the secondary role of the 'tendere' imperfect intervals in comparison to the melodic direction of each voice. The case of V29 (V26 in Schrade), in which the second voice was a later addition to the monophonic work transmitted in *C*, is also helpful for the determination of such differences (see Fuller, 1991).

Ex.8 Opening of V30, *Se je souspir*

9. Reception. In 1350 the chronicler Gilles Li Muisis, in his *Méditations*, named Machaut with Vitry and Jehan de le Mote as poets of his day ('Or sont vivant bieaus dis faisant ...'). References to Machaut as poet continue into the second half of the 15th century (see Earp, 1995). In the anonymous *Regles de la seconde rhetorique*, dating from the beginning of the 15th century, 'maistre Guillaume de Machault' is named as 'le grant retthorique de nouvelle fourme, qui commencha toutes tailles nouvelles et les parfais lays d'amour'. This statement should be understood in association with what precedes on the subject of Vitry ('qui trouva la maniere des motés, et des balades, et des lais, et des simples rondeaus'). Machaut and Vitry are seen here in retrospect and from a historical perspective as formative figures of new groundrules of poetric and musical composition, with typical overlapping of characterization. In any case, Machaut's poetry offered an corpus of exemplars that was widely used as a point of reference (with the lyric forms also used as models) into the early 15th century; explicit citations are found in the works of Eustache Deschamps and Oton de Granson, but his direct influence can also be seen in those of Jean Froissart, Geoffrey Chaucer and Christine de Pizan.

Also in the mid-14th century, the *Libellus cantus mensurabilis* (sometimes attributed to Johannes de Muris) referred to the distinctive notational practices of Machaut, and this continued in musical writings until the *Practica musice* (1496) of Gaffurius. But the number of his works transmitted in the so-called 'repertory manuscripts' is strikingly small (Table 3, after Earp, 1985 and 1993). In the extensive Cambrai fragments (*F-CA* 1328) there are only three works by Machaut (M8, B18 and R7); and only four (M8, M15, M19, R17) are included in the Ivrea Manuscript (*I-IV* 115). The largest number of his pieces in such a collection is indicated in the index (dated 1376) of the lost Trémoïlle Manuscript (*F-Pn* n.a.fr.23190),

A = correct ascription to Machaut

with nine motets, eight ballades (including two from the *Remede de Fortune*) and one rondeau. Correct ascriptions in the notated repertory manuscripts are restricted to the Chantilly Manuscript (*F-CH 564*) for two out of three ballades. For the motets, the above-named sources contain nearly all the pieces transmitted outside the Machaut manuscripts. Some of the chansons (B18, B23, B25, B31 and R7) were remarkably widely distributed, and they continued to be copied in the 15th century; but for the majority transmission was rather more sporadic.

To what extent the comparatively small number of 12 ballades and three rondeaux transmitted outside the complete-works manuscripts is explicable by the very existence of those manuscripts is open to question. The serious lack of sources from the first three quarters of the 14th century must also be taken into account here; however, the general picture of a narrow transmission pattern tends to be confirmed each time manuscript fragments are rediscovered.

From the last quarter of the 14th century – in citations and also in a large number of intertextual references – there is evidence not only of an adoption of texts but also of musical engagement with Machaut's work. Here, with the exception of B15, all those pieces evolved are transmitted in the repertory manuscripts.

A more exact picture of Machaut's influence demands comparative stylistic study of the numerous other songs of the 14th century, usually anonymously transmitted. These are clearly different in form as well as in style: for instance, the virelai, of which there are many examples, appears almost invariably (with one exception) in its polyphonic form; other songs use pre-existing melodies in the tenor. The fact that the polyphonic ballade appears for the first time in larger numbers in the Trémoïlle Manuscript source that might point to reception of Machaut's work, especially since in this eight of the 12 ballades transmitted outside the Machaut's manuscripts are present.

In any case, in the artistic level and specific quality of his works, Machaut stands on his own late into the 14th century. That Deschamps described him with the term 'poëte', referring in a new sense to the poetry of his own time (Brownlee, 1978), corresponds to the importance of his literary oeuvre. Here begins a new kind of reception in which poet and composer are separated. The older unity is continued in music-related poetry, as represented in the late 14th century by Senleches.

The most impressive text to set out the particular importance of this poet-composer, and the affection in which his work was held, is Deschamps' double ballade on the death of Machaut, set to music by Andrieu (for further discussion see Mühlethaler, 1989). One of the texts situates the work in a wide address to those who are called to mourn, with a characteristic list beginning 'Armes, Amours, Dames, Chevalrie, / Clers, musicans, faititres [et fayseurs] en françois ...'. It stresses the principal theme of poetry ('en tous ses diz courtois') and the effect of the music, and sets the lament in a mythological context, beginning with the plea to Orpheus. In the other text music stands in the foreground: Machaut is described as 'flour des flours de toute melodie' and at the same time, in the deliberate use of a description of Vitry by Jehan de le Mote, as 'mondains dieux d'armonie'. The two ballade texts are linked by a shared refrain, which in two key words sums up the central aspect of his life and work: 'Machaut, le noble rethorique'.

WORKS

Editions: *Guillaume de Machaut: Musikalische Werke*, ed. F. Ludwig [vol.iv prepared by H. Besseler] (Leipzig, 1926–54/*R*) [L]

Polyphonic Music of the Fourteenth Century, ii–iii, ed. L. Schrade (Monaco, 1956/*R*1977 in 5 vols.)

Text editions: *Oeuvres de Guillaume de Machaut*, ed. E. Hoepffner (Paris, 1908–21)

Guillaume de Machaut: Poésies lyriques, ed. V. Chichmaref (Paris, 1909/*R*)

La louange des dames by Guillaume de Machaut, ed. N. Wilkins (Edinburgh, 1972)

Guillaume de Machaut: Le Jugement du roy de Behaigne and Remede de Fortune, ed. and trans. J.I. Wimsatt and W.W. Kibler, music ed. R.A. Baltzer (Athens, GA, 1988)

Guillaume de Machaut: Le livre dou Voir Dit (The Book of the True Poem), ed. D. Leech-Wilkinson and trans. R.B. Palmer (New York, 1998)
Guillaume de Machaut: Le Livre du Voir Dit, ed. and trans. P. Imbs, rev. with an introduction by J. Cerquiglini-Toulet (Paris, 1999)

The following list includes only works with music. The numbering is from Schrade's edition, with reference to Ludwig's edition where it differs in the virelais and lais and for the works in the Remede de Fortune. The numbering is based on the sequence found in the main Machaut manuscripts. Detailed information on transmission, composition, editions of and research on all Machaut's works (including those without music) can be found in L. Earp: *Guillaume de Machaut: a Guide to Research* (New York, 1995)

MASS

Messe de Nostre Dame, 4vv [6 movts from Mass Ordinary, incl. the Ite missa est]

DOUBLE HOCKET

Hoquetus David, 3vv

MOTETS

1 Quant en moy/Amour et biaute/Amara valde, 3vv
2 Tous corps/De souspirant cuer/Suspiro, 3vv
3 He, Mors, com tu es haïe/Fine Amour, qui me vint navrer/Quare non sum mortuus, 3vv
4 De Bon Espoir/Puis que la douce/Speravi, 3vv
5 Aucune gent/Qui plus aimme/Fiat voluntas tua, 4vv
6 S'il estoit nulz/S'amours tous/Et gaudebit cor vestrum, 3vv
7 J'ay tant mon cuer/Lasse! je sui en aventure/Ego moriar pro te, 3vv
8 Qui es promesses de Fortune/Ha, Fortune! trop suis mis loing/Et non est qui adjuvet, 3vv
9 Fons tocius superbie/O livoris feritas/Fera pessima, 3vv
10 Hareu, hareu, le feu/Helas, ou sera/Obediens usque ad mortem, 3vv
11 Dame, je sui cilz/Fins cuers doulz/[tenor], 3vv
12 Helas! pour quoy/Corde mesto/Libera me, 3vv
13 Tant doucement m'ont attrait/Eins que ma dame/Ruina, 3vv
14 Maugre mon cuer/De ma dolour/Quia amore langueo, 3vv
15 Amours qui ha le povoir/Faus Samblant/Vidi Dominum, 3vv
16 Lasse! comment oublieray/Se j'aim mon loyal ami/Pour quoy me bat mes maris?, 3vv
17 Quant vraie amour/O series summe rata/Super omnnes speciosa, 3vv
18 Bone pastor Guillerme/Bone pastor qui pastores/[tenor], 3vv [probably composed for the appointment of Guillaume de Trie as Archbishop of Reims in 1324]
19 Martyrum gemma latria/Diligenter inquiramus/A Christo honoratus, 3vv [in honour of the patron saint of Saint Quentin]
20 Trop plus est bele/Biaute paree/Je ne sui mie, 3vv
21 Christe qui lux es/Veni Creator Spiritus/Tribulatio proxima est, 4vv [connected with the Siege of Reims, winter 1359–60]
22 Tu qui gregem/Plange, regni/Apprehende arma et scutum et exurge, 4vv [addressed to Charles, Duke of Normandy, probably spring 1358]
23 Felix virgo/Inviolata genitrix/Ad te suspiramus, 4vv [probably connected with the Siege of Reims, winter 1359–60]

Li enseignement/De touz les biens/Ecce tu pulchra es, motet ascribed to Machaut in *CH-Fcu* 260, seems to be a false attribution

BALLADES

1 S'Amours ne fait, 2vv
2 Helas, tant ay dolour, 2vv
3 On ne porroit penser, 2vv [+ Ct in MS *E*]
4 Biaute qui toutes autres pere, 2vv [+ Ct in MS *E* and in *NL-Uu* 1846[2] (olim 37)]
5 Riches d'amour et mendians, 2vv
6 Doulz amis, oy mon compleint, 2vv
7 J'aim mieus languir, 2vv
8 De desconfort, de martyre amoureus, 2vv
9 Dame, ne regardés pas, 2vv
10 Ne pensés pas, dame, que je recroie, 2vv
11 N'en fait n'en dit, 2vv
12 Pour ce que tous mes chans fais, 2vv
13 Esperance qui masseüre, 2vv
14 Je ne cuit pas qu'onques, 2vv
15 Se je me pleing, je n'en puis mais, 2vv
16 Dame, comment qu'amez de vous, 2vv
17 Sanz cuer/Amis, dolens/Dame, par vous, 3vv
18 De petit po, de nient volente, 3vv [+ Ct in *I-MOe* α.M.5.24 and *F-CA* 1328, the latter also with second triplum; 3 lower voices (i.e. without triplum) in *F-CH* 564, *Pn* it.568, *I-Fn* 26]
19 Amours me fait desirer, 3vv
20 Je sui aussi com cilz, 2vv [+ Ct in MS *E*]
21 Se quanque amours, 4vv
22 Il m'est avis qu'il n'est dons de Nature, 4vv [different Ct in *F-Pn* n.a.fr.6771]
23 De Fortune me doy pleindre, 3vv [+ Ct in MS *E* and *F-CH* 564, different Ct in *Pn* n.a.fr.6771]
24 Tres douce dame que j'aour, 2vv
25 Honte, paour, doubtance, 3vv
26 Donnez, signeurs, 3vv
27 Une vipere en cuer, 2vv [+ Ct in MS *E*]
28 Je puis trop bien ma dame comparer, 3vv
29 De triste cuer/Quant vrais amans/Certes, je di, 3vv
30 Pas de tor en thies païs, 3vv
31 De toutes flours, 3vv [+ triplum in MS *E* and *F-Pn* n.a.fr.6771]
32 Plourez, dames, 3vv
33 Nes que on porroit, 3vv
34 Quant Theseus/Ne quier veoir, 4vv
35 Gais et jolis, 3vv
36 Se pour ce muir, 3vv
37 Dame, se vous m'estés lointeinne, 1v
38 Phyton, le mervilleus serpent, 3vv
39 Mes esperis se combat, 3vv
40 Ma chiere dame, a vous, 3vv
41 En amer a douce vie, 4vv [without triplum in *CH-BEb* 218, *F-Pn* it.568, *I-Fn* 26; from the Remede de Fortune; L i, p.98]
42 Dame de qui toute ma joie vient, 4vv; 2vv (without triplum and Ct) in MS C [from the Remede de Fortune; L i, p.99]

RONDEAUX

1 Doulz viaire gracieus, 3vv
2 Helas, pour quoy se demente, 2vv
3 Merci vous pri, 2vv
4 Sans cuer, dolens, 2vv
5 Quant j'ay l'espart, 2vv
6 Cinc, un, treze, 2vv
7 Se vous n'estés, 2vv [+ Ct in MS *E*, *I-Fn* 26 and *F-CA* 1328; the latter also has a triplum; *I-MOe* α.M.5.24 has the 2vv version and a separate, new Ct]
8 Vo doulz resgars, 3vv
9 Tant doucement me sens emprisonnés, 4vv
10 Rose, liz, 4vv; 3vv (without triplum) in MS C [C also has later, additional Ct not by Machaut]
11 Comment puet on mieus, 3vv
12 Ce qui soustient, 2vv
13 Dame, se vous n'avez aperceü, 3vv
14 Ma fin est mon commencement, 3vv
15 Certes mon oeuil, 3vv
17 Dix et sept, cinc, 3vv
18 Puis qu'en oubli, 3vv
19 Quant ma dame les maus, 3vv
20 Douce dame, tant com vivray, 2vv
21 Quant je ne voy ma dame, 3vv [without Ct in MS *E*]
22 Dame, mon cuer en vous remaint, 3vv [from the Remede de Fortune; L i, p.103]

VIRELAIS

1 He, dame de vaillance, 1v
2 Loyaute weil tous jours, 1v
3 Aymi, dame de valour, 1v
4 Douce dame jolie, 1v
5 Comment qu'a moy lonteinne, 1v
6 Se ma dame m'a guerpy, 1v
7 Puis que ma dolour agree, 1v
8 Dou mal qui m'a longuement, 1v

9 Dame, je weil endurer, 1v
10 De bonté, de valour, 1v
11 He, dame de valour que j'aim, 1v
12 Dame a qui m'ottri, 1v
13 Quant je sui mis au retour, 1v
14 J'aim sans penser laidure, 1v
15 Se mesdisans en acort, 1v
16 C'est force, faire le weil, 1v
17 Dame, vostre doulz viaire, 1v
18 Helas, et comment aroie, 1v
19 Dieus, Biaute, Douceur, 1v
20 Se d'amer me repentoie, 1v
21 Je vivroie liement, 1v; L no.23
22 Foy porter, honneur garder, 1v; L no.25
23 Tres bonne et belle, mi oueil, 3vv; L no.26
24 En mon cuer a un descort, 2vv; L no.27
25 Tuit mi penser sont, 1v; L no.28
26 Mors sui se je ne vous voy, 2vv; 1v (without T) in MS C; L no.29
27 Liement me deport par samblant, 1v; L no.30
28 Plus dure qu'un dyamant, 2vv; L no.31
29 Dame, mon cuer emportés, 2vv; L no.32
30 Se je souspir parfondement, 2vv; L no.36
31 Moult sui de bonne heure nee, 2vv; L no.37
32 De tout sui si confortee, 2vv; L no.38
33 Dame, a vous sans retollir, 1v [from the Remede de Fortune; L i, p.101]

LAIS

1 Loyauté que point ne delay, 1v
2 J'aim la flour de valour, 1v
3 Pour ce qu'on puist, 1v
4 Nuls ne doit avoir merveille, 1v; L no.5
5 Par trois raisons me vueil deffendre, 1v; L no.6
6 Amours doucement me tente, 1v; L no.7
7 Amis, t'amour me contreint ('Lay des dames'), 1v; L no.10
8 Un mortel lay vueil commencier ('Lay mortel'), 1v; L no.12
9 Ne say comment commencier ('Lay de l'ymage'), 1v; L no.14
10 Contre ce doulz mois de may ('Lay de Nostre Dame'), 1v; L no.15
11 Je ne cesse de prier ('Lay de la fonteinne'), 1v and 3vv [even stanzas in 3-voice canon]; L no.16
12 S'onques douleureusement ('Lay de confort'), 3vv [in 3-voice canon throughout]; L no.17
13 Longuement me sui tenus ('Lay de Bonne Esperance'), 1v; L no.18
14 Malgré Fortune et son tour ('Lay de plour' no.1), 1v; L no.19
15 Pour vivre joliement ('Lay de la rose'), 1v; L no.21
16 Qui bien aimme, a tart oublie ('Lay de plour' no.2), 1v; L no.22
17 Pour ce que plus proprement ('Lay de consolation'), 1 or 2vv [halves of each combine as 2-voice polyphony; L no.23
18 En demantant et lamentant, 1 or 3vv [each group of 3 stanzas combines polyphonically]; L no.24
19 Qui n'aroit autre deport, 1v ['Lay de Bon Espoir' from the Remede de Fortune, L i, p.93]

COMPLAINTE

Tels rit au main qui au soir, 1v [from the Remede de Fortune; L i, p.96]

CHANSON ROYAL

Joie, plaisence et douce norriture, 1v [from the Remede de Fortune; L i, p.97]

BIBLIOGRAPHY

A comprehensive bibliography of Machaut may be found in L. Earp: *Guillaume de Machaut: a Guide to Research* (New York, 1995); the following bibliography therefore lists only those studies most relevant to the foregoing article.

WULF ARLT

Machavariani, Aleksi (*b* Gori, 23 Sept/6 Oct 1913; *d* Tbilisi, 30 Dec 1995). Georgian composer and teacher. In 1936 he graduated from the Tbilisi Conservatory and then completed his post-graduate studies in 1939 in the composition class of P. Ryazanov. From 1940 he was taught musical and theoretical disciplines at the conservatory; he later was professor of composition there (1963–92). He was artistic director of the Georgian State SO (1956–8). From 1953 he was the deputy chairman, and later the Chairman (1962–8), of the Georgian Composers' Union; he was also the secretary and a board member of the USSR Composers' Union (1962–73). He served as an adjudicator in international competitions of musicians and performers on several occasions, and was a laureate of the USSR State Prize.

Machavariani's work is notable for the variety of themes and genres; it has played an important role in establishing musical art in modern-day Georgia as well as gaining international acclaim. The music is characterized by vivid national colouring and romantic elation. He combines strong, energetic and sublimely poetic ideas in an original musical language. His developmental path and evolution is rich in events: the early works are strikingly different from those of the 1970s and 1980s which approach the stylistic norms of Western music of the first half of the 20th century. In his formative years he came under the powerful influence of Georgian folk art; in particular, the polyphonic tradition 'became an integral part of my everyday life', wrote the composer. Of almost equal importance were the classical traditions (including those of Georgia), and the works of his older Russian contemporaries such as Prokofiev and Shostakovich. He first gained artistic maturity with his Piano Concerto (1944), but his highest artistic achievement in instrumental genres came with the Violin Concerto (1949) in which the most attractive features of the composer's gifts showed themselves with particular brilliance and fullness. The music of the concerto is imbued with great inner pathos, nobility, and romantic emotion and was included in the repertory of many well-known violinists.

The next important work was the ballet *Otello* (1957) in which he successfully recreated Shakespeare's tragedy in musical terms. The melodic richness and expressive qualities of the music, the portrayal of the characters and the dynamism of the development are the most notable features of this ballet; the composer's success was rightly shared by the director and the performer of the title role, the dancer V. Chabukiani. *Otello* was staged in many towns of the former USSR and abroad. From the second half of the 1970s there was a abrupt change in Machavariani's work. He began to be drawn more and more to acerbic means of expression, to astringent sound combinations, and to the latest techniques in composition. This is the style of his later symphonies (starting with the third), his ballet *Vepkhistqaosani* ('The Knight in Panther Skin'), the string quartets and other compositions. Many of his last works are still in manuscript and are awaiting their first performances.

WORKS
(*selective list*)

Ops: Deda da shvili [Mother and Son] (Machavariani, after I. Chavchavadze), 1944, Tbilisi, 1945; Hamlet (after W. Shakespeare), 1965

Ballets: Otello (V. Chabukiani, after Shakespeare), 1957, Tbilisi, 1957; Vepkhvistqaosani [The Knight in Panther Skin] (Machavariani and Yu. Grigorovich, after Sh. Rustaveli), 1973; Ukroshcheniye stroptivoy [The Taming of the Shrew] (after Shakespeare), 1988

Pirosmani, 1990 [about the self-taught Georgian artist]; Medea (after Euripides)], 1991; Amirani (after Georgian folk poetry), 1992

Musical comedy: Klop [The Bedbug] (3, T. Abashidze, G. Charkviani, after V. Mayakovsky), 1980

Vocal: Arsen, solo vv, chorus, 1947; Gmiris sikvdilze [On the Death of a Hero], vocal sym. poem, 1948; Den' moyey rodinï [The Day of my Motherland] (M. Vershinin, L. Ozerov), oratorio, 1954; 5 Monologues (Vazha-Pshavela), 1v, orch, 1967

7 syms.: 1947; 1972; 1983; 1983; 1987; 1989; 1992

Other orch: Mumli mukhasa [The Oak and the Swarm of Flies], sym. poem [after folksongs], 1937; Pf Conc., 1942; Vn Conc., 1949; Sazeimo uvertiura [Festival Ov.], 1950
Pf: Khorumi, 1939; Bazaletskoye ozero [Bazalet Lake], 1950; Gruzinskiye freski [Georgian Frescoes], 1977; Parizhskiye zarisovki [Parisian Sketches], 1979; 3 pf sonatas
Other works: songs, chamber pieces, incid music, film scores
Principal publishers: Muzfond Gruzii (Tbilisi), Muzgiz, Muzïka, Sovetskiy Kompozitor (Moscow and Leningrad)

GULBAT TORADZE

Machavariani, Evgeny (*b* Tbilisi, 27 July 1937; *d* 2 Jan 1997). Georgian musicologist. He studied music theory with Pavle Khuchua at the Tbilisi State Conservatory (graduated 1963), and subsequently taught at the Second Music College of Tbilisi (1963–70). He was head of music programmes for Georgian Television from 1966, and a senior researcher in the department of music aesthetics at the Conservatory from 1970. From 1978 he presented the TV music show 'Es estradaa', the only Soviet TV show to concentrate on contemporary Western rock, pop and jazz music. From 1982 he was a vice-director of the Georgian Philharmonic Society. He was one of the organizers of the Tbilisi Jazz Festival (1980), the first of its kind in the Soviet Union.

JOSEPH JORDANIA

Mâche, François-Bernard (*b* Clermont-Ferrand, 4 April 1935). French composer. After studying the piano and harmony at the conservatory in Clermont he entered the Ecole Nationale Supérieure (agrégé ès lettres, 1958); he also studied with Messiaen at the Paris Conservatoire. From the time of his arrival at the Groupe de Recherches Musicales of Radio France in 1958, Mâche was preoccupied with developing working principles specific to electro-acoustic composition. But his conception of the 'musical object' differed from that being worked out at the same time by other members of the group. For him the definition had to result from confrontation with other, even non-musical, models such as linguistic ones. The proliferation of theories issuing from extensions of linguistic theories led him to attempt to establish correlations and to apply them in musical analysis. Beginning with *Prélude* (1959) and *Volumes* (1960), he set to work to test the hypothesis of such a method.

Mâche remains attached to a relativist view of musical perception, placing music 'at a point where the musical idea and the musical reality meet', with the aim of dissolving the frontiers between nature and cultivation, between raw sound and musical sound. He has composed several mixed-media works for instruments and tape, notably *Rambaramb* (1972), *Temes nevinbür* (1973), *Naluan* (1974), *Aulodie* (1983) and *Moires* (1994), and he has composed works which combine sampled sounds and notation (*Aliunde*, 1988; *L'estuaire du temps*, 1993). Among his preferred instruments are percussion (*Kemit*, 1970; *Maraé*, 1974; *Khnoum*, 1990) and harpsichord (*Korwar*, 1972; *Solstice*, 1975; *Anaphores*, 1981; *Guntur Sari*, 1990; *Braises*, 1994), often in association with electro-acoustic devices.

Mâche has written works of music theatre, notably *Da capo* (1976), *Rituel pour les mangeurs d'ombre* (1979) and *Temboctou* (1982)

Analysis of birdsong, demonstrating an approach different from that of Messiaen, is a recurrent stimulus to his writing (in the quartet *Eridan*, 1986, for example), not with imitative intention but with the wish to explore phenomena of sound organization liable to expand his compositional universe. In more general terms his musical thinking feeds on characteristics of different civilizations (Celtic, Melanesian, Greek, for example); Mâche is also a distinguished classicist who taught classics at Paris University for 20 years.

WORKS
(*selective list*)

Dramatic: Da capo, 10 comedians, 3 medieval insts, org, 2 perc, tape, sound décor, 1976; Rituel pour les mangeurs d'ombre, perc, 1979; Temboctou, 1982

JEAN-YVES BOSSEUR

Machek. *See* MAŠEK family.

Machete [machada] (Port.). Plucked lute of Portugal, the Azores and Brazil, with four, five or six strings. Portuguese sailors supposedly introduced the instrument into the Hawaiian islands, where it was transformed (through such variant forms as the *machête da braça*) into the UKULELE. It is also called a CAVAQUINHO. For illustrations *see* UKULELE, fig.1.

Machicotage (Fr.). The practice of embellishing certain sections of plainsong (e.g. intonations and cadences, particularly in the solo passages of alleluias, graduals and responsories) in order to add greater solemnity. It was excluded from the Office for the Dead. *Machicotage* appears to have been widespread in France and Italy in the Middle Ages and to have continued into modern times. Lebeuf described it (somewhat disparagingly) according to its practice in 18th-century France. It appears to have consisted chiefly in the addition of passing notes, although Lebeuf linked with *machicotage* the occasional practice of dropping a 3rd below the normal melodic line, especially at cadences.

The technique of *machicotage* could be employed by the celebrant when intoning the hymns of the Little Hours, the *Te Deum*, *Veni Creator* and *Tantum ergo*, etc. Lebeuf explained how he would intone the well-known Whitsun hymn *Veni Creator* (see ex.1). Normally, however, the practice was reserved for singers – members of the lower clergy – known as *machicots* (Lat. *macicoti*, *maceconici* or *massicoti*; It. *maceconchi*). In 1557 the choir of Notre Dame in Paris included six *machicots*, four *basse-contres* and two other clerks of Matins. Over and above his commons, each *machicot* was paid according to the solemnity of the feast and his share in it. Once a year (in June) the Paris *machicots* were summoned before the chapter to give up their charge and to be reappointed. More recently, the term *machicotage* has been used pejoratively to mean poor-quality singing.

MARY BERRY

Machida, Yoshiaki [Kashō] (*b* Gumma, 8 June 1888; *d* Tokyo, 19 Sept 1981). Japanese folksong scholar. After graduating at the Tokyo Fine Arts School in 1913, he became a theatre and music critic for papers such as the *Jiji shimpō* and the *Chūgai shōgyō shimpō*. When the NHK began broadcasting in Japan in 1925 he took charge of Japanese music programmes and held this post until 1934. He also travelled throughout the country collecting folk music and making tape recordings and transcriptions. An outcome of this is the monumental *Nihon min'yō taikan* ('Anthology of Japanese Folksongs', 1944–80). From 1949 to 1957 he taught at the Tokyo Geijutsu Daigaku (Tokyo National University of Fine Arts and Music). He was honoured with many prizes for his work (e.g. the NHK Broadcasting Cultural Prize, 1951; the Medal of Honour with Purple Ribbon, 1956) and won an official commendation from the Ministry of Education in 1952. He also composed Western-style music for Japanese instruments and wrote several articles and books on Japanese folksong.

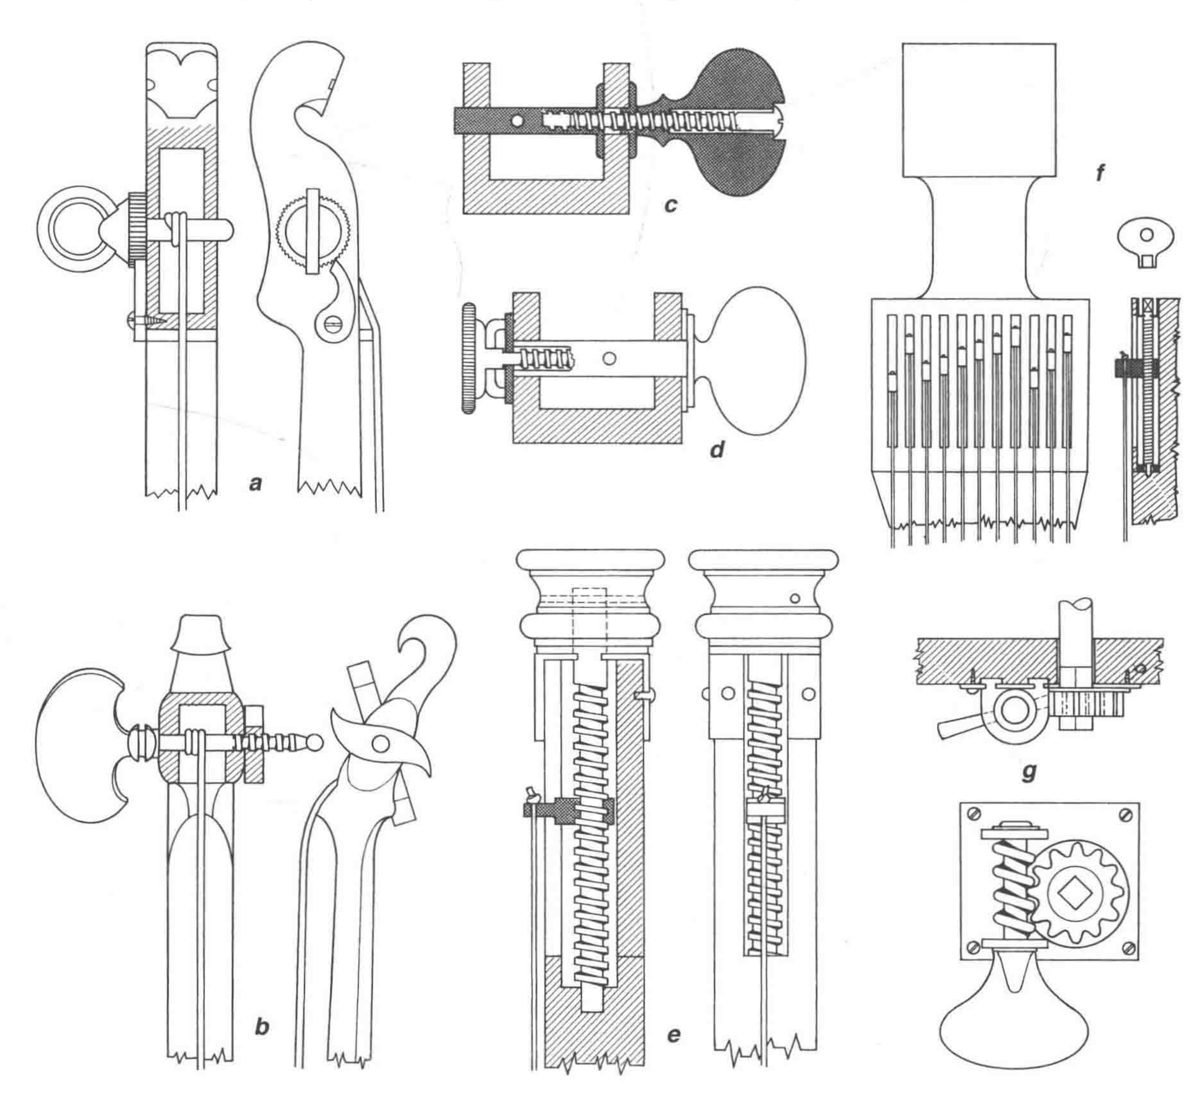
MASAKATA KANAZAWA

Machin, Richard. Possibly the compiler of a manuscript containing five partbooks. *See* SOURCES OF INSTRUMENTAL ENSEMBLE MUSIC TO 1630, §4.

Machine à tonnerre (Fr.). *See* THUNDER MACHINE, THUNDER SHEET.

Machine head. A mechanical device for facilitating the tuning of strings. Machine heads are most commonly found on double basses, guitars and other plucked instruments, although before the early 19th century strings were almost invariably secured to tuning pegs on these instruments without mechanical assistance.



Early methods of holding a string at pitch can be traced back to 17th- and 18th-century trumpets marine. A ratchet and pawl, sometimes in combination with a wooden peg or worm gear, was employed to prevent the string slipping (for illustration see *a* and *b*). Praetorius (1618) referred to pegs of iron being used at the top of the neck of large bass viols or violones: 'The pegs are notched, such that their position is controlled by a further cog much as watch movement is controlled'. Clearly the combination of large wooden pegs and thick strings on low-pitched bowed instruments was not conducive to accuracy, and many improvements were designed. The Historisches Museum, Basle, houses an example of an early ratchet and pawl device on a double bass but most old instruments have been modernized and it is difficult to say exactly how they were originally equipped.

In the mid-19th century, after various patent screw mechanisms had appeared (*c* by Joseph Wallis and *d* by M.H. Collins), worm gears became common and were even occasionally used on cellos and violins. They were introduced as early as the 1770s when a new device was designed by Carl Ludwig Bachmann. A watch-key tuning mechanism for the English guitar was patented by J.N. Preston of London in the mid-18th century (*f*).

Some modern machine heads disguise a screw device within a traditional wooden peg. The introduction of tailpiece adjusters has further facilitated fine tuning.

RODNEY SLATFORD

Machine stop. (1) A device applied to English harpsichords in the second half of the 18th century by means of which a single pedal could be made to control two or more separate registers, overriding their individual handstops (*see* PEDAL (4)). On single-manual harpsichords, when the pedal was depressed the 4′ register and one of the 8′

Examples of machine heads

registers were withdrawn, and when the pedal was released both registers were re-engaged. Moreover, when the pedal was depressed slowly, the 4′ register was withdrawn before the 8′, and when the pedal was released slowly, the 8′ register was re-engaged before the 4′, thereby permitting the harpsichordist to produce fairly smooth diminuendos and crescendos. On two-manual harpsichords, the machine stop had an identical effect on the registers available on the lower manual but, in addition, when the pedal was depressed, the close-plucking lute stop was engaged in place of the front ('dogleg') 8′ register on the upper manual. Both the single-manual and double-manual machine stops could be disengaged when desired, returning the harpsichord to normal handstop operation. It is thought that the machine stop was invented by BURKAT SHUDI, perhaps specifically for Frederick the Great's harpsichords.

(2) A device with a similar purpose applied to chamber organs sometimes called a 'shifting movement'. An extra slider could cancel out the higher-pitched stops when a pedal was depressed, even though their knobs remained drawn, and restore them when the pedal was released. The machine stop was common on English chamber organs from the mid-18th century onwards, and was used in echo passages and in pieces having short soft sections or interludes.

Mchiriku. A revival of an earlier musical style found along the East African coast of Tanzania and Kenya. The roots of *mchiriku* are clearly related to *chakacha*, a popular coastal performance genre performed by girls and women and Swahili during the final *taarab* performances of weddings. *Mchiriku* developed in the 1970s and was quickly banned due to obscene lyrics and the erotic nature of the accompanying dance. It is now performed primarily by youths in the Mombasa (Kenya) and Tanga (Tanzania) regions. *Mchiriku* ensembles typically comprise a tambourine, local drums and electronic keyboard; the sparse instrumentarium reflects the lack of access to imported instruments. Approximately eight youths make up a *mchiriku* ensemble, and performances feature steady rhythmic patterns over which are performed loud and emphatic lyrics in KiSwahili accompanied by keyboard sound effects. Numerous *mchiriku* ensembles exist, and while polished musical performances are not a priority for these groups, they nevertheless sell many recorded cassettes in local and distant markets.

GREGORY F. BARZ

Machito [Grillo, Frank Raul] (*b* Tampa, FL, 16 Feb 1908/9; *d* London, 15 April 1984). Cuban bandleader, singer and maraca player. His family moved to Havana when he was an infant. Although he was already a professional musician when he returned to the USA in 1937, his musical maturity and influence date from 1940. In that year Machito formed the second of his groups known as the Afro-Cubans, including his brother-in-law, the trumpeter Mario Bauzá, who engaged black arrangers to give jazz voicings to the Cuban melodies of Machito's band. As a result the Afro-Cubans became one of the most influential forces in the music later to be called salsa. By the mid-1940s the Afro-Cubans had performed at concerts with Stan Kenton's big band, and had recorded or played with most of the leading bop musicians, giving rise to a fusion style known as Afro-Cuban jazz or 'cubop'. Soloists on recordings by the Afro-Cubans included Charlie Parker (1948–9), Howard McGhee and Brew Moore (1949); the recording *Mucho Macho* (1948–9, Pablo) is a good example of the band's style. Machito's pre-eminence continued during the mambo era of the 1950s and 60s, when his was one of three big bands playing regularly at the Palladium in New York. He continued to work frequently into the 1980s, mainly in New York, performing in both salsa and jazz-orientated clubs and concerts. Carlo Ortiz's film documentary *Machito: a Latin Jazz Legacy* (1987) includes photographs and newsreel material of Machito's work in New York in the 1930s and 40s, and interviews and performances filmed in the last years of his life.

JOHN STORM ROBERTS/R

Machlis, Joseph (*b* Riga, Latvia, 11 Aug 1906; *d* New York, 17 Oct 1998). American writer on music. Having gone to America at an early age, he studied at City College, New York (BA 1927), and the Institute of Musical Art, where he received a teacher's diploma; he also gained a degree in English literature at Columbia University (MA 1938). He joined the music faculty of Queens College, CUNY, in 1938; after his retirement in 1973 he taught at the Juilliard School until his late 80s.

Machlis was the author of two widely used introductory texts, *The Enjoyment of Music* (1955) and *Introduction to Contemporary Music* (1961). For younger readers he wrote *American Composers of our Time* (1963) and *Getting to Know Music* (1966). He made translations of opera librettos from the standard repertory for the NBC Opera Company and other groups (his 16 translations included *Boris Godunov* and *Dialogues des Carmélites*), and wrote several novels, under his own name and the pseudonym George Selcamm, the phonetic reversal of his surname. In his writings on music he addressed the general public, clarifying well known works to increase the listener's appreciation, introducing less familiar repertory and relating music to other art forms. A legendary figure on the New York concert scene, he nearly always attended the premières of important new works and was known for the musical soirées he held in his apartment to introduce young musicians.

PAULA MORGAN/R

Machold, Johann (*b* Hirschendorf, nr Hildburghausen, Thuringia; *d* after 1594). German composer and writer on music. In 1593 he described himself as Kantor at Andisleben, near Rudolstadt. Two years later he was a deacon at nearby Königsee. His only surviving music is his *Passio Domini nostri Jesu Christi nach dem heiligen Evangelisten Matthaeo* (Erfurt, 1593; incomplete). This belongs to the genre of the German motet Passion and is modelled on the German Passion (1568) of Joachim a Burck (*see also* PASSION, §4). It is hardly based at all on the traditional plainchant. In the preface Machold stated that Burck's Passion was frequently performed in Thuringia and that he had published his own so that people could hear something else once in a while. His collection *5 Motetten auf die Türkengefahr gerichtet* (Erfurt, 1595) is lost. He is otherwise known by his *Compendium germanico-latinum musices practicae* (Erfurt, 2/1595, 4/1625; the first edn is lost). The text of this German-Latin singing tutor follows the format laid down by Heinrich Faber in his *Compendiolum musicae* (1548) and is based on the principles of solmization. For practice Machold gave two-part canons in the 12 keys. Four metrical ode settings, supposed to have been sung regularly in the school at Königsee, are printed as an appendix; Machold claimed to have composed them himself, but one of the melodies certainly came from Martin Agricola.

MARTIN RUHNKE

Machover, Tod (*b* Mount Vernon, NY, 24 Nov 1953). American composer, cellist, conductor and maker of electronic instruments. He studied composition at the Juilliard School (BM 1975, MM 1977), the University of California, Santa Cruz (1971–3), and Columbia University (1973–4), and computer music at the Massachusetts Institute of Technology and Stanford University. His principal teachers were Dallapiccola (1973), Roger Sessions (1973–5) and Elliott Carter (1975–8). He was principal cellist of the Canadian Opera Company (1975–6) and a guest composer at IRCAM, Paris (1978–9), where he subsequently served as director of musical research (1980–84). Appointed professor of music and media at MIT (1985), he became director of the Institute's Experimental Media Facility in 1987. He has received numerous honours, including awards from the French Ministry of Culture, the Koussevitzky and Fromm foundations, National Public Radio (USA) and German broadcasting. In 1995 he was made a Chevalier de l'Ordre des Arts et des Lettres.

Machover has composed both acoustic and electronic music. At MIT, working with technicians, he has invented electronic apparatus that includes 'hyperinstruments', a 'sensor chair', conducting 'dataglove' and 'digital baton'. His early works, however, are acoustic and document the transition from works shaped by his teachers' aesthetics to a language that is more individual; the style is often lyrical (even when atonal) and displays a predilection for dramatic, evolving form. His musical gestures, he has noted, are frequently inspired by the human voice. His early tape pieces involving real-time performance, *Soft Morning City!* and *Electric Etudes*, attempt to unite acoustic and electro-acoustic sound worlds, the tape part extending the timbral range of any instrument. In the 1990s this concept was developed further with the aid of 'hyperinstrument' technology. Here an instrument, say a cello (as in *Begin Again Again . . .*) is wired to a computer, enabling the performer to create, control and play a variety of new textures in any combination. After his period at IRCAM, Machover appeared to follow more innate and populist impulses. Pop music and pop culture were significant influences. *Bug-Mudra* and the opera *VALIS* in particular appeal to a much wider audience, though for a time they proved controversial among followers of new music. *Brain Opera*, conceived in 1995–6, is described by the composer as 'an interactive experience in three parts'. Firstly, the audience move through a room and an interactive Mind Forest to play a variety of hyperinstruments. In part two they occupy an adjacent space for a performance of their musical input mixed with Machover's music and numerous devices like the 'sensor chair' and 'digital baton'. While in Net Music, part three, a site on the World Wide Web provides an on-line introduction and facility for those wishing to participate from home; former participants may also visit previously recorded performances. In 1998 Machover collaborated with Andre Heller and others to create a new series of 'hyperinstruments' for the Meteorite Museum in Essen. Other projects of Machover's around that time include the *Toy Symphony*, a work-in-progress which brings together specially designed hi-tech musical toys for children and performers from around the world.

STEPHEN MONTAGUE

Machu, Stephan. *See* MAHU, STEPHAN.

McHugh, Jimmy [James] **(Francis)** (*b* Boston, 10 July 1894; *d* Beverly Hills, CA, 23 May 1969). American songwriter, pianist and music publisher. He learnt the piano from his mother, and in 1915 became a rehearsal pianist for the Boston Opera. From 1916 he was a song-plugger in Boston for Irving Berlin Music and from 1921 in New York for the F.A. Mills Co., of which he later became a partner. In the 1920s he wrote several popular songs, including *When My Sugar Walks Down the Street* (1924), and revues for the Cotton Club in Harlem. In 1928 he began a long association with the lyricist Dorothy Fields; their all-black revue *Blackbirds of 1928* included the song 'I can't give you anything but love', which was an early success for dancer Bill 'Bojangles' Robinson. Fields and McHugh were among the most successful songwriters in Hollywood in the 1930s, writing for such films as *Love in the Rough* (1930), *Cuban Love Song* (1931), *Flying High* (1931) and *Hooray for Love* (1935). McHugh made a return to Broadway with *The Streets of Paris* (1939), and wrote several popular songs with the lyricist Harold Adamson, some of them for films, including *Comin' In on a Wing and a Prayer*, *A Lovely Way to Spend an Evening* and *I couldn't sleep a wink last night* (all 1943) and *It's a most unusual day* (1948).

McHugh received an honorary doctorate in music from Los Angeles City College in 1941. He led a dance band in the 1950s, performing his songs on tours in the USA and Europe and on television, and in 1959 founded his own music publishing company with Pete Rugolo. In 1970 an annual composition award was established in his memory at the University of Southern California.

McHugh was one of the best and most prolific of Hollywood composers, contributing to some 45 films and winning four Academy Awards. He was equally fluent in writing simple, elegant or vocally demanding melodies, and made use of a wide range, extended or irregular phrase lengths to suit the lyrics, and unusual harmonies. Several of his tunes have become standards for jazz arrangements and for singers in such diverse styles as cabaret and barbershop. Wilder considered his songs among the best of mid-20th-century American popular music for their attention to 'the fine points of song writing and the things that create surprises instead of simply good but uninspired writing'. Many of McHugh's best-known songs were assembled as a new song-and-dance musical, *Sugar Babies*, in 1979.

DEANE L. ROOT

Machy [Demachy], Sieur de [first name(s) unknown] (*fl* second half of 17th century). French viol player and composer. He was a native of Abbeville and, like his more famous contemporary Jean de Sainte-Colombe, studied

with Nicolas Hotman (Rousseau, 1688); he probably lived in Paris from this time. In 1685 De Machy published the first French collection of *pièces de viole*; at that time he lived in the rue Neuve-des-Fossez, in the fashionable Fauxbourg St Germain. According to Du Pradel's *Livre commode, contenant les adresses de la ville de Paris* (Paris, 1692), he was still living in Paris in 1692. De Machy's *Pièces de violle, en musique et en tablature* (Paris, 1685) consist of eight suites of dances, four in staff notation and four in tablature. They make full use of the seven-string bass viol and establish the tradition, characteristic of the French virtuosos, of being meticulously marked up with bowing, fingering and ornamentation. De Machy explains in his 11-page 'Avertissement très-nécessaire' that the bass viol has three roles: 'the first and most common is playing *pièces d'harmonie* [unaccompanied chordal pieces] ... the second ... consists of accompanying oneself, singing one part while playing the other ... and the third is to play in consort ... but this manner is not taught nowadays'. De Machy's pieces use the viol in the first of those roles and their origins in the *pièces de luth* are evident in their rich chordal nature and use of the *style brisé*. Each suite opens with an extended unmeasured prelude, to be played 'as one wishes, slow or fast'; the succeeding dances follow the conventional pattern of allemande, courante, sarabande, gigue, gavotte and menuet (or, in the fourth suite, chaconne). De Machy was a conservative, committed to generating a rear-guard action against the new progressive school of viol playing in the hands of Sainte-Colombe's pupils, notably Marais, Danoville and Rousseau. De Machy's claim that there were two ways of placing the left-hand thumb 'as on the lute, theorbo and guitar' – opposite either the first or the second finger – provoked a storm of protest from Rousseau and Danoville, who were both of the opinion that the thumb must be placed opposite the second finger (to facilitate an extended position). The two progressive authors sought to clarify the situation in their treatises of 1687, which were met by a furious retort from De Machy. This latter document is lost, but there remains Rousseau's 13-page vitriolic *Réponse* (Paris, 1688) with liberal quotations from De Machy's original.

LUCY ROBINSON

Maciejewski, Roman (*b* Berlin, 28 Feb 1910; *d* Göteborg, 30 Apr 1998). Polish composer and pianist. His family having returned to Poland in 1919, Maciejewski attended the Poznan and Warsaw conservatories, where his teachers included Kazimierz Sikorski. Expelled from the Warsaw school in 1932 for leading a strike following Szymanowski's dismissal as rector, in 1934 he moved to Paris, where he met Artur Rubinstein, who became an advocate of Maciejewski's music. Between 1939 and 1951 he lived in Sweden, where he collaborated with Ingmar Bergman. He then moved to California, at Rubinstein's invitation, returning to Sweden in 1977.

Maciejewski's output is dominated by the incomplete Missa pro defunctis, or Requiem. Drawing on earlier models by Mozart, Fauré and Verdi, as well as on certain secular works of Ravel, Stravinsky and Rachmaninoff (particularly in the 'Dies irae'), the work nevertheless represents a powerfully coherent setting spanning two hours or more. Its symphonic sweep embraces the expected moments of pathos and, less conventionally, buoyant dance rhythms.

ADRIAN THOMAS

Macigni [Macingni], **Giovanni.** Italian composer. He was the pupil of BENEDETTO MAGNI.

McIntosh [née Lowes], **Diana** (*b* Calgary, 4 March 1937). Canadian composer, pianist and performance artist. After studying with Gladys Egbert in Calgary and Boris Roubakine in Banff and Toronto, she settled in Winnipeg in 1959. She undertook further studies with Alma Brock-Smith, Leonard Isaacs, Peter Clements and Michael Colgrass in Canada, and with Adele Marcus in the USA. In 1972 she graduated with the BMus from the University of Manitoba. A champion of Canadian contemporary music, she founded in 1976 the Winnipeg-based Music Inter Alia, western Canada's first contemporary music series. She served as artistic director of the series until 1991. Also active as a performer, she has given many première performances of Canadian works.

McIntosh's compositions frequently employ multimedia; music, video, slides, electronic tapes, mouth sounds, dialogue and movement all become part of her artistic expression. *Eliptosonics* (1979), *Glorified Chicken Mousse* (1984) and *Process Piece* (1988), poke fun at the more pretentious aspects of avant-garde music. *Paraphrases* (1976–7), *Sound Assemblings* (1983), *Kiviuq* (1985) and ... *and 8.30 in Newfoundland* (1986) are

based on aspects of Canadian life and Canadian expressions. A video, *Serious Fun with McIntosh* (1989), presents aspects of her one-woman multi-media presentations. Humour is central to McIntosh's music, whether for conventional instrumentation or multi-media presentation. *Margins of Reality* for strings (1989) is one of her more introspective works, but its shimmering sonorities show her constant search to widen the possible range of sounds.

ELAINE KEILLOR

McIntosh, Rigdon McCoy (*b* Maury County, TN, 3 April 1836; *d* Atlanta, GA, 2 July 1899). American composer and arranger of Sunday-school and gospel hymns, and hymnbook compiler. He received his musical training under L.C. and Asa B. Everett, with whom he was associated for several years in teaching and publishing. In the 1860s he became music editor for the Methodist Episcopal Church, South, in Nashville, a position that he held for 30 years. In 1875 he joined the faculty of Vanderbilt University, leaving two years later for an appointment at Emory and Henry College, Oxford, Georgia. He established the R.M. McIntosh Publishing Company, publishing at least 20 collections for church and Sunday-school use. McIntosh is best known as the arranger of the camp-meeting tune 'Promised Land', which he changed into a major key to fit the gospel hymn style. (L.E. Oswalt: *Rigdon McCoy McIntosh: Teacher, Composer, Editor, and Publisher*, diss., New Orleans Baptist Theological Seminary, 1991)

HARRY ESKEW

McIntyre, Sir Donald (Conroy) (*b* Auckland, 22 Oct 1934). British bass-baritone of New Zealand birth. He studied in London and made his début in 1959 with the WNO as Zaccaria (*Nabucco*). At Sadler's Wells (1960–67) he sang over 30 roles, including Mozart's Figaro, Attila, the Dutchman, Caspar and Pennybank Bill in the first British staging of *Mahagonny* (1963). He made his Covent Garden début in 1967 as Pizarro, later singing Barak, Golaud, Shaklovity (*Khovanshchina*), Balstrode, Escamillo, Nick Shadow, Scarpia, John the Baptist, Orestes, Axel Heyst in the première of Bennett's *Victory* (1970), Sarastro, Count des Grieux, Kurwenal and Wotan, the role of his Metropolitan début in 1975. At Bayreuth (1967–80) he sang Telramund, Amfortas, the Dutchman, and Wotan in the 1976 centenary *Ring* cycle under Boulez, which was recorded. McIntyre first sang Gurnemanz with the WNO (1981), later recording the role with Goodall, and Hans Sachs at Zürich (1984), and sang Prospero in the British première of Berio's *Un re in ascolto* (1989, Covent Garden) and Baron Prus in *The Makropulos Affair* at the Metropolitan in 1996. With his strongly projected, full-toned voice and fine stage presence, he is a compelling singing actor. He was knighted in 1992.

ALAN BLYTH

Maciunas, George [Yurgis] (*b* 1931; *d* Boston, 9 May 1978). Lithuanian-American architect. In 1947 he emigrated from Lithuania to New York, where he studied architecture at Cooper Union. He opened the AG Gallery at 925 Madison Avenue in 1960 with fellow Lithuanian Almus Salcius. After meeting La Monte Young, he agreed to let Young and Jackson Mac Low produce a series of concerts at the gallery featuring musicians, artists and poets active in the New York avant garde. It was largely through his exposure to Young and his circle that Maciunas became acquainted with radical art.

In 1961, Maciunas moved to Wiesbaden where, in the following year, he founded the Fluxus movement. In a lecture entitled 'Neo-Dada in Music, Theater, Poetry and Art' Maciunas declared himself a 'concrete artist' who preferred noise to so-called musical sounds. His *Carpenter's Piano Piece for Nam June Paik* no.13, in which the performer nails down the keys of a piano, demonstrates the iconoclastic nature of his work. Maciunas believed in art's potential to transform society and adamantly objected to its institutionalization. His activities outside of the creative arts included an urban redevelopment project in lower-Manhattan that contributed to the growth of the SoHo art community.

DAVID W. BERNSTEIN

Mackay [Mackey]. American family of merchants. During the first half of the 19th century members of the family gave financial backing to various Boston instrument makers, including ALPHEUS BABCOCK, Thomas Appleton, and Jonas CHICKERING. Their most active member was John Mackay (*b* Boston, 1774; *d* at sea, 1841), a mariner and merchant, who provided capital and business expertise, found new buyers in North and South America, and imported exotic woods and other raw materials. He held a patent (first issued 14 August 1822) for fitting a small piece of metal into the core of leather-covered piano hammers to produce a fuller tone. This feature can be found in some pianos of Babcock and Chickering.

Mackay supported the builders Babcock, Appleton, and William Goodrich from 1815 until 1820. By 1823 Mackay's nephew George D. Mackay (*d* at sea, 15 Dec 1824) had set up a piano factory at 7 Parkman's Market with Babcock as the superintendent. The Mackay family continued to support the business after George's death until about 1829. During this time pianos produced by Babcock, marked 'Babcock for G.D. Mackay' or 'Babcock for R. Mackay', included the earliest square pianos to have one-piece cast-iron frames.

From 1830 until his death John Mackay was in business with Jonas Chickering; Mackay's son William H. Mackay (*b* Boston, 1817; *d* Boston, 13 March 1850) was also involved in the firm. After working in Philadelphia for seven years, Babcock returned to Boston in 1837 to work for Chickering & Mackays and assigned to the firm his patent of 31 October 1839 (no.1389) for a piano action.

CYNTHIA ADAMS HOOVER/DARCY KURONEN

MacKay, Angus (*b* Raasay, Inner Hebrides, 1812; *d* River Nith, Dumfriesshire, 1859). Scottish piper. His father, John MacKay, was a piper and composer trained in the tradition of the MacCrimmon pipers of Skye. Angus MacKay won the gold medal in the Edinburgh piping competition in 1835 and became the first person to hold the post of piper to the sovereign in 1843. He produced one of the first collections of pipe music written in staff notation and with the help of Hugh MacKay devised a bagpipe march form known as the 'competition march', examples of which include *Glengarry Gathering* and *Balmoral Highlanders*. He transcribed two sets of pieces from oral pipe traditions; much of the *pìobaireachd* music performed during the twentieth century may be found in his manuscripts, which were extensively used by later editors. One of his manuscripts was published as *A Collection of Ancient Piobaireachd or Highland Pipe Music* (Edinburgh, 1838, 3/1972), containing 60 tunes. During his later years MacKay suffered from mental illness, and he drowned in the River Nith after escaping from the Crichton Royal Institute.

R. WALLACE

McKay, George Frederick (*b* Harrington, WA, 11 June 1899; *d* Stateline, NV, 4 Oct 1970). American composer. He studied at the Eastman School of Music, Rochester, New York, with Christian Sinding and Selim Palmgren and was the school's first composition graduate (BM 1923). He joined the faculty of the University of Washington, Seattle, in 1927, became full professor in 1943 and remained there until his retirement in 1968. He served as visiting professor at Drake University, Iowa, and the universities of Southern California, Michigan and Oregon. Described as a folklorist, McKay was interested in portraying the spirit of the American West by evoking in his music what he called a 'folk feeling', using American folk idioms and incorporating folk melodies, through paraphrase or direct quotation. His work also drew on historical and religious themes. A firm believer in democratic ideals, his *To a liberator* (1939–40) was a tribute to such ideals during World War II. He won a number of prizes, including an award from the American Guild of Organists in 1939 and the Harvey Gaul Prize in 1961, and wrote many works on commission. He is the author of *The Technique of Modern Harmony* (1941) and *Creative Orchestration* (1963).

KATHERINE K. PRESTON/R

Mackeben, Theo (*b* Stargard, West Prussia, 5 Jan 1897; *d* Berlin, 10 Jan 1953). German composer and conductor. Proficient on the violin and the piano as a child, he appeared as a pianist at the age of 13 and studied at the Cologne Conservatory. He was a military bandsman in Warsaw (1917–18) where he look lessons in composition from Jules de Wertheim and in the piano from Joseph Weisz. From 1920 to 1922 he was accompanist to the violinist Leopold Przemislaw, after which, having settled in Berlin, he was active as a café and radio pianist. In

1928 he conducted the première of Weill's *Die Dreigroschenoper*, and his widest fame came as the arranger of the operetta *Die Dubarry* (after Millöcker, first performed at the Admiralspalast, Berlin, 17 August 1931). After 1930 he was concerned mainly with composing songs and other music for plays and some 55 films. From his theatre music came the songs 'Komm auf die Schaukel, Luise' for Molnar's *Liliom* (1932) and 'Bei dir war es immer so schön' for *Anita und der Teufel* (1940), and from his film music the songs 'Eine Frau wird erst schön durch die Liebe' (*Heimat*, 1938), 'Die Nacht ist allein zum Schlafen da' (*Tanz auf dem Vulkan*, 1938), 'Du hast Glück bei den Frau'n' (*Bel ami*, 1939) and 'Nur nicht aus Liebe weinen' (*Es war eine rauschende Ballnacht*, 1939) and the waltz 'Münchner G'schichten' (*Bal paré*, 1940). The production of an opera *Rubens* was prevented by the war. Mackeben lived for a time after the war in Bad Ischl, where he wrote a piano concerto and the *Sinfonische Ballade* for cello and orchestra, before returning to Berlin.

ANDREW LAMB

Mackenzie, Sir **Alexander Campbell** (*b* Edinburgh, 22 Aug 1847; *d* London, 28 April 1935). Scottish composer and conductor. He was born into a musical family: his father, Alexander Mackenzie (1819–57), leader of the orchestra at the Theatre Royal, Edinburgh, was a respected violinist, composer and arranger of traditional music. The boy's musical talent soon became manifest and his father decided to send him to Germany for instruction, escorting him to Sondershausen in 1857, shortly before his death. Mackenzie attended the Realschule, receiving tuition from K.W. Uhlrich (theory) and Eduard Stein (violin). He played second violin in the ducal orchestra, performing in many premières of works by Liszt, Wagner and Berlioz. These years proved formative in the young musician's practical attitudes to music and knowledge of orchestral repertory. In 1862 Mackenzie went to London intending to study the violin with his father's former tutor, Prosper Sainton. His only means of realizing that aim was to enter the RAM, where he was awarded a King's Scholarship and where he also studied with Charles Lucas (harmony) and F.B. Jewson (piano). During this period he gained much practical experience playing in London theatre orchestras, and some of his early compositions were performed at the RAM.

In 1865 Mackenzie returned to Edinburgh. He taught privately and professionally at the Ladies' College and the Church of Scotland Normal Training College, and conducted the choir of St George's, Charlotte Square, from 1870 and the Scottish Vocal Association from 1873. He also played the violin in local orchestras, meeting such visiting musicians as Joachim, Hallé, Dannreuther, Walter Bache, Clara Schumann and Hans von Bülow. Some of his early chamber works received premières in the Classical Chamber Concerts series, and he formed a quartet with Adolf Küchler, Hugo Daubert and Friedrich Niecks. Mackenzie married in 1874, and a daughter was born in the following year.

The strain of teaching led Mackenzie to leave Edinburgh in 1879 to recuperate abroad. He was recommended to two of Bülow's pupils in Florence, Giuseppe Buonamici and George F. Hatton, who presented him to Jessie Hillebrand (Laussot), a pianist in her own right and a former friend of Wagner and patron of musicians. After a few months' rest, Mackenzie began composing full-time. He had gained success with some orchestral works before leaving Britain — the *Rhapsodie écossaise* and the *Scherzo* were performed under Manns at the Crystal Palace, and the latter piece also in Glasgow under Julius Tausch. His small cantata, *The Bride*, was highly praised at the Worcester (Three Choirs) Festival in 1881. A string of works followed, including his two lyrical dramas in English, some orchestral overtures and his principal choral works.

Mackenzie was lured back to London by the offer of the conductorship from 1885 of the revived Novello Choir, with which he performed works by Dvořák and Liszt. Within a couple of years he was elected principal of the RAM (1888), a post he held for 36 years. Mackenzie threw himself into the reorganization of the academy, whose fortunes had been failing for some years, and brought it to a standard to rival the newly founded RCM. With Grove he founded the Associated Board of the Royal Schools of Music to ease the increasing pressure on the local examinations system. Mackenzie ensured a personal involvement with the RAM's pupils by teaching composition and conducting the student orchestra. The institution's move from Tenterden Street to Marylebone in 1912 and the celebration of its centenary in 1922 were seen as the highpoints of his period as principal and the tangible results of his reforms.

As a conductor Mackenzie was also in charge of the Royal Choral Society and of the Philharmonic Society Orchestra for the period 1892–9, introducing many new works, including Tchaikovsky's Sixth Symphony, to the London public. In 1903 he undertook a tour of Canada organized by the British-born musician Charles Harriss, the first musical event of its kind in the province; many new orchestras and choral societies were formed to produce programmes including British works.

As president of the International Musical Society, 1908–12, Mackenzie oversaw the congresses in Vienna (1909) and London (1911), the latter highlighting British music. He lectured at the RAM and the Royal Institution, delivering noteworthy lectures in memory of Sullivan and Parry as well as one on Verdi's *Falstaff* which was later published in Italian translation. Many universities and learned societies in Britain and abroad honoured Mackenzie, including the universities of St Andrews (1885), Cambridge (1888) and Oxford (1922). He was knighted in 1895, and created KCVO in 1922. He was also president of the Royal College of Organists (1893–7 and 1914–16) and became an FRCM in 1918. His administrative duties stemmed the flow of composition in later years, but he was at the heart of the nation's music-making until the end of his tenure of office at the RAM. He retired from public life in the mid-1920s.

Mackenzie's first mature works were composed in the late 1860s. The earliest, the String Quartet in G, shows a composer completely at home in his chosen medium (Mackenzie played the first violin part at the first performance, in Edinburgh in 1875). Though the work is conventional in layout, it has a captivating and energetic Scherzo in E minor. It was followed by the Piano Quartet in E♭. The more confident handling of structure in this work impressed Bülow deeply. The slow movement is a set of variations on a minor theme and the finale a rondo of great vitality, which replaced an earlier movement after the work's first performance. Some early orchestral works were performed at the Crystal Palace under Manns, the best-known being the *Rhapsodie écossaise* (1880), a

work suggested by Manns as a counterpart to Svendsen's *Norwegian Rhapsodies*. The work won critical recognition and fuelled Mackenzie's decision to devote his energies to composition throughout the 1880s.

It was with his cantata *The Bride* (1881) that Mackenzie began to develop his national reputation as a composer. Elgar played the violin at the première and later remarked that meeting Mackenzie was 'the event of my musical life'. During the 1880s Mackenzie wrote several more choral works that enhanced his reputation, the most famous being *The Rose of Sharon* (1884); this was based on passages from the *Song of Solomon* prepared by Joseph Bennett, music critic of *The Daily Telegraph*, in the first of many collaborations with the composer. Mackenzie responded to the sensuality of the text with skill and sensitivity. Except for the fact that the solos are often too extended to carry any true theatrical momentum, the work could almost be staged as an opera: both music and libretto are dramatic enough to place it well above the regular provincial music festival offerings. Another notable choral work, *The Dream of Jubal* (1889), combines recitation with choral interludes.

The opera *Colomba* began Mackenzie's mature acquaintance with the stage and, more important, with Carl Rosa and his English Opera Company, for which he also wrote *The Troubadour* (1886). The librettos for both operas were provided by the music critic of *The Times*, Francis Hueffer, whose antiquated style attracted much criticism. *Colomba* shows many traces of the French operatic tradition as represented by Gounod and also features leitmotifs (common in Mackenzie's large-scale vocal works in every genre), although these do not undergo compositional transformation in the same way as those of Wagner. Verdi's influence may be seen in the structure of the opera, with the formulaic scena and a large final chorus in each act. It was performed in a revised three-act version by Stanford's RCM opera class at His Majesty's in 1912. Musically *The Troubadour* is of equal standing, though it was deemed by contemporary critics, Hanslick included, to be too gruesome and Wagnerian a story to merit any repeat season. Liszt thought highly of it, however, and sketched a fantasia on its themes. Mackenzie's later operas do not match his earlier lyrical dramas in scale and vision, but they reflect a preoccupation with the stage that may have been inherited from his father's connection with the theatre, and which is further confirmed by study of the sketches of the unfinished operas; two of these (*The Cornish Opera* and *Le luthier de Crémone*) are almost complete in short score, taking the number of works up to a total comparable to that of Stanford or Ethel Smyth.

Many of Mackenzie's orchestral works are programmatic in inspiration, the three Scottish Rhapsodies being the most overtly nationalistic; melodically they are based on traditional folksong, of which Mackenzie and (posthumously) his father both published anthologies. Each movement of the second is prefaced by a verse of Burns. The well-known *Benedictus* (op.37 no.3), originally for violin and orchestra and dedicated to Lady Hallé (Wilma Neruda), was subsequently scored for small orchestra. Its breadth of melody and subtle orchestration have made it one of Mackenzie's most enduring pieces, predating Elgar's *Salut d'amour* and similar works in its conception. Other notable orchestral studies include the ballad *La belle dame sans merci* and the literary overture *Twelfth Night*. The incidental music for Irving's production of *Coriolanus* (1901) was later performed as a four-movement suite. The *Marche funèbre* was played at Irving's funeral (1905) and Mackenzie's memorial service in St Paul's (1935). Wit and humour are never far from the surface in Mackenzie's music, and the overtures *Britannia* and *Youth, Sport, Loyalty* combine, respectively, *Rule Britannia* and the British national anthem with less 'elevated' melodies in a musical comment on their perceived stuffiness. He never wrote a symphony, although sketches survive in short score of two movements of a work he later abandoned.

Mackenzie's Violin Concerto (1885) was commissioned by the Birmingham Festival and first performed by Sarasate; recently found documentary evidence indicates that it was originally offered to Joachim. Sarasate also gave the première of the *Pibroch Suite* (1889) at the Leeds Festival. The *Scottish Concerto* for piano was conceived for Paderewski and performed at the Philharmonic Society concerts in 1897 under the composer's direction. His solo piano music ranges from the salon style of the late 1870s to the advanced chromatic and virtuoso music found in the *Fantasia* (1910) and the *English Air with Variations* (1915).

Mackenzie's considerable output was extremely popular during his lifetime. Although it was eclipsed by work of later composers, he and his contemporaries may be regarded as having laid the foundations of the musical renaissance in 19th- and early 20th-century Britain. His compositions are always well written in technical terms, and his skill as an orchestrator was often commented on in contemporary reviews, although he admitted in his autobiography that he never had an orchestration lesson in his life. His works show a great range of inspiration and have a sense of character and individuality missing from some better-known pieces of the period.

DUNCAN J. BARKER

Mackenzie, Julia (Kathleen Nancy) (*b* Enfield, 17 Feb 1941). English soprano. She trained as an opera singer at the GSM and in the 1960s toured in operetta and musical comedy. She began a long association with the works of Stephen Sondheim when she took over the role of April

in the first London production of *Company* in the early 1970s, and was in the original cast of the revue *Side by Side by Sondheim* in London (1976) and on Broadway (1977). She later appeared as Sally in the revised *Follies* in London (1987). Her light and flexible voice, combined with both elegant phrasing and a natural sense of comedy, made her ideal for Lily Garland in Coleman's *On the Twentieth Century* (1980), and at the National Theatre she has played to consistent acclaim such roles as Adelaide (*Guys and Dolls*, 1982) and Mrs Lovett (*Sweeney Todd*, 1993). She directed Julie Andrews on Broadway in the Sondheim revue *Putting It Together* (1993).

□

Mackerras, Sir **(Alan) Charles (MacLaurin)** (*b* Schenectady, NY, 17 Nov 1925). Australian conductor. He studied the oboe, piano and composition at the New South Wales Conservatorium in Sydney, and in 1945 joined the Sydney SO as principal oboist; he also conducted the orchestra on occasion. In 1947 he came to Europe and, after a brief period studying conducting under Michael Mudie, became a pupil of Václav Talich at the Academy of Musical Arts in Prague, where the foundation was laid of a special enthusiasm for Slavonic music, Janáček's in particular. He made his London operatic début at Sadler's Wells in 1948 in *Die Fledermaus*, and was on the theatre's music staff until 1954 (conducting the British première of Janáček's *Káťa Kabanová* in 1951). His Covent Garden opera début was in 1964, in Shostakovich's *Katerina Izmaylova*, and he has conducted there frequently, notably in operas by Puccini, Verdi and Mozart. He served as principal conductor of the BBC Concert Orchestra (1954–66), first conductor at the Hamburg Staatsoper (1966–9), musical director of Sadler's Wells Opera (later the ENO, 1970–77) and of the WNO (1987–92), principal guest conductor of the Scottish Chamber Orchestra (1992–5), the RPO (1993–6), San Francisco Opera (1993–6) and of the Czech PO (1999–). He has conducted frequently at the Metropolitan Opera (making his début there, with *Orfeo ed Euridice*, in 1972) and in most European capitals. He conducted the opening concert (1973) in the Sydney Opera House and *Don Giovanni* for the reopening of the Prague Estates Theatre (1991), where the opera had received its première. His recordings include the symphonies, serenades and major operas of Mozart, Beethoven and Mahler symphony cycles, Brahms symphonies, cycles of Janáček's and Sullivan's operas and award-winning recordings of Britten's *Gloriana* and Dvořák's *Rusalka*. He was knighted in 1979 and made a Companion of the Order of Australia in 1998. Other awards include the Czech Republic's Medal of Merit (1996) and honorary doctorates from several universities.

Mackerras first came to prominence as the arranger of the highly successful ballet score *Pineapple Poll* (1951), based on the music of Sullivan, followed by *The Lady and the Fool* (1954), taken from Verdi. His precise knowledge of Sullivan and his phenomenal memory were to serve him decades later when he reconstructed the Sullivan Cello Concerto (whose score was destroyed in a fire) on the basis of a surviving solo part and his recollection of a performance he had conducted in the 1953. As a conductor he commanded attention from the start for his rhythmic exuberance and acute sense of colour, qualities which served him admirably in Janáček and Puccini. Later his conducting revealed an uncommonly keen grasp of dramatic pace, and his performances of *Così fan tutte* and *Die Zauberflöte* have been marked by a breadth and serenity particularly apt to late Mozart. To these qualities must be added a scholarly concern for textual accuracy and interpretative style. The production of *Le nozze di Figaro* which he conducted at Sadler's Wells in 1965, with appoggiaturas sung in accordance with 18th-century convention and added ornamentation (mostly from contemporary sources), had great influence in convincing both audiences and other musicians of the value in musical terms of authentic performing style. Similar considerations have informed his interpretations of Gluck, Handel (several of whose oratorios he has recorded to acclaim) and Janáček. His legendary cycle of Janáček operas recorded with the Vienna PO included the first *Jenůfa* since 1911 to be played without Kovařovic's revisions and the first authentic *From the House of the Dead*. Both works he subsequently edited for publication (with John Tyrrell), as well as *Káťa Kabanová* and several Handel operas, including *Giulio Cesare*, which he conducted (with Janet Baker in the title role) at the ENO and recorded. He has contributed several articles, mainly on matters of style and interpretation, to periodicals.

Charles Mackerras conducting the RPO at the Royal Festival Hall, London, 1994

His brother Colin Mackerras (*b* 1939) is a professor at Griffith University, Brisbane, and an authority on Chinese music.

STANLEY SADIE/JOHN TYRRELL

Mackey. *See* MACKAY family.

Mackey, Steven (*b* Frankfurt, 14 Feb 1956). American composer. After playing rock and jazz guitar in the early 1970s, he studied the guitar and lute at the University of

California, Davis (BA 1978). He went on to study composition with John Lessard and David Lewin at SUNY, Stony Brook (MA 1980), and with Donald Martino at Brandeis University (PhD 1985). In 1985 he was appointed to a post at Princeton University, where he became a professor in 1993. His compositions synthesize his early exposure to popular music and his classical training. Elements borrowed from the vernacular include the driving downbeats of rock, the additive metres of folk music, and the microtonal harmonic fluctuations of jazz and blues styles. These influences, combined with finely honed counterpoint, constant variation derived from serialism and an off-beat imagination, result in works of extraordinary originality.

Mackey's early compositions, such as *Fumeux Fume* (1986), exhibit shimmering kaleidoscopic textures produced by a broad musical palette comprised of intervals ranging from unisons to chromatic clusters, polyrhythms ranging from the improvisational to the clearly defined, and atonal and tonal contexts. With *Indigenous Instruments* (1989) and *ON ALL FOURS* (1990) microtones became a fundamental part of his writing, as did extreme scordatura tunings that produce bending pitches inspired by electric guitar technique; structural details were also magnified and simplified. Rhythmic repetition and near repetition led Mackey to describe this style as 'vernacular music from a culture that doesn't really exist'. From 1989 to 1992 electric guitar and/or string quartet timbres featured in a majority of his works, among them *Troubadour Songs* (1991) and *Physical Property* (1992).

After 1992 Mackey focussed on orchestral music, exploiting this genre to magnify detail through exuberant instrumental virtuosity. The extroverted *Banana/Dump Truck* (1994), for cello and orchestra, and the introspective *Deal* (1995), for electric guitar and orchestra, are particularly representative. The influence of rock music is again evident in works like *TILT* (1992), commissioned by the American Composers Orchestra, and *Eating Greens* (1993), commissioned by the Chicago SO. The monodrama *Ravenshead* (1997), for male performer and rock-inspired ensemble, continues to draw from vernacular idioms, while works such as *String Theory* (1997) use stark lines to explore what Mackey calls 'the area between not-quite-monody and almost-counterpoint'.

WORKS

Stage: Ravenshead (monodrama, 2, R. Eckert), male pfmr, bn + t sax, elec perc, drum set, elec kbd, gui, vn, 1997

RONALD CALTABIANO

McKie, Sir William (Neil) (*b* Melbourne, 22 May 1901; *d* Ottawa, 1 Dec 1984). Australian organist. He graduated from the RCM, London, and Worcester College, Oxford. After being director of music at Clifton College, Bristol (1926–30), and spending eight years in Melbourne as city organist, he returned to England in 1938 to become organist and instructor in music at Magdalen College, Oxford. In 1941 he was appointed organist and master of the choristers of Westminster Abbey, a post he held (apart from war service) until 1963. There he directed the music for the royal wedding in 1947 and the music for the coronation of Elizabeth II in 1953 (recorded by the BBC); he was knighted that year. He commissioned Vaughan Williams's anthem O *taste and see* and later played for the composer's funeral. He also played at the commemorations of Handel and Purcell in 1959 and in the London première of Britten's *War Requiem* in 1962. A keen promoter of Australian music and musicians, McKie was involved in the preparations for the Percy Grainger Festival in 1970. He was also president of the Royal College of Organists in 1957–8. He composed several works, including the antiphon *We wait for Thy loving kindness* (1947).

McKim, Lucy. *See* GARRISON, LUCY MCKIM.

McKinley, William Thomas (*b* New Kensington, PA, 9 Dec 1938). American composer and jazz pianist. He began his jazz career during his teens, playing in clubs under the tutelage of the jazz pianist John Costa. In 1956 he enrolled at the Carnegie Institute of Technology, where after two years of piano studies with Leonard Eisner he changed to composition studies with Lopatnikoff and Haieff. After pursuing a career in jazz performance, he went to Yale in 1967, studying with Mel Powell and associating with musicians who would later become his prominent sponsors, including the clarinettist Richard Stoltzman. McKinley taught at the University of Chicago (1969–73), then at the New England Conservatory (1973–93). In 1991 he founded the Master Musicians Collective, a business devoted to providing contemporary composers with recording opportunities. While all of McKinley's music shows a clear jazz influence, his prodigious output of over 250 works falls into three distinct stylistic periods. The first is a neo-classical style influenced by Lopatnikoff that encompasses all of his early works. With *Directions '65* (1965), McKinley began to explore serialism and atonality, a process he continued with Powell. In 1981 he wrote an arrangement of Gordon Jenkins's *Goodbye*, and began to write in the tonal style evident in all his most performed pieces. His honours include a Guggenheim Fellowship and eight grants from the National Endowment of the Arts.

JEFFREY S. SPOSATO

McKinnon, James (William) (*b* Niagara Falls, NY, 7 April 1932; *d* Chapel Hill, NC, 24 April 1999). American musicologist. He received the BA in classical languages from Niagara University (1955) and worked at Columbia University with Paul Henry Lang and Edward Lippman (PhD 1965). He also studied organ with Frederick Swann. McKinnon began his career as an associate in music at Columbia (1965–6). From 1966 to 1989 he taught at SUNY, Buffalo, where he was made professor in 1979; he also chaired the music department, 1987–9. He was appointed Richard H. Fogel Professor of Music at the University of North Carolina, Chapel Hill in 1989. He also worked as a church organist and choir director in Buffalo and New York City.

McKinnon's research interests centred on early sacred music, particularly Roman and Gregorian chant, music of classical and christian antiquity and the iconography of music. He wrote widely on the early uses of instruments in church and synagogue, liturgical performance practice and the pictorial evidence for such practice. He was also the author of numerous dictionary and encyclopedia articles on liturgical terms and early instruments.

PAULA MORGAN

Mackintosh, Catherine (Anne) (*b* London, 6 May 1947). English string player. She specializes in early instruments: the Baroque and Classical violin and viola, the viola d'amore and the viol. She studied the violin at the RCM, where her teachers included Orrea Pernel and Silvia Rosenberg; she was much inspired by Kenneth Skeaping's Baroque chamber music classes and her experience singing with Roger Norrington's Schütz choir. This led to a three-year scholarship (1967–9) to attend the European Seminars of Early Music in Bruges, which further increased her appetite for the pre-Classical repertory on period instruments. In 1969 she became a founder member of the Consort of Musicke and also joined the English Consort of Viols. In 1973 she became the first leader of the Academy of Ancient Music, a position which she held until 1987. With that orchestra she made pioneer

recordings on period instruments of Handel's *Messiah* and *La Resurrezione*, the complete Mozart symphonies, and Vivaldi's *L'estro armonico* and 'Four Seasons' (sharing the concertos with Alison Bury, John Holloway and Monica Huggett). In 1984 Mackintosh founded the Purcell Quartet, with which she recorded trio sonatas by Lawes, Purcell, Biber, Corelli, Handel and Leclair. In 1984 she became a co-leader of the Orchestra of the Age of Enlightenment, with which she made the first recording on period instruments of Vivaldi's viola d'amore concertos. In 1997 she recorded the Bach violin sonatas with Maggie Cole. With her work at the RCM (1977–99) and also as visiting professor at the Royal Scottish Academy of Music and Drama (from 1988), Mackintosh has played a vital role in establishing the study of early music at British conservatories, encouraging and training many of the Baroque violinists in British orchestras.

LUCY ROBINSON

Mackintosh, Robert (*b* Tulliemet, Perthshire, *c*1745; *d* London, Feb 1807). Scottish violinist and composer. He moved at an early age to Edinburgh, where he embarked on a career as a composer and gave music lessons: his most distinguished pupil was Nathaniel Gow. His first publication seems to have been *A Collection of Favourite Scots Tunes ... by the Late Mr Chs McLean and Other Eminent Masters* (1772), whch contains six pieces ascribed to him in an annotated copy at the National Library of Scotland. He was undecided whether to go into traditional or art music, and tried both: his *Airs, Minuets, Gavotts and Reels* op.1 (1783), which includes a brilliant violin sonata in G minor, shows both styles. In 1785 he left Edinburgh for Aberdeen, where he led the Musical Society orchestra for three years and gave freelance concerts (e.g. on 27 February 1786, when he played his 'Solo concerto' and 'New Solo in the manner of a Rondeau, with harmonic tones', both now lost).

He returned to Edinburgh in autumn 1788. Subsequently he brought out three collections entitled *Sixty-Eight New Reels, Strathspeys and Quicksteps* (Edinburgh, 1792, 1793, 1796); conducted his friend Andrew Shirrefs's ballad opera *Jamie and Bess* at the Edinburgh theatre; and in 1803 moved to London, where he published *A Fourth Book of New Strathspey Reels* in 1804.

His son Abraham Mackintosh (1769–*c*1807) was a successful dancing-master, fiddler and composer of Scottish dance music. The titles of some of his reels and strathspeys suggest that he played frequently at Berwickshire stately homes; he published *Thirty New Strathspey Reels* in Edinburgh in 1792, and moved to Newcastle in 1797, where he published a two-volume *Collection of Strathspeys, Reels, Jigs* in 1805.

DAVID JOHNSON

McLaren, Malcolm (*b* London, 22 January 1946). English manager, producer and animateur. As manager of the Sex Pistols, McLaren made a major contribution to the formation of the British punk rock genre. As an art student he was inspired by the ideas of the French art and political movement the Situationists. He briefly managed New York punk group the New York Dolls before establishing a series of fashion stores with designer Vivienne Westwood; then in 1975 he instigated the formation of the Sex Pistols, also choosing their name. While former group member John Lydon has disputed McLaren's claim to have been the group's musical Svengali, his confrontational managerial style did much to establish the Sex Pistols' high public profile as well as to hasten its demise. After the group's dissolution in 1979 McLaren set out to prove himself to be a musical innovator, with mixed results. He worked with producer Trevor Horn on *Duck Rock* (Charisma, 1983), an album project which used the then novel technique of scratching. He later made a pop version of extracts from Puccini's *Madame Butterfly* on the album *Fans* (Charisma, 1985), and an album of American rap and hip-hop compositions. *Paris* (Disques Vogue, 1994) was a poorly conceived and predictable homage to that city.

DAVE LAING

McLaughlin, John [Mahavishnu] (*b* Kirk Sandall, Yorks., 4 Jan 1942). English jazz guitarist, composer and bandleader. He studied the piano and violin from the age of nine, taking classical lessons and then taught himself to play acoustic guitar: he learnt blues before turning to flamenco, and then jazz. In the early 1960s he became involved with the blues movement in London, playing electric guitar with Graham Bond, Jack Bruce, Eric Clapton and Alexis Korner among others; he also began playing with jazz musicians including John Surman. After working with the free jazz vibraphonist Gunter Hampel in Germany, he moved to the USA in February 1969 to join Tony Williams's group Lifetime and Miles Davis; he figures prominently on Davis's pioneering jazz-rock album *Bitches Brew* (Col., 1969). McLaughlin became a disciple of the guru Sri Chinmoy in 1970, and the following year formed the Mahavishnu Orchestra, which achieved a popular success approaching that of the most famous contemporary rock groups. The album *The Inner Mounting Flame* (CBS, 1971) captures the band's amalgamation of the biting electronic sound, sustained high volume and dance rhythms of hard rock; the virtuoso improvisation and complex meters of jazz; and mantra-like riffs related to traditional Indian religious music. While with the Mahavishnu Orchestra, McLaughlin played a double-necked (one of 6 strings and the other of 12) flat-bodied electric guitar. After disbanding in 1975, McLaughlin formed the group Shakti, in which he played with South and North Indian instrumentalists; in this setting he used a custom-built 13-string acoustic guitar, modelled after the *vīṇā*. In the early 1980s he performed in guitar duos and trios, notably with the Spanish flamenco player Paco de Lucia and Al Di Meola. He revived his talents as a conventional bop electric guitarist to appear as a soloist in the film *'Round Midnight* (1986). In 1988, working once again on acoustic guitar, he formed a trio with percussion and bass guitar, from 1993 he played the electric instrument in the Free Spirits, a trio with Dennis Chambers and the organist Joey DeFrancesco, and from 1995 he also renewed the trio with de Lucia and Di Meola. McLaughlin has written two guitar concertos, the first receiving its première with the Los Angeles PO in 1985. Thereafter he gave regular concerts with symphony

orchestras; his second concerto was performed in Paris in 1991.

BARRY KERNFELD

McLaughlin, Marie (*b* Hamilton, Lanarks., 2 Nov 1954). Scottish soprano. She studied in Glasgow and London, making her début in 1978 as Anna Gomez (*The Consul*) with the ENO. She made her Covent Garden début in 1981 as Barbarina and has subsequently sung there roles including Zerlina, Iris (*Semele*), Susanna, Marzelline, Adina, Norina, Titania, Zdenka, Musetta and Nannetta. At Glyndebourne she has sung Micaëla (1985), Violetta and Donna Elvira. She made her Metropolitan début (1986) as Marzelline, returning as Susanna and Zdenka. She has also sung in Chicago and throughout Europe, making her Salzburg début in 1990 as Marzelline. McLaughlin's later roles with the ENO have included Gilda, Tatyana and Karolina (Smetana's *The Two Widows*), while at Geneva she has added to her repertory Jenny (*Mahagonny*) and Blanche (*Dialogues des Carmélites*). She has a charming stage presence and a full-toned yet flexible lyric voice, heard to advantage in recordings of Susanna, Zerlina, Despina and Marzelline, and of Schubert and Strauss lieder.

ELIZABETH FORBES

Maclean, Alick [Alexander Morvaren] (*b* Eton, 20 July 1872; *d* London, 18 May 1936). English composer and conductor, father of organist Quentin Maclean. He was educated at Eton where his father, Charles Maclean, was director of music. In 1891 he resigned his army commission to resume musical studies. He won the Moody-Manners prize for the best one-act British opera in 1895 with *Petruccio*, an early example of *verismo* in England. His sister, writing under the pseudonym S(heridan) R(oss), was his librettist. Maclean was the musical director of Wyndham's theatres (1899–1912), and subsequently conducted the Scarborough Spa Orchestra to great renown, until his death. In addition he conducted the Chappell (initially Ballad) Concerts from 1916 to 1923 and in the winter months of these years the New Queen's Hall Light Orchestra. He conducted concert versions of his operas *Quentin Durward* and *The Hunchback of Cremona* and scenes from his oratorio *The Annunciation* in Scarborough in 1920.

WORKS

OPERAS

Crichton (comic op, 3, S. Ross), *c*1892, unperf.; Quentin Durward (3, S. Ross, after W. Scott), 1892–3, rev. as The King's Prize (3), perf. 1904, rev. (1), perf. 1920; Petruccio (1), 1894; The White Silk Dress (farce, 2, S. Ross, R. Somerville and G. Byng), 1896; Die Liebesgeige (The Hunchback of Cremona) (2, S. Ross, after F.-J.-E. Coppée: *Le luthier de Crémone*), perf. 1906; Maître Seiler (Die Waldidylle) (1, S. Ross, after T. Erckmann-Chatrian), perf. 1909; The Toll, before 1917

OTHER WORKS

Choral: The Annunciation (orat), 4vv, chorus, orch (1909); Choral Song (L.N. Parker); Lament (A. Hyatt, after Sadi); At the Eastern Gate (A.S. Burrows) (1922) [adapted from Act 3 of Quentin Durward]; Khaled (scena, M. Crawford)

Incid music: The Jest (Parker); The Mayflower (Parker); Cyrano de Bergerac (E. Rostand)

Orch: The Jest, ov.; The Mayflower, sym. prelude, perf. 1923; Mistralia, tone poem (1932); Rapsodie monégasque (1935)

STEPHEN BANFIELD/STEPHEN LLOYD

McLean, Barton (Keith) (*b* Poughkeepsie, NY, 8 April 1938). American composer and performer. He was educated at SUNY, Potsdam (BS 1960), the Eastman School of Music, Rochester, New York (MM 1965), where he was a pupil of Cowell, and at Indiana University, Bloomington (DMA 1972). He taught music theory and double bass at SUNY, from 1960 to 1966. In 1969 he joined the music faculty at Indiana University, South Bend, where he became head of the theory and composition department and director of the electronic music centre. From 1976 to 1983 he directed the electronic music centre and taught at the University of Texas, Austin. McLean has received a number of awards, including fellowships to the MacDowell Colony and an NEA media-arts grant (1978). He has served the American Society of University Composers in several executive or administrative capacities and has contributed articles and reviews on contemporary music to *Perspectives of New Music* and other journals. He began to compose in the early 1960s; since 1973 he has turned to electronic techniques (both *musique concrète* and synthesized sound) and limited aleatory procedures, and has evolved new concepts of notation. With his wife, the composer Priscilla McLean, he performs as the McLean Mix, presenting their collaborative works in the USA and elsewhere; in these concerts he plays the piano or synthesizer. The McLeans' artistic goals are precise control, a certain sonic quality, and disciplined virtuosity in the interdependent domains of composition and performance.

BARBARA A. PETERSEN

McLean, Charles (*b* ?Aberdeen, *c*1712; *d* ?London, by *c*1772). Scottish composer. In 1736 he was licensed by Montrose Town Council to teach music in the town, in 1737 he became master of the Aberdeen music school and by 1738 he was in Edinburgh, playing in the Musical Society orchestra. He disappears from Scottish records after 1740, when he probably went to London. In 1743 a 'Chas. Macklain' rented a house in Angel Court, Piccadilly, which had previously been occupied by the composer Michael Christian Festing.

McLean's outstanding known works are his *Twelve Solo's or Sonatas* op.1. They show an impressive range of styles and forms, some of them antique, all carried out with panache; relics of the 17th-century viol fantasia and fugue on a descending chromatic scale appear in them alongside the influence of Handel. McLean also wrote fiddle variations on popular tunes, which achieve an exciting fusion of Italian and Scottish violin styles.

WORKS

12 Solo's or Sonatas, nos.1–8, vn, bc, nos.9–12, fl, bc, op.1 (Edinburgh, 1737); nos.2, 9, 10, ed. D. Johnson (Oxford, 1974)

Contributions to A Collection of Favourite Scots Tunes ... by the Late Mr Chs McLean and other Eminent Masters, vn, bc (Edinburgh, *c*1772), see Johnson (1984) for details

Variations on popular tunes, vn, *GB-En* MSS. 2084, 2085, 3 ed. in Johnson (1984)

D. Johnson: *Scottish Fiddle Music in the 18th Century* (Edinburgh, 1984, 2/1997)

DAVID JOHNSON

Maclean, Hector R. (*fl* 1874–86). Australian music teacher, organist and composer of British birth. He arrived in Sydney in 1874 to become organist of St James's Church, and was appointed local secretary of Trinity College of Music, London, establishing the first branch college of music in Sydney (1878); he also wrote various theoretical treatises for the use of Australian candidates and was examiner in music at Sydney University. Besides several minor published songs, piano and organ pieces, he composed a patriotic cantata *Australia* in 1880 for the Intercolonial Exhibition and choral music to accompany the first local performance of a classical play, the *Agamemnon* (Sydney University Great Hall, 1886). His three-act comic opera *Populaire* (T. Moser), which received several amateur performances in Sydney in 1886, was acclaimed more for its depiction of sporting prowess in a richly topical social setting than for its pedantic score. Some of his manuscripts are at the Fisher Library, University of Sydney. See also W.A. Orchard: *Music in Australia* (Melbourne, 1952).

ELIZABETH WOOD

McLean, Hugh (John) (*b* Winnipeg, 5 Jan 1930). Canadian organist and musicologist. After early training in Winnipeg and Vancouver, he studied from 1949 to 1951 with Arthur Benjamin and Sir William Harris at the RCM, London. At King's College, Cambridge (1951–6), he was Mann Organ Scholar. After making his London début, with the LPO, in 1954, he returned to Vancouver in 1957 and was active as an organist, harpsichordist, pianist, composer and conductor. Between 1963 and 1975 he gave the Canadian premières of organ concertos by Malcolm Arnold, Samuel Barber, Hindemith and others. He joined the music faculty at the University of Victoria in 1967, became associate professor in the music department at the University of British Columbia in 1969, and served as dean of the music department at the University of Western Ontario from 1973 to 1980. He was vice-president of the Canadian Music Council from 1976 to 1979, and in 1977 was elected a fellow of the Royal Society of Canada. McLean has performed in the USSR, Poland, Finland, Australia and Japan as well as Western Europe, and has made many recordings, including a set of the Handel organ concertos. In his research he has concentrated on Baroque keyboard music and has several publications and editions to his credit.

MAX WYMAN/GILES BRYANT

McLean, Mervyn (Evan) (*b* Invercargill, 17 June 1930). New Zealand ethnomusicologist. At the University of New Zealand he took the BA (1957), and at the University of Otago he took the MA (1959), and the doctorate (1965) with a dissertation on Maori chant. After studying further with Alan P. Merriam at Indiana University (1966–7) he was visiting professor at Indiana (1967) and Hawaii (1968) universities. He joined the staff of the University of Auckland (1968) and was associate professor of ethnomusicology (1975–92). He was founder-head of the Archive of Maori and Pacific Music (1970–92) and editor of the Journal of the Polynesian Society (1969–76). McLean's main area of study is the music of Oceania. His fieldwork is of importance for research and preservation: his field recordings include 60 hours of traditional Maori

chant recorded from 1958 onwards, and 38 hours from Aitutaki and Mangaia, Cook Islands, recorded in 1967.

□

McLean [née Taylor], **Priscilla (Anne)** (*b* Fitchburg, MA, 27 May 1942). American composer and performer of electro-acoustic music. She graduated from the State College at Fitchburg (BEd 1963) and the University of Massachusetts, Lowell (BME 1965). At Indiana University, Bloomington (MM 1969), she was greatly influenced by the music of Xenakis, who was teaching there. She has taught at Indiana University, Kokomo (1971–3), St Mary's College, Notre Dame (1973–6), and the universities of Hawaii (1985) and Malaysia (1996). From 1976 to 1980 she produced the American Society of Composers 'Radiofest' series. In 1974 she and her husband, Barton McLean, began to perform together as the McLean Mix, and in 1983 to present concerts of their own music full-time. She sings with extended vocal techniques and plays the piano, synthesizer, percussion and Amerindian wooden flutes, as well as newly created instruments.

McLean's works range from abstract orchestral and chamber music to dramatic electro-acoustic works. Since 1978 most of her music has focussed on the concept of the wilderness and has incorporated sounds from animals and nature along with synthesized music. Her compositions, unquestionably dramatic, contain electronic passages that are well integrated and musical. The sonic tension, large-scale coherence of her music and its unique sound world have been widely admired.

WORKS
(*selective list*)
† – *in collaboration with B. McLean*

Orch and band: Holiday for Youth, concert band, 1964–5; Variations and Mozaics on a Theme of Stravinsky, orch, 1967–9, rev. 1975; A Magic Dwells, orch, tape, 1982–4; Voices of the Wild [Movt 1: (Printemps) Rites], live elec soloist, orch, 1986–8 [movt 2 by B. McLean]; Everything Awakening Alert and Joyful, nar, orch, 1991–2; Rainforest Reflections†, synth soloists, orch, 1993
Chbr: Interplanes, 2 pf, 1970; Spectra I, perc ens, synth, 1971; Spectra II, perc ens, prepared pf, 1972; Ah-Syn!, autohp, synth, 1974, rev. 1976; Beneath the Horizon I, 4 tuba, tape [whale sounds], 1977–8; Beneath the Horizon II, tuba, tape [whale sounds], 1978, rev. as Beneath the Horizon III, 1979; Elan! A Dance to all Rising Things from the Earth, fl, vn, vc, perc, pf, 1982–4; Where the Wild Geese Go, cl, tape, 1993–4
Multimedia: Inner Universe, 8 tone poems, amp pf, tape, slide projections, 1979–82; Beneath the Horizon, quadraphonic/stereo tape, slide projections, 1982; Dance of Shiva, stereo computer music, slide projections, 1989–90; Rainforest†, audience-interactive installation: 2 synth, perc, found insts, 2 microphones, tape, digital processors, slide projections, 1988; Rainforest Images I and II†, tape, video, 1993; Amazon†, 1v with digital processing, ocarinas, synths, wooden fls, perc, amp zither, 2 pf, live elecs, slide projections, 1995; In the Beginning, 1v with processing, 2 pf, tape, video (A.J. Jannone), 1995–6; Desert Spring†, audience-interactive installation: voice processing, desert objects, thundersheet, amp and programmed buffalo skull, amp bicycle wheel, synth, tape, slide projections, 1996; Jambori Rimba†, audience-interactive installation: voice processing, 2 synth, ceramic bowls, perc, amp bicycle wheel, native tribal tapes, slide projections, video (H. Saidon), improvised dance, 1996–7, rev. for concert, 1v and stereo processing, tape, ww, bowed bicycle wheel, gongs, video, 1988; Earth Song†, 1v, fl, kbd, live elecs, tape, synths, slide projections, 1997; The Ultimate Symphonins 2000†, interactive installation, 1999
El-ac: Night Images, tape, 1973; Dance of Dawn, 4-track tape, 1974; Invisible Chariots, 4-track tape, 1975–7; Desert Voices, MIDI-vn, live elecs, tape, 1997–8
Vocal: Men and Angels Share, SATB, pf, 1959; 4 Songs in Season: Chant of Autumn, Lullaby of Winter, Song to the Spring, Summer Soliloquy, SATB, pf, 1963, rev. 1967; 3 Songs (R.M. Rilke), S, vn, 1965, rev. 1974; There Must be a Time, SAB, fl, 1970; Messages, 4 solo vv, double chorus, chbr ens, elecs, 1972–4; Fantasies for Adults and Other Children (e.e. cummings), S, amp pf, 1978–80; Invocation, S, chorus, audience singing, created perc and ww, tape, 1984–6; O Beautiful Suburbia!, S + autohp, audience singing, bongo drums + bicycle wheel, tape, 1985; On Wings of Song, S, amp bicycle wheel, tape, 1985; Wilderness, S, fl, cl, 2 sax, bn, accdn, 2 perc, pf, 1986, rev. S, flexatone, tape, 1988–89; In Celebration (of the Historic Alaskan Wilderness Act and of All Consciousness of Our Bond with Nature), chorus, perc, tape, 1987–8; 6 (Sage) Songs about Life (... and Thyme ...), S, pf, 1990; In the Beginning, S, processors, tape, 1994–96; also works for chorus and children's chorus, pf

BARBARA A. PETERSEN, LESLEY A. WRIGHT

Maclean, Quentin (Stuart Morvaren) (*b* London, 14 May 1896; *d* Toronto, 9 July 1962). Canadian organist and composer of English birth, son of ALICK MACLEAN. He studied in England, 1904–7, with Harold Osmund, F.G.

Shuttleworth and Richard Terry; and in Leipzig with Karl Straube and Max Reger (and was interned in Ruhleben camp, 1914–18). He was assistant organist at Westminster Cathedral (1919), then organist at various London cinemas (1921–39). His regular broadcasts on BBC radio (1925–39) included the first broadcast of Hindemith's Organ Concerto (1934) and of his own (1935), the inauguration of the BBC theatre organ (1936) and hundreds of light music programmes. During his British career his outstanding technique and sheer versatility led to him being considered by many as the finest-ever exponent of the theatre organ. In 1939 he moved to Canada, becoming organist in Toronto cinemas (1940–49), and at Holy Rosary Roman Catholic Church in Toronto for over 20 years. He broadcast on CBC networks from Toronto (1940–61) as a recitalist and composer of incidental music. Maclean brought high standards of taste and skill to a wide popular audience while continuing to hold the respect of serious musicians. He taught at the Toronto Conservatory and at the Schola Cantorum of St Michael's College. Among his compositions are organ concertos, masses, a *Stabat mater*, motets, orchestral and chamber works.

T. BROWN/NIGEL OGDEN

MacLeod, Donald (*b* Lewis, Outer Hebrides, 1916; *d* Glasgow, 29 June 1982). Scottish piper, teacher and composer. He spent several years as a pipe major in the Seaforth Highlanders. After leaving the army he became a partner in the pipe-making firm of Grainger and Campbell in Glasgow. His competitive piping record included eight clasps to the gold medal at the Inverness piping competition, the clasp being awarded to previous winners of the gold medal. He was a prolific composer of *ceòl baeg* (Gaelic: 'little music') and produced six music books including many of his compositions; melodies such as *Susan MacLeod*, *Cockerel in the Creel* and *Donald MacLellan of Rothesay* later became part of the standard repertory of professional pipers. He also wrote a book of *ceòl mor* (Gaelic: 'great music') or *pìobaireachd*. He taught throughout the world, especially in Canada and the United States. After his death the Lewis and Harris Piping Society inaugurated a professional piping competition dedicated to his memory and using his compositions as prescribed pieces.

R. WALLACE

McLeod, Jenny [Jennifer] **Helen** (*b* Wellington, 12 Nov 1941). New Zealand composer. Active in her youth as a pianist in Levin, an American Field Service scholarship took her at 16 to the Midwest. Following her first Cambridge (New Zealand) Summer Music School, she studied at Victoria University, Wellington (BMus 1964). Messiaen's *Quatuor pour la fin du temps* moved her profoundly, and on receiving a government bursary she joined his classes at the Paris Conservatoire, studying later in Cologne with Stockhausen and Berio and in 1965 attending Boulez's conducting course in Basle. Appointed lecturer in music at Victoria University in 1967, she was professor there from 1971 to 1976.

McLeod's first works, *Cambridge Suite* (1962) and the *Little Symphony* (1963), were written for students at Cambridge. In Europe she wrote the 12-note *Piano Piece 1965* and *For Seven* (1966), embodying avant-garde techniques. Her ambitious music-theatre piece for children, *Earth and Sky* (1968), draws on a variety of indigenous and contemporary idioms in bringing to life the Maori creation myth; it also tapped McLeod's immense organizational abilities, galvanizing into action the small town of Masterton. *Under the Sun* (1971), written partly in rock idiom for children and amateurs in Palmerston North, contemplated the history of the universe, but did not match *Earth and Sky* in quality. Resigning the professorship in 1976, McLeod later became a full-time professional composer, writing highly successful film and TV scores. Influenced by the 'tone clock' harmonic theories of Schat, she has translated his books into English. Her own book on the chromatic system is a 'sort of codification and composer's handbook'. McLeod's later style varies from simple to complex depending on her intended audience. In recent years, she has grown close to the Maori people; *He Iwi Kotahi Tatou* (1993) is a dialogue between Maori and European New Zealanders.

WORKS

Music theatre (for children and amateurs): Earth and Sky, 1968; Under the Sun, 1971; Wellington Sun Festival, 1983
Orch: Cambridge Suite, chbr orch, 1962; Little Sym., chbr orch, 1963; The Emperor and the Nightingale (after H.C. Andersen), nar, chbr orch, 1985; 3 Celebrations, 1986
Vocal: Childhood, 10 songs, chorus, 1981; Through the World, song cycle (W. Blake), Mez, pf, 1982; Dirge for Doomsday, chorus, 1984; Courtship of the Yonghy Bonghy Bo (E. Lear), chorus, 1985; He Iwi Kotahi Tatou, large and small chbr choirs, Maori singers, 2 pf, 1993
Chbr: Str Trio, 1963; For Seven, fl, cl, vn, va, vc, mar/vib, pf, 1966; Music for Four, 2 pf, 2 perc, 1985; Suite: Jazz Sketches, fl, cl/s sax, va, pf, 1986
Pf: Pf Piece 1965, 1965; Rock Sonatas nos.1, 2, 1987; 7 Tone Clock Pieces, 1988; 4 Tone Clock Pieces, 1995
Film scores: Equation; The Neglected Miracle; Beyond the Roaring Forties, Images of New Zealand; The Gift; The Silent One
TV scores: Cuckooland; The Haunting of Barney Palmer

J.M. THOMSON

McLeod, John (*b* Aberdeen, 8 March 1934). Scottish composer and conductor. He attended the RAM (1957–61), where he studied composition with Berkeley and the clarinet with Brymer, Kell and de Peyer. He later studied conducting with Boult. McLeod has held several teaching positions: as director of music at Merchiston Castle School, Edinburgh (1974–85), visiting lecturer at the Royal Scottish Academy of Music and Drama (1985–9) and at the RAM (1993–6), lecturer at Napier University of Edinburgh (1989–93), and as head of composition for film and television at the London College of Music (1991–7). From 1980 to 1982 he was associate composer with the Scottish Chamber Orchestra.

Many of McLeod's early works include passages based on aleatory techniques in the manner of Lutosławski. In *The Shostakovich Connection* (1974) such sections, here based on the 12-note theme which opens Shostakovich's Twelfth String Quartet, are woven into a set of conventionally conducted variations on a theme from the same composer's Fifth Symphony. Other works of the 1970s, such as the *Lieder der Jugend* (1978), which won the Guinness Prize in 1979, seek a rapprochement with tonality. In 1988 McLeod spent a year as Ida Carroll Research Fellow at the RNCM, where he made a special study of Messiaen, Boulez and Birtwistle. The marked change this brought about in his musical thinking, with respect to rhythm, tonality and energy, is evident in *The Song of Dionysius* (1989) with its exploitation of fluctuating metres and the drama of instrumental role-play.

WORKS
(*selective list*)

Orch: The Shostakovich Connection, 1974; Sym. no.1 'Il Sole', 1980; Sym. no.2 'La Luna', 1982; The Gokstad Ship, 1982; Hebridean Dances, 1982; Perc Conc., 1987; Pf Conc., 1988; A Dramatic Landscape, cl, wind band, 1990

Choral: Hebridean Prayers (*Carmina Gadelica*, trans. Carmichael), SATB, children's chorus, clarsach, org, 1979; Stabat Mater (Lat., Al-Khansa, M. de Navarre, E. Bronte, E. Sitwell, A. Akhmatova), S, Bar, Tr, vv, children's chorus, boys' chorus, orch, 1985; Songs from the Small Zone (I. Ratushinskaya, trans. D. FRANCIS J. MORRIS

Mac Low, Jackson (*b* Chicago, 12 Sept 1922). American performance artist, composer and poet. After early training in the piano, the violin and harmony at the Chicago Musical College (1927–32) and the Northwestern University School of Music (1932–6), he studied philosophy at the University of Chicago (1939–43, AA 1941) and, later, Greek with Vera Lachmann at Brooklyn College, CUNY (BA 1958); he also studied the piano with Shirley Rhodes Perle (1943–4), Grete Sultan (1953–5) and Franz Kamin (1976–9), composition with Erich Katz (1948–9), experimental music with John Cage at the New School for Social Research (1957–60), the synthesizer with Rhys Chatham (1973) and singing with Pandit Pran Nath (1975–6). His teaching appointments include positions at New York University (1966–73), the Naropa Institute (1975, 1991, 1994), and Schule für Dichtung, Vienna (1992–3); he has also served as writer-in-residence at SUNY, Albany. He has collaborated with his wife, Anne Tardos, in the creation of performances, poetry and visual art works.

Mac Low's compositional techniques include 'nonintentional' and 'quasi-intentional' procedures, acrostic and diastic text selection and 'translations' between speech and music. Part of the original Fluxus movement, he is best known for his 'simultaneities', performances in which visual, musical and verbal elements are blended according to precise instructions; performers move through text-sound scores called 'Vocabularies' and 'Gathas', layering words, speech-sounds and pitched material in a complex, freely flowing fabric of sound. His 27 books include several volumes of poetry and a number of plays, notably *The Marrying Maiden* (1958) and *5 hörspiele*. His compositions have been published in many periodicals and in such collections as La Monte Young's *An Anthology* (1963, 2/1970) and Cage's *Notations* (1969). On Mac Low's 60th birthday an eight-hour concert of his works was performed in his honour by Cage, Simone Forti, Malcolm Goldstein, Kenneth King, Steve Paxton, Young and many others who had been influenced by his 'multilevel approach to language, sound, and action'; his 75th birthday was celebrated with concerts and readings at New York University, SUNY, Buffalo, and SUNY, Hallwalls.

JOAN LA BARBARA

McMaster, Brian (John) (*b* Hitchin, Herts., 9 May 1943). English administrator. He studied law at Bristol University and comparative law at Strasbourg University, and qualified as a solicitor before taking employment with EMI in 1968. After five years there he was made controller of opera planning at the ENO and then, in 1976, general administrator (later managing director) of the WNO.

McMaster did much to establish the WNO as one of Britain's finest opera companies, first by reorganizing its management structure and reducing its touring commitments, and then by engaging foreign directors, many of them from eastern Europe, to put on adventurous, if sometimes controversial, productions of both standard repertory and unusual operas. He was also successful in securing sponsorship to allow the company to show its productions in London and abroad.

Between 1984 and 1989 McMaster combined his work in Cardiff with an appointment as artistic director of the Vancouver Opera. He resigned from the WNO in 1991 to become artistic director of the Edinburgh Festival.

MALCOLM BOYD

MacMillan, Sir **Ernest (Alexander Campbell)** (*b* Mimico, ON, 18 Aug 1893; *d* Toronto, 6 May 1973). Canadian conductor, composer, organist and educationist. The son of a Scottish Presbyterian minister and musician, he showed early musical talent and played solos on the organ in Massey Hall, Toronto, at the age of ten. After attending schools in Toronto and Edinburgh, where he also studied the organ with Alfred Hollins, he gained the ARCO (1907) and FRCO (1911), and from 1908 to 1910 was organist at Knox Church, Toronto. After further studies he obtained the Oxford BMus in 1911, and that year entered the University of Toronto to study modern history. During his student years he was organist at St Paul's Presbyterian Church, Hamilton, Ontario. After his third undergraduate year, he went to study the piano in Paris; while he was visiting the Bayreuth Festival, World War I began, and he was interned in Ruhleben prison camp near Berlin. There his musical development continued, and he later credited the experience of directing prison shows with having given him basic training in the conductor's craft. To this period belong his first major works, the String Quartet in C minor and the choral-orchestral setting of Swinburne's ode *England*.

Returning to Canada after the war, MacMillan toured the country giving solo organ recitals interspersed with lectures on his prison adventures. From 1919 to 1925 he was organist and choirmaster at Timothy Eaton Memorial Church in Toronto. With two other Toronto musicians, Healey Willan and Richard Tattersall, he organized and directed in 1923 the first of what were to become annual performances of Bach's *St Matthew Passion*. Appointed to the staff of the Canadian Academy of Music in 1920, he remained after its merger with the Toronto Conservatory of Music, of which he was principal from 1926 to 1942. In 1929 he edited what was for many years the most widely used school music text, *A Book of Songs* (later called *A Canadian Song Book*). He became dean of the faculty of music, University of Toronto, in 1927; during his tenure the faculty greatly widened its range of professional courses. In 1942 he declined an invitation from Edinburgh University to the Reid Professorship. His departure as dean (1952) was provoked by administrative disagreements, later forgotten. The university awarded him an honorary LLD in 1953 and in 1964 dedicated its new opera theatre as the MacMillan Theatre.

Meanwhile MacMillan's performing activities had shifted from playing the organ to conducting. In 1931 he became conductor of the Toronto SO, which grew under his leadership to a fully professional orchestra. Before his resignation in 1956 he had taken the orchestra on its first tours to the USA and had made recordings with it. He was also conductor of the Toronto Mendelssohn Choir from 1942 to 1957. His guest conductorship of other orchestras took him to many American cities as well as to Australia (1945) and Brazil (1946). He became known for his annual *Messiah* and *St Matthew Passion* performances, his introduction of pieces new to Canadian audiences by composers such as Sibelius, Vaughan Williams and Bartók, and especially for his premières of orchestral works by Canadian composers, of which he conducted far more than any other musician of his generation. He continued to perform occasionally as solo organist, and also as pianist in the Canadian Trio with Kathleen Parlow and Zara Nelsova or as lieder accompanist to the singers Emmy Heim and Ernesto Vinci.

MacMillan played an important part in the expansion of Canadian musical life after 1945, becoming first president of the Canadian Music Council, and a founding member (1957–63) of the Canada Council. He served also as president of the Composers', Authors', and Publishers' Association of Canada, of the Jeunesses Musicales du Canada, and of the board of the Canadian Music Centre. He edited *Music in Canada* (Toronto, 1955), the country's first comprehensive stock-taking of musical achievements. After his retirement he continued his encouragement of young Canadian musicians by conducting the annual CBC 'Talent Festival' contests, and withdrew from this work only after a serious eye operation in 1963. A musician of great natural gifts, unusual energy, sound conservative tastes and high ideals, he left his mark on virtually every area of Canada's musical life. He was knighted in 1935, received an Hon.RAM in 1938, honorary degrees from nine universities in Canada and the USA, the Canada Council Medal in 1964, and the Canadian Music Council Medal posthumously in 1973. In 1984 his papers were acquired by the National Library of Canada. The centenary of his birth in 1993 was an occasion for the release and reissue of recordings of MacMillan's performances and compositions, for symposia devoted to his legacy, a major exhibition (Toronto, Ottawa) and the appearance of the first full-length biography. Compositions by MacMillan are included in volumes 5, 13, 14, 15 and 18 of the anthology series The Canadian Musical Heritage (Ottawa, 1982).

JOHN BECKWITH

MacMillan, James (Loy) (*b* Kilwinning, 16 July 1959). Scottish composer. He studied music at the University of Edinburgh (BMus 1981) and, later, composition with Casken at the University of Durham, receiving the PhD in 1987. Until that year, MacMillan had pursued a modernist course, though he had been influenced early on by Polish experimentalism, as typified by such figures as Lutosławski and Penderecki, 'the avant garde with the human face'. Returning to Scotland in 1988, he began to identify more positively with his national and religious roots. Deeply impressed by Latin American 'liberation theology', he explored ways in which a Roman Catholic faith, socialist sympathies and feelings about homeland could be brought together productively in music; at the same time he found it increasingly necessary to question the premises on which he had been educated, striving instead for a more directly expressive style.

MacMillan's first notable success, the music-theatre piece *Búsqueda* (composed in 1988 and first performed at the Edinburgh International Festival in 1990) followed quickly. This compelling work acknowledges modernist roots in some aspects of its style, and in its scoring, the same as that of Berio's *Laborintus II*; but the addition of Scottish folk elements, the accessible, melodic expressivity and the sharply defined rhythmic character (to some extent influenced by continental minimalism) result in something quite new. A similarly eclectic but highly fertile stylistic fusion is found in the orchestral *The Confession of Isobel Gowdie* (1990), which despite its impassioned political theme – the burning of a Scottish 'witch' at a 17th-century show-trial – was an exceptional success at its première at a London Promenade Concert in 1990.

Since then MacMillan's popularity has risen steadily, his percussion concerto *Veni, veni Emmanuel* (1992), written for Evelyn Glennie, in particular receiving numerous performances and more than one recording. This is surprising, perhaps, because unlike his popular minimalist or 'religious-minimalist' contemporaries, he has not completely rejected the modernism of his youth. Complex atonality often exists alongside lucid tonality or modality; the language is as likely to be acerbically or punchily dissonant as coolly or sweetly modal. Significantly, MacMillan has cited such diverse influences as Birtwistle's *Gawain's Journey*, and the Russian 'polystylists' Schnittke and Gubaydulina. This rich mix has been at times controversial, for example the opera *Inés de Castro* (1991–5). However, the work shows a courageous attempt to engage with grand operatic tradition, particularly as represented by the historical operas of Verdi; and an engagement with European tradition has continued in the Easter trilogy *Triduum*, comprising *The World's Ransoming* for English horn and orchestra (1995–6), a Cello Concerto (1996) and MacMillan's first symphony, *Vigil* (1997). These powerful compositions, along with the one-movement string quarter *Why is this night different?* (1997), suggest that MacMillan may be developing a new sense of direction, in which his eclecticism and characteristically intense expressivity are combined with a deepening sense of formal purpose.

WORKS

STAGE

Búsqueda (music theatre, Lat. mass, *Poems by the Mothers of the Disappeared*, trans. from Spanish by G. Markus), 1988, Edinburgh, Queen's Hall, 6 Dec 1988; Inés de Castro (op, 2, after J. Clifford), 1991–5, Edinburgh, Festival Theatre, 23 Aug 1996; Visitatio sepulchri (music theatre, 14th-century Easter Day liturgical drama, TeD), 1992–3, Glasgow, Tramway, 20 May 1993 [also version for concert perf.]

STEPHEN JOHNSON

McNabb, Michael (Don) (*b* Salinas, CA, 5 July 1952). American composer and installation artist. He studied composition with Jolas at the Paris Conservatoire (1975–6), and with Leland Smith and Chowning at Stanford University (BA composition 1974, MA 1975, DMA 1980). He was visiting composer at the Center for Computer Research in Music and Acoustics at Stanford from 1980 to 1988, during which time he began his involvement in the development of computer software for both musical and other industrial applications. In 1994 he set up his own software company, developing his own packages for real-time interactive MIDI applications and digital audio processing.

McNabb first attracted international attention with *Dreamsong*, which, widely hailed as the most accomplished essay to date in digital sonic manipulation, received a League of Composers-ISCM award in 1978. Subsequent works, such as the Calvino-inspired ballet score *Invisible Cities*, with its stylistic references to various popular and classical world musics, reintroduced live performers alongside the pre-recorded material. In the 1990s McNabb began to experiment with live interactive environments. For the 1993 International Computer Music Conference in Tokyo he created *The Forever Field*, a multimedia installation in which the sounds and movements of visitors trigger changes in the visual projections and the real-time computer processing of sounds.

STEPHEN RUPPENTHAL/R

Macnaghten, Anne (Catherine) (*b* Whitwick, Leics., 9 Aug 1908). English violinist. As a child she studied privately with Jelly d'Arányi, then with Oliver Williams. She was a student for two years at the Leipzig Conservatory with Walther Davisson and continued her studies later with André Mangeot, Sascha Lasserson and Antonio Brosa. She made her début as a soloist in Dublin in 1930 and with her own string quartet in London in 1932. The quartet originally consisted entirely of women and gave concerts and broadcasts until 1939. It was reorganized in 1947 and specialized in concerts for schools, combined with teaching and coaching for various local education authorities, notably Hertfordshire.

Macnaghten was best known for the concert series she founded in December 1931, with Iris Lemare and Elisabeth Lutyens, to perform works by young or little-known British composers. Lutyens, Britten and Rawsthorne were among the first to benefit from the opportunity; many established composers supported the enterprise, and few young composers of eventual standing were neglected. In 1956 the organization was reconstituted, and the Macnaghten Concerts now pursued an uncompromising policy of 'systematically introducing new developments'. Macnaghten is the dedicatee of many works. In 1962 she received the gold medal of the Worshipful Company of Musicians for services to chamber music.

LESLIE EAST

McNair, Sylvia (*b* Mansfield, OH, 23 June 1956). American soprano. She studied opera with Virginia McWatters and Virginia Zeani and song with John Wustman at the University of Indiana, made her concert début in *Messiah* at Indianapolis (1980) and her stage début as Sandrina in Haydn's *L'infedeltà delusa* at the Mostly Mozart Festival, New York (1982). In 1984 she made her European début, creating the title role of Kelterborn's *Ophelia* at Schwetzingen. She subsequently appeared in the USA as Pamina at Santa Fe and Hero (*Béatrice et Bénédict*) and Morgana (*Alcina*) at St Louis, and in Europe as Susanna at Amsterdam, Pamina in Berlin, and Pamina and Susanna at the Vienna Staatsoper. In 1989 she gave a ravishing interpretation of Anne Trulove at Glyndebourne, where her Ilia was equally admired. Ilia also introduced her to Covent Garden (1989), the Salzburg Festival (1990), where she returned for a seductive Poppaea in *L'incoronazione di Poppea*, and the Opéra-Bastille in Paris (1991). Her début at the Metropolitan was in 1991 as Marzelline. She sang Pamina at Salzburg (1997) and Handel's Cleopatra at the Metropolitan (1999). McNair is also a distinguished concert artist – her London début in Mozart's C minor Mass with Gardiner was a personal triumph – and a pleasing recitalist. McNair's pure, silvery tones and refined phrasing have adorned all her performances, even when her style has seemed a shade bland. Of her many recordings, those of Poppaea and Ilia, both with Gardiner, represent her at her most beguiling.

ALAN BLYTH

McNaught, William Gray (*b* London, 30 March 1849; *d* London, 13 Oct 1918). English music educationist and journalist. After a period in business he studied at the RAM (1872–6) and then embarked on a career of class-teaching and choral conducting. In 1883 he became assistant inspector of music in schools and training colleges to the Education Department under Stainer. When Stainer died in 1901 McNaught resigned, preferring not to serve under a less authoritatively experienced man; however, he continued his educational work as writer and lecturer. Earlier, in 1892, he founded the *School Music Review* and edited this until his death. From 1901 he was also the editor of Novello's series of elementary music manuals, and he edited the *Musical Times* from 1910. He was elected FRAM in 1895 and in 1896 received the Lambeth MusD.

McNaught was acknowledged as an outstanding teacher, combining psychological perception with wide musicianship and deep understanding arising from practical classroom experience. He was probably the most brilliant exponent of the Tonic Sol-fa Method, but his vision was not bounded by any narrow view of its place in musical pedagogy. His aim, in the words of his son, was 'musicianship of the mind with the voice as its instrument'. Besides the publications listed below, many useful items of his teaching are found in the *School Music Review* and in the various editions of John Curwen's *The Teacher's Manual of the Tonic Sol-fa Method*. His son, William (Gray) McNaught (*b* London, 1 Sept 1883; *d* London, 9 June 1953), was a music critic, who wrote for several newspapers and for the *Musical Times*, of which he was editor from 1944 to 1953. He wrote *A Short Account of Modern Music and Musicians* (London, 1937), a sequel to Parry's *Summary of the History and Development of Mediaeval and Modern European Music*, a lucid and unprejudiced account of 20th-century techniques of composition, and contributed on Beethoven (London, 1940) and Elgar (London, 1947) to Novello's series of brief biographies.

WATKINS SHAW

MacNeil, Cornell (*b* Minneapolis, 24 Sept 1922). American baritone. He trained as a machinist before winning a scholarship to the Hartt School of Music, Hartford, Connecticut, where he studied with Friedrich Schorr. From 1946 he took small parts in Broadway musicals. In 1950 Menotti chose him to sing the role of Sorel in the première at Philadelphia of *The Consul*. This led to performances with a number of small American opera companies, and an engagement with the New York City Opera (1952–5), where he developed his gifts in the Italian repertory. Guest appearances included his débuts in San Francisco (1955) and Chicago (1957). His reputation was firmly, and internationally, established in 1959, when he made his débuts at La Scala (as Carlo in *Ernani*) and the Metropolitan Opera (as Rigoletto), in both cases substituting for indisposed singers. In 1960 he opened the Metropolitan season in the company's first production of *Nabucco*. MacNeil's Covent Garden début (as Macbeth in 1964) was praised for his pure and even legato, less for his dramatic involvement. This was the main objection to his performances, and it might be said that his many recordings, which include Rigoletto and Amonasro, present a better view of his art than did his stage appearances. His voice was a true Verdian baritone, crowned by a magnificent top register, though not always well knit to the middle. The high tessitura of Di Luna (*Il trovatore*), for example, was delivered with a technical control that few contemporary singers could rival. He appeared in Zeffirelli's film version of *La traviata*, and in his later career developed into a powerful interpreter of *verismo* roles, notably Scarpia. In 1988 he sang Giorgio Germont to his son Walter's Alfredo at Glyndebourne.

RICHARD BERNAS

Macnutt, Richard (Patrick Stirling) (*b* Hove, Sussex, 22 Nov 1935). English antiquarian music dealer and bibliographer. His interest in musical sources and documentation was first inspired by his enthusiasm for Berlioz, and in 1958 he bought the first items in his Berlioz collection. In December 1960 he acquired the firm of Leonard Hyman (founded 1929). Until 1963 he conducted the business under its old name, but from then on used his own; he retired in 1996. His remarkable series of catalogues, together with his smaller 'Quartos', are of permanent value as a record of the wide range of important material from the 16th to the 20th centuries that passed through his hands, whilst institutional and private collections of many kinds benefited greatly from his acute understanding of their differing natures and needs. He has served on the editorial board of the New Berlioz Edition since its inception, was founder and initially publisher of the facsimile series Music for London Entertainment 1660–1800, and a consulting editor to the *New Grove Dictionary of Opera*. He has contributed many articles on Berlioz to the Berlioz Society Bulletin (1958–80) and on publishers in *Grove's Dictionary* (6th edn) and *Music Printing and Publishing* (London, 1990). His Berlioz collection is now one of the finest devoted to a single composer in private hands.

O.W. NEIGHBOUR

Maconchy, Dame **Elizabeth** (*b* Broxbourne, Herts., 19 March 1907; *d* Norwich, 11 Nov 1994). English composer of Irish descent. The only musician in her family, she began to compose when she was six. She received her musical education at the RCM (1923–9), studying composition with Charles Wood and Vaughan Williams. Throughout her student years, she was strongly encouraged to pursue a compositional career by her teachers, by the college director and by a circle of peers, who included her lifelong friends, Grace Williams, Dorothy Gow and Ina Boyle. During this period, she became acquainted with Bartók's music, an important influence on the development of her own style.

In 1929 Maconchy won an Octavia Travelling Scholarship which took her to Prague, where she had lessons with K.B. Jirák; her music first came to public attention when her Piano Concerto was performed there by Ervín Schulhoff in spring 1930. She returned to London, and the following August – just a week after she married William LeFanu – her suite, *The Land*, was given at a Promenade Concert to great acclaim. The Proms triumph launched Maconchy into the professional world; in November 1930 three of her songs were published, and she became known for her chamber works, which received frequent hearings in public concerts, including the Macnaghten-Lemare Concerts, in BBC broadcasts and at ISCM festivals. Her career changed course in 1932 when she contracted tuberculosis and was forced to move from London. She never again returned there to live, but continued to compose steadily. By 1936 her works had been played in eastern Europe, Paris, Germany, the USA and Australia, as well as in Britain.

During the war, Maconchy and her family were evacuated to Shropshire. By this time she had one daughter, and she gave birth to her second – the composer Nicola LeFanu – in 1947. After the war, she re-established herself in the musical world as a composer of individuality and resource. She won the Edwin Evans Prize with String Quartet no.5 (composed 1948) and took the London County Council prize for Coronation Year with the overture *Proud Thames* (1952–3). She became the first woman chairman of the Composers' Guild of Great Britain in 1959 and was for many years associated with the SPNM, of which she became president in 1976. She was made a CBE in 1977 and a DBE in 1987. She wrote many pieces to commission for professional and amateur organizations and for schools, her later output including a large proportion of operas, theatre works, choral pieces and song cycles.

Maconchy's particular musical individuality emerges most distinctly in her chamber pieces, and most of all in the 13 string quartets, written between 1933 and 1983, which she described as 'my best and most deeply-felt works'. She conceived the dialogue within the quartet as 'impassioned argument' rigorously carried through, every note being essential to the whole structure. The music is largely linear, involving counterpoint of rhythms as well as of melody. Motifs, like Bartók's, tend to be short and compact, often turning back chromatically on themselves. Many movements are driven by strong motor rhythms, while developments concern themselves with a few basic themes and their transformations. From the Second Quartet onwards thematic connections may be established between movements. A quartet may be based on a single idea (as in no.2) or on a group of ideas (as in no.3). No.5

Elizabeth Maconchy

is dominated by an opening canon, no.6 by a passacaglia, in no.8 a single chord provides all melodic and harmonic material, and no.10 is unified by a viola motif linked to a short repeated-chord phrase.

In later years she enjoyed close associations with various performers whose intelligent virtuosity helped to inspire and shape commissioned pieces. In the chamber works of the 1970s and 80s she exploited in Haydn-like fashion the characteristics and foibles of particular voices or instruments. *Ariadne* (1970–71) is remarkable for the freedom and expressive quality of its wide-ranging vocal line and for its intricate, multi-linear orchestration. In *Epyllion* (1973–5) the character of the solo cello is explored in melodic coloratura of a fantastic, semi-improvisatory, kind.

Maconchy was stimulated rather than inhibited by the inevitable limitations involved in writing for children or amateurs. *The Birds* (1967–8) has something of the gusto and good humour of Vaughan Williams's more popular works for amateurs; *Samson and the Gates of Gaza* (1963–4) and *The King of the Golden River* (1975) are strongly dramatic, yet never overstep the limits of what is practicable for children.

Her belief that music is worth nothing if it does not spring from passionate emotion is reflected strongly in the works of her maturity. Her three chamber operas are properly and vividly theatrical. The cantata *Héloïse and Abelard* (1976–8), which is also operatic in mood and form, is a work of italianate passion and intensity. At the other end of the emotional scale, the song cycle *My Dark Heart* (1981) deals in intimate, half-articulated thoughts and desires. By this time, she had moved a long way from the businesslike, no-nonsense mood of her early style, gaining expressive freedom, but without denying or outdistancing her earlier self.

WORKS

STAGE

The Willow Plate (dramatic work, 3 pts), 1931, inc.

Great Agrippa (ballet, after H. Hoffman: *Struwwelpeter*), 1933, concert perf., London, Mercury, 4 Feb 1935; pubd

HUGO COLE, JENNIFER DOCTOR

Maconie, Robin (John) (*b* Auckland, 22 Oct 1942). New Zealand composer and writer on music. He studied with Page at Victoria University, Wellington (1960–63, BA 1962, MA 1963), with Messiaen at the Paris Conservatoire (1963–4) and with Zimmermann and Eimert at the Cologne Hochschule für Musik (1964–5). While in Cologne he also attended the second series of Kurse für Neue Musik, where he benefited particularly from the instruction of Stockhausen, Heike (acoustics) and Schernus (conducting). He returned to New Zealand to work as a film composer (1965–7), as he had during the period 1961–3, a composer of electronic incidental music for the NZBC Drama Unit and a lecturer at Auckland University (1967–8). In 1969 he moved to England, where he has been engaged in criticism and research into the history of music and technology and its relationship to philosophy and science. He taught at the University of Surrey (1975–85) and in 1997 was appointed professor of music at the Savannah College of Art and Design, Georgia. His most important work is the television ballet *Māui*, in which a narration in Maori is heard against a clear-textured orchestral score abounding in physical gestures and recalling at once Stravinsky, Varèse and Webern.

PAUL GRIFFITHS

Macovei, Ion (*b* Sărata-Răzeşi, Leovo district, 10 March 1947). Moldovan composer. In 1973, he completed composition studies with Zagorsky at the Musicescu Academy of Music in Kishinev, and in 1976 finished a postgraduate course under Balasanian at the Moscow Conservatory. His first successes as a composer date from this period and his early compositions, based on a profound knowledge of Moldovan folklore, were notable for their independence. These works, unlike most Moldovan compositions of the time, were not so heavily reliant on Russian models, especially in the way they treated folk music. His treatment of Moldovan songs is both authentic and subtle. The oratorio *Mioriţa* (1974) interprets a popular Moldovan ballad in the form of a passion play; it was the first Moldovan work which demonstrated a purist and authentic approach to folk materials. It became Macovei's most popular work and gained him the State Prize of Moldova in 1990. In his instrumental works – which form a large portion of his output – he combines his instinctive grasp of folklore with Bachian counterpoint. He has also written much music for children, mostly miniatures based on Moldovan material. In 1979 he was awarded a prize for the best works written for children by the Ministry of Education of the Moldavian SSR. His composing career was cut short by serious illness.

IRINA SUKHOMLIN

McPhee, Colin (Carhart) (*b* Montreal, 15 March 1900; *d* Los Angeles, 7 Jan 1964). American composer and ethnomusicologist. He studied composition and piano at the Peabody Conservatory with Harold Randolph and Gustav Strube (1918–21), then returned to Toronto for piano studies with Arthur Friedheim. In 1920 he gave the première of his Piano Concerto no.1 with the Peabody Orchestra and in 1924 performed his Piano Concerto no.2 with the Toronto New SO. From 1924 to 1926 he studied in Paris with Paul Le Flem and Isidore Philipp and then went to New York, where for five years he was an active participant in new-music societies and concerts. A decisive event in McPhee's career occurred in the late 1920s, when he first heard newly released recordings of the Balinese gamelan. He was inspired to travel to Bali in 1931 and remained there, with only a few interruptions, until late 1938. His pathbreaking research on Balinese music documented a decade when the island was still relatively free from outside influences and culminated in the writing of *Music in Bali*, which remains the principal treatise on the island's music. McPhee studied thriving musical traditions, as well as those on the wane, by travelling around the island to work with a variety of orchestras and by turning his native-style house in Sayan into a gathering place for local musicians. He founded several ensembles, including a *gamelan semar pegulingan* and a *gamelan angklung*, to revive dying repertories. While in Bali he associated with a group of Western anthropologists and artists that included Gregory Bateson, Jane Belo, Claire Holt, Margaret Mead and Walter Spies.

McPhee combined the roles of composer and scholar in his approach to Balinese music. He transcribed dozens of gamelan works for two pianos, solo piano, and flute and piano (a number of which he recorded with Britten and Barrère in 1941), and in 1936 he wrote *Tabuh-tabuhan*, his first major orchestral work to incorporate Balinese materials. It was first performed in the same year by Carlos Chávez and the Orquesta Sinfónica de México. After McPhee returned to New York early in 1939 he faced great difficulty in re-establishing and supporting himself. During the 1940s he worked for the Office of War Information (1945–7) and turned principally to prose as his creative medium. He wrote articles about Bali and reviews of scores and recordings for *Modern Music*, *Musical Quarterly* and *Harper's*, and captured the atmosphere of his stay poetically in *A House in Bali* (1946). During this time he made a few unsatisfying attempts at musical composition, including incidental music for plays by Tennessee Williams and Eugene O'Neill and *Four Iroquois Dances* for orchestra. These works, together with most of his early music, were either destroyed or renounced by him. After *Tabuh-tabuhan* finally received its first American performance in 1953 (conducted by Stokowski), McPhee began to compose again. He received commissions from the Koussevitzky Foundation, the Louisville Orchestra, the United Nations, the Contemporary Music Society, Robert Boudreau's American Wind Symphony and BMI. Other honours included a National Institute of Arts and Letters Award (1954) and Guggenheim and Bollingen fellowships. He joined the faculty at UCLA in 1960.

The hallmark of McPhee's musical style is an acute sensitivity to individual timbres coupled with a predilection for textures of multi-layered rhythms. These traits are present in his few surviving early pieces, especially the

Concerto for Piano and Wind Octet (1928), a neoclassical work characterized by frequent explosive sound combinations, and they continue in the compositions McPhee wrote after he left Bali. No experimentalist, McPhee stayed within traditional forms and tonal harmonies even after his imagination was fired by the gamelan. He delighted in making large, dramatic gestures and wrote principally for orchestra and piano. In *Tabuh-tabuhan*, his best-known composition, McPhee used a standard symphony orchestra together with a 'nuclear gamelan' of Western instruments (two pianos, celesta, xylophone, marimba and glockenspiel) and two Balinese gongs. Much of the musical material in this and his later works, such as the Symphony no.2 and the Nocturne for chamber orchestra, was drawn from the many transcriptions he made in Bali – all of which sensitively transfer note-for-note the gamelan's intricate melodic interweavings to Western instruments.

CAROL J. OJA

MacPherson, Donald (*b* Glasgow, 5 Sept 1922). Scottish piper. He studied piping with his father Iain, who had been a pupil of John MacDougall Gillies; at the beginning of the 20th century Gillies was well known as an authority on piping, having been trained in the MacCrimmon tradition. Donald MacPherson was noted for his expertise on the competition platform; he won the senior *pìobaireachd* events at the Argyllshire Gathering on 14 occasions and those at the Northern Meeting at Inverness on nine occasions, and also won the senior light music award six times. In 1948 he won the gold clasp and gold medal at the Argyllshire Gathering, and he repeated this achievement at Inverness in 1954. His playing was characterized by a resonant tone full of harmonics, technical excellence and interpretative skills of high quality. On more than one occasion he took a break from public performance for several years, but he returned successfully to the professional piping arena after each absence, winning numerous awards in prestigious competitions. After his retirement in 1991 he concentrated increasingly on teaching, and several of his pupils became successful pipers. The most popular of his compositions was a jig, *The Curlew*. Some fine examples of his performances are included on the CD *Donald MacPherson: the Master Piper* (Lismor LCOM 9013, 1989).

R. WALLACE

McPherson, Gordon (*b* Dundee, 27 Aug 1965). Scottish composer. He read music at the University of York (1983–6), where his composition teachers were John Paynter and David Blake. He returned there for the doctorate (1988–91) before pursuing post-doctoral studies at the RNCM. In 1987 he won prizes for his string sextet *Prosen* (Yorkshire Arts) and his orchestral work *Bull Bugles* (British Petroleum). He is an accomplished performer on the accordion and has given the British premières of several works for that instrument. He has taught composition at the University of Edinburgh, and, in 1999, was appointed head of composition at the Royal Scottish Academy of Music and Drama where he was previously composer-in-residence. McPherson also lectures in 20th-century music and analysis at St Andrew's University.

Many of McPherson's early works concern themselves with Scotland's political, social and musical heritage. In *Oh, why should I cry upon my wedding day?* (1985), for

instance, the ornamentation of the solo violin line has its ancestry in pibroch. The String Quartet no.2 'Dead Roses' and *Maps and Diagrams of our Pain* (both 1990) reflect McPherson's interest in memory and obsession. The latter explores the problems of compulsive disorder through music which views the same musical object repeatedly from different perspectives: at the opening, for example, two registrally fixed notes in the piano are cast in a variety of rhythmic shapes. Extra-musical stimuli continue to inform McPherson's music in such works as his *Handguns: a Suite* (1995) for instrumental ensemble.

FRANCIS J. MORRIS

Macpherson, (Charles) Stewart (*b* Liverpool, 29 March 1865; *d* London, 27 March 1941). English music teacher of Scottish descent. After studying at the RAM he joined the staff as a professor of harmony and composition in 1887. For some years he was organist of Immanuel Church, Streatham, and conducted choral and orchestral societies. Until 1923 he was chairman of the Music Teachers' Association, which he founded in 1908, and from 1925 to 1927 he was dean of the Faculty of Music in the University of London. He also composed, his longer works including a Symphony in C (1880), a Mass in D (1898) and a *Concerto alla fantasia* for violin and orchestra (1904). But his important work was in musical education, where his influence in two directions was considerable. Beginning with a conventional though pedagogically clear view of the teaching of harmony, he later, in *Melody and Harmony*, struck out in several new directions. Also, impressed by the failure of many students to consider the music they played as a body of literature, he became a pioneer in the movement known as 'musical appreciation', which he intended as a complement to technical training. He always insisted that musical appreciation be based on aural perception, though his children's books written jointly with Ernest Read seem to put the matter the other way round.

WATKINS SHAW

Macque, Giovanni de (*b* Valenciennes, ?1548–50; *d* Naples, Sept 1614). Flemish composer, organist and teacher, resident in Italy. He was a leading composer of the Neapolitan school in the late 16th and early 17th centuries.

1. LIFE. Macque's birthplace is given on his marriage contract and on the title-page of his volume of motets of 1596. As a boy he sang in the choir of the imperial chapel at Vienna. A memorandum of 7 December 1563 recommended that he be placed in the Jesuit college at Vienna because his voice had broken: this establishes his approximate date of birth. After he left the college he studied with Philippe de Monte and by 1574 he had moved to Rome under the patronage of Monsignor Serafino Oliviero Razzali, Judge of the Sacra Romana Rota. From 1 October 1580 to 21 September 1581 he was organist of S Luigi dei Francesi, Rome. During this period Macque established relationships with members of the Caetani family. It was probably through the influence of Cardinal Enrico Caetani that four of his polychoral motets appear in a manuscript prepared under the auspices of Annibale Zoilo for the Lenten music at the SS Trinità dei Pellegrini in the early 1580s. Together with G.M. Nanino, Marenzio, Giovannelli and others, he was a member of the Compagnia dei Musici di Roma when it won papal sanction in 1584.

During the early part of 1585 Macque moved to Naples where he was employed by the Gesualdo household. His publications during this period are dedicated to prominent members of the Neapolitan nobility: Carlo Gesualdo and his father, Fabrizio, Cesare D'Avalos and Scipione Pignatello. In May 1590 he was appointed second organist to Scipione Stella at SS Annunziata. In 1594 he became organist of the chapel of the Spanish Viceroy and five years later *maestro di cappella*, succeeding Bartolomeo Roy. During his tenure the musical forces were doubled, and two of his pupils, G.M. Trabaci and Ascanio Mayone, served as first and second organists. Other distinguished pupils included Francesco Lambardi, Donato Antonio Spano, Andrea Falconieri and Luigi Rossi.

2. WORKS. Macque's compositions may be divided into three chronologically and geographically defined groups:

the Roman works from the years 1574–84, the early Neapolitan works 1585–96 and the later Neapolitan period, 1597–1614. The early madrigals reflect the conservatism of his Roman contemporaries. More colourful tendencies occasionally appear, and they are more frequent in his publication of 1579: in *Di coralli e perle*, for example, the extensive melodic movement of the minor second results in expressive harmony foreshadowing the experimental, roving harmonies of his later works. The two books of *Madrigaletti et napolitane* (1581–2) are modelled on the *canzone alla napolitana* of Ferretti. Many of them still retain the formal scheme of the villanella (AA^1BCC^1), but there is a greater emphasis on pictorial treatment. The serious madrigals of the early 1580s are tempered by his association with Marenzio, who was some ten years younger. They are in a more popular style. Simple diatonic melodies appear in playful imitation contrasting with sections made up of short, regular homophonic phrases. The lowest voice often has the character of a harmonic bass moving mostly in 4ths and 5ths. The greater demands in several of the madrigals published in Ferrarese anthologies during this period suggest that they were written for that court's *concerto di donne*. The polychoral motets and the litany for two and three choirs from the Roman period follow the same procedure adopted by Palestrina in his motets published in 1576. Each choir maintains its complete harmonic function and cadence points do not overlap. This style was suited to the acoustics of the larger churches and oratorios in Rome.

A series of letters written by Macque between 1586 and 1589, preserved in Caetani Archives in Rome, discuss his concern with the publication of two books of madrigals (1586 and 1587) and a book of ricercares and *canzone francese* (1586). In the *Primo libro de madrigali* Macque exploited a technique that foreshadows some of his later music: two voices proceed in 3rds or suspensions while the remaining voices have an interplay of short motives in imitation. The passage is repeated in invertible counterpoint. The madrigals of the *Secondo libro* for five voices are in the style of the canzonetta. Among Macque's canzonettas of this period is his contribution to *Il devoto pianto della gloriosa Vergina* (RISM 1592[5]), the Italian adaptation of the *Stabat mater* published by Verovio. Macque's only published book of motets (1596) was dedicated to Francesco Maria Tarugi, one of the founders of the Oratorio di S Filippo in Naples. The six-voice motet *Rex autem David* stands apart from the rather conservative style of this collection in its use of chromaticism and harmonic inflections depicting David's grief over the death of his son Absalon.

Macque's final group of publications begins with the *Terzo libro* for five voices (1597), dedicated to Alfonso II, Duke of Ferrara, and published by the ducal printer Baldini. The book consists mainly of pastoral texts chosen with the Ferrarese court in mind. In his fourth book (1599), Macque developed the technique first essayed in the *Primo libro* for four voices: combining descending or ascending chromatic passages in imitation with counter motives in short note values. In the last two books (1610 and 1613) intervals 'forbidden' in 16th century counterpoint appear for the first time in his music. He experimented here with new verse styles as well: several of the texts in both books consist solely of *quinarii*, and the madrigal cycle based on the concluding *terze rime* from Sannazaro's *Arcadia*: *I tuoi capelli, o Filli, in una cistola* provided Macque with his only *sdruccioli* verse.

Macque's instrumental and keyboard works embrace a wide range of forms, including ricercares, canzonas, capriccios, variations on the Ruggiero and a *toccata a modo di trombetta*. Among the works that have received most attention are the *Consonanze stravaganti*, *Durezze e ligature*, and the *Prima e seconda stravaganze*. His ricercares are based on multiple subjects which are stated in the opening exposition. The *Ricercare del 8 tono con quattour fughe* from his second book (preserved only in manuscript copies) served as a model for Frescobaldi's *Recercar nono: Obligo di quattro soggetti* (1615).

W. RICHARD SHINDLE

McRae, Carmen (*b* New York, 8 April 1920; *d* Beverley Hills, CA, 10 Nov 1994). American jazz singer. She studied the piano privately in her early years and began her career as a singer with Benny Carter's orchestra (1944). Her early and enduring influence was Billie Holiday. After performing with the bands led by Count Basie and Mercer Ellington (1946–7) she worked as an intermission singer and pianist at Minton's Playhouse and other clubs in New York, where she listened to and absorbed the sounds of bop, and came under the influence of Sarah Vaughan. In 1955 she signed a recording contract with Decca, which issued her superb renditions of *Suppertime*, *Yardbird Suite* and *You took advantage of me* (all in 1955). From that time she pursued an active career as a solo singer, performing in clubs, at concerts and at festivals; she made several tours of Europe and Japan from the 1960s into the 1980s. In 1967 she settled in Los Angeles. In 1988 she recorded an album of vocalese versions of compositions by Thelonious Monk *Carmen Sings Monk* (Novus). Illness forced her retirement in 1991.

McRae's voice had an immediately recognizable 'smoky' timbre, and she performed popular ballads and jazz numbers with bop phrasing and inflections. She was especially inventive as a scat singer and had an instinctive feeling for rhythm. She was also a thoroughly competent pianist.

ED BEMIS

MacRae, Gordon (*b* East Orange, NJ, 12 Mar 1921; *d* Lincoln, NE, 24 Jan 1986). American actor and singer. Known for his good looks, pleasant smile and smooth baritone voice, he is best remembered for his work in film adaptations of Broadway musicals during the 1950s. His two most important roles were Curly McLain in *Oklahoma!* (1955) and Billy Bigelow in *Carousel* (1956). Other notable films include *Look for the Silver Lining* (1949), *Tea for Two* (1950), *By the Light of the Silvery Moon* (1953), *The Desert Song* (1953), and *The Best Things in Life Are Free* (1956). Prior to his move to Hollywood, MacRae was a band singer and nightclub performer. His career was blighted by the decline of the movie musical and he returned to the stage and nightclub circuit in the 1960s. Two of his daughters, Meridith and Heather, became actresses.

MacRae possessed a clear lyric baritone voice with attractive masculine, yet non-operatic, qualities. With his large range and full ringing tone, he had the ability to make technically difficult music sound easy to sing. He epitomized the American, as opposed to the European, baritone sound, and delivered a distinct and intelligible American version of English largely responsible for making American English a recognized singing language.

WILLIAM A. EVERETT, LEE SNOOK

Macri [Macro], **Paolo.** *See* MAGRI, PAOLO.

Macrobius Ambrosius Theodosius (*fl* first half of the 5th century CE). Latin writer. He is thought by some to have been the prefect in Spain (399–400 CE) or the proconsul in Africa (410 CE) cited in the Codex Theodosius but now identified with Theodosius, praetorian prefect in Italy in 430 CE. He was the author of a treatise comparing Greek and Latin verbs (*De verborum graeci et latini differentiis vel societatibus*), a commentary on Cicero's *Somnium Scipionis* and a *Saturnalia*, the last two of which were dedicated to his son, Fl. Macrobius Plotinus Eustathius, city prefect in about 461 CE. Together with the writings of BOETHIUS, MARTIANUS CAPELLA, CASSIODORUS and ISIDORE OF SEVILLE, Macrobius's commentary helped preserve and communicate ancient science and Neoplatonic theory in the Middle Ages. The *Somnium Scipionis*, with its dramatic language, images of the harmony of the spheres and observations about the nature and ascent of the soul, provided Macrobius with an ideal basis for commentary on such subjects as the classification of dreams, Pythagoras's discovery of musical consonance and Pythagorean number theory, the nature of virtue, distinctions between mortality and immortality, the Neoplatonic hypostases, movements of the celestial and planetary spheres and their harmonious sound, and the superiority of Plato's view of the soul over Aristotle's. Derived in large measure from Porphyry's commentary on the *Timaeus*, Macrobius's commentary (i.6 and ii.1–4) was a particularly important source for the medieval understanding of Pythagorean musical mathematics. The *Saturnalia*, with its emphasis on Virgil, rhetoric, poetics and such lighter topics as food and drink, became more widely known in the Renaissance.

THOMAS J. MATHIESEN

Macropedius, Georgius [Langhveldt, Langveld, Lankveld, Joris van] (*b* Gemert, North Brabant, *c*1475; *d* 's-Hertogenbosch, July 1558). Dutch dramatist and composer. After attending the school of the Brethren of the Common Life at 's-Hertogenbosch and the University of Leuven he became a Hieronymite monk. He served as rector in schools of the order, first at 's-Hertogenbosch, later at Liège and beginning in 1540 for 13 years at Utrecht. Acclaimed as a successful dramatist and outstanding scholar in Latin, Greek and Hebrew, he retired in 1553 to 's-Hertogenbosch, where he died.

The importance of Macropedius in music history lies in the music written for his Latin comedies and morality plays. With the exception of *Andrisca* (1539), which contains two four-part choruses, early editions of his works lack any music. In 1552 11 plays were published with strophic monodies to be sung by a chorus at the conclusion of an act. In several plays the protagonists also have short solo songs. The melodies are simple and are set syllabically to one of the classical poetic metres. In *Lazarus* there is a duet sung by two angels; *Joseph* requires four pipers (*tibicines*), although their music is not given.

CLEMENT A. MILLER

McSwiney, Owen. *See* SWINEY, OWEN.

McTee, Cindy (*b* Tacoma, WA, 20 Feb 1953). American composer. She studied with David Robbins at the Pacific Lutheran University, Tacoma (BM 1975), and with Jacob Druckman, Penderecki and Bruce McCombie at Yale University (MM 1978), and gained the PhD in 1981 under the direction of Richard Hervig at the University of Iowa; she also studied with Penderecki, Marek Stachowski and Krystyna Moszumańska-Nazar at the Kraków Conservatory. She was appointed to the University of North Texas in 1984, becoming professor in 1995. She has received a Senior Fulbright Scholar Lecturing award in electronic music at the Kraków music academy and other awards, and commissions from the Barlow Endowment for Music Composition, the American Guild of Organists and other organizations.

McTee composes for both acoustic and electronic media, and her works have been performed in Asia and Europe as well as the USA. Her musical ideas are often derived from visual and literary elements and reveal a keen sense of humour and careful attention to the placement of sound images and effects within acoustical space. Juxtaposition of contrasting musical elements is a feature of her works, many of which contain multiple short movements of changing style and mood.

ELIZABETH HINKLE-TURNER

McTell, 'Blind' Willie [McTell, Willie Samuel] (*b* McDuffie County, nr Thomson, GA, 5 May 1898; *d* Milledgeville, GA, 19 Aug 1959). American blues singer, songster and guitarist. Blind from birth, he was trained at schools for the blind in Georgia, New York and Michigan. Much of his adult life was spent in Atlanta, though he travelled extensively, even as far as Mexico in order to perform as a professional musician. His first recordings, made in Atlanta, included *Mama 'tain't long fo' day* (1927, Vic.), which revealed his effortless 'bottleneck' slide style on the 12-string guitar. *Atlanta Strut* (1929, Col.) is a ragtime dance theme with imitative, impressionistic guitar breaks and spoken narrative. There followed a long series of recordings with extremely varied instrumental accompaniments which established McTell as the most versatile of the Piedmont school; his voice was more 'white' than that of many Georgia blues singers, but nevertheless ideally suited to the blues, as on *Death Cell Blues* (1933, Voc.) with its excellent lyrics. McTell had a number of guitar-playing partners including Blind Log (Byrd) and Curly Weaver. He also accompanied women singers including Kate Williams, whom he married in 1934. In 1940 McTell

was recorded for the Library of Congress in a session that showed the great breadth of his repertory, including the ballads *Chainey* and *Delia* (1940, Sto.). This songster aspect of his work was also evident when, 16 years later, he made his last recordings, which included the ribald *Beedle um bum* and a final version of his celebrated guitar rag *Kill it Kid* (both 1956, Bluesville).

PAUL OLIVER

Madagascar (Malagasy Repoblikan'i Madagasikara). Country situated off the coast of south-east Africa. With an area of 587,041 km², it is the fourth largest island in the world. At the end of the 20th century, it had an estimated population of 17·4 million.

1. Historical background. 2. Musical characteristics. 3. Main musical style areas: (i) The central highlands (ii) The east (iii) The south and west (iv) The north-west coast. 4. Musical instruments. 5. Popular music.

1. HISTORICAL BACKGROUND. The origins of the Malagasy are unknown: many cultural phenomena indicate prehistoric contacts with South-east Asia, in particular the Malagasy language, which is most closely related to Ma'anyan in south Borneo and belongs to the Austronesian family of languages. Arabic, African and European influences were subsequently added to this original South-east Asian foundation. For a long time, the African element in the islanders' culture was thought to be slight, but it is now generally recognized that not only were African slaves brought to Madagascar but free Africans also emigrated to the islands. Elements of Bantu language exist in every Malagasy dialect and seem to have been established for some time.

The Malagasy of Asiatic origin have settled mainly in the highlands (the Merina people), while African influence is strongest among the people of the west of the island (the Sakalava and Makoa) and the south (the Bara, Mahafaly or Maharaly and Antandroy or Antardroy). Muslim communities in Madagascar were reported by early European travellers in the early 16th century; traces of Arab contact occur in groups living on the north-west coast (the Boina-Sakalava and the Antankarana or Tankarana) and the south-east coast (the Antaimoro or Taimoro).

European colonial policies first affected the island in 1500, when the Portuguese explorer Diego Díaz visited the island. At this time, three great kingdoms had developed: the Merina, the Betsileo and the Sakalava. The courts of these kingdoms encouraged a wide range of secular arts expressed in highly complex ways. The Sakalava courts were famed for their women's choirs; the minstrels at the Betsileo courts sang both epics and short *haiku*-like poems of great clarity and perception; and the Merina courts are reputed to have been the scene of innumerable musical endeavours. The Merina kingdom gradually won political supremacy, uniting the majority of the 18 ethnic groups into a single state by the mid-1800s. Under Radama I (1810–28), Queen Ranavalona I (1828–61) and Radama II (1861–3), the British and French first got a foothold on the island. The court converted to Protestantism in 1869, and slaves on the island, most of them Africans, were emancipated in 1877. From 1896 to 1960 Madagascar was a French colony. Since independence in 1960, the island state has experienced a number of political vicissitudes. It has been governed democratically since 1993.

2. MUSICAL CHARACTERISTICS. The music of Madagascar unites the syncretism of a cultural melting-pot with a marked independence that may be ascribed to its island situation. Certain characteristics apply to all its regions: most Malagasy music is based on a number of heptatonic modes, while pentatonic music is found principally in the south. Polyphony is widespread everywhere; the preferred harmonic intervals are major and minor 3rds. As well as isometric rhythms, there are many bimetric rhythms, upon which most dance forms are based; two formal types, the open periodic form and the declamatory form, are found throughout the country. Antiphonal ensemble singing is principally found in the coastal areas, and strophic song in the highlands. Characteristic vocal techniques are a strained, nasal style in the highlands and vibrato in the south.

The music of Madagascar clearly reflects the island's proximity to the African continent, particularly in its basic rhythms. Most of the musical forms, especially in the coastal regions, are constructed on a pattern of pulses and beats that is fundamental to all their rhythmic manifestations. The predominance of the formal number 12 favours metrical diversity, for instance in the simultaneous and successive appearance of binary and ternary forms. Divisions of rhythmic patterns largely depend on whether the music is for singing or dancing. The rhythms of dance styles tend to be regular and are based on two, four or multiples of four beats. Singing styles are more complex with rhythmic patterns often based on a multiple of three beats in which subsidiary accentuation breaks the basic metre into uneven units. A division of 12 beats into units of 3 + 2 + 3 + 2 + 2 is common, as well as a division of 24 beats into 5 + 7 + 7 + 5. Traces of an Asiatic inheritance are still present in some instruments (for instance the use of the *valiha* tube zither), in vocal style (the strained head voice) and in some of the dances (in the virtuoso hand and finger movements of the bird dances).

3. MAIN MUSICAL STYLE AREAS.

(i) The central highlands. The music of the people of the central highlands or plateau, particularly the Merina and Betsileo, was the most strongly influenced by European models. From 1820 onwards, missionary, trade and diplomatic connections were concentrated on this part of the island. Missionary work was pursued with great efficiency, particularly by the London Missionary Society and its Norwegian equivalent, the Norske Misjonsselskap. After the French occupation of the country, these efforts were reinforced by Catholic missionaries. The eradication of many phenomena of traditional culture went hand in hand with the spread of liturgical music. The formation of a military band in the Merina army and the founding of music schools on the European model established and reinforced the influence of Western musical culture.

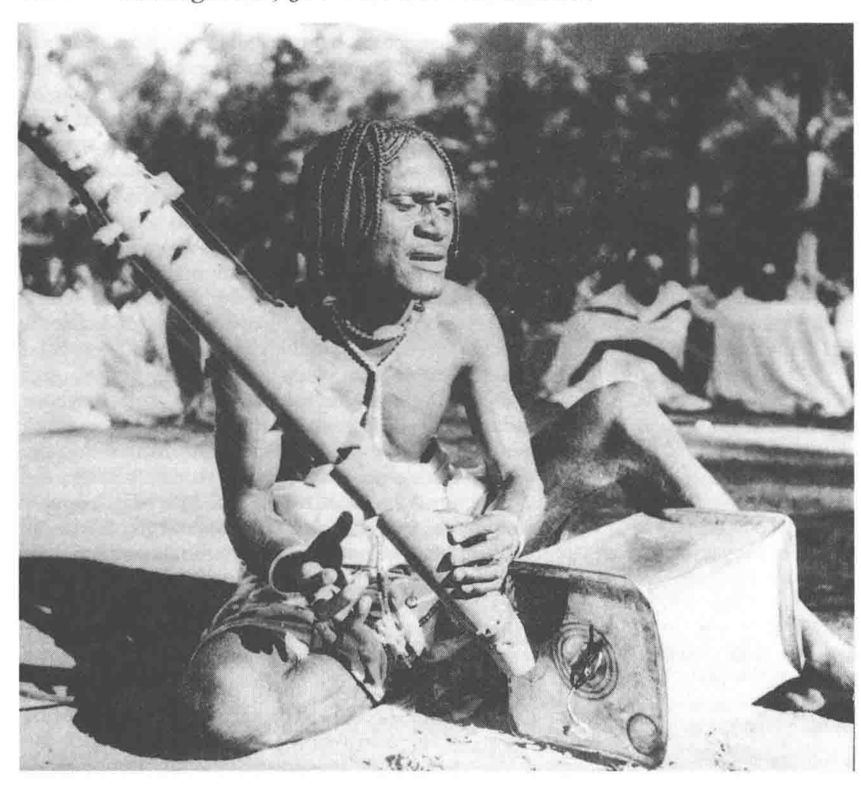
The adaptation and transformation of Western ideas led to their absorption into existing local culture. King Radama II composed piano pieces that show a certain tendency towards Malagasy idioms. This soon spread to

church music, particularly Catholic church music, and subsequently led to the development of syncretic traditions still extant today. The collective terms *vako-drazana* (traditional or folk music and dance) and *dihin'ny ntaolo* (literally, dances of the ancestors), relate mainly to such stylistically hybrid forms. They represented a thriving culture of public performance, which has assumed the status of national Malagasy folklore. Many elements in it derive from the *hira gasy* theatre, in which moral tales are performed in song, dance, mime and elaborately extravagant language, to an audience gathered around the stage. The instruments of the ensemble for this genre, consisting of 10 to 24 players, include large and small drums, violins, accordions, trumpets and clarinets. Performances are given at markets and festivals such as the reburial ceremonies (*famadihana*) common in many parts of Madagascar.

Other popular hybrid vocal forms in the highlands are the *kalon'ny fahiny* (songs of the old days), often sung as duets in parallel 6ths, sentimental songs accompanied by gestures, and *zafindraony*, choral songs always performed at high volume by loud male voices, with a separate bass line. *Zafindraony* are sung mainly at wakes. The *rija* verse epic of the Betsileo, on the other hand, is bardic music showing little trace of Western influence and is always performed by two men accompanied by stick zithers. The *vakisôva*, songs in verse form originally performed at festivals, have developed in urban areas into songs of social criticism on the part of the underprivileged. Some of the best known musicians of Madagascar, for instance Dama Mahaleo and Paul Bert Rahasimanana (Rossy), are masters in this genre.

(ii) The east. The music of the east (the Betsimisaraka, Sihanaka, Bezanozano, Tanala, Antambahoaka or Tambahoaka, Antaimoro, Antaifasy or Taifasy, Antaisaka or Taisaka and Antanosy or Tanosy peoples) became very popular throughout the country in the 1960s through the recordings of the *valiha* virtuoso Rakotozafy. To this day, however, the east coast has remained to a great extent *terra incognita*. *Jijy*, a kind of praise and narrative song, is the most important form of music. In this art, which is also found in the north-west of the island among the Tsimihety and Sakalava, the interpreter usually accompanies himself on an instrument such as a lute, *valiha* or accordion. By way of contrast, *osika* denotes a kind of collective performance at ceremonies of very different kinds: singing alternates between a group of singers and the chorus, accompanied by hand-clapping and drums. The traditional *zanakorovana* women's songs, accompanied by pounding sticks, are sung at religious ceremonies of thanksgiving, and the *kalamaka* are performed at funeral ceremonies.

(iii) The south and west. A wide variety of different musical traditions has been preserved in the remote and extensive areas of steppe and savanna to the west and south of Madagascar, among the Sakalava, Masikoro, Vezo, Bara, Antanosy, Mahafaly and Antandroy peoples. The immigration of Merina and Betsileo to the fertile river plains has also made their own forms of musical expression familiar and very popular.



Because there was little influence on it by Christian missionaries, the traditional nature of this music has on the whole survived. Music is an essential component of ceremonies during which the celebrants make contact with their ancestors. As well as funerals and circumcisions, there are séances of possession such as *tromba* and *bilo*. The diversity of musical forms of expression on these occasions is partly the result of the heterogeneous nature of the Malagasy pantheon, in which the individual gods all have their own repertory, and partly due to the different functions of the music: to induce a trance, to invoke spirits, to aid the healing of the sick, to give thanks, to take leave of the spirits and so on. As well as the actual religious rituals with their own musical forms (for instance the *kolondoy* ceremonial song of the Sakalava, which is accompanied by drums and hand-clapping), the ceremonies for funerals and circumcisions, often lasting several days, include many subsidiary events. The Mahafaly and Antandroy peoples have praise-songs called *beko*, telling the tales of past rulers whose descendants still enjoy great prestige. Musicologists often connect this richly ornamented song with Arab influence.

Antsa is a wide term embracing women's songs for both religious and secular occasions. Also very popular are competitive sports such as *ringa* wrestling to drums (in the south) and *morengy* boxing to the accompaniment of a large cone drum and a metal idiophone (in the west). Instances of the original use of the vocal apparatus to make rhythmic patterns are the *rimotse* of the Antandroy (noisy and spasmodic breathing) and the *kagnaky* of the Sakalava (grunting, screeching, hissing, whistling etc.).

(iv) The north-west coast. The variety of musical forms is greatest on the north-west coast because of both the ethnic diversity of its people (Sakalava, Antankarana, Tsimihety, Makoa, groups from the highlands and emigrants from the southern desert regions) and the connections of the area with the nearby Comoro Islands. The majority of Malagasy Muslims live in this region. Islamic musical genres, closely linked to the Swahili culture of East Africa, include the *maolidy* women's dances and recitations, the *deba* round dance performed by girls, the *daira* recitations and dances of men, the men's *kigôma* and *kasohida* dances and the women's *oadra* rice-stamping dance. The musical forms subjected to a strict ritual in honour of the dead and living kings of the Sakalava should also be mentioned; they include the *rebiky* dance, in which two men perform a dance symbolizing the battles between rival sub-groups of the Sakalava.

4. Musical instruments. Through the study by Sachs (1938) and later work based on it, the field of Malagasy musical instruments has been thoroughly explored. The most important instruments of Madagascar are idiophones, including pounding sticks, clappers, stamping tubes, scrapers and rattles. The *atranatra* or *atranatrana* (free-key or 'leg' xylophone), sparsely distributed in the south-west of the country, is often cited as important evidence for cultural influence on Madagascar from south-east Asia, but it shows considerable material, conceptual and structural similarities to traditional south-east African xylophones. Known also as *katiboky*, *kilangay* or *valihambolo*, it may have up to 12 keys but only five or seven are normally used in performance. The instrument was traditionally used for sacred ceremonies, but it is now used for secular purposes, except among the Bara.

Drums are important in ceremonials and, as utensils employed for religious purposes, are surrounded by taboos. Double-headed cone drums (*hazolahy*, *dabalava*, *manandria*) are often used in sacred ceremonies. The gigantic *bekiviro* goblet drum is used in festivities

Valiha (tube zither) player, Madagascar

honouring the Sakalava dynasty that ruled western Madagascar before the French invasion. Flute and drum ensembles perform at festivals, and in the highlands they consist of three long flutes, a *langorona* snare drum and a large *amponga* drum. In the south, such ensembles usually contain over two double-headed cylindrical drums (*amponga be*, *karataky*, *karadibo*) of different sizes, including the small drum, and the flutes are often replaced by accordions. Small kettledrums or pottery barrel drums (*ampongavilany*) are also played, and the Muslims of the north-west have frame drums (*tary*).

A double reed instrument of Arab origin (the *anjomara* or *kabiry*) is played on the north-west coast. Side-blown coiled horns and trumpets or zebu horns (*antsiva*, *bankôra*) are blown by village chiefs and sailors as signalling instruments and are played at circumcision ceremonies. The diatonic accordion (*angoradao*, *gorodo*, *hereravo*), introduced from Europe in the middle of the 19th century, is one of the most widely distributed musical instruments in Madagascar today and is played mainly at ceremonies of possession.

Sodina is the common term used for flutes, which may be straight (short or long), curved or with a flared bell. The *soly* (or *sody*) is a short straight flute found in the south and south-west. It has between four and six fingerholes, and the mouthpiece is usually chamfered. The long straight flute (*antsodina*) is similar and is principally associated with the Sakalava. *Sodidiva* is the term for all long flutes with a bell, generally found among the Sihanaka. Flutes are played only by men and always in ensembles, which usually consist of three flutes and two drums. Such ensembles take part in secular ceremonies and also rites such as circumcision.

Dying traditions are those of the ground bow (*pitikilangay*), the musical bow with gourd resonator and tuning loop (*jejo lava*) and the stick zither (*jejo voatavo*), which resembles the East African *zeze*. The Betsileo and the Merina still use the *jejo voatava*. Until the end of the 19th century, it was also found among the Antandroy, Sakalava, Tanala, Antaisaka and Antaimoro or Taimoro peoples, and in the first half of the 20th among the Bezanozano and the Sihanaka. It was formerly played at home or while on watch during rice harvests, but it is now generally used to entertain at fairs, bull-fights and other popular entertainments.

The *valiha* tube zither (see illustration) is sometimes described as the national instrument of Madagascar, but it is not often found today outside the central highlands and the north. The heterochord variant, consisting of a bamboo tube strung with on average 15 to 20 steel strings, is much more usual. The *valiha* can sometimes be played by women; otherwise, string and wind instruments are reserved for men. The box zither (*marovany*, *valiha*, *salegy*) has parallels with the tube zither in its manner of playing and its tuning in sequences of 3rds. Its major use is in the *tromba* rites of possession.

String instruments of various kinds, but all included under the common name *lokanga*, are found in the highlands and the south and derive from the viols introduced by European sailors in the 16th and 17th centuries. The violin has established itself in the highlands (for further information, see M. Domenichini-Ramiaramanana: 'Lokanga', *Grove I*). The most common musical instrument in Madagascar today is a simple long-necked lute (*Kabôsy* or *Rabosa*, *mandoliny*) with one to six strings. It is used mainly to accompany song, but can be played solo. Ensembles consisting of several lutes, drums and rattles, and frequently modelled on European examples, are widespread.

5. Popular music. The modern popular music of Madagascar is deeply rooted in local traditions. Some genres, none the less, are found throughout the country. The *salegy*, a rapid bimetrical dance, was invented in the north-west in the 1960s and was soon taken up by groups all over the country. The *basesa* of the east coast, the *sigôma* of the north, the *baoenjy* of the north-west and the *tsapiky* and *kinetsanetsa* of the south are other examples of a flourishing dance-music of the inhabitants of the coastal districts, or *côtiers*, which is distinct from the more vocally orientated popular music of the highlands.

Since the 1970s there have been stronger influences from Africa, particularly Kenya (*benga*), South Africa (*mbaqanga*) and the former Zaïre (*soukous*, *kwassa kwassa*), from the nearby islands of Réunion and Mauritius (*sega*) and from the Caribbean (*zouk*). The activities of the local recording companies Discomad and Kaiamba greatly encouraged this music but were superseded at the end of the 1980s by the production of cassettes. At the same time, Malagasy music rose sharply in popularity on the 'world music' market of the Western world.

AUGUST SCHMIDHOFER (with MICHEL DOMENICHINI-RAMIARAMANANA)

Madama Europa. Italian singer. Sister of Rossi, salamone.

Madan, Martin (*b* Hertingfordbury, Herts., 1725; *d* Epsom, 2 May 1790). English writer and composer. He was the son of Colonel Martin Madan (1700–56), MP and equerry to Frederick, Prince of Wales; he was also a cousin of the poet William Cowper. He was educated at Westminster School and Christ Church, Oxford (BA, 1746): to his father's annoyance, he 'fiddled and shot partridges' at Oxford. Called to the Bar in 1748, he led a dissolute life until he was converted in 1750 by hearing John Wesley preach. Under the influence of Selina, Countess of Huntingdon, he later joined the Calvinistic branch of the Methodist/Evangelical movement, and was ordained a deacon of the Church of England in 1758 and a priest in 1759. He acquired a reputation as a preacher, 'itinerating' round the country as late as 1768.

However, he soon began his life's work of charity, dedicating his gifts as well as his considerable wealth (he had inherited a fortune from his father). Already a governor of the Foundling Hospital, in 1759 he offered to serve without stipend as chaplain to the newly founded Lock Hospital for venereal patients. The offer was eagerly accepted, and he financed the building of a new chapel, completed in 1762. In 1760 he had compiled and published *A Collection of Psalms and Hymns*, which is regarded as the first comprehensive hymnbook of the Anglican Evangelicals. It was largely based on George Whitefield's *Hymns for Social Worship* (1753), and included hymns of a kind not then accepted for general Anglican use: of 171 in the first edition, 89 are by Charles

Wesley and 44 by Isaac Watts. The book was soon adopted for use in the hospital chapel. It ran to 13 editions, the last in 1794, and was superseded at the hospital only in 1803.

In about 1762 Madan turned his attention to the music, issuing 12-page booklets which were eventually gathered into *A Collection of Psalm and Hymn Tunes: to be had at the Lock Hospital* (in successive editions, *c*1766, 1769, 1792, the last completed by Charles Lockhart). All but three of its texts came from Madan's hymnbook. This too was widely adopted and became known as the 'Lock Hospital Collection'. It was reprinted at Boston, Massachusetts, in 1809, and was enormously influential on Anglo-Saxon church music in general. Madan gave the profits of both his books to the hospital.

The tunes were mostly original, and broke new ground by their style and character. Most are duets for equal voices with continuo, in the fashionable *galant* taste, with trills and other graces and much dynamic variation. They even include examples by Italian opera composers such as Giardini and Alessandri, as well as nine theatrical specimens by Burney, but the largest number (45) are by Madan himself. The hospital patients were hardly capable of forming a choir: they were housed in hidden galleries in the chapel, where they listened in silence. But with the help of the chapel organist, Lockhart, Madan was able to persuade the fashionable congregations to sing this music, and even to attend weekly practices. He also instituted an annual oratorio performance in the chapel.

He was involved in more than one controversy. In a work called *Thelyphthora; or, A Treatise on Female Ruin* (London, 1780), he advocated polygamy as a solution to the appalling social conditions that made the Lock Hospital necessary. The resulting outcry led to his abrupt retirement from his duties at the hospital, though he remained nominally chaplain until his death. His book had much influence on Samuel Wesley.

Madan was a skilful composer, and published *Six Sonatas for a German Flute & Violin or two Violins* (London, *c*1780) and *A Sonata for Harpsichord or Pianoforte* (London, *c*1785). The elegant artificiality of his hymn tunes seems strangely unsuited to the passionate fervour of many of the texts. His basses are static, his harmonies conventional; yet the melodies undeniably have a touch of genius. They clearly filled a need of the time, for many of them were reprinted in hundreds of tune books in Britain and the USA. The compilers of four American collections between 1793 and 1807 actually coupled Madan's name with Handel's as a model for composers of sacred music. The most enduring tune was 'Hotham', still widely used for Wesley's *Jesu, lover of my soul*; other hugely successful tunes were 'Leeds' and 'Denbigh'. The more extended 'Denmark' (*Before Jehovah's awful throne*) remained a standard 'set piece' for several generations, and was by far the most popular through-composed composition printed in America before 1811.

NICHOLAS TEMPERLEY

Mãdar [mãdal, mandar, mandal, mardal, mādal, madal]. Double-headed drum, with baked clay body and laced skin heads, found among Austro-Asiatic and Dravidian Ādivāsī groups as well as non-Ādivāsī musicians throughout East-Central India, including the states of Orissa, southern Bihar, Madhya Pradesh, West Bengal and eastern Uttar Pradesh.

The size and shape of the *mãdar* vary depending on the group and geographic area. The two most common shapes are barrel-shaped and conical (straight or slightly waisted). In both the right-hand head is smaller, and higher in pitch, than the left.

The hollow shell of the *mãdar* is a thin wall of baked clay whitewashed with white clay or slaked lime. For added strength cowhide lacings about 2 mm wide are pasted around the shell in close parallel bands. Monkey hide is preferred for the right head, but has become scarce so that goatskin may be substituted for it. The left head is usually made of calfhide. The skins are held in place by plaited straw hoops and a strip of skin about 1 cm wide overlapping the outer edge of each head. The skins and hoops are tied in a close network of lacings which runs the length of the drum. Additional thongs of cowhide running from one head to the other hold the skins permanently at the required tension. The right head is usually treated to within 3 or 4 cm of its edge with many layers of a permanent paste of clay and a grain, typically rice. Each layer is rubbed well with a stone and allowed to dry. The centre of the left head is covered 1–4 cm from its edge with several, more temporary, layers of the same paste, applied with the hand, without rubbing, and allowed to dry. The left head is decorated with painted geometric designs, and the entire drum is often wrapped in a colourful cloth.

Although the *mãdar* is primarily associated with Ādivāsī groups, its shell is made by members of the Kumhār (potter) caste and its heads made and attached by members of one of the area's leather-working castes (such as the Mūcī, Ghãsī Mahali, Turi or Goṛāit). The player, usually a man, holds the drum horizontally before him, slung around his neck by a leather or cotton cord. For many Ādivāsī groups the drum's presence is essential at the village dancing-ground. *Mãdar* players dance as they play, swinging the drum in front of them, turning with it, and bending forward to lower it nearly to the ground. In Orissa and some parts of West Bengal the drum is also part of the percussion ensemble which accompanies the *chau* (*cho*) dance-drama and the *nacini* dance. *Mãdar* rhythmic patterns and strokes are vocalized in syllables which vary from village to village and from drummer to drummer.

The *jaspuria mãdar* is the principal drum of many communities of musicians in southern Bihar. Its barrel-shaped, or cylindro-barrel-shaped, shell can range from 60 to 118 cm in length (on average about 70 cm). Half the instrument, from the right head to the centre, is roughly cylindrical or slightly conical, but from the centre the shell widens to a bulge at approximately three-quarters the distance from the right head, and then

narrows slightly towards the left head. Both heads of the *jaspuria mā̃dar* are flush with the outer rims of their hoops. Typically, both heads are left undecorated.

The *jaspuria mā̃dar* is traditionally associated with the Ghā̃sī caste of leather-workers, who play it, make it and claim to have invented it. In the past they reserved the drum for accompanying *janāni jhumar* ('women's *jhumar*') – group singing and dancing during the monsoon season – using other drums such as the *ḍholkī* in other seasons. In the last 30 or 40 years the *mā̃dar* has been taken up by players of high-status castes and has become the principal drum throughout the year to accompany staged solo singing and most genres of dancing.

The straight or slightly waisted conical types of *mā̃dar* are more common throughout the east-central Ādivāsī belt than are the barrel-shaped. Approximately half the drum, from the right head to the centre, is cylindrical or even narrows slightly to a shallow waist. From the centre the shell expands conically towards the left head. Because of its shape, the outer lacings do not touch the drum's body, giving it the illusion of a strict conical shape. The rim around the right head is built up with bamboo strips, so that the head is recessed by 2 or 3 cm from the drum's outer edge.

In southern Bihar this type, of variable size, is associated with different Ādivāsī groups who know it by various names of which the most widespread are the *k̲hel* and the *dumaṅg*. The Uraon *k̲hel* is the largest of these drums, ranging from 60 to 85 cm in length (usually about 60 cm); the right head is 25 cm in diameter, the left 35 cm. It is the most popular drum among the Uraon people, who use it for group singing and in the *jadur*, *karam* and *jātra* communal dances.

The Muṇḍā people of southern Bihar use two *mā̃dar*-type drums of different sizes, both called *dumaṅg* in Muṇḍāri; one is about 35 cm long, and the other, perhaps more common, about 50 to 66 cm. Local non-Ādivāsī musicians refer to the smaller as *jhālda mā̃dar* and the larger as *mūcī mā̃dar*. The heads are attached and treated in the same manner as those of the *jaspuria mā̃dar*, but the paste covers a larger area of the right head. During the first few decades of the 20th century the *dumaṅg* was the most important drum in the percussion ensemble that accompanied Muṇḍāri processions and communal dancing and singing in the village dancing-ground. The full ensemble consisted of *dumaṅg* players (the lead drummers), with the instruments *nagaṛa* (kettledrum), *rabaga* (double-headed drum), perhaps some *ḍulki* (double-headed drum) and *cuā̃* or *manjīrā* (cup cymbals). The *ḍulki* has gradually replaced the *dumaṅg* as the lead drum in the dancing-ground. The *dumaṅg*, however, still holds a position of honour in Muṇḍā processions, rituals, festivals and in song texts, where it is often paired with the *ḍulki* and sometimes with the *rabaga*.

CAROL M. BABIRACKI/R

Madarász, Iván (*b* Budapest, 10 Feb 1949). Hungarian composer. He studied composition at the Franz Liszt Academy of Music in Budapest with Endre Szervánszky. From 1974 to 1980 he taught at the academy's teacher training college in Pécs. In 1976 he joined the staff at the Béla Bartók Conservatory, and in 1980 became a teacher of music theory at the Liszt Academy in Budapest. His two one-act operas, *A nö meg az ördög* ('The Woman and the Devil', 1972) and *Lót* (1984), were commissioned by Hungarian Television. In 1992 he received the Erkel Prize for composition. Madarász's works do not adhere to any clearly definable stylistic trend, though the influences of electronic sounds, as in *Hímzett hangok* ('Embroidered Tones', 1989), and aleatory techniques, as in *Tabulatúra* (1996), are evident. In his opera *Lót* he employs the repetitive technique of minimalism, using it to diverge from traditional dramatic concepts: instead of musical development shadowing the dramatic narrative, the opera is made up of frozen musical moments.

WORKS
(*selective list*)

Stage: A nő meg az ördög [The Woman and the Devil] (op, 1, T. Emőd), 1972, perf. 1972; Musica dell'arte (wordless play), any insts, 1981, perf. 1995; Lót (op, 1, A. Romhányi), 1984, perf. 1986

ANNA DALOS

Madden, Henri. *See* MADIN, HENRI.

Maddison [née Tindal], **(Katherine Mary) Adela** (*b* 15 Dec 1866; *d* Ealing, 12 June 1929). Irish composer. A friend and pupil of Fauré, she moved to Paris from London in the late 1890s, and gave concerts of her works and musical parties, moving in circles which included Debussy, Delius and the Princesse de Polignac. She spent several years in Germany and her large-scale opera *Der Talisman* was performed to enthusiastic reviews at the Leipzig Stadttheater in 1910. After returning to England during World War I, she became involved with Rutland Boughton's Glastonbury Festivals, writing incidental music for Miles Malleson's play *Paddly Pools* and a Celtic ballet *The Children of Lir*, which was performed at London's Old Vic (1920). The publication of her Twelve Songs (1895) marks the appearance of Maddison's individual voice with its careful use of dissonance and occasionally unconventional vocal lines. The texts she chose to set for her vocal works, from A.C. Swinburne to Chinese, Indian and Irish poetry in translation, mirror many fashionable turn-of-the-century concerns. Her piano quintet (1916) is a fluent and expressive work, demonstrating her control of structure and inventive melodic writing. Her unpublished music appears not to have survived.

WORKS
(*selective list*)

Stage: Der Talisman (op, after L. Fulda), Leipzig, Stadttheater, 1910; Paddly Pools (incid music, M. Malleson), Glastonbury, 1917; The Children of Lir, (ballet), 1920; Ippolita in the Hills (op, M. Hewlett), 1920s

Inst: Brer Rabbit Polka, pf (1882); Diana Waltz, pf (1888); Berceuse, vn, pf (1898); Romance, vn, pf (1898); Irische Ballade, orch, 1909; Pf Qnt, 1916 (1925)

Vocal (1v, pf, unless otherwise stated: For a Day and a Night (A.C. Swinburne) (1888); 2 mélodies (Sully Prudhomme [R.F.A. Prudhomme], F.E.J. Coppée) (1893); 12 songs, opp.9–10 (E.W. Wheeler, Swinburne, D.G. Rossetti, A. Tennyson, P.B. Shelley, H. Heine) (1895); Soleils couchant (P. Verlaine), (female vv)/(S, A), pf (*c*1896); 6 mélodies (1897); 2 mélodies (A. Samain) (1900); 3 mélodies sur des poésies de Goethe (1901); 3 mélodies (E. Harancourt) (1915); National Hymn for India (K.N. Das Gupta) (1917); If you would have it so (R. Tagore) (1919); Tears (Wang Sen-ju) (1924); other songs

SOPHIE FULLER

Madeira [née Browning], **Jean** (*b* Centralia, IL, 14 Nov 1918; *d* Providence, RI, 10 July 1972). American contralto. She studied at the Juilliard School of Music and under the name Jean Browning made her début in 1943 at the Chautauqua Summer Opera as Nancy (*Martha*). In 1947 she was chosen by Menotti to alternate with Marie Powers in the European tour of *The Medium*. She joined the Metropolitan in 1948, making her début as the First Norn. From 1955 she sang mostly in Europe: she appeared as Clytemnestra, one of her greatest roles, at Salzburg (1956), as Carmen at Vienna and Aix-en-Provence and as Erda at Covent Garden, Bayreuth and Munich. She created Circe in Dallapiccola's *Ulisse* (1968, Berlin) and continued to sing until 1971. She had a rich, dark voice and was a compelling figure on the stage. Her arresting Erda can be heard on Solti's recording of *Das Rheingold*, and her vividly characterized Clytemnestra on Böhm's *Elektra*.

HAROLD ROSENTHAL/ALAN BLYTH

Madelka, Simon Bar Jona [Barjona, Bar Jona, Bariona, Simon] (*b* Oppeln [now Opole]; *d* Pilsen [now Plzeň], 1597–9). Silesian composer, active in Bohemia. He had to leave Oppeln in 1575 because of his Counter-Reformation sympathies and settled in Pilsen. There he joined the butchers' guild and was elected a town councillor in 1578 and master butcher in 1580. He published *Canticum Beatissimae Virginis Mariae* (Prague, 1581, inc.), which contains eight four-part *Magnificat* settings and a setting of Psalm xx, *Exaltare Domine*, and *Septem psalmi poenitentiales* (Altdorf, 1586), for five voices; there are also seven incomplete manuscript motets (in *CZ-KL*), six for six voices and one for eight. These works are imbued with the spirit of the Counter-Reformation, and their style is that of the later Dutch school.

MIROSŁAW PERZ

Maderna [Grossato], **Bruno** [Brunetto] (*b* Venice, 21 April 1920; *d* Darmstadt, 13 Nov 1973). Italian composer and conductor. His influence on the musical life of the mid-20th century made itself felt through a number of important works, through his teaching and through his conducting, which contributed significantly to the wider dissemination of the masterpieces of the European avant garde. Maderna's stylistic devices, original and often distinct from those of such contemporaries as Berio, Boulez, Stockhausen and Nono, include his characteristic use of deterministic precompositional techniques, his own interpretation of the 'open work' concept and the melodic thread which remains perceptible in even the most complex textures.

1. LIFE. Many details of his early years are still unclear. His mother was Caroline Maderna, his father almost certainly Umberto Grossato, although paternity was never formally acknowledged. After the death of his mother, documentation refers to him as Bruno (or Brunetto) Grossato, and he was brought up in S Anna di Chioggia, a small village near Venice. Soon recognized for his precocious musical gifts, he learnt to play a number of instruments including the violin, on which he was encouraged to perform in the local bar and dance hall run by the family. In 1930 Grossato further exploited his talents as the principal attraction of the Happy Grossato Company band, which played song arrangements in hotels, variety shows and cabarets. Yet, just two years later, the young Maderna conducted a concert of 19th-century operatic repertory with the orchestra of La Scala. Between September 1932 and December 1935 he went on to conduct in Milan, Trieste, Venice, Padua and Verona to great acclaim. His progress came to the notice of the fascist authorities in 1933; as soon as they discovered that Grossato was not Maderna's legal parent, he was placed under the tutelage of a musician from La Fenice and exhibited as a child prodigy to the glory of the regime.

This stressful existence came to an end when Irma Manfredi, a fashionable dressmaker in Verona, intervened

and arranged for Maderna to live in her house. He was provided with a sound, broad-based education from private tutors, the composer Arrigo Pedrollo giving him music lessons, although he failed the intermediate course at the Milan Conservatory in 1937. The final break with his childhood surroundings came when he went to stay in Rome, thanks partly to Vatican intervention in the form of a letter from Cardinal Montini, the future Pope Paul VI. In 1940 he graduated in composition at Rome Conservatory under the guidance of Alessandro Bustini, who also taught Petrassi, Turchi and Giulini.

Despite the upheavals of his youth, Maderna reached adulthood without lasting damage. From his early writings and from the testimony of those who met him at this time we gain a picture of a level-headed young man who was aware of his own limitations, and who saw through all the publicity that had surrounded him. He was a keen student at G.F. Malipiero's advanced international course for composers in Venice (1941–2), subsequently acknowledging his great debt to Malipiero both as a teacher and as the man who imparted to him his great love of early music, especially Venetian, borne witness by his many transcriptions and by profound echoes within his own music. In 1941 he also studied conducting with Guarnieri at the Accademia Musicale Chigiana, Siena, for which he proved exceptionally gifted; he later attended Scherchen's international course in Venice in 1948.

Maderna's musical career was interrupted by the war. He served in the army from 1942 to 1943, and in February 1945 he joined the partisans. When hostilities ceased, he was faced with all the difficulties of pursuing his work in a war-stricken country; and it was at this time that his friendship with Malipiero proved to be most valuable, the elder composer putting his name forward for the post of teacher of *solfeggio* at the Venice Conservatory, which he held, on and off, until 1952. It was during these years that he met Nono, who was to became a lifelong friend. Malipiero also introduced him to the publisher Ricordi, for whom, between 1947 and 1949, Maderna transcribed a number of Vivaldi's concertos; and it was probably at Malipiero's behest that Maderna's *Serenata* for 11 instruments was performed at the first postwar Venice Biennale in 1946. None of this work, however, was sufficiently well paid for the needs of a newly married man (he married his first wife, Raffaella Tartaglia, in February 1946) who had been accustomed to a life of ease. In order to supplement his income he turned his hand to composing music for radio plays and mediocre films, along with dance music and other pieces written to order.

At the end of the 1940s Maderna's career took a decisive new direction. Probably on the suggestion of Scherchen, he made his first contact with the Darmstadt summer courses that were to play such an important part in his artistic and personal development, and where, from 1949 on, his compositions were frequently performed. Many details of his activity there as teacher, conductor and administrator emerge from his voluminous correspondence with Wolfgang Steinecke, Darmstadt's founder and animating spirit. It was there that he discovered the true nature of his vocation, striking up productive friendships with the composers most actively involved in the Neue Musik, in particular with Nono, and working with the performers to whom so many of his pieces were dedicated: the Kontarsky brothers, Lothar Faber, Severino Gazzelloni, Han de Vries, Christiane Edinger, Theo Olof and Aldo Bennici as well as the stage director Harro Dicks, whose influence can be detected in the dramaturgy of his music-theatre works. It was at Darmstadt, too, that he met Beate Christine Köpnick, whom he lived with from 1950 (but did not marry until 1972), and who bore him three children.

During the 1950s Maderna worked for long periods in Milan with a group of intellectuals and musicians (Luigi Rognoni, Luigi Pestalozza and Roberto Leydi among the former; among the latter Berio, Cathy Berberian and Manzoni) whose aim was to rejuvenate the Italian musical scene through powerful new initiatives. These included the founding of the Studio di Fonologia Musicale of the RAI in 1955 – which provided both Maderna and Berio with the experimental facilities they needed for the development of their electronic techniques – and the activities connected with Incontri Musicali: a periodical (overseen by Berio), an ensemble (founded and directed by Maderna), a series of talks, and an introductory course on 12-note composition which Maderna gave at the Milan Conservatory in 1957 and 1958.

In spite of these heavy commitments in Darmstadt and Milan, Maderna continued to compose and conduct. Indeed he was increasingly in demand as a conductor during the 1960s, and to critics and audiences alike became far better known as a conductor than as a composer. At first he acquired a reputation as a thoughtful exponent of contemporary music, especially that of the Second Viennese School and the Darmstadt group of composers; later he broadened his repertory to include the main 20th-century classics and the Austro-German symphonic composers, as well as operas by Mozart and Debussy; his performances of Mahler broke new ground. Maderna's pleasure in sharing his experiences as a composer led, too, to his quickly becoming a figure of enormous significance to many Italian composers not much his junior; Nono, Clementi, Donatoni and others have acknowledged the decisive influence he exerted on various aspects of their early composing careers. Performers in the various contemporary music ensembles and the symphony orchestras with which he spent most time, including those of The Hague, the BBC, New York, Chicago and Milan Radio (where he was permanent conductor in his last years), recall his authoritative handling of contemporary music. Although he was an inspiring teacher, his rich talents in this field were exploited all too rarely, notable exceptions being the courses he gave in composition and conducting at the Dartington Summer School between 1960 and 1962, at the Salzburg Mozarteum from 1967 to 1970, and at Tanglewood and the Juilliard in 1971 and 1972. In 1972 he was awarded the Italia prize for his radio score *Ages*, and in 1974, posthumously, the City of Bonn Beethoven Prize for *Aura*. On his premature death in Darmstadt, he was buried there with civic honours.

2. Works. The style of Maderna's earliest compositions after he left Rome was clearly influenced by his period of study with Malipiero. Pieces written at this time, such as the *Introduzione e passacaglia: 'Lauda Sion Salvatorem'* (a hitherto unpublished piece which Maderna included in all the lists of his works), demonstrate how he was learning to apply ancient techniques in a thoroughly 20th-century manner, preferring essential clearcut design to the colours of late Romanticism. In his works of the 1940s

the contrapuntal technique he had learned from Bustini was enriched by a study of the pre-19th century Italian instrumental masters; while not imitating the mechanistic character of early Hindemith and some Stravinsky, they are nevertheless part of the neo-classicism then in vogue in Italy. At the same time, Maderna was absorbing 12-note technique, though in a very personal manner in 1942. He had already conducted Webern's Variations op.30 and was familiarizing himself with dodecaphonic pieces by Dallapiccola, Riccardo Malipiero and Togni. In 1948 he wrote his first serial work, *Liriche greche*, which was published by Ars Viva, probably through the intervention of Scherchen.

Over the next five years, up to *Quattro lettere: Kranichsteiner Kammerkantate*, he composed a number of pieces in which the procedures of the Second Viennese School are developed with considerable freedom and fantasy, the strictness of the transformational operations co-existing with unexpected evocations of a much older *melos*, for example in the quotation of the Epitaph of Seikilos, one of the few surviving examples of ancient Greek music, in *Composizione no.2* (1950), or the use of folktunes in the *Composizione in tre tempi* (1954). The dramatic tensions so created sit side by side with Maderna's evident desire to impose a logical, mathematical ordering of materials; and the second *Serenata* and the String Quartet of 1955 offer perhaps the clearest instances of his constructional side, evidence of which is provided by the enormous quantities of preparatory work which exist, especially for compositions up to the mid-1960s, in the form of diagrams, tables of series, number matrices, patterns for the distribution of timbre and dynamics, plans for the ordered unfolding of 'sound events' and, in particular, 'magic squares'. However, such techniques, many of which he learnt at Darmstadt, never fitted into a single 'system' of thought. For Maderna, contradiction was a necessary and productive part of a composer's make-up: 'I grow more and more aware that one must not be consistent in one's life, particularly if one is a composer or an artist; I think one should at all costs avoid being too consistent' (Baroni and Dalmonte, 1985). This dialectic of rigour and fancy set him apart from his avant-garde colleagues; yet, in retrospect, it is what constitutes his essential modernity.

Much of Maderna's music demonstrates an audacious experimentation with novel sound formations. His tape pieces are notable in this regard; even more so are the compositions in which live and recorded sound are combined, for instance *Musica su due dimensioni* (the first of its kind) and the Oboe Concerto no.1. These works also exhibit a form of controlled aleatorism, in which the precise coordination of musical fragments is left unspecified in the score, the conductor (who would originally have been Maderna himself) being left to determine their exact sequence and timing. In the works that followed the performer is given increasing discretion, particularly after *Aulodia per Lothar* (1965). From the point-of-view of overall construction, Maderna came to view the 'work' more as an assemblage of sections or passages, each of which is to some extent independent of the whole. The great *Hyperion* cycle (1962–9), in its numerous concert and stage versions, exemplifies his approach. The earliest version – described as a *lirica in forma di spettacolo* and first directed by Virginio Puecher at the Venice Biennale in 1964 – consists of the tape pieces *Le rire* and *Dimensioni II*, three sections of *Dimensioni III* for flute and orchestra and the first part of *Aria* for soprano, flute and orchestra to words by Hölderlin. The subject matter of the pieces here is the dramatic relation between the 'poet', representing the noblest part of the individual, embodied in the sound of the flute and Hölderlin's words, and the 'machine', representing the emasculatory violence of the masses. Maderna later added the orchestral sections *Entropia II* and *Stele per Diotima*, and, for the Berlin performance in 1969 under the title *Suite aus der Oper 'Hyperion'*, two further choral sections, one orchestral and the musette solos. Nearly all the different parts can be performed as independent concert pieces, or combined with other works for the stage, a course taken by Maderna himself when in 1968 in Bologna they were put on with Belli's *Orfeo dolente* and in Brussels with H. Claus's *I morituri*. In the late *Ausstrahlung* and *Satyricon*, interchangeability becomes an essential principle, with the component sections of the two scores published as separate items. Perhaps the most extreme of his 'open form' works is the *Serenata per un satellite* (1969), in which a single page contains precisely notated parts, but with the instruction that the performers should play 'what they can, together or separately or in groups, improvising with the notes that are set down'.

In spite of Maderna's changing working procedures and formal preoccupations, a common thread that links the stages of his career is the expansive singing quality of his writing for solo instruments: for flute in the concerto of 1954, and as the protagonist of *Don Perlimplin* (1962) and *Hyperion*; for violin in the concerto of 1969, in *Widmung* (1967) and *Pièce pour Ivry* (1971); and for viola in *Viola* (1971); and particularly for the oboe in three concertos (1962, 1967, 1973), *Aulodia per Lothar* (1965) and *Solo* (1971). Another notable feature, especially, though not solely, of the late large-scale works, concerns his techniques of orchestral writing. In works such as *Quadrivium* (1969), *Aura* (1972) and *Biogramma* (1972) the instruments are divided into groups – each in effect a small orchestra – in the manner of Stockhausen's *Gruppen*, but with totally different aims and results. Maderna's concern is not with the interference that occurs at the meeting of different sound-sources, but with the balance that may be achieved between contrasting timbral and textural blocks, an effect which recalls Venetian polychoral music of the 16th and early 17th centuries. The sound-space of *Aura*, in particular, is criss-crossed by magnetic forces and sudden flashes; in the programme note to its first performance Maderna comments that 'the title refers to the radiations of all possible consequences which emanate from a central musical object'. In these complex works, the discrete margin of controlled indeterminacy which Maderna gives is put fully at the service of his exquisitely judged oscillating sound images, whether blurred murmurings of freely repeated muted string fragments, or a subdued percussion radiance combined with woodwind trills, or myriad further subtleties of articulation and dynamic.

Maderna was concerned perhaps above all with musical communication. There was no clearer indication of this than his deep commitment to the theatre in various forms. He conducted Monteverdi's *Orfeo* in his own edition, and *L'incoronazione di Poppea*; he wrote a number of radiophonic works, which he referred to as 'theatre of the ears', including *Don Perlimplin*, *Il mio cuore è nel sud*,

Ritratto di Erasmo and *Ages*; and *Hyperion* was, at least initially, a 'poem in dramatic form'. With the *Venetian Journal* and particularly with the opera *Satyricon*, Maderna once and for all severed his links with a Darmstadt poetic. An extensive use of quotation takes precedence over structural principles in both works; and in the latter the unifying force of a plot is annulled by the employment of several open-ended narrative strands. In this final example of Maderna's deep desire for communicability, the ivory tower is abandoned for what he considered to be nothing less than a 'political act'.

WORKS

STAGE

Das eiserne Zeitalten (ballet), 1952–3, inc.
Il moschettiere fantasma (film score, dir. Calandri, W. French), 1952
Macbeth (ballet, A.A. Milloss, after W. Shakespeare), 6 Sept 1962, inc

ROSSANA DALMONTE

Madetoja, Leevi (Antti) (*b* Oulu, 17 Feb 1887; *d* Helsinki, 6 Oct 1947). Finnish composer. He matriculated in Oulu in 1906 and then studied in Helsinki at the university (MA 1910) and at the music institute under Sibelius (1906–10); his studies were continued with d'Indy in Paris (1910–11), with Fuchs in Vienna, and in Berlin (1911–12). He conducted the orchestra of the Helsinki Philharmonic Society (1912–14) and the orchestra of Viipuri (1914–16), where he was also director of the orchestra school. In Helsinki he taught at the music institute (later academy) (1916–39) and was music critic of the *Helsingin sanomat* (1916–32). During the 1920s and 30s he spent some time in France. Madetoja was a leading member of the Finnish national Romantic school which followed Sibelius. He made use of the folktunes of Ostrobothnia, dark and heavy melodies tinged by church modes; at the same time he was influenced by contemporary French music. His orchestration was particularly skilful, approaching the clarity and balance of chamber music. In harmony and rhythm his means were more

limited. His opera *Pohjalaisia* ('The Ostrobothnians') kept its status as the 'national' opera until the arrival of Joonas Kokkonen's *The Last Temptations* in 1975.

WORKS
(selective list)

STAGE AND ORCHESTRAL

Pohjalaisia [The Ostrobothnians] (op, 3, Madetoja, after A. Järviluoma), op.45, 1923, Helsinki, Finnish Opera, 25 Oct 1924; Okon Fuoko, op.58, ballet, 1930; Juha (op, 2, A. Akté and Madetoja, after J. Aho), op.74, 1934, Helsinki, Finnish Opera, 17 Feb 1935

Sym. Suite, op.4, 1910; Tanssinäky [Dance Vision], op.11, 1910; Sym. no.1, F, op.29, 1915–16; Pastoral Suite, 1916; Sym. no.2, E♭, op.35, 1917–18; Lyric Suite, 1921–2; Huvinäytelmäalku [Comedy Ov.], op.53, 1923; Sym. no.3, A, op.55, 1926

Incid music, ovs., suite from each op, shorter orch pieces

VOCAL AND CHAMBER

HANNU ILARI LAMPILA

Madge, Geoffrey Douglas (*b* Adelaide, 3 Oct 1941). Australian pianist. He gained his initial musical training at the Elder Conservatorium, University of Adelaide, studying the piano with Clemens Leske. After graduating in 1959 he toured Australia as a member of a piano trio. Leaving for Europe in 1963, Madge became first a student of Géza Anda in Switzerland (1964) and then of Peter Solymos in Hungary (1964). His main energies as a pianist have been devoted to 20th-century repertory. His talents in this sphere were recognized in 1971 when he was appointed associate professor of classical and contemporary keyboard repertory at the Royal Conservatory in The Hague. His propagation of this repertory, both as performer and pedagogue, has been wide-ranging, embracing works by Schoenberg, Ives, Sorabji, Busoni, Xenakis, Boulez, Stockhausen, Krenek, Stefan Wolpe, Barraqué and Bussotti. Madge has also been drawn to the Russian avant gardists and futurists of the 1920s (including Mosolov, Oboumov, Roslavetz, Lourié, Alexandrov and Wyschnegradsky), many of whose works were suppressed or withdrawn between 1929 and 1989. A notable feature of Madge's activity has been the presentation of cycles of major works or large-scale compositions at international music festivals (for example, Sorabji's *Opus Clavicembalisticum* at the 1982 Holland Festival in Utrecht and Nikolaos Skalkottas's 32 Piano Pieces and 4 Etudes at the 1979 ISCM Festival in Athens). More recently, he has presented Krenek's complete piano sonatas. Madge has also composed various works, including a piano concerto (1979) and various chamber works; a wind quintet by him was performed at the 1966 Adelaide Festival of the Arts.

ANDREW D. McCREDIE

Madin [?Madden], **Henri** (*b* Verdun, 7 Oct 1698; *d* Versailles, 3 Feb 1748). French composer and priest of Irish origin. He worked in the diocese of Verdun, and in 1719 he was *maître de musique* at Meaux Cathedral, returning to Verdun to work at the cathedral in 1726. He became master of the choir school at Tours Cathedral in 1730 and at Rouen Cathedral from 1737 to 1741. On 25 January 1738 he was appointed *sous-maître de musique* of the royal chapel. He was honoured as 'chanoine de St-Quentin' in 1741, but the presentation ceremony was not held until 1746. In 1742 he succeeded Campra as *maître des pages de la chapelle*.

Madin's works include four *a cappella* masses in contrapuntal style and 29 *grands motets*, 25 of which are listed as having been written for the royal chapel. His *récits*, written in the bipartite or tripartite form common at the time, were praised for their melodies and originality; he rarely wrote da capo arias. The motets 'à grand choeur et symphonie' were performed at Versailles until 1792, and *Diligam te Domine* and *Notus in Judea* were popular at the Concert Spirituel until 1762. A royal privilege was given to 'H.M.' in 1740 to publish a book of motets for one or two voices and continuo, but 'H.M.' cannot positively be identified with Madin and the book is lost. Madin also published a theoretical work, *Traité de contrepoint simple ou chant sur le livre* (Paris, 1742).

WORKS
printed works published in Paris

Masses, 4vv: Dico opera mea regi (1743), Velociter currit sermo ejus (1746), Vivat pax (1747), Vivat rex (1741); ed. Centre de Musique Baroque (Versailles, 1990)

Grands motets, solo vv, 5vv, orch, bc, *F-Pc*, *Pn*, *R*: Beatus vir; Benedic anima mea; Cantate Domino quia mirabilia; Cantate Domino ... omnis terra; Confitebor tibi; Conserva me; De profundis; Deus Deorum; Deus noster refugium; Deus quis similis; Deus venerunt gentes; Diligam te Domine; Dixit Dominus; Domine Deus meus; Domine in virtute tua; Domine, quid multiplicati sunt; Dominus regnavit; Exultate Deo; Exurgat Deus; Laetatus sum; Lauda Jerusalem; Laudate Dominum; Nisi Dominus; Notus in Judea; O filii; Pange lingua; Quare fremuerunt; Te Deum; Venite exultemus

VIVIEN LO

Madison. City in Wisconsin, USA, site of the UNIVERSITY OF WISCONSIN SCHOOL OF MUSIC.

Madlseder, Nonnosus [Johannes Baptist] (*b* Meran [now Merano], 20 June 1730; *d* Andechs, nr Ammersee, 3 April 1797). German composer, choir director and organist. He was a choirboy at the chapel of the royal convent in Hall, and sang in school comedies at the Jesuit Gymnasium there (1743–5); he continued his studies at the monastery of Polling, Bavaria, and at Freising. In 1749 he entered the Benedictine monastery at Andechs and in 1754 was ordained priest. According to his foreword to the offertories op.1, he studied at Andechs with the music director Gregor Schreyer, was the monastery's assistant director of music (1755), organist and director of the *Tafelmusik* (1757), leader of the *Figuralchor* (1760) and singing master (1761–2). In 1763, to encourage his compositional activity, Abbot Meinrad Moosmüller sent him to visit the Italian Opera in Munich. In 1767 he became the music director and leader of the boys' classes at the Andechs monastery. In 1772–4 and 1791–4 he was a priest at the convent of Lilienberg, Munich.

Madlseder was considered an outstanding theoretician and contrapuntist and was highly regarded as a Kapellmeister and organist. His symphony shows Mannheim and Viennese Classical influences. The sacred vocal works, with their coloratura solo parts and fugal sections, are frequently demanding for the singer. His brother Josef Madlseder (*b* Meran, 12 Aug 1740; *d* Salzburg, Jan 1806) was a bass singer and *Kammervirtuos* at Passau, and from 1803 a member of the choir at Salzburg Cathedral. He is possibly the composer of a German Mass (in *A-Sd*).

WORKS

Cants. (all lost): Intellectus, Meditation II (F. Neumayr), Munich, Lent 1762; Detrimentum honoris, Meditatio II (Neumayr), Munich, Lent 1764; Ezechias (P. Scharl), Andechs, Jan 1770; Il viaggio di Febo a Spitzberga (Scharl), Andechs, 1775

AUGUST SCHARNAGL/ROBERT MÜNSTER

Madness. English pop group. Formed in 1979, the original line-up consisted of Suggs (Graham McPherson; *b* Hastings, 13 Jan 1961; vocals), Mike Barson (*b* London, 21 May 1958; keyboards), Chrissie Boy (Chris Forman; *b* London, 8 Aug 1958; electric guitar), Kix (Lee Thompson; *b* London, 5 Oct 1957; saxophone), Bedders (Mark Bedford; *b* London, 24 Aug 1961; bass guitar), Woody (Dan Woodgate; *b* London; 19 Oct 1960; drums) and Chas Smash (Cathal Smyth; *b* 14 Jan 1959; trumpet and vocals).

After the band's first single, *The Prince* (2-Tone, 1979), they moved to Stiff Records and their early work, such as the single *One Step Beyond* (1979), had a marked ska influence. On more dance- and pop-orientated hits such as *My Girl*, *Baggy Trousers*, *Embarrassment* (all 1980) and *Grey Day* (1981) they developed a mordant lyrical style which articulated a sense of Englishness as skilfully as any Beatles or Kinks record. The album *The Rise and Fall* (1982) contained what are perhaps their two finest singles, *Our House* and *Tomorrow's just another day*. By this point Madness were the perfect pop package: supreme melodists (their slightly queasy fairground organ melodies were fun and unsettling), at times excellent lyricists, and masters of the emergent field of the pop video, making a dozen or so witty yet macabre promos, the quality of which has rarely been matched. The band split up in 1986 after their eloquent anti-apartheid single *(Waiting) For the Ghost Train*, but a succession of high-profile concert reunions and the massive success of their 1992 compilation, *Divine Madness* (Virgin), demonstrated their continued popularity. For more information see D. Hill: *Designer Boys and Material Girls* (Poole, 1986). In 1999 the band reformed to release *Love Struck*, their 16th UK hit single.

DAVID BUCKLEY

Madonis, Luigi (*b* Venice, *c*1690; *d* St Petersburg, *c*1770). Italian violinist. He is thought to have been a pupil of Vivaldi in Venice, and Quantz praised his playing. In 1725 he was engaged as Konzertmeister to the Italian Peruzzi opera troupe, on tour in Breslau, but he returned to Venice the following year because of the company's financial difficulties. It is likely that Madonis played with the Peruzzi company again at Brussels in 1727; two years later he was with them in Paris, where he also played at the Concert Spirituel in 1729 and 1730. He entered the service of the Venetian ambassador to France in 1731, and in the same year his *XII sonates a violon seul avec la basse* were published in Paris, with a dedication to the Abbé de Pomponne.

Madonis eventually returned to Venice and was invited to join the Russian court orchestra by the Empress Anna's envoy, Johann Hübner. In 1733 he arrived in St Petersburg with several other artists including his brother, Antonio Madonis, a violinist and horn player. Shortly before Anna's death Luigi Madonis left Russia, but returned to declare his allegiance to the infant Tsar Ivan VI in 1740. Subsequently he served under Elizabeth, for whose coronation in 1742 he added a few pieces to Hasse's opera *La clemenza di Tito*. His appointment as Konzertmeister in St Petersburg lasted until early in 1762, when

he was replaced by Pietro Peri and Domenico dall'Oglio. Possibly Madonis's resignation was caused by a mental disorder, though he remained an employee of the court until 1767, when he retired with a pension.

Madonis was married twice. His first wife, the singer Gerolama Valsecchi-Madonis, died about 1740; by his second wife, Natalya Petrovna, he had a daughter (Marianna) who married the cellist Giuseppe dall'Oglio, Domenico's brother. Madonis's most important compositions are his 12 'Symphonies', published in St Petersburg in 1738 and dedicated to the Empress Anna. These are in fact suites for violin, cello and continuo; they are rare specimens of Baroque music written in Russia and are among the earliest examples of Russian music printing. According to von Stählin, Madonis also composed two sonatas based on Ukrainian melodies, but these have not survived.

GEOFFREY NORRIS

Madonna [Ciccone, Madonna Louise Veronica] (*b* Bay City, MI, 16 Aug 1958). American popular performer, songwriter, producer and actress. The daughter of an engineer at Chrysler, Madonna studied dance in high school and during a brief stay at the University of Michigan. In 1978 she moved to New York, where she worked with Alvin Ailey's dance troupe, played the drums in a band (the Breakfast Club), and sang backup for disco recordings. She collaborated in 1981 with Stephen Bray to write songs that came to the attention of DJ Mark Kamins, who played her tapes and passed them on to Sire Records, which released *Everybody*, her first club hit, in 1982. In 1983 she worked with 'Jellybean' Benitez to produce her first album, *Madonna*, which included the songs *Holiday*, *Lucky Star* and *Borderline*, and which spread her fame into the mainstream. During the 1980s she released a series of songs that reached the top of popular music charts in the USA and Europe.

Madonna attracted unparalleled attention, in part because of her uncanny ability to operate within the new medium of television channels devoted to music videos. She held the public spotlight throughout the 1980s with a series of carefully crafted videos, each of which offered a different facet of an ever-changing persona. Her initial images presented her as a stereotypical 'bad girl', which outraged those who saw her embracing the role of sex object. However, her increasingly self-conscious staging of gender and identity as constructs along with video references to classic films, as in *Material Girl* and *Express Yourself*, soon made her a favourite focus of cultural theorists who regarded her as enacting postmodernist models of subjectivity.

Written with collaborators such as Patrick Leonard, Shep Pettibone, and Babyface, Madonna's songs, like her videos, offer a wide range of genres and personae, although dance grooves remain fundamental to her mode of musical expression. She deploys her distinctive voice to full advantage, whether she is projecting a petulant child-woman (*Like a Virgin*) or delivering mature torch songs (*Take a Bow*). As the course of musical fashion has changed, she has produced fusions with gospel (*Like a Prayer*), rap (*Justify my Love*), romantic rhythm and blues (the album *Bedtime Stories*, 1994), techno (*Ray of Light*, 1998), and electronica (*Music*, 2000). She has continually used her access to the media to bring to the mainstream controversial subcultural practices, such as interracial relationships (*Like a Prayer*), ritualized impersonations in gay dance clubs (*Vogue*), or the sado-masochism celebrated in certain queer communities, in her book *Sex* (New York, 1992) and the song *Justify my love*. Some critics decry these projects as opportunistic; others credit them with challenging and expanding accepted notions of the erotic and gender propriety.

Sire Records produced Madonna's albums in the 1980s, but her dazzling financial success and shrewd business sense allowed her to demand greater artistic autonomy. In 1992 she signed a multi-million-dollar contract with Time-Warner, giving her full control over her own production company, Maverick. Madonna has become one of the most powerful artists and cultural entrepreneurs now working.

SUSAN MCCLARY

Madre de Deus, Filipe da (*b* Lisbon, *c*1630; *d* ?Seville, after 1687). Portuguese composer, active mainly in Spain. He was in Lisbon when João IV of Portugal sent a letter to Seville in March 1654 inquiring about him; he was widely known in Seville as a prolific composer of frothy, tuneful secular songs. He worked these out by trying the combined voices, usually four or fewer, on his vihuela rather than laboriously on paper. João IV, who preferred a more dignified style, accused him of plagiarizing Fray Manuel Correa. Madre de Deus also reported that he had been commissioned to write six festive pieces at a doubloon each for the celebrations in Seville honouring Felipe IV's second wife.

When the frivolous Afonso VI inherited the Portuguese throne, court tastes changed, and from at least 1660 until he was deposed in 1667, Madre de Deus was master of the royal chamber music at Lisbon. He then returned to Seville, where he directed the music at the Carmelite church of S José until 1688 or later. His 30 extant tonos and villancicos for two to eight voices (some to words by F.M. de Mello, in sources ranging from *D-Mbs* to Guatemala City Cathedral; see Maier and Stevenson, 1970) are to some the most piquant, daring and advanced Portuguese music of his epoch. Although free of any learned contrivances, they burst with clever rhythmic twists and happy modulations. The villancicos, especially the *negros*, contain echoes of folk music. Only a single *Salve regina* for three voices and continuo survives (in Guatemala City Cathedral archives) to show Madre de Deus's powers with a Latin text.

ROBERT STEVENSON

Madriale. *See* MADRIGAL.

Madrid. Capital city of Spain. Ramiro II of León took the town of 'Macherit' from the Muslims in 939, but the struggle for it did not end until Alfonso VI of Castile captured it again in 1083.

1. To 1630. 2. 1630–1800. 3. The 19th century. 4. The 20th century.

1. TO 1630. During the Middle Ages Madrid was an unimportant place and, in contrast with the 22 cantigas of Alfonso el Sabio (1221–84) that are set in the Cádiz area, only three are set in Madrid. Juan Fernández de Madrid, composer of four three-part lovers' laments in the oldest part of the Cancionero Musical de Palacio (*E-Mp* 2–1–5; ed. in MME, v), was a court singer after 1479 and also wrote sacred trios (*F-Pn* nouv. acq. fr.4379). Another musician named Madrid earned a fortune playing the rebec for the Spanish crown prince Don Juan (*d* 1497). After a long period of obscurity the town became a musical centre when Philip II moved his court there in 1560–61. Because Toledo was the primatial see Madrid was made the seat of a bishopric as late as 1884 and even then (until 1964) remained suffragan to Toledo.

Church music history in Madrid begins not with a cathedral but with the royal chapel (the Capilla Real, divided until 1634 into Flemish and Spanish sections), and with the convents of Descalzas Reales (Royal Barefoot Clarist nuns, 1565) and Encarnación (Augustinian nuns, 1611). Under Philip II (reigned 1556–98) the Capilla Flamenca (Flemish chapel) comprised primarily singers, the Capilla Española instrumentalists. Pierre de Manchicourt, whose erudite church style matched Philip's severe tastes, was the first of a line of learned Flemish *maestros* at Madrid that continued with Jean Beaumarchais (1565–70), Geert van Turnhout (1571–80), George de La Hèle (1581–6) and Philippe Rogier (1586–96). Among Rogier's numerous disciples at Madrid all but one Spaniard were brought from the Low Countries. After Rogier's death Géry Ghersem, a favourite pupil who was in Spain from 1586 to 1604, edited his masses and published one of his own in *Missae sex* (1598), a luxurious volume that was the first polyphonic choirbook published in Madrid, though printed by a Fleming. Mateo Romero, born in Liège and like the rest of Rogier's circle brought to Madrid as a choirboy, followed his master as *maestro de la Capilla Real* (1599–1633). Only when Romero retired did a native Spaniard, Carlos Patiño, at last attain the post.

In Philip II's Capilla Española a few Spanish singers and choirboys were employed from time to time, but the leading members were organists, the greatest being Antonio, Juan and Hernando de Cabezón. The latter collected his father's teaching-pieces for the first book of tablature published at Madrid, *Obras de música* (1578); these were printed, significantly, by a Spaniard, not a Fleming. The most gifted 16th-century musician born in Madrid was the Cabezóns' friend Tomás de Santa María, who by 1563 was organist in S María de Atocha, the Dominican monastery in Madrid. Outstanding among other prominent Spanish instrumentalists active in Madrid before 1590 (though not born there) was Miguel de Fuenllana, *músico de cámara* to Philip II's third wife, Isabel de Valois, from 1562 to 1568. Gaspar de Arratia and the two Camargos created a precedent followed by Capilla Real instrumentalists for two centuries, by founding musical clans that passed on their lucrative posts from relative to relative.

Rogier partly accommodated Spanish taste by composing 71 villancicos in the vernacular; nonetheless, his extant masses mainly parody Flemish works. The most important composer of polyphony contemporary with him at Madrid was Victoria, who at the age of 38 became personal chaplain to the Dowager Empress María. From 1587 to her death in 1603 he was *maestro* of the priests' and boys' choir attached to the convent of Descalzas Reales and was convent organist from 1604 until his death in 1611. His *Officium defunctorum* (1605), the third polyphonic choirbook published at Madrid (Alonso Lobo's *Liber primus missarum* of 1602 was the second), uses a noble, retrospective musical style befitting the deceased empress. In contrast his liturgical miscellany published in partbooks at Madrid in 1600 already looks forward to the Baroque, with its brilliant organ-accompanied polychoral masses suited to Philip III's modern tastes. Victoria's successor at Descalzas Reales, Sebastián López de Velasco, produced a similar miscellany published at Madrid in 1628, containing polychoral masses parodying his own motets, published in the same set of eight partbooks.

Secular court music in the early 17th century is epitomized by the collection of amorous dainties carried back to Munich in 1625 by the Duke of Neuburg. Now known as the Cancionero de la Sablonara, this songbook (the continuo or guitar part of which is lost) is dominated by Romero's works, but also includes the Spanish theatre composers Juan Blas de Castro, Álvaro de los Rios and Juan de Palomares. Of the 12 public theatres permitted legally in Spain in 1608 two were in Madrid, the Teatro de la Cruz and Teatro del Príncipe. As in Elizabethan England, stage music was usual before, during, between and after the three acts standard in Spain. Cervantes's interludes, as well as his masterpiece *Don Quixote* (Madrid, 1605–15), testify to the craze among all classes for such dances as the *canario*, *chacona*, *gallarda*, *jácaras*, *morisca*, *turdión*, *villano* and *zarabanda*, and the universal passion for singing *romances* to guitar accompaniments. Cervantes's friend and fellow novelist Vicente Martínez Espinel (1550–1624), now known chiefly as a man of letters, was in his day a *maestro de capilla* in Madrid (1599–1624) and a notable guitarist. Espinel's picaresque *Relaciones de la vida del escudero Marcos de Obregón* (1618) depicts Bernardo Clavijo del Castillo, Hernando de Cabezón's successor as organist of the Capilla Real, and other leading Madrid chamber musicians in Arcadian surroundings.

2. 1630–1800. Beginning in 1616 with Matías Juan de Veana, the main 17th-century *maestros* at the royal

convent, Encarnación, were Matías Ruiz, Carlos Patiño and Juan Pérez Roldán. Philip IV was a pupil of Romero and composed the motet *Ab initio et ante saecula creata sum*, which was used as the model for all the parodies in Cardoso's third book of masses (1636). The best composers of sacred music for the Capilla Real during Carlos II's reign were Juan del Vado y Gómez, Cristóbal Galán, Sebastián Durón and (in the 18th century) Joseph de Torres y Martinez Bravo. A native of Madrid, Torres was appointed first organist of the Capilla Real in 1697 and in 1703 published the last large polyphonic choirbook in the Renaissance tradition.

The first Spanish drama without spoken dialogue was Lope de Vega's *La selva sin amor*, staged in 1627 at the Coliseo del Buen Retiro, the royal palace theatre, by Cosimo Lotti, a Florentine designer imported by Philip IV. The music, composed by Filippo Piccinini (1575–1648) and Bernardo Monanni does not survive. In 1635, the year of Lope's death, Lotti staged *Dafne* at Buen Retiro, probably with music by Marco da Gagliano. From then until 1681 the Madrid court theatre was dominated by Calderón de la Barca, librettist of the two operas mounted in 1660, *La púrpura de la rosa* and *Celos aun del aire matan* (music by Juan Hidalgo). In contrast with Baroque opera elsewhere, Spanish musical stage works had in Lope and Calderón incomparable dramatists.

At the end of the century Sebastián Durón, Juan Francisco de Navas and Antonio Literes replaced Hidalgo, Juan de Sequeiros (active 1676–1723), José Peyró Juan Romero and Galán as the leading composers of Madrid civic and courtly stage music. Elaborate instrumentation became more and more the rule; the zarzuela *Celos vencidos de amor* (1698) specifies violins, viols, bass viols, viole d'amore, harps, guitars, trumpets, clarions, kettledrums and castanets. In the same year the term 'opera' began replacing *comedia armónica* and *representación música* as the name for a through-composed theatrical production on the Madrid stage.

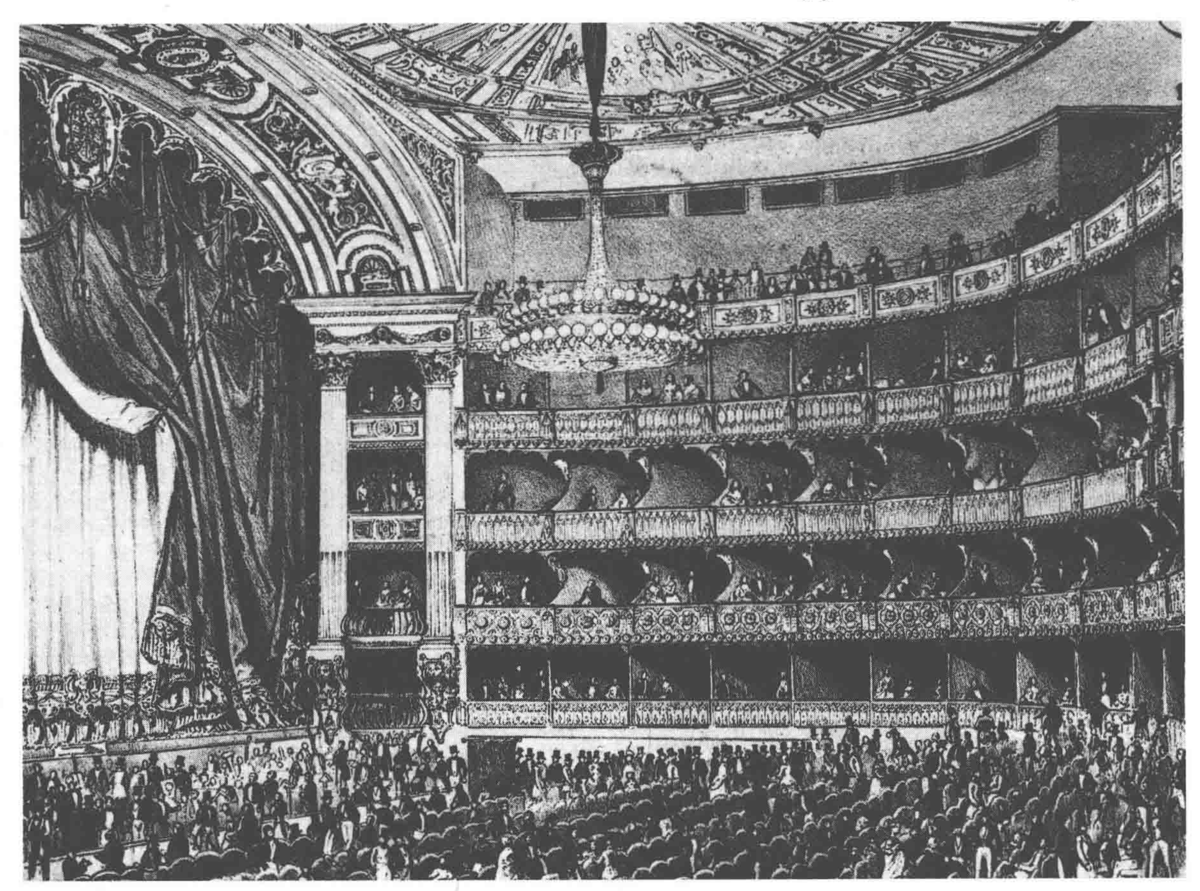
The change of dynasty in 1700 brought Philip V to the throne; his operatic tastes were dominated by his Italian wives, especially the second, Elisabeth Farnese, whom he married in 1714. On his return from Italy in 1703 Philip brought to Madrid an Italian comic troupe of Trufaldines to divert the court at the most sumptuous theatre in town, the Coliseo del Buen Retiro, and the general public, firstly in a patio in Calle Alcalá and later at Caños del Peral (1708–13). From 1725 to 1750 José de Nebra was the most prolific Spanish-born stage composer in Madrid. On Christmas Eve 1734 the royal palace was burnt down, and Nebra and Literes were commissioned to compose a sacred repertory to replace the destroyed archive. Until Philip V's death in 1746 Corselli, Corradini, Facco, Falconi and Mele typified the Italian musicians favoured at court; the most influential was Farinelli, brought to Madrid in 1737 to soothe the king's madness. He in turn brought Conforto to Madrid, and from 1737 to 1759 Farinelli entertained Philip V and the royal melomanes Ferdinand VI and Maria Bárbara with a series of lavish Metastasian spectacles unparalleled in Spanish history. Domenico Scarlatti was Maria Bárbara's harpsichordist at Madrid from 1729 to 1757. Several of the native Spaniards active at Madrid in Scarlatti's time were Catalan, among them the organist José Elías, appointed to Descalzas Reales in 1725, and the violinist Francisco Manalt, a native of Barcelona who from 1733 to his death in 1759 was a court instrumentalist and whose *Obra harmónica en seis sonatas de cámara de violín y bajo solo* (1757) was published at Madrid. Joseph Herrando published the first Spanish violin tutor in Paris in that year. The Catalan Mir y Llussá, together with Ripa, signed an approbation in 1762 for the greatest Catalan musician of the epoch, Antonio Soler. Soler, *maestro de capilla* at El Escorial, was a pupil of both Nebra and Scarlatti; his festive villancicos belong to a type of composition considered frivolous by Maria Bárbara.

In contrast, Carlos III, who acceded in 1759, considered *opera seria* artificial and banished Farinelli to Bologna, thereby leaving a theatrical void filled briefly by the revived zarzuela, some with plots including local colour by Ramón de la Cruz. Cruz's Spanish collaborators Antonio Rodríguez de Hita, Antonio Rosales and Fabián García Pacheco simultaneously held convent or church posts at Madrid. Boccherini, who lived in Madrid from 1769 to 1805, set Cruz's two-act zarzuela *Clementina* in 1786; after 1787 the term 'zarzuela' stopped being used in Madrid until 1846.

The last quarter of the 18th century was the heyday of the scenic *tonadilla*. The masters of this colourful genre included Misón, Laserna, Esteve y Grimau, Antonio Guerrero, Moral, José Palomino, Aranaz y Vides, José Castel, Valledor y la Calle, Galván and Guillermo Ferrer. Over 2000 examples survive in the Madrid Municipal Library. At the turn of the century Madrid became even more conscious of local colour with the publication of Zamacola's two-volume collection of *seguidillas*, *tiranas* and *polos* with guitar accompaniment (1799–1802).

In 1787, after a long interruption, Italian operas again began to be mounted at the Teatro de los Caños del Peral. Sarti's *Medonte* on 27 January, followed by Cimarosa's *Caio Mario* and Paisiello's *La frascatana*, typified the repertory heard that year; operas by Guglielmi, Gazzaniga, Fabrizi and Capua were added during the next two seasons. Throughout the 1790s Italian operas from the contemporary repertory continued at Caños del Peral until a royal ban of 28 December 1799 (inspired by Godoy) drove Italian opera out of Madrid for eight years. An *opera seria* in Spanish, *Glaura y Coriolano*, by the prolific Capilla Real organist José Lidón, was produced at the Teatro del Príncipe in 1791.

In 1788 Lenten 'academies' at Caños del Peral with an orchestra of about 50 players introduced Madrid to the first paid public performances of Haydn and Pleyel symphonies; Haydn, however, was a favourite among aristocratic Madrid chamber music enthusiasts as early as the 1770s. Iriarte's five-canto *La música*, lavishly issued by the royal printers in 1779, contains the lines 'Only your genius, Haydn, has been so inspired by the Muses that your works a thousand times repeated never lose their freshness nor fascination'. According to Iriarte, Haydn's *Stabat mater* (1767) and *Il ritorno di Tobia* (1774–5) were familiar works at Madrid in 1779. Among Haydn's other Madrid devotees Guillermo Ferrer and Pablo del Moral wrote symphonies, performed on 10 March 1790 at the academy at Caños del Peral.



3. THE 19TH CENTURY. The chief Spanish-born composer of Italian operas in the early 19th century was Ramón Carnicer, brought to Madrid from Barcelona by royal order in 1829; until his death in 1855 he dominated local music-making with his operas and through his

teaching of composition at the Royal Conservatory (founded 1830), where his pupils included Barbieri and Baltasar Saldoni. María Cristina (1806–78), who was brought in 1829 from Naples to marry the decrepit Fernando VII, wanted to model the conservatory on the Neapolitan ones, and appointed the Italian opera singer Francesco Piermarini as its first director (1830–38). Other notable directors included Arrieta y Corera (1868–94). After Carnicer, Eslava (1855–7), Arrieta y Corera (1857–68) and Serrano (1895–6) held the composition chair. Among 19th-century teachers who became internationally known were Hernando (1858–61; harmony), Pedro Albéniz y Basanta (1830–54; piano), Saldoni (1839–41; singing), Arbós (1888–91; violin), Felipe Pedrell (1894–1904; music history and choral music) and Iradier (1839–51; solfège). The official name of the conservatory changed six times between 1830 and 1963; between 1868 and 1900 it was called Escuela Nacional de Música y Declamación. Its location also changed six times, and from 1852 to 1925 it was in the Teatro Real.

In the mid-19th century Barbieri, Gaztambide, Oudrid y Segura, Inzenga and Hernando initiated the zarzuela in two (*Colegiales y soldados*, 1849) and three acts (*Jugar con fuego*, 1851) that dominated the Spanish-speaking world until Chueca, Valverde and others heralded the vogue of the one-act zarzuela in the 1890s; by the close of the 19th century ten Madrid theatres were devoted exclusively to zarzuelas. Madrid theatres inaugurated during the century that either occasionally or regularly offered musical spectacles included the Príncipe (1807), Liceo, Instituto (1839), Circo (1834 for equestrian performances, remodelled in 1842 for opera), Talia (1840), Variedades (1843, burnt down 1888), Zarzuela (1856), Novedades (1857), Príncipe Alfonso (1863 as a circus, 1870 as a theatre), Circo de Rivas, Rossini (1864), Apolo (1873), Eslava (rebuilt from a café in 1873), Comedia (1875), Lara (1880) and María Guerrero (1885). At the Palacio, lavishly subsidized between 1849 and 1851 by Isabel II, Arrieta's two-act *Ildegonda* and three-act *La conquista di Granada* with librettos by the Italian court poet Temistocle Solera were produced in 1849 and 1850 respectively. The Teatro Real, on the site of Caños del Peral, was opened on 19 November 1850 with Donizetti's *La favorite* sung by an Italian cast. Arrieta's two operas were revived there in 1854 and 1855, the second renamed *Isabel la Católica*. From 1871 to its closure in 1925, 32 operas by Spanish composers were mounted in the Teatro Real, only nine of which had received their first performances elsewhere. These included works by Arrieta, Bretón, Chapí, Serrano, Campo, Vives, Zubiaurre, Usandizaga, Turina, Vicente Arregui Garay and Guridi. Despite these gestures, and the occasional performance of a zarzuela by Chapí or Bretón between 1850 and 1925, Madrid high society reserved its affection chiefly for Italians, above all Verdi. Verdi was in Madrid for the Spanish première of *La forza del destino* (based on a Spanish play) on 21 February 1863. He was only one of many international figures who visited the city in the 19th century: Rossini in 1831–2, for the première of his *Stabat mater* commissioned by the rich prelate Fernández Varela; Liszt in 1844 for highly successful concerts at the Liceo; Glinka in 1845; Gottschalk in 1851–2; Herz in 1857; Offenbach in 1870; Saint-Saëns occasionally between 1880 and 1908; Gounod in 1882; and Puccini, who became the idol of Madrid, in 1892. Paderewski first took Madrid by storm in 1902, as did Stravinsky in 1916.

The leading 19th-century church musicians who conducted the Capilla Real were Rodríguez Ledesma (1836–47) and Eslava (1847–78). The most prolific Spanish-born symphonist there was P.M. Marqués y García, with five symphonies performed between 1869 and 1880 by the Sociedad de Conciertos (founded by Barbieri in 1866). Wagner's music was first heard in Madrid on 12 March 1864, when Barbieri conducted the Sociedad Artístico-Musical de Socorros Mutuos (founded in 1860 with Hernando as secretary) in the March from *Tannhäuser*, and again on 11 July 1868 when Gaztambide conducted the Sociedad de Conciertos at Campos Eliseos in the *Tannhäuser* Overture. During Monasterio's directorship of the Sociedad de Conciertos (1869–76) the repertory ranged from Haydn and Mozart to Bizet, Rubinstein and Gade. Mariano Vázquez, a native of Granada who directed the society's concerts from 1877 to 1885, gave the first performance in Madrid of Beethoven's Ninth Symphony, on 2 April 1882; among Spaniards he favoured Brull, Chapí, Espí, Pablo Hernández, Hernando (Symphonic Fantasy *La proclamación*, 1878), Pedrell and Zavala. The Unión Artístico-Musical, founded as a competing orchestral society in 1878, enlisted Bretón as conductor until September 1880. After giving premières of ten Spanish composers' works (including Chapí's *La corte de Granada: fantasia morisca*, 1879), Bretón conducted the Sociedad de Conciertos from 1885 to 1891 in less adventurous symphonic programmes. During the next decades the pattern of symphonic life at Madrid became progressively more international, with the repertory (as in most European capitals) neglecting natives in favour of internationally known composers.

4. The 20th century. By the turn of the century Madrid's musical life had grown rather sterile. It was revitalized by the creation of the Sociedad Filarmónica) (1901, dissolved in 1936), the Orquesta Sinfónica (1904, directed by Enrique Fernández Arbós) and the Orquesta Filarmónica (1915, directed by Bartolomé Pérez Casas). These organizations gave a new boost to orchestral activity in Spain by performing the Classical, Romantic and modern repertories. Of the three leading composers active in Madrid at the beginning of the century, only Falla (who lived there between 1899 and 1907) had much impact on the city's musical life. Conrado del Campo (1878–1953), a native of Madrid, sponsored the Cuarteto Francés in 1903, which became the Quinteto de Madrid in 1919 (with Joaquín Turina on the piano), and did much to foster enthusiasm for chamber music in the city. Turina (1882–1949) came to Madrid from Seville and composed in all the main genres, including opera. An important role was also played by Adolfo Salazar, critic for *El sol*, secretary of the Sociedad de Conciertos and the Sociedad Nacional de Música de Madrid from 1915 to 1922 and the secretary of the Spanish section of the ISCM from 1923. The Sociedad Nacional de Música de Madrid sponsored 84 concerts of new works, mostly foreign, in the 1920s and early 30s. These were the years when the composers of the Grupo de los Ocho (most prominent among them Ernesto and Rodolfo Halffter, Salvador Bacarisse, Gustavo Pittaluga and Julian Bautista) burst on to the scene. Their work, influenced by contemporary French composers, Stravinsky and Spanish composers such as del Campo, gained wider currency in broadcasts by Union Radio de Madrid, where Bacarisse was artistic

Interior of the Teatro Real, Madrid: lithograph by J. Donon

director. Prokofiev made his first Madrid appearance in November 1935 and conducted the world première of his Second Violin Concerto on 1 December. In 1938 the Orquesta Nacional introduced works by many Spanish composers, including Bautista, Bacarisse, Casals, Javier Gols, Rodolfo Halffter and Turina (*Sinfonía sevillana*).

During the Civil War Madrid's fragmentary musical life was centred on the Orquesta Municipal, directed in 1938 by Lamote de Grignon, the Orquesta de Conciertos (1939), directed by Emilio de Vega, and the Orquesta Clásica, directed by José María Franco. Joaquín Rodrigo, who settled in Madrid in 1939, wrote his *Concierto de Aranjuez* there in the same year. The Madrid SO was directed by Luis Jordá from 1940 until 1945 and the Orquesta Nacional by Altaulfo Argenta between 1945 and 1958. In 1941 Turina was named music commissioner, in charge of an organization whose importance was equalled only by the Servicio de Educatión y Cultura del Movimiento, which in 1964 organized the first biennial international festival of contemporary music. That same year saw the first festival of Spanish and Latin American music; in 1965 the 39th Festival of the ISCM was held in Madrid and featured works by Luis de Pablo, Cristóbal Halffter and Anton García Abril, all members of the Grupo Nueva Música, which had been formed in Madrid in 1958. In 1964 the Zaj group was founded by Juan Hidalgo, Walter Marchetti and Ramón Barce. The Orquesta Sinfonica de la Radiotelevisión Española was formed in 1965 and gave its first concert on 25 May under the direction of Igor Markevich.

On 13 October 1966 the Teatro Real, which had been closed since 1925, reopened as a concert hall and the home of the Real Conservatorio Superior de Música, as the Escuela Nacional de Música y Declamación had been renamed in 1963. Shortly afterwards the Sociedad de Conciertos Alea, directed by de Pablo, was created, along with its electronic music laboratory. Juventudes Musicales de Madrid, established in 1951, spawned Nueva Generación, Grupo Sonda and Conjunto Koan, all dedicated to avant-garde music. In 1970 Leonardo Balada's stage cantata, *Maria Sabina*, opened in Madrid, causing a celebrated scandal. Another contemporary music group, LIM (Laboratorio de Interpretación Musical), was founded in 1975, with Jesús Villa Rojo as artistic director. Chamber music was served by concerts organized by the Fundación Juan March (established in 1955), by the Monday concerts at the Sala Fénix between 1973 and 1986 and by the series of concerts at the Teatro Real (from 1977). The annual Festival de la Libre Expresión Sonora, devoted to new Spanish music, was held at Complutense University between 1979 and 1984.

Madrid's musical life was boosted in the early 1980s by the support of the national and municipal left-wing governments. The Círculo de Bellas Artes was set up in 1983, to promote contemporary culture, including music, in Madrid. The following year the first annual Festival de Otoño (Autumn Festival) was held. Artists to appear at subsequent festivals have included Steve Reich, Pierre Boulez and John Cage. The première of Luis de Pablo's

Kiu on 16 April 1983 at the Teatro de la Zarzuela was an event of momentous importance for new Spanish opera. Subsequently the Centro para la Difusión de la Música Contemporánea has commissioned and produced operas by young Spanish composers such as Jorge Fernández Guerra, Alfredo Aracil, José Ramón Encinar, Eduardo Pérez Maseda, Jacobo Durán-Loriga, Marisa Manchado and Jose Garcia Román. The Centro para la Difusión de la Música Contemporánea, created as an offshoot of the Ministry of Culture in 1984, has its headquarters in Madrid and holds a regular concert season in the city. It was directed by the composer Tomás Marco from 1985 to 1995, and subsequently by Villa Rojo and Consuelo Díez.

In 1988 the Teatro Real was closed down as a concert hall, reopening as an opera house on 11 October 1997. The Auditorio Nacional de Música was inaugurated in 1988 with Falla's *Atlántida*, in the completion by his pupil Ernesto Halffter. The hall is the home of the Orquesta y Coro Nacional. The first 'Punto de Encuentro' festival of electro-acoustic music was held at the Círculo de Bellas Artes in 1990. In 1992 Madrid was named European Culture Capital and was host to numerous musical events, including a series of concerts 'Madrid, Villa y Corte' that revived rare Spanish works from the 17th century to the 19th.

ROBERT STEVENSON (1–3), JOSÉ IGES (4)

Madrid, Juan Fernández de (*fl* 1480). Iberian composer. Four villancicos, a Gloria and three motets are ascribed to 'Madrid' in various late 15th-century sources. While Barbieri identified the composer with the rebec player Diego or Juan de Madrid in the service of Isabella, Anglès, Stevenson and Pope agreed on Juan Fernández de Madrid, singer in the royal Aragonese chapel between 1479 and 1482. A third possibility might be Juan Ruiz de Madrid who was appointed singer in the same chapel in January 1493 and who died before 1501. Either – or even both – of these singers could have been composers. It may or may not be significant that Juan Ruiz was rewarded handsomely during his years of service in the royal chapel, both with presentations to various benefices and with gifts such as, in 1499, a mule.

The four songs attributed to 'Madrid' in the Cancionero Musical de Palacio appear in the earliest layer of the manuscript thought to have been copied in about 1500. One of these is also found in the Cancionero Musical de la Colombina and *Pues que Dios te fiso tal* is a reworking of the setting by Johannes Cornago who had served in the Aragonese royal chapel in the mid-1470s. 'Madrid' was, therefore, one of the generation of song composers before Juan del Encina; this is borne out by his adherence to the canción form and the more contrapuntal style of his songs. *Por las gracias que tenéis* may be a homage to the Virgin rather than the queen, as suggested by Barbieri; indeed, the ambiguity may have been deliberate.

The settings for the aspersion, *Asperges me* and *Vidi aquam*, were added to the end of the so-called 'Chigi' codex (*I-Rvat* Chigiana C.VIII.234). Only the first of these settings is ascribed to 'Madrid', but the style of the second is very similar, with initial, though not systematic points of imitation and a preference for parallel movement resulting in a rich and consonant harmony. These features are also apparent in the three-voice Gloria and the four-voice setting of *Domine non secundum peccata nostra*, a motet for Ash Wednesday, ascribed to Madrid in the manuscript *F-Pn* nouv.acq.4379, although such stylistic traits are common to other composers of the period and it is difficult to say with any certainty that all these works are indeed by the same composer.

TESS KNIGHTON

Madrigal. A poetic and musical form of 14th-century Italy; more importantly, a term in general use during the 16th century and much of the 17th for settings of various types and forms of secular verse. There is no connection between the 14th- and the 16th-century madrigal other than that of name; the former passed out of fashion a century before the term was revived. The later madrigal became the most popular form of secular polyphony in the second half of the 16th century, serving as a model for madrigals and madrigal-like compositions in languages other than Italian throughout Europe. It set the pace for stylistic developments that culminated in the Baroque period, particularly those involving the expressive relationship between text and music, and must be regarded as the most important genre of the late Renaissance.

I. Italy, 14th century. II. Italy, 16th century. III. The concerted madrigal. IV. The English madrigal. V. The madrigal outside Italy and England.

I. Italy, 14th century

The origin of the word 'madrigal', which appears in various forms in early sources (*madriale*, *matricale*, *madregal*, *marigalis* etc.), is a matter of dispute. Its derivation from *mandra* (It.: 'flock') by Antonio da Tempo (1332) is probably untenable. Two hypotheses are open to discussion: the word is derived either from *materialis* (as opposed to *formalis*), implying a poem without rules and without specified form; or from *matrix* (in the sense of *cantus matricalis*, a song in the mother tongue, or of *matrix ecclesia* – originally an ecclesiastical song or perhaps a clausula-like piece for the organ).

The madrigal, never mentioned by Dante, but used by Petrarch, was mentioned for the first time by Francesco da Barberino (*c*1313), who defined it as 'rudium inordinatum concinium', thus approaching the idea of *materialis*. In an anonymous early 14th-century treatise from the Veneto (see Debenedetti, 1906–7, 1922), the madrigal is described as a piece with a tranquil tenor part and lively upper voices. This led Pirrotta (1961) to suggest that the madrigal structure derived from a clausula-like *matrix*. The first detailed description of literary madrigal forms is found in da Tempo, who distinguished two different types – those with and without ritornello (both are in *I-Rvat* Rossi 215) – and grouped them according to the length of the lines. Da Tempo also referred to monody as well as polyphony in the madrigal. However, all the surviving examples are for two or three voices.

The earliest surviving madrigals are from northern Italy and probably originated in the 1320s (*I-Rvat* Rossi 215). The texts are mainly arcadian, intended for the north Italian *signori*. The music often moves freely and improvisatorially in relation to the text. A predominant upper voice, presumably the first to be written (which would preclude a derivation from the clausula), is accompanied by a lower voice which often moves by perfect consonances with it. Crossing of parts occurs almost exclusively in the final section, the ritornello. Although both voices are supplied with text in all the early madrigals, and in most of the later ones too, the melodic style of the lower voice suggests that it was intended originally as a supporting voice.

The trecento madrigal attained its final form in the 1340s in northern Italy: two or three three-line strophes, each known as a 'copula' or 'terzetto', and having identical music, are followed by a one- or two-line terminating ritornello, usually with a change of time signature. The individual lines normally have seven or 11 syllables for the strophes and 11 syllables for the ritornello. The following example by Giovanni da Cascia has two three-line strophes and a two-line ritornello; all the lines have 11 syllables. The rhyme scheme is *ABB ACC DD* (text from Corsi, 1970, p.11).

> Agnel son bianco e vo belando be
> e, per ingiuria di capra superba,
> belar convegno e perdo un boccon d'erba.
>
> El danno è di colui, io dico in fé,
> che grasso mi de'aver con lana bionda,
> se capra turba che non m'abbi tonda.
>
> Or non so bene che di me sarà,
> ma pur giusto signor men mal vorrà.

Guido Capovilla (1982) identified 63 further metrical schemes used in the madrigal, with 17 variants. But in the musical repertory two are used more commonly than the others: *ABB CDD EE* and *ABA CDC EE*. The musical style was established in the works of Magister Piero, Giovanni da Cascia and Jacopo da Bologna (*fl* 1340–60): the individual lines are usually separated from each other by cadences, and often also by differences of tonality. Ex.1 shows the beginning of the first line, the whole of the second line, and the beginning and end of the ritornello

of *Agnel son bianco*. The melismatic opening, the ensuing syllabic style and final melisma of each phrase are characteristic. Imitation rarely occurs in the 14th-century madrigal, but there is a canonic type that furnishes a link with the CACCIA.

Almost 90% of the 190 or so known madrigals are for two voices, the rest for three. The three-voice madrigal appeared for the first time in the output of Jacopo da Bologna, who also developed a closer relationship between words and music (see Fischer, 1995). The genre continued to be used in northern Italy by Bartolino da Padova and Ciconia, and was also very popular in Florence where composers such as Gherardello, Donato, Lorenzo, Niccolò, Paolo, Landini and others cultivated the madrigal. From the 1360s onwards the number of madrigals declined in favour of the ballata, which had itself become polyphonic. By that time the madrigal usually no longer appeared as arcadian courtly poetry, but rather took the form of autobiographical pieces (e.g. Landini's *Mostrommi amor* and *Musica son*, Zacara's *Deus deorum, Pluto*), moralizing poetry (e.g. Landini's *Tu che l'opere altrui*), poems written for special occasions (Paolo's *Godi, Firenze*, 1406, Antonello de Caserta's *Del glorioso titolo*, 1395), and pieces with heraldic or symbolic meanings (e.g. Jacopo's *Sotto l'imperio*, Bartolino's *Imperial sedendo*, ?1401, Ciconia's *Una panthera*, ?1399). The 14th-century madrigal disappeared after about 1415, but instrumental versions still appeared (as in *I-FZc* 115, dated between 1410 and 1420).

II. Italy, 16th century

After about 1530 the term 'madrigal' began to be used regularly in Italy as a general name for musical settings of various types and forms of verse. One of these, a single stanza with a free rhyme scheme and a varying number of seven- and 11-syllable lines, revived the 14th-century poetic term 'madrigale'. To some 16th-century writers the word 'madrigal' meant only this poetic form (along with, perhaps, the 14th-century madrigal itself, a different and less variable form); and one often finds musical settings of Italian poetry called simply 'canti'. But to many, and certainly to music publishers, 'madrigal' was a generic term, like the earlier 'frottola'; musical settings of sonnets, ballatas, canzoni, lyric and narrative ottava stanzas, pastoral verse, popular and dialect poems were all known as madrigals.

1. ORIGINS. Madrigalian verse in the early 16th century owed its style, imagery and even vocabulary to the lyrics of Petrarch, whose poetry enjoyed an extraordinary revival at this time. The Aldine edition of the *Canzoniere* (Venice, 1501) was followed by numerous reprints, including the pocket-size 'Petrarchini' carried everywhere by fashionable young poets for whom Petrarch's canzoni and sonnets were literally and figuratively a source of inspiration. Pietro Bembo (1470–1547), who had edited the 1501 *Canzoniere*, became the leading Petrarchist of his day. His championing of the 'classical' Tuscan language of Trecento writers led him to a poetic theory, fully elaborated in his *Prose della volgar lingua* (1525), in which the works of Boccaccio and Petrarch were seen to embody every desirable characteristic of style. Their use of word accent and rhyme, and especially their ability to create varied effects (as opposed to Dante's greater regularity), in part through free alternation of 'versi rotti' (7-syllable lines) and 'versi interi' (11-syllable lines) were much admired and much imitated by Bembo and his fellow Petrarchists. Although Bembo's theories had more to do with the sound of words than with subject matter or imagery, poets of the time took these as well from Petrarch. Thus much of the poetry of the early madrigal, though in its way no less 'poesia per musica' than the verses set by the frottolists a few years earlier, was reminiscent of Italy's greatest lyric poet; and there were many settings of Petrarch's verse itself.

A traditional view of the origins of the madrigal is that changes in literary taste in the early 16th century led composers away from the half-serious texts, closed forms and soprano-dominated texture of the frottola; that the new use of Petrarchan and Petrarchistic texts called for musical forms as free as the verse, and for a fully vocal, declamatory polyphonic texture as serious as the melancholy love-poems newly in fashion. According to this view the Italian-born frottolists, led by Tromboncino and Marchetto Cara, were unable to meet the challenge thus presented; and Italy turned once more to the 'oltremontani', French or Flemish musicians such as Verdelot, Arcadelt and Willaert, in whose hands the madrigal took shape.

This account of the madrigal's origins must be qualified on nearly every point. First, the turn away from frottolistic verse was not sudden but gradual, not complete but partial. In the printed sources of the 1520s and 1530s, Petrarchan settings are found side by side with frottolas, mascheratas and other lightweight verse. Deliberate cultivation of a rustic vein, including use of dialect verse, is to be seen, as in the Venetian–Paduan villotta, during the early years of the madrigal's development (by the 1540s pieces with texts of this kind were usually published separately, and called 'canzone villanesche', 'villanelle' or another of the names grouped together by Einstein as 'the lighter forms').

The contrast between the frottola's fixed repetition schemes and the freedom of the madrigal is real but its importance has been exaggerated. Since the madrigal is usually the setting of a one-stanza poem or of a single stanza from a canzone, ballata, sestina or poem in *ottava rima*, it naturally lacks the verse–refrain scheme of the frottola. As for internal repetitions like those within a frottolistic stanza, they are not infrequent in the early madrigal; Verdelot, the two Festas and Arcadelt all used a good deal of repetition, sometimes disguised by overlapping phrases and changes of texture. Since these repetitions are often the setting of rhymed couplets that might occur anywhere in a madrigal or canzone stanza, they are less predictable than those of the frottola. The musical repetition so common at the end of madrigals, however, is usually a reiteration of the final line rather than the setting of a couplet.

If the frottola was essentially music for solo voice with lute or other instrumental accompaniment, performance by singers on all four parts being an alternative, the early madrigal was the reverse, primarily vocal polyphony for three to six voices, with solo performance a secondary choice. A transition in Italian music from solo writing to fully texted vocal polyphony has been called a prime factor in the rise of the madrigal (Rubsamen). Such a change did indeed take place, but it cannot be seen very clearly in the frottola itself, despite the increasing number of 'serious' poems found in Petrucci's last books of frottolas.

A 'serious' polyphonic texture, part chordal and part imitative counterpoint, but with all voices sharing a more or less equally declamatory style, was cultivated among a new generation of composers working in Rome and Florence rather than in the courts of Mantua and Ferrara. Some of these composers were northerners, but others were Italians: Sebastiano and Costanzo Festa, the former at least intermittently and the latter steadily working in Rome; and a group of Florentines including the young Francesco de Layolle and Bernardo Pisano (the importance of whose work has been demonstrated by D'Accone). The overlapping of two styles and two generations can be

seen in prints of 1520, a year in which Petrucci's *Musica de messer Bernardo Pisano sopra le canzone del Petrarcha* as well as Antico's *Frottole libro quarto* and the *Frottole de Misser Bartolomio Tromboncino & de Misser Marcheto Carra ... per cantar & sonar col lauto* were published.

Cultural relations between Rome and Florence were close during the reign of the Medici Popes Leo X (1513–21) and Clement VII (1523–34). Some musicians, among them Pisano, divided their time between the two cities; the works of Costanzo Festa, a member of the papal chapel from 1517, show many connections with Florence; and Verdelot, in Florence from the early 1520s, is known to have visited the papal court at the end of 1523. Bembo's residence in Rome (1513–21) as secretary to the papal curia meant that Rome was at this time a centre for Petrarchists. This makes it very likely that conscious attempts to create an Italian musical style possessing the qualities of 'piacevolezza' (charm) and 'gravità' (dignity), which Bembo found in Petrarchan verse, were made in 'Bembist' circles during the second decade of the 16th century.

The frottola, the Florentine carnival song and other Italian secular genres, somewhat lacking in 'gravità', could serve only in part as the basis for such a style. French music (ably represented by the many northern musicians in the service of Leo X) offered more appropriate models, in the chanson and the motet. Josquin's late chansons, some of which were surely known in Rome, have the kind of learned texture and attention to expressive declamation that lift the genre far above the 'light and foolish thing' it was called by Carpentras, one of Leo X's musicians. In contrast, the lighter but expert polyphony of the developing Parisian chanson showed how much variety was possible in a secular genre. In the motet of this period there is a balance between imitative counterpoint and chordal writing; the contrapuntal fabric is supported by a new harmonic firmness and varied by alternation of vocal parts and change of register.

Application of all these characteristics to the setting of Italian poetry was hardly to be expected of the older frottolists, who had spent their lives cultivating a quite different style. The great Franco-Flemish composers of the turn of the century had on the whole treated Italian pieces in a lightweight manner; and in Leo X's time Josquin was far from Italy, Isaac an old man. The French members of Leo's chapel contributed little, although Carpentras did make a few Petrarchan settings (published in Antico's *Frottole libro tertio* of 1517). Among Italians in the Roman-Florentine orbit Pisano, the young Layolle and Sebastiano Festa were working towards a new style, but in some ways their music must be regarded as transitional; for instance, Pisano's settings of single stanzas from Petrarchan canzoni were probably meant to serve for the entire poems, and their style seems a mixed one rather than a firm synthesis. By the mid-1520s such a synthesis was on the way to being achieved, probably by several composers but certainly by one, Philippe Verdelot, whose career as a madrigalist is discussed below.

2. 1525–40: Verdelot, Festa. *Madrigali de diversi musici: libro primo de la Serena* (Rome, 1530) is the first collection of pieces to bear the title 'madrigal'. Its eight works by Verdelot, one by the Ferrarese Maistre Jhan and two by each of the Festas are characteristic of the new genre but it contains, like the diverse prints of the 1520s, some lighter pieces and even a few French chansons. Individual pieces by Sebastiano Festa were printed as early as 1520, and a madrigal by Verdelot was included in a fragmentary Petrucci print of about 1520, while another, *Madonna quando io v'odo*, appeared in a Roman print of 1526, *Messa, motetti, canzonni ... libro primo*, discovered by Jeppesen; according to Jeppesen the *Libro primo de la fortuna*, with two pieces by Verdelot, was probably also printed about 1526. Of the manuscripts (mostly Florentine in origin) containing early madrigals, some date from the late 1520s; these include *I-Bc* Q21 and *US-Cn* Case-VM1578 (M91). The latter is an exceptional source for the early history of the madrigal, an elaborate presentation copy of motets and madrigals, many of them by Verdelot, perhaps sent to Henry VIII of England (see Slim, 1972).

In 1533–4 the first two books of Verdelot's four-voice madrigals were printed in Venice. Both volumes were soon reprinted, and a single-volume edition of the two books, issued in 1540, became one of the most popular collections of the time, reprinted a number of times during the next 25 years. Following a practice started with the frottola repertory, the Venetian printer Ottaviano Scotto published, in 1536, Willaert's arrangements for voice and lute of a number of pieces from the first book. A third book of four-voice madrigals appeared in 1537; two books of works for five voices appeared in the late 1530s, and one of six-voice madrigals was printed in 1541. In nearly all these prints there are some madrigals by other composers, identified in the table of contents but usually simply called 'diversi' or 'altri eccellentissimi autori' on the title-page. Until the publication of Arcadelt's first book (probably in 1538) Verdelot was clearly seen as the leading composer in the new genre. By 1540 Verdelot and Arcadelt were thought of as the two masters of the madrigal (in a painting of a musician by Hermann tom Ring, dated 1547, a copy of what is perhaps Verdelot's first and second books for four voices is depicted as 'Di Verdelotto Di Archadelt Tutti li Madrigali del Primo et Secondo libro a Quatro Voci'; fig.1). Other composers of this first generation include Costanzo Festa, Maistre Jhan, Francesco Layolle, Corteccia, Alfonso dalla Viola, Domenico Ferrabosco and – though much of his work was as yet unpublished – Willaert.

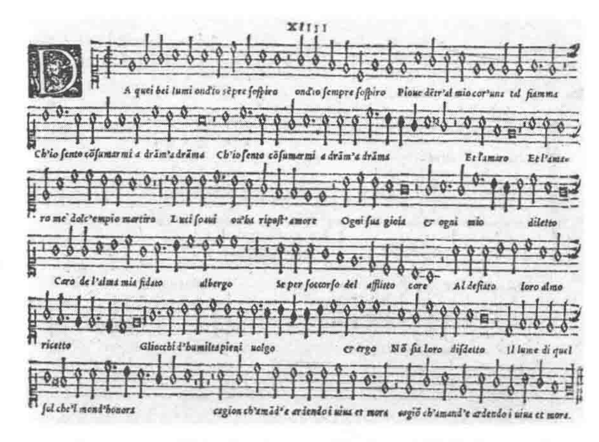
Although Verdelot set texts by Petrarch, he seems to have been more inclined to use poems, often Petrarchistic in style and tone, by contemporary writers such as Machiavelli, Lodovico Martelli and Luigi Cassola. Forms related to the ballata or canzone are common in this poetry, along with some madrigals and a few sonnets.

The dates of publication are really too close to permit the view that Verdelot's four-voice madrigals were his first efforts in the genre and the five- and six-voice pieces were written later. There is, however, a real, if not constant, difference in style, perhaps the natural consequence of differences in vocal texture, between the madrigals for four and those for five and six voices. The four-voice settings are on the whole closer to the style of Sebastiano Festa and the simpler pieces by Pisano: mostly chordal, with clearly marked cadences (sometimes full closes) separating the phrases of text, the whole strongly reminiscent of the French chanson of the period. A more motet-like polyphony, with much imitation, varied scoring and overlapping of phrases, can be seen in the five- and six-voice madrigals. In Verdelot this differentiation is

1. *'A Musician' (Johann Münstermann): portrait by Hermann tom Ring, 1547 (Westfälisches Landesmuseum für Kunst und Kulturgeschichte, Münster)*

comparatively slight; in the later madrigal it can be of fundamental importance, the four-voice madrigal becoming almost a separate genre in the works of composers for whom writing for five and six voices was the norm.

Costanzo Festa contributed to the establishment of another sub-species of the madrigal, that for three voices. His three-voice madrigals, said in the (?) first edition of 1541 to be newly 'reprinted', were surely written a good deal earlier; it is possible that interest in the writing of three-voice madrigals was stimulated by the vogue for three-voice chansons in Rome during the 1520s and 1530s. At any rate Festa's three-voice madrigals, simple and graceful in style, were popular enough to be reprinted several times. A book of four-voice madrigals, printed in 1538, survives only in part; the contents of what may have been another book are in a lone manuscript partbook (*I-Pc* 3314). Otherwise Festa is represented as a madrigalist by individual pieces in prints of Arcadelt's and Verdelot's music and in anthologies of the 1540s. It is thus difficult to assess Festa's position in the rise of the madrigal; his place in the papal chapel, his close connections with the Florentine Filippo Strozzi and the fact that he must have been about the same age as Verdelot nonetheless make him a figure of importance.



3. 1535–50: Arcadelt; the madrigal in Venice. According to the Florentine humanist Cosimo Bartoli, 'Arcadelt then followed in the steps of Verdelot, moving in them with no mean skill at the time of his stay in Florence'. Arcadelt's madrigals, the bulk of which were published in five books for four and one for three voices between 1538–9 and 1544, and a number of which appear in manuscripts alongside those of Verdelot, bear a close stylistic resemblance to those of his older contemporary. His four-voice *Primo libro*, the first edition of which is lost but which was reprinted over 40 times before the mid-17th century, is perhaps the most famous single book of madrigals ever published. Its contents varied somewhat from one edition to the next, but a group of pieces including the celebrated *Il bianco e dolce cigno* remained in all the editions. Like Verdelot, Arcadelt chose Petrarchist verse (but comparatively few poems by Petrarch himself), much of it by writers now forgotten but including poems by Bembo, Sannazaro and Michelangelo. Many of the poems, again like those chosen by Verdelot, show a relationship to the ballata and recognizable forms of the canzone; others are free madrigals. Arcadelt's madrigals contain a good deal of imitative counterpoint, but opening phrases and important lines of text are often set in declamatory chordal fashion. In providing this variety of texture Arcadelt blended sound and sense, gravity and charm in a way that translates Bembo's theories literally into music (a good example is the opening of *Quando col dolce suono* from the first book for four voices).

Through repetition of the text and some overlapping of phrases Arcadelt connected the alternating 7- and 11-syllable lines into a smooth if not continuous musical fabric. In this his style seems a clear advance over Pisano's, perhaps also that of Verdelot's earlier madrigals. Nevertheless the madrigal in Arcadelt's hands was still bound by the form of the chosen text, its musical phrases corresponding to poetic lines. Madrigals of this 'classic' type continued to be written for some years, especially in four-voice settings.

With the publication in 1539 of Arcadelt's first four books by Antonio Gardane (later known as Gardano), a Frenchman recently arrived in Venice, a long period of the madrigal's life in print began. Led by Gardane's firm and that of Girolamo Scotto, Venetian printers established themselves as the leading publishers of madrigals by composers from all parts of Italy. They brought out a surprising number of madrigal collections, and reprinted successful volumes, including some originally published elsewhere, to meet what was evidently a great demand. In the 1540s the madrigal became so popular that there was hardly a professional musician in Italy who did not cultivate the genre, and even avowed amateurs had a volume or two (often prefaced with self-deprecating statements about their stature in the musical world) published by Gardane or Scotto. In the course of bringing out new editions of popular collections such as those of Arcadelt, the printers added and subtracted pieces, changed ascriptions and rearranged the order of works – this last sometimes upsetting an arrangement carefully ordered by mode or choice of clefs. By way of compensation later editions sometimes have corrected readings and more precise underlay of text.

There is no proof that either Verdelot or Arcadelt ever lived in Venice, and their influence on the Venetian madrigal after 1540 is only tangential. Petrarchism flourished in Venice in the second quarter of the 16th century, doubtless encouraged by Bembo's return to Padua and then Venice; salons such as those of Domenico Venier were frequented by Petrarchan poets and musicians, and the houses of wealthy patrons like Neri

Capponi were centres for the performance of new music. The chief musical figure in Venice, from his arrival in 1527 until his death in 1562, was Willaert, the much revered 'Messer Adriano', *maestro di cappella* at S Marco. He dominated the city's musical life in person and through a circle of admiring pupils, including Girolamo Parabosco, Antonio Barges, Francesco Viola, Perissone Cambio and the theorists Pietro Aaron, Vicentino and Zarlino. Cipriano de Rore, who seems to have lived in Brescia before his move to Ferrara in 1546, may not actually have been a pupil of Willaert's, but his madrigals are certainly 'Venetian' rather than 'Florentine' in character.

With the exception of a volume of *Canzone villanesche alla napolitana* (1545), Willaert's madrigals were not printed in collected form until a late date; *Musica nova*, his celebrated volume of motets and madrigals for four to seven voices, was published with great fanfare by Gardane in 1559 (speculation about the possibility of an earlier edition is unfounded). The contents of this volume must have been written much earlier; pieces from the *Musica nova* were known and cited in Willaert's circle in the 1540s. According to Francesco Viola's preface to the collection, Willaert revised and reordered his collection before releasing it to a public eager to be delighted and moved by it, as well as to those who wished to imitate its perfections in their own music. Thus the madrigals of the *Musica nova* may be taken as Willaert's testimony of what he thought the madrigal should be.

In several respects this differs from what Verdelot and Arcadelt had done, even from Willaert's own earlier work. Willaert here set the verse of Petrarch in preference to that of that of 16th-century Petrarchists; he favoured the sonnet, dividing it so that a piece in two sections or *partes*, like a motet, resulted. Indeed the complex, rather dense polyphony of Willaert's madrigals (the seven-voice madrigals, dialogues in a simpler style, are exceptional in this volume) is much like that of his motets; it is even possible that he intended the two genres represented in *Musica nova* to have some similarities of style and material. Imitative correspondences among the voices tend in Willaert's madrigals to be freely varied rather than exact, with each voice, as it were, speaking for itself. The mixture of imitative and chordal texture is subtler, more closely interwoven than it is in Arcadelt's style; and the declamatory and syntactic values of the text are adhered to much more closely. Willaert's prosodic exactness is so essential an element of his mature style that it seems almost to replace interest in distinctive melodic patterns.

Willaert's pupils and admirers imitated his style in varying ways and with varying success. For example, the five-voice madrigals of Perissone Cambio (1545 and 1550) show a composer of modest stature doing his best to write in Willaert's vein; on the other hand, Rore's first two books for five voices show total mastery of Willaert's style. In at least one respect Rore's *Primo libro* was in advance of Willaert; Rore used the newly fashionable notation called 'cromatico' or 'a note nere' or 'misura di breve', which used short (hence black or 'coloured') note values under the mensuration sign C, as opposed to the normal use of longer values under the sign ₵ (designated as 'misura comune' in Rore's second book for five voices; fig.2).

It is not entirely clear whether this notation, already used in occasional pieces by Arcadelt and Verdelot, was in every case the mark of a new style. It allowed for a widened range of note values, from a quick declamatory patter (seen also in the villanella at this time) and close, nervously syncopated imitative entries to long-held notes useful for setting laments, sighs and invocations; in this respect its presence is a sign of change in the direction of heightened expressiveness. Madrigals written in this notation were seen by contemporaries as something new, a view encouraged by Gardane and Scotto who published anthologies of such pieces throughout the 1540s.

Venetian printers broadened the market for the madrigal during this period. Lute intabulations of popular madrigals, first those of Verdelot and Arcadelt, began to appear with increasing frequency. Collections of two- and three-voice madrigals, some of them (such as the volumes of duos and trios by Jhan Gero) probably commissioned by the publishers, made the genre accessible to small groups of performers and to students. At least a few of these pieces were, like the two- and three-voice chansons of the period, arrangements of existing works. Finally, Gardane and Scotto, as friendly or rival competitors, vied with each other in bringing out new collections by composers within and outside the Venetian musical circle.

During the 1540s Venice was the leading centre of madrigal composition. Music in nearby cities such as Vicenza, Verona and Treviso, where madrigal composers such as Nasco and Ruffo worked, was greatly influenced by Venetian musical culture. Ferrara, closely connected

with Venice in many ways, had its own proud musical tradition. Maistre Jhan, in the service of the Este court at Ferrara for a long period ending with his death in 1538, belonged to the earliest group of madrigalists, but can hardly be considered a leading figure in the genre's development. More important madrigalists in Ferrara at this time were Alfonso dalla Viola and Domenico Ferrabosco, who published books of their own four-voice madrigals and are represented in Gardane's anthologies of the early 1540s; Ferrabosco's setting of Boccaccio's *Io mi son giovinetta*, first printed in an anthology of 1542, became one of the most famous madrigals of the century. Rore's arrival in Ferrara later in the decade marked the beginning of a new period in Ferrarese musical history.

Florence, lacking a central figure of the stature of Willaert, presents a less clear picture in the 1540s. At the beginning of the decade two volumes of canzoni by Francesco Layolle were printed by Moderne in Lyons; though Layolle spent the last 20 years of his life in Lyons, he must be reckoned a Florentine madrigalist. Francesco Corteccia, *maestro di cappella* to Cosimo I, collected and published (1544–7) three volumes of madrigals written, according to his own statement, some years earlier. A volume of settings of Petrarchan verse by another Florentine, Mattio Rampollini, probably dates from this period although it was published years later. Giovanni Animuccia, a young Florentine soon to move to Rome, published his first book of madrigals in 1547.

4. The madrigal in society. Some madrigals, such as Willaert's, may have been performed in an exclusive circle for years before their publication; many others were released to the public as soon as a composer had a collection ready. How publishers acquired these collections is not known, although there are recorded instances of composers being solicited directly; thus Claudio Veggio, a book of whose madrigals was printed by Scotto in 1540, was asked four years later to send new madrigals to the printer so that the composer's admirers could have more of his work to sing. Individual printings of madrigals were probably limited to a rather small number of copies, but the demand for new collections and for new editions of popular works remained steady.

The cantus partbook of Antonfrancesco Doni's *Dialogo della musica* (RISM 1544[22]), an anthology of madrigals and motets, contains a series of anecdotes and conversations which gives a picture of this music performed in company. Doni's interlocutors, some of whom are musicians, talk briefly about the pieces in front of them, and about various musical topics, before and after they pick up the music to sing it. The two sections of the *Dialogo* describe amateur musical evenings in Piacenza and Venice: a few singers, one to a part, try out a number of new pieces and alternate their performance with some solo singing to lute or viol accompaniment.

One tends to think of madrigals as Doni describes them: chamber music performed by cultivated amateurs for their own enjoyment, and perhaps for the delectation of a select few. The existence of academies (such as the Accademia Filarmonica of Verona, founded in 1543), whose members wrote or commissioned madrigals for their own entertainment, confirms this view. But this is not the whole story; from its beginnings the madrigal was also used in connection with dramatic performances and public or private festivities. Texts set by Verdelot include canzoni by Machiavelli (*O dolce nocte*, *Chi non fa prova amore*) written for musical performance as *intermedi* in his plays *Clizia* and *Mandragola*, produced in Florence in 1525. Corteccia's second book of four-voice madrigals contains settings of verses from *Il furto*, a comedy performed in Florence in 1544. Alfonso della Viola, Rore and others wrote madrigals to accompany dramatic performances in Ferrara.

By 1539, the year of Cosimo de' Medici's festive wedding to Eleanora of Toledo at Florence, madrigals were being composed along with motets as ceremonial music. This 'public' form of madrigal developed in two general ways, one leading to an increasingly ornate solo style, the other cultivating a rather bland choral idiom. Both styles, 'monodic' and choral, were performed with colourful and sometimes elaborate instrumental accompaniment. In Florence this music was usually written to texts on mythological themes, illustrated with rich costumes and scenery, the whole providing a series of *tableaux vivants* between the acts of a play. An example is the music written by Corteccia and Alessandro Striggio (i) for texts based on the tale of Cupid and Psyche, performed at a Medici wedding in 1565. A substantial amount of music survives for two 16th-century Florentine wedding festivals, the one in 1539, and the marriage of Ferdinando de' Medici and Christine of Lorraine in 1589.

5. The madrigal at mid-century: Rore. Although madrigals in the 'classic' style of Arcadelt were still being written in the 1550s, the genre was changing rapidly. There was a wider choice of texts, and poets such as Tansillo and Bernardo Tasso were fashionable. Petrarch was still a favourite poet, but instead of setting individual stanzas composers were now writing large cyclic works in which every stanza of a canzone or sestina was given separate treatment. The popularity of these cycles may be seen in anthologies such as *Il primo libro delle muse a cinque voci* (RISM 1555[25]) issued by the composer and publisher Antonio Barrè in Rome, then by Gardane in Venice; this volume contains nothing but cycles, settings of Petrarch and Sannazaro by Arcadelt, Jacquet de Berchem, Ruffo and Barrè himself.

Stanzas from Ariosto's *Orlando furioso* were set, singly, in pairs or in narrative cycles, with increasing frequency, and with unmistakable references to melodic formulae used for improvised declamation of epic verse. Berchem's set of 93 stanzas from *Orlando furioso*, published in 1561 but probably written some years earlier, is the most extensive if not the most typical of such cycles. More characteristic are sets of five or six madrigals on continuous ottavas or stanzas of a canzone or sestina, for varying numbers of voices and through-composed, but often with unifying tonal and thematic elements.

Precise declamation of text, already a feature of the madrigal in Willaert's circle, continued to be important, but in different ways. A supple declamatory or 'narrative' rhythm, used in a chordal texture, may be seen, particularly in the *madrigale arioso*; this term was put into circulation by Barrè with his three four-voice anthologies, *Libri delle muse ... madrigali ariosi* (1555–62). Barrè's own madrigals in this style approach a chordal parlando style, nearly free of regular metric stress. A number of contemporary madrigalists, among them Hoste da Reggio and even, on occasion, Rore, used this style. At the same time madrigals with strongly individualized, expressive rhythmic contrast within a polyphonic texture were

3. Four singers with partbooks ('Concert champêtre'): painting, by an unknown artist, Italian school, early 16th century (Musée du Berry, Bourges)

gaining currency, moving the genre away from the gentle stereotypes of Arcadelt's generation.

Experiments in chromaticism are to be seen in the motet and the madrigal in the 1550s. Again it was Willaert's circle that took the lead. Among Willaert's pupils Nicola Vicentino was the strongest advocate of a new chromaticism based, in theory, on the ancient Greek genera. Such theory was rarely put to practical use, but by 1550 the Venetian madrigal had become more chromatic (with many major root-position triads on secondary scale degrees) than had been characteristic a generation earlier.

In all these innovations (choice of text, experiments in declamation and a new harmonic vocabulary), the works of Rore are of prime importance. He was the leading madrigalist of his generation: his first books for five (1542) and four voices (1550) were among the most often reprinted volumes of the century; his 'Vergine' settings form perhaps the most celebrated of all cyclic madrigals; and his masterly handling of any novelty of style or form to which he subscribed made his works models for more than a generation of imitators. Rore's early madrigals show him to have been an associate of Willaert; but in his first book for five voices, with its new, 'chromatic' notation, the individuality of his melodic and rhythmic writing is already apparent. His concentration on the meaning of the almost invariably serious texts led Rore to run lines together, to end a phrase in mid-line, even to disregard the formal divisions of Petrarchan sonnets. The high technical finish and distinct individuality of each of his pieces set a new course and a new standard for the madrigal. In his later works, the third book for five voices (1548) and the second book for four (1557), Rore moved into yet newer realms of parlando declamation, highly individualized expressive melody and colouristic harmony. These works begin the later history of the madrigal.

6. 1555–70. In 1555 Palestrina and Lassus both published their first collections of madrigals. Palestrina's role in the history of the madrigal was not decisive, except perhaps in the domain of the MADRIGALE SPIRITUALE. Nevertheless the common opinion which dismisses him as a timid follower of Arcadelt seems unfair. He wrote a few famous pieces, including the much loved *Vestiva i colli*; his name appears with great regularity in anthologies, suggesting that his madrigals were always welcome to singers; and he was a master of the multi-partite canzone and other cyclic forms. Lassus's early madrigals are not much like those of Palestrina; being strongly influenced by both Rore and Willaert, he wrote serious, complex settings of Petrarchan verse and at the same time produced light *villanesche* like those of Willaert, Perissone and Baldassare Donato. His ability to write in the newer, more chromatic idiom is shown at some length in his *Prophetiae Sibyllarum*, published late, but certainly an early work. After settling in Munich in 1556 Lassus continued to write madrigals; in the dedication (to Alfonso II of Ferrara) of his fourth book for five voices (1567) he

said that he wanted it known that the Muses were encouraged in Germany as well as in Italy. The court chapel at Munich, under Lassus's direction, employed a number of musicians who wrote madrigals; two anthologies of works by these 'Floridi virtuosi del ... Duca di Baviera' were published (RISM 1569[19] and 1575[11]).

The most prolific of all madrigalists was another 'oltremontano', Philippe de Monte, who produced two books for seven voices, nine for six, nineteen for five, four for four, one for three, and five of *madrigali spirituali* – a total of over 1000 pieces. Most of this enormous output was written after Monte's move to the imperial court at Vienna in 1568; the first two books for five voices, however, and the first for four date from his Italian period. He had great technical skills, and as a young man had already mastered the progressive styles of about 1550; he was particularly adept in handling the declamatory style of the *madrigale arioso*.

In Venice the influence of Willaert and Rore remained great even after their deaths. Venetian composers successful at writing both madrigals and *villanesche* included Donato, a long-lived musician at S Marco, whose first book for four voices (1550), which combined a few madrigals with 'canzon villanesche alla napolitana', was popular for a decade. Nearly every composer in Venice, as well as in Italy generally, contributed to the huge repertory of madrigals, and the output of the 1550s and 1560s is too large to be described here in detail. Among composers who had become established figures were Nasco, the first composer employed by the Accademia Filarmonica in Verona, and later active in Treviso; and the prolific Vincenzo Ruffo, who served the same academy briefly in 1551–2 and was subsequently *maestro di cappella* in Verona and later in Milan. Another composer known to have had close connections with various academies was Francesco Portinaro of Padua.

Composers of at least local prominence during this period (the list is far from complete) included Stefano Rossetto and Alessandro Striggio (i) at Florence, Nicolao Dorati at Lucca, Bartolomeo Spontone and Domenico Micheli at Bologna, Hoste da Reggio at Mantua, Pietro Taglia and Simon Boyleau at Milan, Giovanni Animuccia at Rome, Costanzo Porta at Osino and then Padua, Ippolito Chamaterò at Udine, Ippolito Ciera at Venice, Giulio Fiesco at Ferrara, and G.D. da Nola and Francesco Menta at Naples. Much of the madrigal literature of these middle years remains to be edited and studied.

Some of the greatest madrigalists of the later 16th century began their career in this period. In 1566 Andrea Gabrieli returned to his native Venice to become second organist at S Marco and at the same time published his first book of madrigals for five voices. Wert, a northerner who like Lassus spent part of his youth in southern Italy, entered the service of the Gonzaga family as a young man and remained at the Mantuan court for the last 30 years of his life. By 1570 Wert had produced four books of five-voice madrigals as well as his single four-voice volume. Like Lassus he was much influenced by Rore, whose style he developed with virtuoso technique in writing cyclic settings of Petrarch and Ariosto. In flexibility of technique, ability to find a madrigalistic conceit for practically any word or phrase of text, and skill at vocal instrumentation, Wert had few rivals; during his lifetime Mantua and Ferrara, which he often visited, became major centres in the later development of the madrigal.

7. The 1570s: hybrid styles. The evolution of the madrigal during the last third of the century involved the amalgamation of previously distinct styles, particularly those of the serious madrigal and its lighter forms. Andrea Gabrieli and Giovanni Ferretti, whose first editions appeared mainly from the late 1560s to the mid-1570s, were especially influential in this development. Ferretti published only collections with titles such as 'canzoni' or 'canzoni alla napolitana', although these collections contain some pieces that textually and musically are genuine madrigals (DeFord, 1985; Assenza, 1997). Musically Ferretti took as his point of departure the three- and four-voice *canzona villanesca alla napolitana* of the 1540s and 50s, from which he borrowed several traits: a reduced and clarified harmonic vocabulary; a dance-like rhythmic style using short, sharply profiled, strongly metrical motifs; and a clarified formal architecture with frequent sectional repetition and emphasis on clear cadential points. He also occasionally used the standard texture of the *villanesca*: three voices, two of which moved in parallel 3rds or 6ths, and the third of which, quite distinct in range and style, often served as a harmonic bass. This polarized texture, modified and filled out in various ways, grew steadily in importance as the century wore on and led to the 'trio sonata' texture of the next century.

Ferretti led the style of the *villanesca* towards that of the madrigal in several respects, exploiting stylistic possibilities that were to remain important throughout the life of the polyphonic madrigal. He tended to respond to the first stanzas of his strophic texts with the kind of pictorial musical details often called madrigalisms (*see* Word-painting), for example quick runs or turns for images of flight or happiness, slow motion and low tessitura for images of rest or sleep. He also wrote for a larger number of voices than was usual in the lighter forms; all Ferretti's published pieces are for the five- or six-voice ensemble characteristic of the madrigal of the last half of the century. Together with the increased number of voices went an increased complexity of texture, especially shown in the frequent use of a certain kind of polyphony, dubbed by recent historians 'sham polyphony' (*Scheinpolyphonie*), which gives an overall impression of being more homophonic than polyphonic. Phrase beginnings are imitative, and the individual voices are motivically animated, but in place of the melodic integrity and individual shape characteristic of each line in the best mid-century polyphony, one hears lines made up of short rhythmic motifs tossed around within the clearly shaped harmonic context typical of the lighter forms. The motifs themselves are often essentially triadic in nature and outline either a single chord or a simple succession of chords.

Just as Ferretti wrote canzoni that became more and more madrigal-like, so Andrea Gabrieli composed madrigals that incorporate features of the lighter forms. An extraordinarily versatile musician, Gabrieli typified his age in that he composed in several distinct styles at the same point in his career, and he mixed these styles in subtle combinations according to the impulse or the occasion. Some of his madrigals are stylistically almost indistinguishable from Ferretti's canzoni. Normally, however, they are somewhat closer to the traditional madrigal; they show greater polyphonic complexity, freer forms, and reactions to the text that are both more elaborate and

more delicate than Ferretti's. Another feature of Gabrieli's madrigals, the use of high, transparent textures and bright colours (especially the major triad in certain spacings), seems not to have been borrowed from any separate style. Frequently the listener's attention is directed to the colour and spacing of simple harmonic progressions as a principal source of interest and effect, and it is symptomatic in this connection that Gabrieli published no madrigal books for four voices. He chose either the flexible, transparent three-voice texture characteristic of the lighter forms or a five- to 12-voice texture in which contrasts of colour and spacing could be more fully exploited.

In his books for five and more voices Gabrieli turned away to some extent from the typical texts of the period before 1570. Petrarch is represented in Gabrieli's printed works by only about a dozen sonnets and one sestina, all published in early anthologies, in posthumous collections, or in his earliest books in the genre. Of Cassola's madrigals there are fewer than a half-dozen. Instead of this standard fare there are a large number of public and occasional texts (wedding madrigals, encomiastic texts, prologues and intermezzi for banquets etc.) and many poems that step outside the world of the 'literary' Petrarchism of the first two-thirds of the century into either the playful and conventional world of the pastoral lyric, or the sensuous and often vulgar world of the semi-popular canzone.

Many others in the 1570s followed a path similar to Gabrieli's (in northern Italy one might mention Alessandro Striggio (i), M.A. Ingegneri and Paolo Bellasio), but Gabrieli was the leading composer of Venice, and Venice was apparently the leading centre of the new style. The role played by the patrons and composers of Rome in this stylistic evolution remains an open question. Rome attracted fine performers, especially fine singers, and may have been of primary importance both in the stylistic changes of the 1570s and in prompting the widespread vocal virtuosity of the madrigal in the early 1580s. *Il quarto libro delle muse* (RISM 1574[4]), the most important Roman anthology of the 1570s, contains the first published madrigals of a new generation of Roman composers (e.g. G.A. Dragoni, Francesco Soriano, G.M. Nanino and Macque), whose production is just beginning to be investigated (Pirrotta, 1985, 1993). The transparent textures and pastoral texts of the new Venetian style are also to be found in the works of these composers, as are many elements borrowed from the lighter forms. The hybrid style, though increasingly widespread in the 1570s, was by no means the only style practised then. In particular, the serious, expressive, even craggy madrigals of Wert from the 1560s and 70s onward carried forward the tradition of late Rore and were to be a profound influence on Monteverdi in the 1590s.

8. The 1580s: the ornamented style; dissemination of the hybrid madrigal. 1580 saw the appearance of the last of Andrea Gabrieli's books to be published during his lifetime and the first of 12 books by Marenzio to be published during the next decade. This coincidence may be taken to mark not only the changing of the guard, but also the gradual movement of the centre of progressive influence in the madrigal from Venice in the earlier period, to Rome and the small and contiguous duchies of Ferrara and Mantua in the later. The most important composers of the 1580s were Marenzio, who was employed in Rome but had important connections with Ferrara, and Wert, who was employed in Mantua but likewise had important ties with Ferrara.

According to Vincenzo Giustiniani (*Discorso sopra la musica*, 1628), Marenzio was one of the leaders in the development of the new hybrid madrigal. Speaking of the period about 1580, Giustiniani emphasized the importance not only of a new style of composition that involved a mixture of madrigal and villanella, but also a new style of singing whose most distinctive characteristic was wide-ranging and technically demanding ornamentation. The success of this style of singing stimulated composers to incorporate some of its novelties into the written polyphonic style. Although Giustiniani mentioned Rome as an early centre of this kind of singing, he also named the courts of Ferrara and Mantua as leading centres where the new virtuosity was incorporated into the polyphonic madrigal during the 1580s. The dukes of each of these small city-states maintained a group of highly trained singers – both men and, extraordinarily, women – specifically to perform polyphonic madrigals, one singer to a part, in the rulers' private chambers. The Duke of Ferrara seems to have been the pioneer in this movement; his chamber group was founded in 1580, and he is reported to have listened to it for two to four hours every day.

As Giustiniani's account suggests, many of the boldest and most progressive madrigals of the early 1580s, especially those directed towards the wealthiest centres where fine singers could be expected, became increasingly saturated with ornamental formulae (called diminutions, or divisions). This is of more than passing significance, since the control and manipulation of ornamentation by the composer for his own expressive and structural purposes was to become one of the fundamental elements of the early 17th-century style. The striking degree to which the turns and runs of the diminution manuals (as well as the voices led in parallel 3rds, the clear harmonies and the forthright rhythms of the lighter styles) found their way into the madrigal during the 1580s can be seen in Marenzio's *Rivi, fontane e fiumi* (from *Le gioie*, 1589).

Although Andrea Gabrieli had been a pioneer in the new style, Marenzio went far beyond him in the inventiveness of his tone-painting, in his love for tonal, textural and stylistic contrast, and in his emphasis on virtuosity, both in written-out ornamentation and in far-reaching harmonic excursions.

The style of composition derived from the lighter forms did not always incorporate the new written-out ornamentation, even in Marenzio's work. The lighter style in the 1580s might still exist without the element of virtuosity and almost always did so when the madrigal was directed at less sophisticated patrons than those of the major courts and academies of Italy. Indeed, in terms of the number of composers and pieces affected, the unornamented hybrid madrigal derived from Ferretti and Gabrieli continued to be the predominant type in Italy and must be regarded as the quantitively dominant style of the end of the century. It spread to the Low Countries and northern Germany, especially in the successful anthologies of the Antwerp publisher Pierre Phalèse (published from 1583 into the early years of the 17th century), and in the late 1580s the style migrated to England, where it took root with astonishing vigour. In the anthologies of the Nuremberg printer Kauffmann and in numerous prints from Venice, it spread to southern Germany, Austria and

eastern Europe (Piperno, 1991). At the same time several northern musicians were working in the new idioms, not as teachers but as students of the style. Some of them, such as Peter Philips in Brussels, imitated from afar. Some went south and stayed (Rinaldo del Mel, Bartolomeo Roy, Jacobus Peetrinus, Macque), and others returned home with what they learnt (Mogens Pedersøn from Denmark, Schütz from Germany).

9. Expressionistic and recitational styles. As music director at the court of Mantua and frequent visitor to the neighbouring court of Ferrara, Giaches de Wert was in the vanguard of Italian secular music in the 1580s. Wert's musical personality, like that of Rore, who may have been his teacher, was both serious and passionate. Although he occasionally wrote in the lighter style, his most important and most distinctive madrigals from the 1560s through the 1580s are settings of pathos-laden texts, for which he designed musical gestures of an unprecedented violence and intensity. His serious, dramatic style, like Rore's, was one of the most important harbingers of the *seconda pratica* proclaimed by Monteverdi at the outset of the next century.

In Wert's madrigals of 1558–95 two major categories of dramatic style can be distinguished, which are valid generally in considering the remaining history of the madrigal without continuo. Pieces of the first category, which might be called expressionistic madrigals, translate extravagant emotions expressed in the text into similarly extravagant musical gestures involving, for example, extremely low or high tessitura, unusual vocal intervals (tritones, 7ths, 9ths, 10ths), abrupt silences and contrasts of tempo (see Wert's settings of *Solo e pensoso* and *Giunto a la tomba* from 1581). Pieces of the second category, which might be called recitational madrigals, clothe the text in a musical dress whose simplicity is in itself extreme. Only an occasional flash of dissonance, chromaticism or polyphony is allowed to provide points of emphasis in an austere chordal texture whose purpose is purely declamatory. This style belongs to a tradition of polyphonic declamation that reaches at least as far back as the beginning of the 16th century and corresponds in many ways to the ideals later expressed by Galilei and Bardi in the Florentine Camerata: almost all complexity in the music is renounced; declamatory rate, effective pauses, pitch and (implied) volume level seem designed to capture the delivery of a highly trained actor or orator (see parts of Wert's *Giunto a la tomba*, *Qual musico gentil* and especially *O primavera*). Both the 'expressionistic' and the 'recitational' styles had a profound influence on style in the 1590s. Of the main figures in the refashioning of the madrigal in the 1580s and 90s (Wert, Luzzaschi, Marenzio and Monteverdi) Wert was the only one who had grown up in the heavily theatre-oriented world of Naples and Rome around 1550, and this orientation continued in Mantua, where he worked during the 1560s and 70s. For this reason, Wert brought a unique kind of experience to his colleagues in the last decades of the century.

It would be well to review at this point the stylistic options open to madrigal composers in the late 1580s. They might have chosen the hybrid style of the 1570s, blending elements of the lighter style into the style of the madrigal, usually in setting pastoral lyrics of no great emotional or intellectual weight. Marenzio, G.M. Nanino and Ruggiero Giovannelli often worked in this style, as did countless other composers including G.F. Anerio and Annibale Stabile in Rome, Ludovico Agostini, Paolo Virchi and Giulio Eremita in Ferrara, Benedetto Pallavicino in Mantua, Lelio Bertani in Brescia and the young Monteverdi in Cremona. A few composers in Italy chose to continue a madrigal style directed towards the expression of intense emotion, in either lyric or dramatic settings. Wert had been a leader in the development of this type of madrigal since the 1560s, and he continued to lead this school during the 1580s. He was joined often by Luzzaschi in Ferrara, though in a quite different, less dramatic style, and occasionally by Marenzio (see his *Dolorosi martir* and *O voi che sospirate*) and more conservative composers, such as G.M. Nanino. A composer might also have chosen to work in the recitational style, where the clear projection of the text was the primary goal. Although Wert was again the most important figure here, Andrea Gabrieli's choruses for *Oedipus rex* offer another example. Or a composer might have chosen to work in the more traditional, rather neutral, motet-like style of the middle of the century. This style predominated in the late madrigals by Lassus, and in many of those by Palestrina and by several younger composers of the Palestrina school, such as G.M. Nanino and Francesco Soriano. Any of these pure or hybrid styles could be decorated by the new written-out ornamentation. Although some composers were specialists, many wrote in any of these styles according to the audience or occasion, or the text that he was to set.

10. Poetry and the madrigal. Even composers insensitive to the individual content of a madrigal text were usually sensitive to its style or type, and in this broad sense text and musical style were inextricably intertwined. Normally a composer would not set a Petrarch sestina stanza in the same style as he would a lighter text (compare, for example, Marenzio's setting of Petrarch's *O voi che sospirate* with the other madrigals in his second book for five voices). Thus a few significant changes in style or type of text during the last quarter of the century went hand in hand with changes of musical style; they may even have helped to bring them about.

The first such change, which began with Andrea Gabrieli in the late 1560s, was the movement away from Petrarchan forms and style towards lighter, pastoral or idyllic poems, most often relatively short works in the poetic form called the madrigal (Tasso's *Ecco mormorar L'onde*, set by Monteverdi is a fine example of this type of poetry). Such texts usually called for the hybrid style of the 1570s or the ornamented style of the 1580s, and were much set by Marenzio and other progressive composers of those decades. Wert resisted the trend, however, continuing to set texts of the highest literary quality in the traditional forms of sonnet and serious ottava. Even into the 1580s he chose poems by the poets and in the traditional forms set in the middle of the century. For example, in his seventh book of 1581, eight of the 13 poems set are by Petrarch or by well-known poets from the first part of the century such as Angelo di Costanzo, Ariosto and Tansillo. By contrast, in Marenzio's first three books for five voices (1580–82) 31 of 47 texts are madrigals, almost all of the texts are pastoral in tone and more than half are so indistinctive in tone and in quality that they will probably remain anonymous; only three are by Petrarch.

In his choice of texts as in his musical style, Wert showed a mixture of conservatism and progressiveness. Although he largely avoided the texts typical of the hybrid madrigal of the 1570s and 80s he was the first to set the most important new type of text of the end of the century: the serious dramatic scene. He began by setting dramatic ottavas from Tasso's epic poem *Gerusalemme liberata*. After his pathbreaking setting of *Giunto a la tomba* in 1581 there were six more such pieces in his next book, and his example was quickly followed by Marenzio, Monteverdi and others. The tradition thus established of setting dramatic scenes from *Gerusalemme liberata* extends to Monteverdi's setting of the *Combattimento di Tancredi e Clorinda* (published 1638) and beyond.

In the realm of the dramatic scene, ottavas from Tasso's epic were overtaken in popularity about 1590 by monologues in free verse from an explicit theatre piece, G.B. Guarini's pastoral play *Il pastor fido*. It was in the *Pastor fido* settings from his sixth to his eighth books (1594–8) that Marenzio found his style as a dramatic composer; Wert set four sections from *Il pastor fido* in his last complete book of 1595; many of the most famous dramatic madrigals from Monteverdi's fourth and fifth books (*Cruda amarilli*, *Ah dolente partita*, *Anima mia perdona*) are settings of texts from Guarini's play. During the last decade of the century these texts were the proving ground for the polyphonic progenitors of the *stile recitativo*.

The other important new style of poetry at the end of the century has nothing to do with the rise of opera. The Ferrarese school of composers (Luzzaschi, Alfonso Fontanelli and Gesualdo) preferred to set contemporary madrigals, usually poetry written by local poets, perhaps under the direct supervision of the composer or patron. Brevity and contrast of imagery were the characteristics of this newer madrigal verse, which was essentially lyric, not dramatic. Such texts continued to be favoured in the polyphonic madrigal after 1600. Many were at best mediocre poetry, for the requirements they had to meet were not conducive to great literature. But they were an ideal textual support for the highly affective style of the composers who chose to set them.

11. THE 1590S: THE RISE OF THE 'SECONDA PRATICA'. These two new types of text brought with them a new style, which caused the Italian madrigal without continuo to have a final period of several decades of splendid bloom. The new style was announced in a series of publications appearing in 1594–9. The most important composers involved at the outset were Marenzio, Luzzaschi and Gesualdo (Wert died in 1596). All the publications in the new style contain settings of emotionally intense texts – settings that attempted to capture and reinforce through musical means the perfervid emotional states expressed in the texts. In responding to the challenges of the text, the composers often used unusual or even forbidden musical means that disturbed the balanced style of traditional Renaissance polyphony. These anti-canonical devices might violate norms of spacing, of rhythmic or melodic structure, of part-writing or of harmonic combination. As justification for the new liberties, the composers (notably Luzzaschi in 1596 and Monteverdi in 1605) pointed explicitly to the need to reflect the style and emotional content of the text.

The text must be master of the music. This was the essence of the new style, which Monteverdi was to publicize in 1605 as the 'seconda pratica'. The new style was in one sense a reaction against the degree to which the expression of text had been subordinated to motivic animation, luxuriant ornamentation, clear formal schemes and sensuous vocal colours in the madrigal of the 1570s and 80s, and was thus a kind of musico-dramatic reform movement. Yet it was also a purely musical movement, resulting from the desire of bold and restless musicians at the end of the century to enliven the pleasing but perhaps too bland style of the 1580s. The new style incorporated enough musical novelties, especially in the area of dissonance treatment, to provoke a strong attack from the conservative theorist Artusi.

4. Domestic madrigal singing: woodcut by Jost Amman from Hans Sachs's 'Eygentliche Beschreibung aller Stände auff Erden' (Frankfurt, 1568)

While recognizing the break represented by the *seconda pratica*, one should remember that it was connected with the luxuriant style of the 1580s by one important factor: both styles involved avant-garde environments and tendencies and a high degree of virtuosity. Both required performers of professional ability and audiences of considerable sophistication, and both were connected with the major courts and centres of patronage rather than with humbler social environments. The *seconda pratica*, however, originated as a reaction in some circles against what Einstein termed the 'surrender to hedonism' characteristic of the madrigal of the 1580s. Tasso, in his dialogue *La Cavaletta* of 1584–5, issued a plea to the major composers of the day to temper the soft sensuousness of the modern style, and to bring back to the madrigal some of its former emotional weight. Tasso's plea was not an isolated one in the culture of the time, to judge from the responses of, for example, Luzzaschi and Monteverdi in their dedications of 1596 and 1605 respectively and Marienzo in his Books of 1588 and 1594–9.

The problem of how to respond to this summons was apparently troublesome for all the composers involved, for each of them, normally quite prolific, virtually stopped publishing for several years. Luzzaschi published only a handful of individual pieces between 1582 and 1594; Marenzio, who had published over a dozen books in the first years of the 1580s, published only one between 1588 and 1594; Monteverdi, who was much the youngest of the three, went through the cycle somewhat later, publishing his first three books in 1587–92, then stopping for over ten years. Each man, when he began to publish again, composed in a markedly different style, using bolder harmonies, a higher level of dissonance, and more rhythmic contrast and unusual melodic intervals (compare Monteverdi's *Pastor fido* settings from before and after the gap: *O primavera* on the one hand and *Cruda amarilli*, *Ah dolente partita* or *Anima mia perdona* on the other).

Luzzaschi was the oldest of the composers involved, and in some respects he was, with Rore and then Wert, the prime mover. His avoidance of cadence, his frequent use of discontinuous, highly contrapuntal texture, and his close juxtaposition of intricate counterpoint with declamatory homophony were essential characteristics of the new style pursued first by Gesualdo and Fontanelli, and thereafter by many in the early 1600s. Gesualdo explicitly named Luzzaschi as his mentor, and his style during the 1590s and choice of texts bear this out. But Gesualdo was from the beginning more extreme in every way; his regular use of melodic chromaticism, unusual harmonic successions and extraordinary dissonances led him into areas where Luzzaschi almost never ventured. Marenzio, in his most serious works after 1594 (especially in a long series of settings from *Il pastor fido*), first adopted the recitational style of Wert, adding to it his own richer harmonic vocabulary. Then, in his last book (1599), he summarized all the achievements of the past decade and went beyond them. He returned to some of the greatest poetry of the Italian heritage, Petrarch and even Dante. In his settings he combined the textural discontinuity and contrapuntal complexity of the Ferrarese style with the textual seriousness, greater coherence and declamatory beauty of Wert's style, adding a tonal control and harmonic richness all his own. The resulting collection is one of the summits of the madrigal.

By 1597 Monteverdi had already written some of the pieces in the new style that he was to publish in 1603 and 1605. Like the Ferrarese composers, he used unusual dissonance treatment and sharp contrast between simple homophony and complex polyphony; like Wert, he had fine literary sensitivity and treated his texts with care; like Marenzio, he exercised clear control over large tonal design. His version of the new style, however, was a highly personal one: like his now deceased mentor Wert, and more than any of the living composers in the new style, he tried to capture in pitch level and declamatory rhythms the delivery of an impassioned orator or actor; and the influence of the lighter forms showed through more consistently and clearly in his works than in those of any other composer in the new style. His forms and sectional articulations were clear, and his basic harmonic movements, however much they may be decorated by dissonance, were simple and direct. In all this, his style is distinctly different from the Ferrarese/Neapolitan style of Luzzaschi, Fontanelli and Gesualdo.

12. The madrigal in society, 1570–1600. The late 16th-century madrigal had two major social functions, one public and one private. The festive madrigal, usually designed for a particular ceremony, added to the spectacle at large public occasions; the chamber madrigal helped to pass the time of more or less cultivated amateurs in their courts, academies or homes. Both of these social functions were as old as the genre itself. The second, the most common one for the printed madrigal in the early and middle part of the century, began to be transformed after about 1580 by the growing virtuosity of musical style, by

5. 'The Four Singers': painting attributed to Adam de Coster, early 17th century (Royal Collection, Windsor Castle)

the replacement of the amateur singer by the professional and by the dramatization of the madrigal. In the most advanced centres of patronage, there was a resulting separation of performer from audience. In such centres the madrigal was evolving from a social game for the pleasure of amateur performers into a semi-dramatic concert piece for the pleasure of a separate, passive audience. The intensely emotional or explicitly dramatic tone of many madrigals in the 1590s was probably a result of this evolution. The situation, while it gave a burst of renewed vigour to the polyphonic madrigal, also intensified the inherent contradictions of the medium (for example, the lament of a single lover delivered in a language of heightened emotional realism by five singers simultaneously), which were to lead to a more consistent solution in opera and to the gradual demise of the madrigal without continuo.

13. The polyphonic madrigal after 1600. The polyphonic madrigal without independent instrumental bass was by no means ignored by composers after 1600, however. A particularly vigorous school centering on Naples continued well into the century (Larson, 1985), producing dozens of published madrigal books, some following the style of Gesualdo's last books (1611 and 1626), some in less extreme styles. Important and productive schools of polyphonic madrigal composition in the early 17th century also existed in Rome (including Felice Anerio, Cifra, Frescobaldi, Mazzocchi and G.B. Nanino), in Tuscany (Bati, Marco da Gagliano, Del Turco, Fontanelli and Pecci), in the Este and Gonzaga domains (Monteverdi in books 4 through 6, Pallavicino, Salamone Rossi and Orazio Vecchi) and in Venice (especially among the cisalpine students of Giovanni Gabrieli such as Schütz, Pederson and Grabbe) (Küster, 1995). The published output of especially the first two groups still awaits careful study. One of the most outstanding composers of the late polyphonic madrigal, Sigismondo D'India, seems to have worked and resided in all of these places (with the possible exception of Venice) at some time in his career, though his longest permanence (1611–23) was in the Savoy court in Turin. Some important examples of the late polyphonic madrigal survive only in manuscript, such as those by Michelangelo Rossi, Alessandro Scarlatti and Lotti. The last two also testify to the survival of the genre late into the century.

III. The concerted madrigal

From the early 17th century continuo parts were added to ensemble madrigals, but it was some time before genuine concertato music, including pieces for fewer than the conventional 16th-century five-voice group, was common. At the same time there occurred the rather more decisive and radical initiative of writing madrigals for a solo voice with continuo, through which the new Baroque style achieved its widest diffusion in Italy. By the 1630s these parallel developments had eroded the very concept of the madrigal as an independent genre, so that the concertato ensemble madrigal gave place to its heirs, the DIALOGUE and cantata (*see* CANTATA, §I, 1), and the solo madrigal to the cantata and the usually more schematic aria (*see* ARIA, §2). *See also* MONODY.

1. Introduction. 2. Madrigals for two and more voices. 3. Solo madrigals.

1. INTRODUCTION. To judge by the vast majority of 16th-century publications, the Renaissance madrigal might appear to have been an exclusively vocal genre. Contemporary accounts suggest that instrumental participation in the performance of madrigals was widespread, however, and ranged from the doubling of vocal parts to the purely instrumental performances of some vocal lines, including the reduction of a texture to a single vocal part accompanied by either an instrumental ensemble or a single instrument performing an intabulation of the original texture. It is likely that when doubling or replacing singers the instruments did not limit themselves to playing the parts as written but added improvised divisions. Evidence of such practices is found in collections such as Franciscus Bossinensis's *Frottole intabulate* (1509–11) and Cristoforo Malvezzi's publication, in 1591, of the *intermedi* for Girolamo Bargagli's play *La pellegrina* (performed in Florence on the occasion of the wedding of Ferdinando de' Medici and Christine of Lorraine in 1589), and in late 16th-century treatises such as Ercole Bottrigari's *Il desiderio* (1594), which describes performances by mixed vocal and instrumental ensembles. Malvezzi's volume, together with Bastiano de' Rossi's official chronicle of the festivities, attests to the great variety of instrumental and vocal combinations used in the madrigals of the *intermedi*, and contains, in pieces such as *Dolcissime sirene*, early examples of the ornamented monodic songs with instrumental accompaniment associated with the Florentine Camerata. In particular, the 1589 *intermedi*, together with records from earlier court

6. Three singers accompanied by lute and bass viol ('The Sense of Hearing'): etching by Abraham Bosse from the series 'Five Senses', c1635

spectacles, provide evidence of the increasing prominence accorded to the bass line, which was often doubled by a large complement of foundation instruments, including both single-line bass instruments and *strumenti da corpo* (Brown, 1973). Finally, the use of instrumental sinfonias to introduce some of the numbers in the *intermedi* foreshadows the pairing of madrigals with sinfonias in some early 17th-century madrigal books.

The textural variety generated by the ad hoc participation of instruments in madrigal performances, and the increasing tendency of 16th-century composers to use stratified textures may be considered precedents for the reduced textures that characterize the concerted madrigal. The use of divided ensembles contrasting high and low voice groups, a prominent structural element in Josquin's works, continued to be used in the 16th century to create variety and dramatic immediacy in settings of dialogue texts. An extreme manifestation of this is the cultivation of high-voice ensembles sparked by the *concerto delle dame* active at Ferrara during the 1580s, a group of female virtuoso singers renowned for its highly ornamented singing style and its repertory of madrigals for one, two and three voices with instrumental accompaniment. The Ferrarese ensemble was the object of emulation in Mantua and Florence; its influence was felt in the preponderance of upper-part duets and trios in the madrigals of composers such as Pallavicino, Wert and Monteverdi. Luzzaschi's *Madrigali per cantare et sonare*, published in 1601 long after the group had been disbanded (but composed earlier), provide a sample of what must have been a larger repertory; the keyboard accompaniment shows that, in spite of their elaborate ornamentation, the works performed by the ensemble were essentially five-part madrigals in which the upper parts were supported by an intabulation of the full texture and not by a true basso continuo comparable to that of the monodies in, for example, Caccini's *Le nuove musiche*.

2. MADRIGALS FOR TWO AND MORE VOICES. Contrary to Pietro Della Valle's assertion that by 1640 no-one was composing madrigals (by which he seems to have meant the old-fashioned *a cappella* type), books of madrigals for four and five voices without continuo continued to be published well into the 17th century, primarily as composers' first books. It is undeniable, however, that after the turn of the century the concerted madrigal – that is, with obbligato instrumental participation – quickly gained in popularity and overshadowed the older type. The earliest true concertato madrigals appeared in Monteverdi's fifth book (1605); in earlier publications, such as Salamone Rossi's first and second books for five voices (1600 and 1602), the earliest volumes of ensemble madrigals to include a continuo part, the chitarrone is given an intabulation of the vocal parts, and the composer does not exploit the presence of the instrument for structural or textural purposes. These works, and the

many older volumes of *a cappella* madrigals reissued in updated editions with new, separate continuo partbooks (such as Phalèse's 1615 edition of Monteverdi's third and fourth books), may be seen as attesting as much to the rising popularity of the concerted style as to its roots in the informal addition of a supporting *basso seguente*. Monteverdi himself represented both types in his fifth book: the title page reads 'with a basso continuo for the harpsichord, chitarrone, or a similar instrument, composed expressly for the last six and optional in the others'. The composer thus drew a distinction between the older type, which makes up the majority of the volume, and the group of madrigals at the end, in which the continuo supports a variety of vocal combinations that range from the short solo refrains of *T'amo mia vita* to the extended solo sections that open *Amor se giusto sei* and the highly ornamented, recitative-like duets of *Ahi, com'a un vago sol*. Dividing a volume of madrigals into two groups, *a cappella* madrigals with optional instrumental support and truly concerted pieces with continuo obbligato, proved to be an attractive solution. Volumes of this kind were issued by composers including Monteverdi, whose sixth book (1614) is organized in two cycles, each consisting of *a cappella* madrigals followed by concerted ones; Sigismondo d'India, whose third book for five voices (1615) requires the participation of supporting instruments for the last eight madrigals; Giovanni Valentini, whose fifth book (1625) contains madrigals for six voices without continuo and *scherzi* for three and six voices with obbligato accompaniment; and Domenico Mazzocchi, whose madrigals for five voices (1638) are grouped according to whether they are *a cappella*, require a continuo or are variously concerted.

The availability of new vocal combinations and the presence of the instrumental bass also allowed composers to experiment with new formal solutions, such as the incipient strophic bass organization of Monteverdi's *Ahi, come a un vago sol* and *Amor se giusto sei*, and the refrain structures of *T'amo, mia vita* and *Ahi, come a un vago sol*. The option, made available by the presence of the continuo, to isolate one of the parts from the ensemble also lent to the madrigal an added dramatic dimension, making it possible to realize with greater verisimilitude than before the interactions of dialogue and mixed-mode texts: in *T'amo, mia vita* Monteverdi assigned to the canto the beloved's remembered words, isolating the female voice against the lover's narrative, which is sung by an ensemble of three low voices. Monteverdi extended this marriage of schematic form and dramatic potential in the continuo madrigals of his sixth book, in which strophic basses, now fully worked out, figure prominently in the service of semi-dramatic texts. The lovers' dialogue in Marino's sonnet *Addio Florida bella* is assigned to the appropriate voice parts while the narration is carried by the full ensemble; Florida's response to Floro's opening quatrain is sung to the same bass part that had accompanied his words, transposed up a fifth, emphasizing the lovers' like-mindedness and, by returning to the original tonal level for the closing narrative tutti, creating a symmetrical harmonic layout (D–A–D). A similar formal symmetry governs the architecture of *Misero Alceo*, in which Alceo's solo recitative lament is framed at either end by a five-voice chorus, and is set as a series of strophic variations over a three-fold repetition of the bass; the harmonic structure is also symmetrical (A for the choruses, E for the central lament).

The most significant effect of the introduction of the continuo was to enable composers to focus on previously unavailable vocal combinations, particularly duets, trios and, more rarely, quartets. As Vincenzo Giustiniani remarked (*Discorso sopra la musica*, 1628), '[nowadays] we sing solos, or at most with three voices concerted with appropriate instruments such as the theorbo or the guitar, or the harpsichord or organ'. Of the various ensembles, the duet established itself as the most popular. Although the choice of continuo instrument, as Giustiniani's comment makes obvious, was left up to the performer in all concerted madrigals, composers were, on the whole, precise about the vocal scoring: equal voice combinations were preferred for duets, with pairs of tenors or sopranos being the most common and duets for altos and basses exceedingly rare; mixed voice pairs, although not unheard of, account for relatively little of the repertory; and alternative scorings, explicitly allowing performance by, for example, either two tenors or two sopranos, are uncommon. Although examples of duets, such as those by Luzzaschi for the *concerto delle dame* and by Monteverdi in *Orfeo*, survive from the later 16th century and the beginning of the 17th, and although composers had long isolated duets within larger ensemble madrigals both within and without continuo, it was not until after 1615, the year in which d'India's *Musiche a due voci*, Alessandro Grandi's *Madrigali concertati a due, tre, e quattro voci* and Marco da Gagliano's *Musiche a una due e tre voci* were published, that true continuo duets began to appear as separate compositions, spawning a flowering that reached its peak in the 1620s and lasted well into the middle of the century. Duets were included in a wide variety of collections, from volumes of monodies (which originated mainly in the area between Florence and Naples, with Rome as the principal centre of production, but were also issued by Venetian composers) to madrigal books (which were most commonly published by composers working in northern Italy, especially in and around Venice) (see Whenham, 1982).

The duet repertory can be divided into groups according to musical structure, the two largest categories being strophic duets and madrigalian duets. In the early 17th century strophic duets were most commonly found in monodic collections; from 1619 onwards they also appeared in madrigal collections, although their frequency in monody books declined from the early 1620s. The earliest continuo duets were modelled on the Renaissance three-part canzonetta, and in many, as in Peri's syllabic, note-against-note setting of *Al fronte, al prato* (1609), the instrument simply plays a basso seguente doubling the lowest voice. One of the earliest volumes to include a true basso continuo part is Kapsberger's *Libro primo di villanelle* (1610), the first of his seven extant volumes devoted to the genre. His setting of Rinuccini's *Non havea Febo ancora* (1619), a canzonetta text later treated in highly dramatic fashion by Monteverdi (the *Lamento della ninfa*, 1638), is characteristic of its type: it is strophic, the declamation is syllabic and the texture is homorhythmic; the phrase structure (two main phrases, each comprising an antecedent–consequent pair, followed by a repeated single-phrase refrain) follows the poetic structure (four lines of *settenari*, alternating between *piani* and *tronchi*, and a two-line refrain in *ottonari tronchi*).

The continuo emphasizes the rhythmic structure of the upper parts, delineating the phrase structure with a clear harmonic layout centring on G.

Like the Renaissance madrigal, madrigalian duets eschew the patterned forms of strophic poetry, setting madrigals and sonnets in through-composed fashion. Whenham (1982) divided the repertory between 1615 and 1643 into two broad categories: small-scale, concise, arioso settings; and more ambitious madrigal-style settings in which the music attempts to match the poetic imagery. In both there is an increasing tendency to incorporate aria-like elements not only in response to text imagery, but also as a means of structural articulation. Alessandro Grandi's first book of madrigals (1615) contains the earliest published examples of arioso duets, and, although he has been relegated by historians to Monteverdi's shadow, Grandi is considered by Whenham to be one of the most important exponents of the concise duet type.

Monteverdi's seventh book of madrigals (1619) is seen as the point of origin for the larger-scale madrigalian duet, although it can be argued that the foundations for the 17 duets of this collection are found in the duet sections of the ensemble madrigals of the fifth book, and in the sacred works such as the motets *Pulchra es* for two sopranos from the Vespers of 1610, *Cantate dominum canticum novum* for two 'canti o tenori' (1615) and *Sancta Maria succurre miseris* (1618), that represent his earliest essays in the duet genre. 14 of the duets in the seventh book are through-composed madrigalian settings of substantial proportions, ranging in character from the sombre affect of *Interrotte speranze* to the light-hearted eroticism of *O come sei gentile*. Monteverdi's scorings reflect contemporary preferences: the majority are for equal voice pairs (tenors or sopranos), and only one is for mixed voices (tenor and bass). In these duets, as well as in those of the eighth book (1638) and of the posthumous *Madrigali e canzonette a due e tre voci . . . libro nono* (1651), the musical imagery is closely allied to that of the poetry, producing emotionally intense works that often border on the theatrical. One extreme example is his setting of Guarini's famous portrayal of the musical virtuosity of the Ferrarese *concerto delle dame*, *Mentre vaga angioletta* (1638), in which Monteverdi not only matches the poet's description of the singer's art point by point, but also conveys, through a variety of means, the poem's larger theme, the mysterious ways in which music affects its listeners.

Like the ensemble madrigal, the duet also assimilated the schematic forms made possible by the presence of the continuo. Strophic variations were used to unify entire settings, as in Monteverdi's romanesca *Ohimè dov'è il mio ben* (1619); and from around the late 1620s and early 1630s, ostinato basses of popular dance origin, such as the *ciaccona* and the passacaglia, became common accompanimental formulae, not only for singing generic poetic forms (*arie per cantar*), but also for more elaborate madrigalian settings such as Monteverdi's *ciaccona Zefiro torna* (1632), and the middle section of the *Lamento della ninfa* (1638), *Amor, dicea*, with its descending tetrachord ostinato, which became established as the 'emblem of lament' for much of the 17th century.

Composers began to include other instruments in addition to the continuo, extending and expanding upon the earlier practices of improvising ritornellos between stanzas of strophic songs and of arranging vocal works by doubling and replacing parts with instruments. Instruments were used in two main ways: in passages inserted between vocal sections, variously called ritornellos, sinfonias or, more rarely, sonatas; or as equal participants with the voices in an integrated texture.

Monteverdi's *Scherzi musicali* (published in 1607 but probably composed around 1600; see Ossi, 1992), a collection of strophic settings of canzonettas mainly by Chiabrera, is the earliest example of true concerted technique in a volume of secular music. The pieces are scored for two sopranos, bass, two violins and continuo, and they present a nearly complete catalogue of possible concerted combinations. As the composer's instructions make clear, the violins play ritornellos, double the voices in the outer stanzas, replace two of the voices if the inner stanzas are performed by a solo singer, and are even assigned internal 'bridges', notated in the vocal parts but explicitly intended for instrumental performance only. In these works instrumental scoring is no longer a matter of performance practice but is integral to the compositional plan.

Monteverdi's *Scherzi* represent a relatively sophisticated variation of the simple strophic form with ritornellos, probably most common in improvised performance and occasionally found in printed volumes such as Biagio Marini's *Scherzi e canzonette a una e due voci* (1622), a collection of strophic miniatures in which vocal and instrumental elements are kept almost entirely separate. Monteverdi's own later essays in the genre, such as *Chiome d'oro* (1619), a canzonetta for soprano duet, further elaborated on the possibilities established in the *Scherzi*: rather than one ritornello, there are three, all of which are heard at the beginning and are subsequently brought back in rotation between strophes; vocal sections and ritornellos are based on the same bass line, which functions as the backbone for an elaborate set of strophic variations; and the instruments and voices are joined in the final strophe, the instruments having independent obbligato parts rather than doubling the vocal lines. A similar, if less strict, pattern of variations occurs in the 'sinfonias' of Galeazzo Sabbatini's canzonetta *Chiome crespe* (1630), which may well have been intended to mimic Monteverdi's composition in subject and structure.

Composers in the early 17th century also devised other sectional forms made up of alternating instrumental and vocal blocks; these are best described as 'stanzaic' rather than truly strophic. In Monteverdi's *Questi vaghi concenti* (1605), a five-part ensemble of unspecified instruments introduces the madrigal with a 'sinfonia' that returns in abbreviated form to divide the setting into two sections. Similarly, in Angelo Notari's *Così di ben amar* (1613), an unlabelled instrumental interlude for two violins and continuo separates two recitative-style vocal sections, the first a soprano duet, the second a trio for two sopranos and bass. Giovanni Valentini's *Duo archi adopra* (1621) opens with a 'sonata' for two violins and continuo that recurs between the four vocal sections, each of which is different from the others and is scored for a variety of vocal combinations, from one to four voices. The violins join the singers for the final section, and are included in the composer's reckoning of the total number of parts (the piece is labelled 'a sei voci': two violins, two sopranos and two tenors. Galeazzo Sabbatini's *Segua i piacer* (1630) alternates between 'sinfonia' sections, for two

violins and continuo, and non-strophic vocal sections; the 'sinfonia' is different each time, and the violins occasionally join the vocal ensemble, even before the final tutti section. Four different 'ritornellos' separate the vocal sections of Martino Pesenti's *Quel bel foco* (1638); each vocal section is different from the others, and, although no single strophic variation principle governs the entire setting, the 'ritornellos' are loosely built on the bass lines of the stanzas that precede them.

An early example of the second way in which instruments could be used, as equal participants in the texture of the madrigal, is again found in Monteverdi's *Scherzi musicali*, where obbligato instrumental parts are included within predominantly vocal passages. This practice was expanded, albeit in a limited way, in the final tutti sections of canzonettas, where the instruments did not merely double the voices but were assigned independent parts. By the second decade of the 17th century, works with full concertante parts had begun to appear in a variety of secular publications. Monteverdi's *Con che soavità* (1619) provides an extreme example of the possibilities of mixing voices and instruments: a madrigal for solo voice, it includes three separate instrumental ensembles ('cori' of viols, violins and continuo instruments) that provide a variety of accompanimental textures, from expanded continuo support to motivic interplay between voice and upper strings, and even including a written-out orchestral decrescendo. Although *Con che soavità* remains an isolated example of such elaborate instrumental writing in a vocal work, it can be taken as an indication of the variety of possibilities available to composers and performers as they 'arranged' continuo accompaniments for particularly lavish performances, such as might be required for dramatic works (according to contemporary accounts, the climactic lament of Monteverdi's opera *Arianna* was supported by an ensemble of 'viole et violini'). On a much smaller scale, Marini's scherzo *Semplicette verginelle* (1622) includes, in addition to a ritornello, a 'si placet' violin part as a counterpoint to the vocal line. More typical, however, was the inclusion of two equal instrumental parts, often violins, to create a mixed vocal and instrumental texture, as in Monteverdi's *A quest' olmo* (1619), in which a pair of violins alternates with two 'flautini o fifare' in interacting with the six-part vocal ensemble. The violins in such pieces are generally included in the total number of voices: thus Francesco Turini's *Madrigali a cinque* (1629) calls for two violins and various combinations of three voices plus basso continuo.

During the 1620s and 30s, in madrigals in which the obbligato instruments are full participants in the contrapuntal fabric and share motivic material in imitation with the voices, ensemble combinations could range from one singer and one violin, as in Marini's *Semplicette verginelle* and Francesco Vignali's *Re fa mi sol amore* (1640), to larger forces, as in Giovanni Rovetta's *Taccia il cielo* (1629) and *Io torno amati lumi* (1640), scored for six vocal parts, two violins and continuo, and for eight voices, two violins and continuo respectively. A number of works in Monteverdi's *Madrigali guerrieri, et amorosi* (1638), such as *Hor che 'l ciel e la terra*, *Altri canti d'Amor*, *Vago augelletto* and *Altri canti di Marte*, call for similarly large forces. Instrumental ensembles could also be larger than the prevalent violin pairs. *Altri canti d'Amor* includes an ensemble of four viols, ranging from 'contrabasso' to tenor, in addition to two violins and continuo, and Marini's *Gite sospiri*, a 'concerto a dieci' included in his *Concerto terzo* (1649), calls for four voices and six instrumental parts: a 'cornetto o violino primo', a 'violino secondo', two 'trombone o viola' (alto and tenor), a 'trombone o fagotto' and continuo. Some madrigal books included groups of sinfonias at the end, to be used freely in conjunction with the vocal works that made up the main part of the volume; this is the case with Stefano Bernardi's *Concerti academici con varie sorti di sinfonie* (1616), for six voices and continuo, in which the polyphonic sinfonias included at the end of the volume are scored, in keeping with 16th-century practice, for unspecified instruments. More frequently, however, the sinfonia was integrated within a particular madrigal as an introduction, or served to mark an internal division. Rovetta's *Io torno* includes, in addition to the extensive use of the violins as concertante instruments, two sinfonias, one at the beginning and one in the middle, as well as an unlabelled instrumental passage that functions as an internal 'spacer' exactly as the second sinfonia does. Textural variety and instrumental colour could also serve to establish contrasting sections within a madrigal: Monteverdi's *Altri canti d'Amor* opens with an ostinato section for three voices and two violins, which gives way to a long passage *in genere concitato* for the entire vocal ensemble and the violins; this is followed by an extended bass solo accompanied by all the strings and a 'spinetta' in a texture that is reminiscent of the expanded continuo writing of *Con che soavità*, after which the piece ends with all instruments and voices joining together in a tutti choral section in which the violins participate in the virtuoso music of the voices and the viols function as ripienists. Marini's *Gite sospiri* juxtaposes sections for solo voice accompanied by the lower instruments, tuttis, vocal quartets with continuo alone and solo voice with continuo alone.

The introduction of concertato techniques, whether involving the addition of a basso continuo alone or of upper instrumental parts as well, made available to early 17th-century composers a sound world that until then had been primarily the province of the performer. Contrasts of colour and texture and the juxtaposition of instrumental and vocal blocks made possible new conceptions of form in which musical architecture could co-exist with poetic form, sometimes complementing it, and sometimes working independently of it to create abstract forms imposed upon and even contradicting the form of the text. The opening of these new possibilities coincided with the passing, around the middle of the century, of the madrigal as a vital genre; although books of madrigals continued to be published as late as the 1690s, they had acquired an unmistakable air of 'antiquity', and the potential of the concerted techniques developed for the madrigal were eventually realized in other genres, such as the cantata.

3. SOLO MADRIGALS. It was primarily through madrigals for solo voice and continuo that wide currency was gained in the first decade of the 17th century for a fundamental reforming precept of the Florentine Camerata and their sympathizers: that the words of a piece of music should be clearly heard – a notion, incidentally, that presupposed an audience, as was not necessarily the case with polyphonic madrigals. Moreover, the doctrine of the *seconda pratica* enunciated by Monteverdi enjoined the

composer to remember that the words were to be 'the mistress of the harmony' and not vice versa as in polyphonic pieces. The first published madrigals for solo voice and continuo were the dozen that Caccini included in *Le nuove musiche* (1601/2), though there had been certain anticipations of them, including the practice of performing the highest part of a polyphonic madrigal as an accompanied solo, the declamatory homophonic writing found in some of the later madrigals of Wert, the appearance in *intermedi* of one or two solo songs by composers in the orbit of the Camerata, and possibly those published in D.M. Melli's first songbook in 1602.

Solo madrigals are mostly for a high voice, with the realization of the bass played on instruments such as the lute, chitarrone, theorbo and harpsichord; there is a strong polarity between voice and bass. They are almost entirely in common time, and their predominant style can be summed up as melodic arioso. They are settings of the same kinds of poem as polyphonic madrigals (among them a minority of spiritual texts). The musical form is thus very similar too, as is the nature of the melodic lines. The most obvious structural difference is that the successive periods of a madrigal, corresponding to segments of the text, could no longer be bound together by counterpoint, though there are occasional snatches of imitation between voice and bass, even in the madrigals of Caccini, arch-enemy of counterpoint (e.g. in *Dolcissimo sospiro* in *Le nuove musiche*). Solo madrigals may thus have seemed easy to compose, and they undoubtedly attracted a few composers – some of them amateurs, such as Flamminio Corradi, who produced little or no other music, others professional composers such as Barbarino and Ghizzolo, who seem to have been more at home in more traditional genres – in whose works a rather dry arioso is enervatingly presented in a succession of short phrases ending with perfect cadences. More significantly, however, the new genre stimulated many composers, both amateurs and professionals – among them Benedetti, Marco da Gagliano, d'India, Peri and Saracini, as well as Caccini – to the composition of music of a high order. Several of them lived in or near Florence. At their best they shaped their settings into longer phrases and used the repetition of phrases and larger units to structural ends; for example, in Benedetti's *Ho visto al pianto mio* (*Musiche ... libro quarto*, 1617) the reappearance of the opening phrase establishes a cadence in the dominant halfway through, and in Mutis's *Non è di gentil core* (*Musiche*, 1613) the short initial motif recurs near the end and is there treated sequentially. The latter piece is thus one of the many solo madrigals in which the closing bars are treated in a climactic way. This is often achieved through expansive writing enhanced by ornamentation, which is in any case a conspicuous feature of many madrigals, not simply at final cadences. Some of the embellishments stemmed from the diminutions of the 16th century, but others, probably prompted by Caccini's fine example, are far subtler and are a principal means of expressing the meaning of the text.

Caccini's madrigals are almost entirely diatonic, with little modulation, as are those by several other composers, among them Barbarino, Bonini and Rasi. On a larger view they can be seen as part of the mainstream of Italian music, for it was through diatonic music (though generally in triple time and especially in the aria and cantata) that secular music developed in Italy during the 17th century. Certain other solo madrigals, among the most interesting and seemingly radical, though in fact a dead end, are, on the contrary, highly charged interpretations of emotive verses, abounding in dissonance and arresting harmonic progressions and displaying discontinuous textures and unstable tonality. Two fine examples are the settings of Marino's *Tu parti, ahi lasso* by d'India (*Le musiche*, 1609) and Saracini (*Le seste musiche*, 1624); Benedetti's *Ho visto al pianto mio*, mentioned above, is another. But such music, especially in the hands of amateurs like G.S.P. de' Negri, could sometimes sound merely wilful or eccentric.

Several non-strophic solo songs are settings of more schematic texts than madrigals, notably sonnets and ottavas. Composers often set them more schematically too, especially as STROPHIC VARIATIONS, in which the music is generally of a madrigalian cast. Other settings, while still divided into well-defined sections corresponding to the octave and sestet or to subdivisions of them, are not founded, as strophic variations are, on recurring basses and are thus closer in their musical form to settings of madrigal verses. A fine example is Gagliano's *Valli profonde* (in his *Musiche*, 1615), one of the greatest songs of the period, which displays aforementioned features such as imitation between voice and bass and the reappearance near the end of a phrase from earlier in the piece. Another exceptional work is Monteverdi's *Con che soavità* (book 7, 1619), his only solo madrigal, which is accompanied by three groups of instruments and is unified by two bass figures.

Some 60 volumes containing solo madrigals appeared in Italy between 1602 and 1617. Several (e.g. Barbarino's two collections of 1606–7) consist only of madrigals, others (e.g. d'India's *Le musiche* of 1609, a large and unusually fine collection) of solo madrigals and arias. In a number of other volumes, often, like a few solo volumes, called *Musiche*, solo madrigals were published alongside ensemble pieces, stage music and instrumental pieces (e.g. Gagliano's *Musiche*, 1615, another notable collection). As regards the declining popularity of madrigals and the growing enthusiasm for arias, a watershed can be seen in Italian solo song in 1618, for that year saw the publication not only of virtually the last book in which all the songs are madrigals, but also of the first in which they are all arias. The same year was also the first in which books containing more arias than madrigals outnumber those containing more madrigals than arias – by eight to three – and the figures for the following years show that this development gathered momentum. A number of distinguished solo madrigals, especially by d'India and Saracini, were yet to appear, but even these two composers published none after 1623 and 1624 respectively. It is not surprising that about this time too madrigals began to be invaded by some of the characteristics of the developing aria. While Vincenzo Calestani's *Tornat'o mio Licori* (in his *Madrigali et arie*, 1617) seems to be the only solo madrigal in triple time throughout, there are many others in which triple-time passages occur. It is particularly significant when they do so at the end of a madrigal, for such pieces herald the future recitative and aria. An instance occurs as early as 1606 in Domenico Brunetti's *O miei pensieri* (in his *L'Euterpe*). There are examples in the *Amorosi concetti* of 1612 and 1616 by Cecchino, but perhaps the most significant instance in these earlier years is Falconieri's *Deh dolc'anima mia* (in his *Musiche ...*

libro sexto, 1619), which is virtually in the form of a double recitative and aria. Collections published in 1633 by Benedetto Ferrari (*Musiche varie*) and Sances (*Cantade*, first set) show that by that date the madrigal and aria were virtually indistinguishable. For example, in Ferrari's madrigal *Amor, com'esser può* the first ten lines of text occupy 54 bars of 4/4 arioso, and the last three are spread over 72 bars of 3/2 aria-like writing; this piece is thus almost identical in form to the aria *Ahi! traditor ingrato* in the same book. Rinuccini's madrigal text *Filli, mirando il cielo* lends itself to treatment as a recitative and aria, which is how Sances set it, whereas Caccini's setting (1602) simply consists of undifferentiated arioso. Sances also published settings of madrigal texts that include aria sections founded on ostinato basses surrounded by syllabic recitatives; such a piece is *Misera, hor sì ch'il pianto*.

It is no accident that Sances's 1633 volume, like his duet volume of the same year, is entitled *Cantade*, for solo madrigals, like those for larger forces, were not only being supplanted by arias at this period but were merging with them and also with the more extended form of the cantata. Though they set madrigal texts, Sances and other progressive composers of the time probably did not consider that they were thereby composing madrigals. While the ensemble concertato madrigal enjoyed a somewhat longer life because it was sufficiently distinct by virtue of its larger forces from the all-conquering aria and cantata, very few solo madrigals appeared after the early 1630s. On the whole they either were strongly influenced by other genres or were by minor composers clinging to an outdated style.

IV. The English madrigal

In the 1580s and 90s a lively offshoot of the *madrigale arioso* and the 'light' madrigal style of Ferretti and Gastoldi (see §II, 7 above) took root in England. Several impressive composers of madrigals emerged, and for a short time nearly all native composers seem to have interested themselves in the new style. The English madrigal development is of interest for its startlingly frank embrace of foreign models; in this respect it marks something of a watershed in the history of English music. The extent of the development – about 50 printed editions between 1588 and 1627, including nine of Italian music in translation or transcription – is also notable, by the standards of local musical activity at the time. It is well to bear in mind, however, that Monte wrote more madrigals and Marenzio published more editions than were produced by all the English madrigalists together.

1. Origins. 2. The 1590s: Morley, Weelkes and Wilbye. 3. After 1600. 4. Later history.

1. Origins. Italian madrigals circulated in manuscript in England from as early as the 1530s, though apart from a few specialized sources, their appearance in manuscripts up to the 1590s is scant compared to motets and chansons. In the 1560s and 70s a colourless but prolific Italian madrigalist, Alfonso Ferrabosco (i), held a prominent position at Queen Elizabeth's court and built up a great local reputation (see §II, 3 above). However, the composition of madrigals in the vernacular was unthinkable until poets could conceive of English verse at least

approximately comparable in form and content to Italian madrigal poetry. One could not write madrigals to the lyrics in Tottel's *Miscellany* (1557) or *The Paradyse of Daynty Devises* (1576), which are for the most part stiff, stanzaic, alliterative and still 'courtly' in the late medieval tradition.

A favourable literary situation developed in the 1570s, when Spenser, Sidney and other 'new poets' undertook a comprehensive reform of native poetry along Italian lines. The English madrigal development was an accurate reflection of an important literary movement. The decade of the 1590s which saw the greatest concentration of madrigal composition was also the heyday of the English sonnet sequence. A leading literary figure, Thomas Watson, issued the first of the sonnet sequences, *Hekatompathia* (1582), and a set of *Italian madrigalls Englished* (1590). Essentially a Marenzio collection, this anthology seems to have been conceived as propaganda for the fashionable italianate current in music, letters and manners that was seeping through late Elizabethan England.

Musica transalpina (1588) was a larger and more influential anthology of translated madrigals. This book stemmed, as its extremely interesting preface tells (fig.7), from a group of 'Gentlemen and Merchants of good accompt (as well of this realme as of forreine nations)' who met at the home of Nicholas Yonge, a London lay clerk, for 'the exercise of Musicke daily used'. Thus it appears that in their social settings, too, the English and the early Italian madrigal were broadly analogous. The later Italian development away from amateurism and towards professional, virtuoso singing found no echo across the Channel.

Most of the translations, according to Yonge, were made 'five yeeres agoe', that is, in 1583, which is the date of *Musica divina*, the first important madrigal anthology issued by the Antwerp publisher Phalèse. *Musica divina* provided much of the contents for *Musica transalpina*, as well as a model in general layout and in stylistic orientation. The music 'daily used' by Yonge's circle was fairly up-to-date but conservative, in the mixed style of the late 1570s (see §II, 7 above). Favourite composers were Ferrabosco and Marenzio, the latter represented by the most popular of his very early work. And broadly speaking, this marks a stylistic terminus for the English madrigal development which was soon to follow. Native composers did not adopt the so-called 'expressionistic' and 'recitational' styles practised by Wert and Marenzio in the mid-1580s, still less the radical *maniera* pioneered in the 1590s at Ferrara.

There was demand enough for three more of these anthologies in the 1590s. As a result, more translated madrigals were published in London than pieces by any single native madrigalist. Furthermore, the anthologies became an important source of poems for resetting by English composers – who in many cases also modelled their work on the music that lay so obviously at hand. In two ways, then, the anthologies played a central role in the domestication of the Italian madrigal style.

The madrigal is intimately associated with the first important period of London music printing, which began in 1588 under Byrd's monopoly. *Musica transalpina* includes a consort song by Byrd on Ariosto's *La verginella*, 'brought to speake English with the rest' (and provided with words in all the five parts). For Watson's anthology Byrd wrote two madrigals in praise of Queen Elizabeth,

To the right honourable Gilbert Lord Talbot, ſonne and heire to the right noble & puiſſant George Earle of Shrewesbury, Waſhford and Waterford, Earle Marſhal of England, Lord Talbot, Furniuall, Verdune, Louetoft, & Strange of Blackmeere, one of hir Maieſties moſt honorable priuie councel, Iuſtice of the forreſts and chaces by north the riuer of Trent, and knight of the moſt honourable order of the garter. Nicholas Yong wiſheth increaſe of honour, with all happineſſe.

RIght honourable, ſince I firſt began to keepe houſe in this Citie, it hath been no ſmall comfort unto mee, that a great number of Gentlemen and Merchants of good accompt (as well of this realme as of forreine nations) haue taken in good part ſuch entertainment of pleaſure, as my poore abilitie was able to affoord them, both by the exerciſe of Muſicke daily vſed in my houſe, and by furniſhing them with Bookes of that kinde yeerely ſent me out of Italy and other places, which beeing for the moſt part Italian Songs, are for ſweetnes of Aire, verie well liked of all, but moſt in account with them that underſtand that language. As for the reſt, they doe either not ſing them at all, or at the leaſt with litle delight. And albeit there be ſome Engliſh ſongs lately ſet forth by a great Maiſter of Muſicke, which for skill and ſweetnes may content the moſt curious: yet becauſe they are not many in number, men delighted with varietie, haue wiſhed more of the ſame ſort. For whoſe cauſe chiefly I endeuoured to get into my hands all ſuch Engliſh Songs as were praiſe worthie, and amongſt others, I had the hap to find in the hands of ſome of my good friends, certaine Italian Madrigales tranſlated moſt of them fiue yeeres agoe by a Gentleman for his priuate delight, (as not long before certaine Napolitans had been engliſhed by a verie honourable perſonage, and now a Councellour of eſtate, whereof I haue ſeene ſome, but neuer poſſeſſed any.) And finding the ſame to be ſingulerly well liked, not onely of thoſe for whoſe cauſe I gathered them, but of many skilfull Gentlemen and other great Muſiciens, who affirmed the accent of the words to be well mainteined, the deſcant not hindred, (though ſome fewe notes altred) and in euerie place the due decorum kept: I was ſo bolde (beeing well acquainted with the Gentleman) as to entreate the reſt, who willingly gaue me ſuch as he had (for of ſome he kept no Copies) and alſo ſome other more lately done at the requeſt of his particular friends. Now when the ſame were ſeene to ariſe to a iuſt number, ſufficient to furniſh a great ſet of Books, diuers of my friends aforeſaid, required with great inſtance to haue them printed, whereunto I was as willing as the reſt, but could neuer obtaine the Gentlemans conſent, though I ſought it by many great meanes. For his anſwer was euer, that thoſe trifles being but an idle mans exerciſe, of an idle ſubiect, written onely for priuate recreation, would bluſh to be ſeene otherwiſe then by twilight, much more to be brought into the common view of all men. And ſeeing me ſtill importunate, he tooke his

A.ij. penne,

The Epiſtle dedicatorie.

penne, and with an obſtinate reſolution of his former ſpeech, wrote in one of the Bookes theſe verſes of the Poet Martial.

Seras tutior ibis ad lucernas,
Hæc hora eſt tua, dum furit Lyæus,
Dum regnat roſa, dum madent capilli,
Tum te vel rigidi legant Catones.

Wherefore I kept them (or the moſt of them) for a long time by mee, not preſuming to put my ſickle in an other mans corne, till ſuch time as I heard, that the ſame beeing diſperſed into many mens hands, were by ſome perſons altogither vnknowen to the owner, like to be publiſhed in Print. Which made mee aduenture to ſet this worke in hand, he beeing neither priuie nor preſent, nor ſo neere this place as by any reaſonable meanes I could giue him notice. Wherein though he may take a iuſt offence, that I haue laid open his labours without his licence: yet ſince they were in hazard to come abroad by ſtraungers, lame and vnperfect by meanes of falſe Copies, I hope that this which I haue done to auoide a greater ill, ſhall deſerue a more fauourable excuſe. But ſeeking yet a ſtronger ſtring to my bow, I thought good in all humble and duetifull ſort to offer my ſelfe and my bold attempt to the defence and protection of your Lordſhip, to whoſe honourable hands I preſent the ſame. Aſſuring my ſelfe, that ſo great is the loue and affection which hee beareth to your L. as the view of your name in the Front of the Bookes, will take away all diſpleaſure and vnkindnes from mee. And although this may be thought a greater boldnes then the firſt (I being not any way able to doe your L. ſuch a ſeruice, as may deſerue ſo great a fauour) yet I hope theſe Songs being hitherto well eſteemed of all, ſhalbe ſo regarded of your L. as I for them, and they for themſelues, ſhall not be thought vnworthie of your honourable defence. With which hope I humbly commit your L. to the protection of the Almightie: wiſhing to the ſame, that encreaſe of honour which your true vertue deriued from ſo noble and renowmed Anceſtors doeth worthely deſerue. From London the firſt of October. 1588.

Your Lordſhip's

moſt humble

at commandement,

N. Yonge.

7. Preface to 'Musica transalpina' (London: East, 1588), Nicholas Yonge's anthology of madrigals translated into English

one of them related to a 'six Virgins Song' performed at the elaborate entertainment at Elvetham (1591) put on for the queen by the Earl of Hertford. Other madrigals dealing with the queen and various court figures (Bonny Boots, Dorus, Carimel) were published during the 1590s, up to *The Triumphes of Oriana* in 1601. Court interest may have contributed decisively to the English development; like the Dukes of Mantua and Ferrara, Queen Elizabeth could have seen in the madrigal style an ideal vehicle for celebrating the Renaissance prince. As a further speculation, this might have dawned on her first in 1591–2, when in the face of falling popularity she resumed her progresses. But madrigals seem to have circulated widely – not only at court and among amateur musicians in London, but also elsewhere in the nation, as dedications to patrons ranging from Norfolk and Suffolk to Cheshire and Derbyshire show.

2. The 1590s: Morley, Weelkes and Wilbye. Byrd, who by this time was past 50, drew back from the madrigal style after his initial experiments with it. 19th-century scholars called his secular compositions to English words 'madrigals', but Byrd himself never did so. His *Psalmes, Sonets & Songs* (1588) are all consort songs for voice and instruments (*see* CONSORT SONG), though words are adapted to all the parts, possibly in response to the new madrigal fashion. The secular pieces in his later songbooks (1589, 1611) remain resolutely un-italianate, though madrigal ideas increasingly invade them.

Morley, a younger musician temperamentally much more closely attuned to Italy, became the guiding force of the whole English madrigal development. As a pupil of Byrd and a well-connected Gentleman of the Chapel Royal, as the monopolist of music printing after 1596 and as the learned 'Master' of *A Plaine and Easie Introduction to Practicall Musicke* (1597), Morley occupied a position of considerable prestige and power. He published more madrigals, canzonets and balletts than anyone else, mostly at a time when no-one else was publishing them. His books were almost the only ones to require more than a single edition (though other publications of the time have been shown to exist in several impressions, with the type partly or fully reset but without a new title-page date). Morley established the stylistic norm that was followed, at least in the first instance, by all later English madrigalists.

His first two books are similar in style: the *Canzonets or Little Short Songs to Three Voyces* (1593) (more accurately, light madrigals) and *Madrigalls to Foure Voyces* (1594). To Petrarchistic or pastoral verse of trivial quality, Morley adjusted a skilful compound of canzonet and light madrigal ideas, following the words carefully without ever surrendering to them. Counterpoint is employed rather more regularly than with the contemporary Italians, in a simple, clearly harmonic idiom. Morley's smooth, lively, italianate writing must have caused something of a revelation in the sober world of the Elizabethan consort song.

For his next two books (1595) Morley turned to even lighter models. The *Balletts to Five Voyces* and *Canzonets to Two Voyces* consist largely of free transcriptions of the popular ballettos of Gastoldi (*see* BALLETTO, §2) and four-voice canzonets by Felice Anerio; Morley's sets were actually issued in London in parallel English and Italian editions. Derived (or 'parody') compositions turn up in his other publications, too, the models ranging from the Domenico Ferrabosco classic *Io mi son giovinetta* to Giovanni Croce's *Ove tra l'herbe e i fiori* from *Il trionfo di Dori* (1592), which provided the impetus for *The Triumphes of Oriana*. Then Morley edited two more Italian anthologies, of four-voice canzonets (1597) and five-voice *madrigali ariosi* (1598). In the latter, it is Ferretti and Giovanelli, not Marenzio, who share pride of place with Ferrabosco.

The late 1590s saw the publication of three pleasant books (by Farnaby, Farmer and Bennet) of four-voice light madrigals inspired by Morley's 1594 set. But evidently Morley was not the man to lead the way in naturalizing the more serious variety of Italian madrigal for five and six voices. His own examples are few and not always notably successful. The task was left for composers of another new generation, George Kirbye, Thomas Weelkes and John Wilbye, who first published in 1597–8. It is no doubt significant that Kirbye and Wilbye, with John Ward, were the only madrigalists who seem to have been in the private service of members of the English gentry. Ward's single madrigal book shows that he was indebted to Wilbye's serious style and also more conscious of literary values than any other English madrigalist.

In their more serious work, these composers leant further towards the style of Marenzio in the early 1580s. They reacted to words more variously and sensitively than Morley, but at the same time they always seemed to keep purely musical considerations well in mind; they were rarely so concise or mercurial as Marenzio. Effective essays in pathetic expression involving chromaticism, such as Weelkes's *O care thou wilt dispatch mee* (1600) and Wilbye's *Oft have I vowde* (1609), also reveal a lively appreciation of current Italian practice. In general, though, these composers are less frankly italianate than Morley, less derivative, more imaginative and much more individual. Wilbye must be ranked very high among English composers of the time, in spite of his very small output.

Around 1600 nearly all English composers (except Byrd) seem to have become fascinated by the madrigal style. Farnaby, a virginalist, tried his hand at it, and lutenists such as Thomas Greaves and Michael Cavendish, a gentleman amateur, included some feeble efforts in books of lute ayres. Canzonets were appended to Holborne's *Citharn Schoole* (1597) and in 1601 21 English composers wrote madrigals in praise of their queen for Morley's *The Triumphes of Oriana*. With this brilliant exercise in public relations Morley unforgettably implanted the idea of an 'English madrigal school' – though some of the contributors had only the faintest idea as to what constituted a madrigal. *The Triumphes* is a tribute not only to Queen Elizabeth but also to Morley and his successful transformation of the light Italian style into a form that was immediately appealing and viable at home.

3. After 1600. Two years later Morley and Queen Elizabeth were both dead and the madrigal was in decline, a victim of what has been called 'the disenchantment of the Elizabethans'. A growing mood of pessimism, realism and discipline brought with it a literary and musical reaction against Petrarchism. With the circulation of the early poems of John Donne, literary taste turned against the sonnet sequence and the elegant artificiality of italianate verse. And whereas Morley in *A Plaine and Easie Introduction* had eulogized the madrigal at some

8. 'Aprill is in my mistris face': page from the cantus partbook of Morley's 'Madrigalls to Foure Voyces' (London: East, 1594)

considerable length, without so much as mentioning the lute ayre, Campion now prefaced his *First Booke of Ayres* (1601) with a sharp attack on music 'which is long, intricate, bated with fuge, chaind with sincopation, and where the nature of everie word is precisely expresst in the Note ... such childish observing of words is altogether ridiculous'. The lute ayre, indeed, more natural and more native, was the musical genre that suited the new times (*see* AIR, §2). Dowland's ayres were published and republished from 1597 onwards, and in the decade 1600–10 more books of lute ayres were issued than madrigal sets. Some popular sets were still reprinted (as also were popular sonnet sequences) and some new composers appeared, but they contributed no real new energy to the madrigal's development.

The history of the later madrigal, then, comes down to the study of small bodies of work by a number of minor figures. Few of the English madrigalists ever wrote much. Weelkes wrote two books of light music, the *Balletts* (1598) and *Ayeres or Phantasticke Spirites* (1608), and two more serious books (1597, 1600). Michael East produced four (1604, 1606, 1610, 1618) but they are not exclusively madrigalian. Wilbye produced only two (1598, 1609) and only Bateson (1604, 1618) and Pilkington (1613, 1624) matched him. One book was the limit for Kirbye (1597), Farnaby (1598), Farmer and Bennet (1599), Jones (1607), Youll (1608), Lichfild and Ward (1613), Vautor (1619), Tomkins (1622) and Hilton (1627). There are many charming light madrigals in this later repertory, and some striking serious ones, along with many others that ring endless changes of the stock of formulae laid down by Morley. Elements from the consort song, the anthem and the lute ayre are increasingly in evidence. By the time of the essentially non-madrigalian sets of Peerson (1620, 1630) and Walter Porter (1632), the lute ayre and 'recitative musicke' had marked the madrigal as an irretrievable thing of the past.

Throughout the period of the English madrigal certain composers published secular part-music that adheres in one way or another to older, more abstract traditions. These composers apparently ignored or resisted or did not understand the madrigal – its characteristic type of text, its treatment of words, musical texture and harmonic style. Some of the music is very fine; Byrd's songbooks have already been mentioned, and another prime example is Gibbons's set of *Madrigals and Mottets* (1612; the title is revealing). With the decidedly gauche efforts of John Mundy (1594), Carlton (1601) and Alison (1606), too, one hesitates to use the word 'madrigal' at all. In fact, some four-part ayres by Dowland better deserve the name.

4. LATER HISTORY. The later history of the English madrigal has an interest of its own. In the 18th century, in spite of Burney's snobbish disapproval, madrigals were sung regularly by the catch and glee clubs and by the Madrigal Society, founded in 1741. Antiquarians actually reprinted three sets in full score (with 'the customary graces') around 1810, at a time before any publications by such composers as Byrd, Palestrina or Lassus had received similar treatment. A line of enthusiasts starting with Oliphant and Rimbault made the madrigal into the Victorians' favourite genre of old music. 'There can be little doubt', wrote E.H. Fellowes in 1913, 'that the English Madrigal writers of the Elizabethan and early Jacobean period constitute our finest School of national composition'. His famous blue-covered edition *The English Madrigal School* was one of the first successful musical *Gesamtausgaben* to be published in Britain.

Since that time, sophisticated musical taste has turned towards other 'schools of national composition', and Fellowes's judgment now seems over-enthusiastic. *Now is the Month of Maying*, *April is in My Mistress' Face*, *Adieu, Sweet Amaryllis*, *The Silver Swan* and one or two others are sung happily by many choral groups in Britain and America, whatever their level of accomplishment, but the 'early music' movement and its recording arm have generally not been kind to the English madrigal.

V. The madrigal outside Italy and England

The Italian madrigal never became 'naturalized' in Spain as it did in other European countries such as England, but there otherwise existed many opportunities for Italian influence on Spanish secular music: political connections with Naples, the port of Barcelona (a centre of trade with Italy) and the fact that Spanish composers travelled abroad (e.g. Mateo Flecha (ii)). The italianate madrigal gained popularity simultaneously with a revival of classical Latin as a literary language, and though Vasquez, a Sevillian, protested against its dullness, there was a tendency for later 16th-century composers such as Mateo Flecha (ii), Guerrero and Brudieu to write such pieces. The library of the Duke of Medinaceli in Madrid furnishes a source of the italianate madrigal in Spain (*see* CANCIONERO), while the macaronic *ensaladas* of Mateo Flecha (i) represent an early example of the parody of madrigal idiom. The VILLANCICO was the genre most similar to the Italia Madrigal, adopting a four-part chordal, syllabic style, a musical structure that abandoned the refrain, and texts sometimes written by the greatest poets (e.g. Lope de Vega). The spiritual madrigal was an Italian type also cultivated in Spain, and well suited to the expressive intensity typical of some Spanish music: Guerrero wrote some fine examples.

In Germany from the 1540s the leading printing centres, Nuremberg and Munich, provided an outlet for Italian madrigal publications. The great era of the German polyphonic lied had passed, and some native composers were preoccupied with the Lutheran chorale; the way was open for influence from Italy on German composers of secular music. Many composers working in Germany set Italian texts as well as German, for example Lassus, Monte and Schütz, and lesser figures such as Leonhard Lechner, Handl, H.L. Hassler, and Scandello, whose *Canzoni napoletane* of 1566 were the first settings of Italian texts to appear in Germany. The influence of the Italian canzonetta and light madrigal was specially important in the works of Regnart. Both the lighter forms and more complex structures appear in Hassler's secular music, to German or Italian texts: the pieces in the four-part *Canzonette* of 1590 recall the works of Orazio Vecchi in style and use characteristic refrain schemes such as *AABCC*; those in the 1596 *Madrigali* are more akin to Marenzio's in manner, though not so deftly written; a double-choir German piece, *Mein Lieb will mit mir kriegen*, is utterly Venetian in spirit, as befits the work of one who went to Italy to study with Andrea Gabrieli. The latter's nephew Giovanni taught a later generation of northerners, including Johann Grabbe from Westphalia, around the turn of the century. Grabbe's madrigals exhibit a semi-concertato style: *Ardo sì* begins with a lengthy passage stressing the polarity between two treble parts and the bass.

Antwerp, as a main publishing centre, was the principal outlet for Italian madrigals in the Netherlands. Hubert Waelrant's publication of 1558 included 18 Italian madrigals (as well as French chansons), but a more active period for Netherlandish madrigalists was 1596–1623, when anthologies of works mostly by Italians also included madrigals by Verdonck, Schuyt and Sweelinck (all three are represented in Phalèse's collection *Nervi d'Orfeo*, 1605). Sweelinck's *Rimes françoises et italiennes* of 1612 contains two- and three-voice 'madrigaletti' whose somewhat earnest style recalls Lassus's sacred bicinia rather than Morley's canzonets. Two impressive six-part madrigals by Sweelinck appear in another Phalèse anthology, the *Ghirlanda di madrigali* of 1601.

The court of King Christian IV of Denmark was cosmopolitan in outlook, and at the beginning of the 17th century three of its musicians, Melchior Borchgrevinck, Mogens Pedersøn and Hans Nielsen, were sent to study with Giovanni Gabrieli in Venice. Their studies bore fruit in collections of madrigals published in 1606–9, which reveal that, though their teacher insisted on a self-sufficient five-part scoring without continuo, they were quite abreast of the most modern Italian expressive techniques – even those of Monteverdi's fourth and fifth madrigal books. The madrigals are full of vivid contrasts, impassioned melodic leaps, dramatic silences and bold chromaticisms and harmonic juxtapositions.

In Poland during the reign of Queen Bona, after 1522, numerous Italian musicians arrived to serve at the Polish court, and this contact with Italian music effected a change in the Polish secular vocal texts towards a more intimate style. An early Italian madrigal idiom is discernible, for instance, in *Aleć nade mna Wenus*, in the tablature of Jan z Lublina, a source which also includes many intabulations of Italian madrigals. The late 16th-century Kraków Tablature contains many Polish madrigal texts, the discovery of which has made possible the reconstruction of other works in this genre.

Madrigal comedy. A term in general use to describe madrigalesque entertainment music of the late Renaissance in Italy. In the widest sense of the term, a madrigal comedy consists of a series of secular vocal pieces held together by a more or less well-defined plot or story in which the music is descriptive of the action of the characters or situation.

The origin of the term may be traced to Orazio Vecchi's *L'Amfiparnaso* (1597), subtitled 'comedia harmonica', or, as it is referred to in the preface, 'comedia musicale'. The term 'madrigal comedy' appears to have been first used by Einstein, who has been followed rather indiscriminately by others. A distinction ought to be made between entertainments organized along the lines of the literary genre of the comedy proper and those of a more purely descriptive nature such as *Il cicalamento delle donne al bucato* (1567) by Alessandro Striggio (i), Giovanni Croce's *Triaca musicale* (1595) and Adriano Banchieri's *Barca di Venetia per Padova* (1605); such works have too often been classed together in a single category. Banchieri's three madrigal comedies belong with his books of three-voice canzonettas and therefore qualify as madrigals only in a generic sense. The generally humorous content of madrigal comedies has led to the erroneous correlation of 'comedia' with 'comic', ignoring the literary definition of comedy, used by Vecchi, which includes the serious (*grave*) as well as the light-hearted (*piacevole*) in the portrayal of scenes and persons 'imitated from life'.

Vecchi's *L'Amfiparnaso* represents the first attempt at combining the Parnassus of music with that of comic poetry into a unified whole. Its subject matter and its organization of a prologue and 13 scenes grouped into three acts more closely resembles the contemporary *farsa* or the three-act *commedia dell'arte* improvised by Massimo Troiano and Lassus at Munich in 1568 than the five-act *commedia erudita*. Gardano's beautiful edition of this work contains woodcuts illustrating each scene, suggesting that these were intended to stimulate visually the imagination of the performers (figs.1 and 2); Vecchi also called upon the performers in his preface to fill in mentally any lapses in the action. It is made clear in the prologue that it was not intended to be staged:

> the place of this action is the great theatre of the world ... know then that the spectacle of which I speak is seen through the mind, into which it enters through the ears, not through the eyes; be silent then, and instead of looking, listen.

ARGOMENTO.

Promette Pantalon di dar ſua figlia
Al Dottore, e di lui (qual rozzo) prende
Piacer, che mal riſponde, e peggio intẽde.

Atto Primo. Scena Terza. Gratiano. Pantalone.

Gra.	Hor per vegnir a la confuſion	Gra.	A vuoi mò dir chl'è tant'al culinicint
	Audigh mſier Piatlon ch'a vuoi la putta		Ch'baibò de ſta fiola
	M'intinziu?me beccan?m'acchiaponau?		Cha vuoi balare
Pan.	V'intendo Caldaron del dì de morti,		Cha vuoi cantare
	Deme la man la putta xe la voſtra.		Cha vuoi ſaltar à la voſtra preſicenza.
Gra.	Dſid da ver? P. da ſeno. G. am'burlad.	Pan	O che Dottor, o via che mi ve ſuono.
Pan.	No à fè da Zentil homo.		Tantara tantaran tà
Gra.	O la me fiola caura		Tantara tantaran tà
	O fiola frà le fiol la prima fiola		Dottor vu pare à punto vn niouo Orfeo
	Che ſippa in tutta quant la fiolaria.		Che ſe tiraua drio.
Pan.	Ch'andeuu fiolando		E beſtie, e piante, e piere,
	Caual d'Orlando		Coſi la voſtra ſcienza tira i putti
	O grama beſtia		Coi ſaſſi tegni, e torſi
	Frà l'altre beſtie		E in ſino i can de becaria xe corſi,
	La mazor beſtia		E la veſt'i n'anaſa
	C'haueſſe mai la beſtialaria?		Entremo dunque in caſa.

2. *Woodcut showing Gratiano and Pantalone, and the opening of Act 1 scene iii of Orazio Vecchi's 'L'Amfiparnaso' (Venice: Angelo Gardano, 1597)*

Banchieri's *La pazzia senile* (1598), *Il studio dilettevole* (1600), *Il metamorfosi musicale* (1601) and *Prudenza giovenile* (1607; republished in 1628 with minor changes as *Saviezza giovenile*) follow the precedent established by Vecchi. All these works adopt a nearly identical scenario – foolish old men duped by ladies – typical of the *giustiniana*, of which these comedies are only an extended example. Their dramatic continuity is even less developed than in *L'Amfiparnaso*, relying on an acquaintance with the stock characters of the *commedia dell'arte*, who need little elaboration beyond the musical sketch to bring them to life. Banchieri clearly had an audience in mind, directing that one of the singers should read aloud the title and argument printed at the head of the single numbers in the partbooks 'so that the listeners may know what is being sung'. He also directed that a change of clefs indicated an

octave transposition up or down depending on whether men or women were being represented, thus allowing for a performance by five singers or three men who sing falsetto as the characterization demands.

Banchieri's stated purpose in writing his comedies was 'for no other end than to pass the hours of leisure', suggesting that they are social diversions no less than the parlour games popular with Italian academies as entertainment during their evening reunions. Vecchi's *Le veglie di Siena* (1604) takes its form from the game of 'imitation' described by Girolamo Bargagli in his treatise on games played by the Accademia degli Intronati of Siena, the *Dialogo de' giuochi che nelle vegghie sanesi si usono di fare* (1572). In Vecchi's musical version the leader proposes that one of the company impersonate the speech and mannerisms of a Sicilian, a peasant woman, a German, a Spaniard, a Frenchman, a Venetian and Jews. The *proposta*, for six voices, is followed by the *imitazione* for three voices in the descriptive style of the villanella; the success of the imitation is then commented upon by the assembled company. The second part of the evening's entertainment portrays a hunt for Cupid ('La caccia d'Amore') and concludes with tongue-twisting word games (*bisticci*). In the second *veglia* Vecchi introduced a subject of his own invention, the portrayal of the various 'humours of modern music' – madrigals descriptive of the serious moods of love in contrast with the facetious caprices of the first *veglia*. Gastoldi's *Balletti* (1591) has a similar programmatic intent to Vecchi's 'humours', forming an organic whole in which the participants are invited to represent a succession of imaginary characters such as Good Humour, Contentment, Hopeful Love and so on.

DAVID NUTTER

Madrigale spirituale (It.). A general term for settings of Italian devotional texts not intended for liturgical use which became particularly fashionable after the Council of Trent.

A few settings began to appear concurrently with the secular madrigal in the 1520s and 30s (Sebastiano Festa's *Vergine sacra* from the *Libro primo de la croce* of 1526 may be the earliest); the absence of the appellation 'spirituale' does not exclude their existence as a genre prior to the earliest complete collection, the Veronese Giovanni dal Bene's *Musica spirituale* (RISM 1563[7]), compiled in the 1550s. Like the secular madrigal the term 'madrigale sprirituale' could cover a variety of musical styles and its development closely paralleled that of its secular equivalent. Distinctions between it and other forms of devotional music (*canzonetta spirituale; lauda spirituale*, *see* LAUDA) were often blurred, though the *madrigale spirituale* was not normally strophic. Some were simply contrafacta of secular madrigals but the majority were independently conceived compositions, with examples by many of the most important composers of the period. The term was even used for pieces with Latin texts, as in the collection *Madrigali de diversi auttori accomodati per concerti spirituali* (1616[8]), which contains Latin contrafacta of madrigals by Marenzio, Andrea Gabrieli and others.

Like their secular analogues, *madrigali spirituali* were principally destined for private performance, often, though by no means always, by cultivated amateurs. Many were written specially for the households of independently wealthy clerics, and were considered particularly suitable for performance during Lent at courts and academies. They were fostered by the Jesuits, to whose members many collections were dedicated during the 1570s and 80s, and by the Oratorians of Filippo Neri. *Madrigali spirituali* are also known to have been used in confraternity oratories and in other paraliturgical contexts. Some extant sources include printed marginal notes indicating the feasts for which particular madrigals were appropriate; G.F. Anerio's *Teatro armonico spirituale* (1619), possibly the most extensive collection, contains a repertory for the entire liturgical year intended for performance at the oratory of S Girolamo della Carità in Rome. Rome, as well as Verona, was an important centre for the production of *madrigali spirituali*: Giovanni Animuccia's pioneering *Primo libro de madrigali, a tre voci ... con alcuni motetti, et madrigali spirituali* (1565) was dedicated to two young adherents of Neri's oratory; it was followed by published collections from Palestrina (two), Marenzio and both Felice and G.F. Anerio. In northern Italy, Rore's setting of Petrarch's canzone *Vergine bella* was published in 1548; Nasco, Ruffo and Willaert contributed to dal Bene's *Musica spirituale*; and collections by Asola, Agostino Bonzanino, Leone Leoni, Merlo, Monteverdi, Pellio and Pietro Vinci, among others, followed. Composers such as Luzzaschi and Gesualdo also contributed to the genre, which was taken up outside Italy too, most noticeably by Monte and Lassus.

While some *madrigale spirituale* texts parodied secular poems, many were originally religious. A particularly prominent role was played by settings of Petrarch's *Vergine cycle* and his sonnet *I' vo piangendo i miei passati tempi*. Among contemporary poets who inspired large numbers of musical settings were Vittoria Colonna, Angelo Grillo, Gabriele Fiamma, Luigi Tansillo and Tasso. Many of the texts written in the late 16th century were vernacular paraphrases of biblical or liturgical texts; Grillo's *Lagrime del penitente* transformed the first two verses of each penitential psalm into a sonnet, and some of the texts of Monteverdi's 1583 collection of *madrigali spirituali* closely paraphrase passages of the Gospels. Some texts, especially those about the Passion of Christ, elicited musical settings that explored the affective possibilities of the *seconda pratica* (e.g. Angelico Patto's 1613 collection of monodic contemplations on the wounds of Christ). Cyclic texts such as Petrarch's *Vergine bella* and Tansillo's *Lagrime di S Pietro* provided opportunities for extended works unified by motivic or tonal means; Lassus's setting of the Tansillo cycle, a 20-section tonal arch, may mark the high point of a genre that includes some extremely expressive works. A number of sacred dialogues, cantatas and oratorio-like works were originally published as *madrigali spirituali* (e.g. G.F. Anerio's *Rispondi, Abramo* and *La conversione di S Paolo*), and the term remained in use until the 1670s.

SUZANNE G. CUSICK/NOEL O'REGAN

Madrigalism. *See* WORD-PAINTING.

Maegaard, Jan (Carl Christian) (*b* Copenhagen, 14 April 1926). Danish composer and musicologist. He attended the Royal Danish Conservatory (1945–52), where he studied composition, the piano, the double bass and conducting. From 1950 he also studied at the University of Copenhagen (MA 1957). A music critic for various newspapers between 1952 and 1960, in 1961 he became associate professor at the university (full professor, 1971–96). Between 1978 and 1981 he was professor of music at the University of California, Los Angeles. He has acted as a consultant for the musical department of Danish Radio, and from 1983 was head of the consultancy service. He has held various other administrative positions; memberships include the Royal Danish Academy of Sciences and Letters (1986) and the Norwegian Academy of Sciences and Letters (1988).

Initially he composed in the Nielsen tradition, but by chance he discovered 12-note composition through Schoenberg's Serenade op.24 (1922). He was inspired by it and used the method successfully in eleven works over the period 1955–66. During this time he made a study of Schoenberg's development pre-dodecaphony, the subject on which in 1972 he gained his doctorate; this included the first fundamental chronology of Schoenberg's manuscripts. In the Danish musical scene of about 1960 he was regarded as 'avant-gardist', an impression confirmed when he arranged for Stockhausen to give a concert in Copenhagen, and when he issued the book *Musikalsk modernisme* ('Musical modernism', 1964), an excellent introduction to contemporary music. In his compositions of about 1970, Maegaard attempted to move away from strict dodecaphony, experimenting first with open forms ('labyrinths' for solo instruments) and secondly with raw materials consisting of note rows of nine, ten and eleven notes. The most important of these works share the name 'musica riservata', and include opp.61 (1976), 70 (1982), 102 (1996), and the solitary string quartet op.52 (1970). As the name indicates, it is intimate, emotionally nuanced chamber music; although not 'difficult', it requires concentration on the part of the listener. Maegaard found a different type of material in certain systematically ordered sets of triads, which he used, for example, in the organ work op.71 (1983), and which renders the harmony peculiarly indefinite and often undynamic. This is in sharp contrast to what is perceived as a late Romantic orientation in the Cello Concerto op.98 (1993); for the first time Maegaard used a classical genre, and did so again in the lucid Harp Concerto op.99 (1995). His remarkable serial orchestral pieces *Due tempi* op.39 (1961) are characterized by brilliant orchestration, a subject that Maegaard had been taught by Schierbeck – the only teacher at the Academy in whom he found an understanding for his compositional efforts. Further evidence of Maegaard's effective orchestral technique is in his orchestration of Schoenberg's *Variations on a Recitative* op.40 for organ (op.62, 1976). This work, taken next to the 'musica riservata' pieces opp.52 and 61, demonstrates the breadth of Maegaard's output.

PETER BRASK

Maelzel, Johann Nepomuk (*b* Regensburg, 15 Aug 1772; *d* at sea, 21 July 1838). German inventor. The son of an organ builder, he settled in Vienna in 1792 and devoted himself to teaching music and to constructing various mechanical devices, including a chronometer, and an automatic instrument of organ pipes imitating flutes and trumpets, and drums, cymbals and a triangle struck by hammers, which played music by Haydn, Mozart and Crescentini. In 1804 Maelzel began touring with his mechanical devices, and as an added attraction he bought a mechanical chessplayer. He also constructed an automatic Trumpeter, which played Austrian and French Cavalry marches and signals, as well as allegros by Weigl, Dussek and Pleyel. In 1805 Maelzel displayed the mechanical orchestra and the chessplayer in Paris; later both were sold there, the orchestra to a Mr Irving of Aberdeen, and the chessplayer to Eugène Beauharnais. Irving shipped the orchestra to Boston in 1811, where it was exhibited throughout the eastern states. Eventually it was sent to Cuba, where it was lost at sea. An American copy of the orchestra was made by a Mr Savage and W.M. Goodrich, and exhibited in Boston in 1824.

In 1808 Maelzel was appointed court mechanician in Vienna, and he and his younger brother Leonhard began manufacturing ear trumpets, one of which was used by Beethoven. Maelzel also constructed another mechanical orchestra, the Panharmonicon. While the first orchestra he created was patterned after a Turkish (Janissary) band, the second resembled a chamber orchestra consisting of trumpets, clarinets, violins, violas and cellos and probably percussion instruments. It was worked by descending weights acting upon pinned barrels. In 1812 Maelzel opened his Kunstkabinett, which had among its attractions the Trumpeter and a new and enlarged Panharmonicon; soon afterwards he made public a musical chronometer, an improvement of a machine by Stöckel, for which he obtained certificates from Beethoven and other leading musicians.

At this time Maelzel and Beethoven were on friendly terms. They arranged to visit London together, proposing to take the Panharmonicon with them, and Maelzel eased Beethoven's financial straits by urging on him the loan of 50 ducats in gold. For the Panharmonicon Beethoven composed the 'Battle Symphony', commemorating the Battle of Vitoria (21 June 1813). Maelzel suggested using patriotic themes, *Rule, Britannia* and *God Save the King*; he also provided the overall compositional plan and sketched in detail the drum marches and trumpet calls of the French and English armies. Maelzel further induced Beethoven to score the piece for orchestra, with a view to obtaining funds for the journey; thus scored, it was performed at a concert in Vienna on 8 December 1813 in a programme that also included Beethoven's Symphony no.7, and the marches by Dussek and Pleyel (by the Trumpeter). The concert was repeated on 12 December, and the two yielded a profit of over 4000 florins. But Beethoven took offence at Maelzel's having announced the battle-piece as his property, broke completely with him, rejected the Trumpeter and its marches and held a

third concert (2 January 1814) for his sole benefit. Maelzel departed for Munich with his Panharmonicon, including the battle-piece arranged on its barrel, and also with a full orchestral score of it, which he had obtained from compiling the instrumental parts without Beethoven's concurrence. When Maelzel had the orchestral piece performed at Munich, Beethoven entered an action against him in the Vienna courts. Beethoven also addressed a statement to the musicians of London, entreating them not to support Maelzel, who arrived there in 1814 and performed the Battle Symphony the following year. That same year, Maelzel travelled to Amsterdam, where from the inventor DIEDERICH NIKOLAUS WINKEL he appropriated the idea of using a balanced, double-ended pendulum as a chronometer. He soon perfected the instrument by adding scale divisions behind the pendulum which indicate the number of beats per minute. After examining many musical compositions, Maelzel gave numerical values to all of the common tempo terms.

In 1815 Maelzel patented the Metronome, both in London and Paris, and the following year began manufacturing it in Paris, as Mälzl & Cie. He issued two promotional guides to its use, in French and German (1816). The word 'metronome' does not appear before 1815, and although there is a long history of musical timekeepers before him the familiar wooden-box metronome remains to this day almost exactly like his later models (for a further account of Maelzel's invention, *see* METRONOME (i)).

With this new venture he no longer needed his Panharmonicon, so he sold it to the Abbé Larroque. Although the remains were later found and reassembled in Stuttgart in 1935, only 12 of its barrels survived the bombing of that city during World War II.

Wishing to repurchase the chessplayer and to promote his metronome, Maelzel returned to Munich and then Vienna in 1817. Beethoven's lawsuit was abandoned and the costs divided equally between them. Maelzel obtained the chessplayer on easy terms, but was soon unable to pay the Beauharnais estate, and hastily sailed for the USA, landing in New York on 3 February 1826. He exhibited his inventions at the National Hotel in New York until June, when he fled to Boston, pursued by the agents of the Beauharnais estate. They located him and he apparently paid them a final settlement of 4000 francs.

For the next ten years Maelzel toured various large cities in the USA. In 1837 he sailed to Havana, Cuba; the venture was financially disastrous, so he left for Philadelphia on 14 July 1838 on the brig *Otis*. He was found dead in his berth on 21 July, off the coast of Charleston, South Carolina. Ironically his first mechanical orchestra had been lost at sea in the same region.

Maelzel was evidently a shrewd and energetic businessman, and as well as an inventor he was considered a good composer and pianist. He certainly built on the ideas of others, but his genius lay in the ability to recognize a marketable invention, improve it, and then present and promote it with such skill that even the most resistent composer could be persuaded to try one of his products, such as the metronome, or to compose music for one of his musical machines, such as the Panharmonicon.

ALEXANDER WHEELOCK THAYER/DIXIE HARVEY

Maendler-Schramm. German firm of harpsichord and piano makers. Karl Maendler (*b* Munich, 22 March 1872; *d* Munich, 2 Aug 1958) began as a piano maker. He married Susanne Schramm, daughter of M.J. Schramm, and on 1 April 1903 became the sole owner of his father-in-law's piano firm in Munich. It is probable that the firm had already produced harpsichords (one labelled 'M.J. Schramm' is known to exist), but Maendler built up this side of the business, producing his first harpsichord in 1907, and continuing to make harpsichords, clavichords and pianos until he went blind in 1956. The business then passed to Ernst Zucker. Maendler's main output was of heavily built, mass-produced instruments; he also built harpsichords to the so-called 'Bach disposition' (*see* BACH HARPSICHORD); he also used a metal frame which Zucker called *Panzerplatte*. In the 1920s he developed the BACHKLAVIER, an attempt at a harpsichord capable of admitting touch dynamics. On the other hand, the Händel-Haus at Halle has a Maendler-Schramm harpsichord of 1939 which, except for the typical German pedal mechanism, appears to be a careful copy of a Shudi of 1770.

MARGARET CRANMER

Maercker, Matthias. *See* MERCKER, MATTHIAS.

Maes, Jef (*b* Antwerp, 5 April 1905; *d* Antwerp, 30 June 1996). Belgian composer. From 1922 he studied the viola and chamber music at the Antwerp Conservatory, and he took private lessons in harmony, counterpoint and fugue with Candael. He played the viola with the leading ensembles and orchestras of Antwerp before devoting himself to teaching and composing. He was a co-founder of the Antwerp PO, now known as the Royal Flanders PO. He became a violin teacher at the Boom Academy of Music in 1933, becoming its director ten years later. From 1942 until his retirement in 1970, Maes was a teacher of harmony, then (from 1955) chamber music at the Antwerp Conservatory.

Maes called himself a modern romanticist, 'a 19th-century poet in the body of a 20th-century orchestrator'. He deliberately used an uncomplicated style of composing, but his works always have an excellent structure, fluent melodic lines, strong rhythmic impulses and clear thematic form. He gained international fame with his ballet *Tu*

auras nom ... Tristan (1963), commissioned by the French ballerina Jeannine Charat. To celebrate the 80th birthday of the Antwerp music patron Marcel Baelde he composed the *Concertante Overture* (1961), which became extremely popular with Belgian orchestras and audiences.

DIANA VON VOLBORTH-DANYS

Maessens [Maessins], **Pieter** [Massenus Moderatus, Petrus] (*b* Ghent, *c*1505; *d* Benfeld, 10 Dec 1562). South Netherlandish composer. He began his career as a choirboy in the chapel of the Archduchess Margaret of Austria. After some years at university he became a soldier of fortune, fighting with the armies of Charles V. He took part in the relief of Vienna in 1529, and in the following year accompanied the emperor to his coronation in Bologna. In 1535 he was rewarded by the emperor for bravery and distinguished by the title 'eques auratus'. In 1538 he went with the Spanish army to Flanders and, while there, ended his military career. In 1539 he received the minor orders of the priesthood in Tournai so that on 19 July 1540 he could take up duties as Kapellmeister in the service of the chapter of Onze Lieve Vrouwkerk in Kortrijk. At the same time, he also took over the inventorying of the church's music, for his predecessor Jan van den Piedt (Johannes Pes) had been dismissed for misconduct. Maessens was dismissed at Easter 1543 for neglect of his duties and excessive drinking.

A year earlier, in July 1542, Ferdinand I had requested the Regent of the Netherlands, Maria of Hungary, to find him a capable man to assist his chief Kapellmeister Arnold von Bruck in the Viennese court chapel. On her recommendation, Maessens obtained the post of second Kapellmeister on 1 March 1543. When Bruck retired, Maessens was appointed Kapellmeister on 1 January 1546, a post he probably held until his death. Jean Guyot succeeded him on 1 November 1563.

As Kapellmeister Maessens made several journeys to recruit singers both for the emperor's chapel and also, from 1550, for that of Maximilian II at Prague. As various documents show, Maessens took some interest in the welfare of his choirboys: in 1555 he proposed a separate school for the boys recruited to court service, but it is not known whether the scheme came to fruition. Maessens's activity as Kapellmeister moved Ferdinand I to raise him to the hereditary nobility with the title 'von Massenberg'. Among his pupils were Petrus Speilier, Matthias Zaphelius, Thomas von Winkl and Johann Bauernfeind, and Pierre Reulx from his time at Kortrijk.

Although no single publication was devoted to him, his works survive in many sources from different places. His grasp of contrapuntal devices is shown particularly in the secular motet *Discessu – Quid maius*, which can be performed in 16 different ways from the one written version. In addition to his musical work, evidences of considerable literary activity have also been preserved. A little book with Latin prayers, *Piae et breves orationis dominicae declarationes*, first appeared in 1556 and was reprinted three years later. Another literary work, an astronomical *Calendarium*, was also printed in 1556. Towards the end of 1562 the emperor guaranteed Maessens a printing privilege for a number of 'libri sancti'. None of these works has survived.

ALBERT DUNNING

Maessig. *See* MÄSSIG.

Maestoso (It.: 'majestic'). A term used alone as an indication of mood or as a tempo designation. It also appears as a modification of some other tempo mark. J.G. Walther

(1732) described it as 'ansehnlich und langsam, iedoch mit einer lebhaften Expression' ('stately and slow, but with a lively expression'). H.C. Koch (1802) indicated that, like *con gravità*, *maestoso* implied the use of overdotting (*see* GRAVE). The spelling *majestoso* is also found, particularly in German scores.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Maestro (It.: 'master'). A title applied in musical parlance in several senses, to refer to a composer, a virtuoso, a teacher (*maestro di canto fermo*, 'master of plainchant'; *maestro dei putti*, 'master of the boys'), an instrument maker, a conductor or a leader of an ensemble, as in concertmaster, *maestro al cembalo* (leader of the 18th-century Italian opera orchestra), and particularly *maestro di cappella* (It.) and its equivalents *maestro de capilla* (Sp.), *maître de chapelle* (Fr.) and Kapellmeister (Ger.). For a discussion of the role of the *maestro*, *see* CHAPEL.

□

Maestro, Johann Friedrich. *See* MEISTER, JOHANN FRIEDRICH.

Maestro Capitán. *See* ROMERO, MATEO.

Maestro di cappella (It.; Sp. *maestro de capilla*). The musician in charge of a CHAPEL.

Maeterlinck, Maurice (*b* Ghent, 29 Aug 1862; *d* Nice, 6 May 1949). Belgian writer. In the 30 years that followed the publication of his first play, *La princesse Maleine* (1889), Maeterlinck's dramas stimulated compositions or projected compositions from Chausson, Debussy, Dukas, Fauré, Honegger, Humperdinck, d'Indy, Lyadov, Martinů, Rachmaninoff, Schoenberg, Sibelius, Webern and a host of lesser figures. That composers of such varied backgrounds and interests should have been drawn to the works of the same contemporary dramatist and poet is remarkable and indeed without precedent; some explanation may be found in Maeterlinck's dramatic theory. It was his view that the writer should be concerned with innermost psychological states, whose presentation is only hindered if they are linked to great actions or if they are associated with characters fixed in a known time or environment; and so he gave most of his early plays a tenuous, highly ambiguous plot, set in an ill-defined, quasi-medieval limbo. Since the deepest emotions are unspoken, words themselves might prove a barrier; he therefore used a very simple language, concluding a large proportion of his lines with ellipses. The audience was provided with clues not so much in dialogue and action as in symbol and suggestion. As a result the drama took on a dream-like character, but instead of inviting the spectator to Freudian analysis it offered an escapist fantasy. Maeterlinck's problem – how to understate meaningfully in a verbal medium – could be solved only by the addition of a parallel current, such as music provided. And composers, above all Debussy and Schoenberg, found in Maeterlinck's scenarios ideal frameworks for exploring deep-lying mental states in a way that Wagner had intimated. (Newman's essay is a comparison of Maeterlinck's aesthetic with that of Wagner.) The only text which Maeterlinck wrote for musical setting was *Ariane et Barbe-bleue*.

WORKS SET TO MUSIC

dates in brackets are those of publication

STAGE

La princesse Maleine (play, 1889): ov. by Bréville, 1891; ov. by C. Scott, 1912; op by L. Boulanger, 1918, inc.; ov. by Steinberg

Les aveugles (play, 1890): music theatre by W. Zimmermann, 1984; music theatre by B. Furrer, 1989

L'intruse (play, 1890): ov. by J.D. Davis; incid music by Durey, 1933; op by G. Pannain, 1940

Les sept princesses (play, 1891): incid music by Bréville, 1895; op by V.V. Nechayev

Pelléas et Mélisande (play, 1892): incid music by Fauré, 1898; op by Debussy, 1892–1902; sym. poem by Schoenberg, op.5, 1903; orch suite by W. Wallace; incid music by Sibelius, 1905; ov. by Scott, *c*1912

Alladine et Palomides (play, 1894): op sketched by Webern, 1908; op by E.F. Burian, 1923; op by Chlubna, op.16, 1925; chbr op by Burghauser, 1944

La mort de Tintagiles (play, 1894): ov. by Carse, 1902; sym. poem by Loeffler, op.6, 1905; op by Nouguès, 1905; ov. by Martinů, 1910; ov. by Voormolen, 1915; sym. poem by Absil, op.3, 1923–6; op by L. Collingwood, perf. 1950; sym. poem by Santoliquido, 1907

Aglavaine et Sélysette (play, 1896): ov. by Scott, *c*1912; ov. by Honegger, 1917

Monna Vanna (play, 1902): op by Ábrányi, Budapest, 1907; op by Rachmaninoff, 1907, inc.; op by H. Février, Paris, 1909; op by Brânzeu, 1934, rev. 1976

Soeur Béatrice (play, 1902): op by Yanovs'ky, 1907; incid chorus by Lyadov, op.60, 1910; op by Grechaninov, op.50, 1912; op by A. Wolff, 1914; incid music by Atterberg, 1917; op by Mitropoulos, 1919; op by Rasse, 1944; op by A. Marquès Puig; incid music by Atterberg, 1917; incid music by Luening, 1926; op by Hoiby, 1959

Joyzelle (play, 1903): op by A. Tcherepnin, 1926

Ariane et Barbe-bleue (op, 1907): op by Dukas, 1907; incid music for production as play by A.N. Aleksandrov, 1920

L'oiseau bleu (play, 1908): incid music by O'Neill, perf. 1909; incid music by Humperdinck, 1910; 13 Scenes by F. Hart, op.8, orch, 1911; ov. by Křička, op.16, 1911; incid music by Vaughan Williams, 1913; op by A. Wolff, 1919; incid music by Szeligowski, 1935

Les fiançailles (play, 1922): incid music by C.A. Gibbs and L.H. Heward, perf. 1921

CONCERT WORKS

PAUL GRIFFITHS/RICHARD LANGHAM SMITH

Maffei, Giovanni Camillo (*b* Solofra, nr Salerno, early 16th century; *fl* 1562–73). Italian physician, singer and lutenist. In 1562 and 1573 he was living in Naples, where he served Giovanni di Capua, count of Altavilla and music-lover, in both his professional capacities. He dedicated a long letter to his master (printed in 1562 with the rest of his correspondence) which amounts to a treatise on embellished song as it was then practised by Italian

singers. He appears to have been the first physiologist-musician, and examined vocal physiology before explaining his actual method of *cantar di garganta*, which he illustrated with numerous music examples. He concluded with some therapeutic advice. This work, which helps resolve difficult and ever-controversial problems of interpretation, remains an excellent guide for the singer wishing to learn how to sing the sort of *passaggii* that performers then improvised quite freely.

NANIE BRIDGMAN

Maffon [Maphon], **Giovanni Francesco** [Franciszek] (*fl* 1574–93). Italian composer and organist active in Poland. He was perhaps related to Pietro Maffon, a merchant of Brescia, who from 1553 was a burgher of Kraków, where he died in 1575. Giovanni Francesco Maffon probably visited Venice about 1574, since a *greghesca* by him was published there in that year in Pietr'Antonio Spalenza's book of four-part madrigals: the *greghesca* was a genre exclusively identified with Venice. He was organist of the Polish court at least from 1577 to 1593. In addition to the *greghesca* there is also a madrigal by him in Spalenza's book, and he is known too by a fantasia for the lute (published in 1603), possibly arranged for the instrument by Besard (edns of all three in ZHMP, xx, 1970).

PIOTR POŹNIAK

Magadis (Gk.). One of the terms for the Greek harp (*see* TRIGŌNON). This most elusive term appears early, in the 6th century BCE, in circumstances that point quite definitely to its identification with the harp. Later, however, its original meaning became obscured, so much so that Athenaeus could write in the *Sophists at Dinner*: 'Look now, Masurius, my friend, I as a lover of music have often considered whether what is called the magadis is a kind of aulos or kithara'. The derivation of the term gives further cause for puzzlement; it appears to come from the word *magas* meaning 'bridge', a feature that is obviously not proper to the harp. More interesting is the verb that derives from the term *magadis* itself – *magadizein*, meaning to sing in octaves. Perhaps there is a reference here to the capacity of the harp to play in octaves because of its wide tonal compass and the fact that the instrument was played simultaneously with two hands.

See also ANACREON; ALCMAN; and GREECE, §I, 5(iii)(b).

JAMES W. McKINNON

Magalhães, Filipe de (*b* Azeitão, nr Évora, *c*1571; *d* Lisbon, 17 Dec 1652). Portuguese composer. He was ordained in 1585, when the names of his parents were given as António Gomes and Filipa Fernandes. He was the favourite pupil of Manuel Mendes at the cloister school of Évora Cathedral. In 1590 he stood fourth on the list of salaried singers at the cathedral. On the death of his patron Teotónio de Bragança (Bishop of Évora, 1578–1602) he joined the choir of the royal chapel at Lisbon, and he also conducted the choir of the Capela da Misericórdia. In 1605 Mendes bequeathed him all his music in the hope that he would arrange for its publication, but he was unable to do so. On 27 March 1623 he became *mestre* of the royal chapel, where he remained until his retirement on 15 March 1641 at his full annual salary of 80,000 réis and five *moios* of wheat. He was perhaps the greatest Portuguese composer of his time; his works surpass even those of Cardoso and Duarte Lobo in expressiveness.

WORKS

Cantus ecclesiasticus commendandi animas corporaque, 3–5vv (Lisbon, 1614; 3/1691 as Cantum ecclesiasticum [incl. chants for the dead, several polyphonic resp])
Missarum liber cum antiphonis dominicalibus in principio, et motetto pro defunctis, 4–6vv (Lisbon, 1636); ed. in PM, ser. A, xxvii (1975)
Cantica Beatissimae Virginis (Lisbon, 1636)
Domine, probasti me (Ps cxxxviii), 4vv, *P-VV*

ROBERT STEVENSON

Magaloff, Nikita (*b* St Petersburg, 26 Jan/8 Feb 1912; *d* Vevey, 26 Dec 1992). Swiss pianist of Russian birth. When he was six his parents were driven by the Revolution from Russia to Finland and stayed there for four years before the family settled in Paris. At the Paris Conservatoire he studied with Isidor Philipp, won a *premier prix* when he was 17, and earned an enthusiastic testimonial from Ravel. Another important early influence was the émigré Prokofiev, who gave him private composition lessons. From 1949 to 1959 he took over Lipatti's masterclass at the Geneva Conservatoire.

Magaloff played with most of the great orchestras and conductors, and at leading festivals. He was particularly renowned for his warm Romantic sympathies, especially in the music of Chopin, whose complete works he played in a series of recitals in many European centres, and he was admired by younger colleagues for his freedom of

spirit and lively imagination. His numerous recordings include several with Joseph Szigeti, whose daughter he married. Magaloff was also the composer of a violin sonatina, piano pieces and songs.

JOAN CHISSELL/JESSICA DUCHEN

Maganini, Quinto (*b* Fairfield, CA, 30 Nov 1897; *d* Greenwich, CT, 10 March 1974). American composer, conductor, arranger and flautist. After initial training in California, he played the flute in the John Philip Sousa band until 1916, before joining the San Francisco SO (1917–19) and then the New York SO (1919–28). He studied privately with Emilio Puyans, Georges Barrère, Domenico Brescia, and was also a composition student of Nadia Boulanger (1926–7) in Paris and Fontainebleau, where he eventually became the president of the American School of Music and Fine Arts. Encouraged by Walter Damrosch, he conducted the New York Sinfonietta (1930–32), the Norwalk (Connecticut) SO (1939–70), and in 1932 founded his own orchestra, the Maganini Chamber SO, which toured extensively. He served as an editor for both Carl Fischer and Edition Musicus, eventually becoming president of the latter. He also lectured occasionally at Columbia University and other educational institutions throughout the United States. His opera *The Argonauts*, on the subject of the California gold rush of 1849, received both the Pulitzer Prize and the Bispham Medal. Widely respected in his day for well-constructed, idiomatic and accessible music, his reputation today rests mainly on works for flute and his many arrangements for chamber orchestra.

WORKS

(*selective list*)

Stage: Even Hours (ballet), 1928; The Argonauts (op, Maganini), 1934; Tennessee's Partner (op, B. Harte), 1942

Orch: Tuolumne, a California Rhapsody, tpt, orch, 1920; South Wind, 1922; An Ornithological Suite, 1928; Conc., d, chbr orch, 1929 [after Dante]; Sylvan Sym., chbr orch, 1932; Napoleon, 1935; The Royal Ladies, 1949; band works; numerous arrs.

Chbr: A Flute in the Garden of Allah, fl, hp, 1921; Realm of Dolls, 4 fl, 1922; Caprice Terpsichore, fl, 1924; Fantaisie japonaise, fl, pf, 1925; Prelude, g, fl, v, 1928; Sonate gauloise, fl, pf, 1929; Nocturne, str qt, 1929; Sonata da camera, vn, pf, 1935; The Boa Constrictor and the Bobolink, fl, bn, 1936; Fiesta: Spanish March, 2 fl, 1936; Twins, 2 fl, 1936; Geographs, ob/fl, cl, bn, 1937; Gaeta, fl, eng hn, tambourine, 1940; Ars contrapunctus, fl, cl, bn, 1942; Two Hummingbirds, fl, pf, 1943; Shepherds in Arcadia, 4 fl, 1943; Troubadors, 3 hn, 1944; Night Piece, fl, pf, 1946; An Ancient Greek Melody, fl, pf, 1946; Maria's Trinity, tpt, pf, 1946; Song of a Chinese Fisherman, fl, pf, 1949; Three Little Kittens, 3 fl, 1950; Sonnet, trbn, pf, 1950; Petite suite classique, fl, cl, 1951; numerous arrs.

MICHAEL MECKNA

Magasin de Musique (i). French music publishing firm, whose full title was Magasin de Musique à l'Usage des Fêtes Nationales et du Conservatoire. The firm was founded by Bernard Sarrette as a result of a governmental decree of 15 February 1794; it opened at 16–17 rue Joseph, Paris, and in October 1794 moved to 4 rue des Fossés-Montmartre. Two months after the founding of the Paris Conservatoire in August 1795, the firm added to its name 'ou Imprimerie du Conservatoire'. In August 1797 it moved to premises within the Conservatoire, at 152 rue du Faubourg-Poissonnière at the corner of the rue Bergère, at the same time changing its name to Magasin de Musique (occasionally Imprimerie) du Conservatoire. In 1806 the street number was changed from 152 to 11 and subsequently an alternative address, 3 rue Bergère, was sometimes used. From 6 March 1797 Etienne Ozi was manager, and from the early 1800s the imprint normally read 'Le Magasin de Musique du Conservatoire, tenu par M.M. Ozi et Compagnie'. After Ozi's death on 5 October 1813 his successors substituted 'MM. Charles, Michel, Ozi et Compagnie' and used only the 3 rue Bergère address. Janet & Cotelle took over the firm, probably late in 1825.

Sarrette directed the music corps of the National Guard, which was responsible for performing the patriotic music composed for the *fêtes* held in Paris from 1790. The firm primarily published music for the Parisian *fêtes* and patriotic music in general 'whereby to excite the courage of the defenders of la Patrie'. The profits were to be used to support widows and children of the National Guard's musicians. Two monthly periodical publications were started; the first, dating from April 1794, was a volume of some 50 pages containing an overture, a patriotic hymn or song, a military march and a rondo or quickstep; the second, launched about three months later, was a single folded leaf containing three or four patriotic songs or hymns. The government subscribed to 550 copies of the first, one for each district of the Republic, and to 12,000 copies of the second, for distribution among the land and sea forces. During the first year production costs rose by about 500% and the government, although making good the firm's deficiency, did not renew its subscription to the first periodical; the firm nevertheless continued to issue the second irregularly until 1799 and also published patriotic and military music required for *fêtes* and by the municipalities and armies.

As the revolutionary fever gradually subsided the needs of the newly founded Conservatoire gave the firm a new focus. It began publishing music and didactic works for the use of students, most of which were the work of Conservatoire professors themselves. Between 1800 and 1814 the *Principes élémentaires de la musique* and other treatises on harmony, singing and plainchant, two books of solfège and nine instrumental methods were published. Other publications included 17 overtures and 36 duets for wind instruments, 30 concertos, 14 symphonies concertantes for various instrumental combinations and full scores of Cherubini's *Eliza* and of six operas by Catel. After Ozi's death in 1813 production was almost entirely limited to reprinting earlier publications. All the publications of the firm were engraved.

RICHARD MACNUTT

Magasin de Musique (ii). French music publishing firm, whose full title was Magasin de Musique Dirigé par MM. Chérubini, Méhul, Kreutzer, Rode, N. Isouard et Boieldieu (each of these composers being a partner). The firm was officially founded for a period of nine years on 5 August 1802, and in December announced the opening of premises at 268 rue de la Loi, Paris. In 1805–6 the street

number and name were altered to 76 rue de Richelieu. Isouard left the firm in July 1807, and at its dissolution (12 August 1811) the business, manuscripts and 9679 engraved plates were sold to J.-J. Frey.

In the late 18th century composers had frequently published their works from their homes, selling them personally and through music shops; this forced them to waste time in business matters, while receiving insufficient publicity and paying disproportionate fees to the music seller who took little or none of the risk. It was to overcome these disadvantages that the six composers joined forces. Each contracted to furnish at least one opera or 50 pages of his music each year; each was entitled to the proceeds from the sale of his own works, less 5%, and to a share in the profits of the firm's publications of works by non-associated composers.

Isouard was the only one of the six who regularly provided operas for publication; the firm printed nine of his in full score. Other full scores published included Cherubini's *Anacréon*, Méhul's *Joseph* and Boieldieu's *Ma tante Aurore*. In publishing the music of other composers precedence was given to instrumental works by contemporary musicians prominent in Paris – numerous works by Viotti (including five violin concertos), flute concertos by Devienne, piano sonatas by Steibelt and chamber music by J.L. Dussek. The most notable operatic publication was the first edition in full score of *Le nozze di Figaro* (*c*1807–8), which considerably preceded the Simrock edition of 1819. Altogether more than 650 editions were published, all from engraved plates.

RICHARD MACNUTT

Magdalaine, Robinet de la. *See* ROBINET.

Magdalen Hospital. London institution founded in 1758 for the care of penitent prostitutes, and in aid of which concerts were given. *See* LONDON, §I, 5.

Magdeburg, Joachim (*b* Gardelegen, Altmark, ?1525; *d* after July 1587). German theologian and poet. He had a very chequered career, not only because of the Counter-Reformation but also because during the post-Reformation confessional conflicts between Protestants he steadfastly adhered to Flacianism, the strictest form of Lutheranism; his deeply conscientious nature impelled him constantly to stand up for his religious convictions in an uncompromising way. After attending the University of Wittenberg from 1544, he became a Rektor at Schöningen, near Brunswick, in 1546 but was soon expelled by the Catholics. A series of similarly short-lived posts followed; between 1547 and 1585 he was compelled by his extreme religious position to move at least ten times. By 1585 he was at Iserlohn, Westphalia, whence he was prevented from returning to Essen. His final recorded place of residence was Cologne, whose Lutheran community had repeatedly provided him with support.

In addition to a number of theological works, Magdeburg published one musical work, *Christliche und tröstliche Tischgesenge* (Erfurt, 1572), which has a characteristically intransigent preface (there are four melodies in *ZahnM* and several texts in G. von Tucher: *Schatz des evangelischen Kirchengesangs*, i, Leipzig, 1848, and in P. Wackernagel: *Das deutsche Kirchenlied*, iii, Leipzig, 1870). It is a small collection, published in partbooks and containing one three-part and two four-part songs for each day of the week with the cantus firmus in the soprano or tenor. Their sources are unknown, except for the four-part piece *Was mein Gott will, das gscheh allzeit*, which originated over 40 years earlier as Claudin's chanson *Il me suffit*. The words of the first verse of *Wer Gott vertraut, hat wohl gebaut* are by Magdeburg himself, and he must certainly have written other texts in the collection. Whether he wrote any of the music is as yet unknown. Two similar works are attributed to Magdeburg in Michael Praetorius's *Musae Sioniae ... achter Theil* (1610[12]; ed. in *Michael Praetorius: Gesamptausgabe*, viii, Wolfenbüttel, 1932).

WALTER BLANKENBURG

Magdić, Josip (*b* Ogulin, 19 March 1937). Composer and conductor of dual Bosnian and Croation nationality. He graduated from Škerjanc's composition class at the Ljubljana Academy in 1963 and completed postgraduate studies in 1966; he was a self-taught organist, but studied conducting with Švara. From 1970 he lectured in theory and composition at the Sarajevo Music Academy and in 1994 he joined the academy in Zagreb. While at Sarajevo he founded the contemporary music ensembles Momus and Masmantra. In 1986 he was awarded the City of Sarajevo's 6 April Prize. His output is extremely varied in terms of both genre and style. In over 200 chamber or orchestral works there are instances of neo-classicism, neo-romanticism and a style approaching Expressionism. Electro-acoustic and computer music also form part of his output, while works of a contrapuntal nature often use Gregorian chant and Bosnian folk melodies. He is the author of *Vokalna polifonija* (Sarajevo, 1979) and other textbooks.

WORKS

IVAN ČAVLOVIĆ

Mager, Jörg (Georg Adam) (*b* Eichstätt, 6 Nov 1880; *d* Aschaffenburg, 7 April 1939). German instrument inventor. He began experimenting with quartertones on a pipe organ in 1911 and commissioned a two-manual quartertone harmonium. He constructed a series of electronic instruments in Berlin during the 1920s and, from 1929, in Darmstadt. His first was the Elektrophon (1921); this had a beat-frequency oscillator and was played by moving

a lever around a calibrated semicircular dial. It was followed by two versions of the similar Kurbelsphärophon (*c*1923 and 1926), and the Klaviatursphärophon (1928), which had an audio oscillator, two monophonic manuals instead of levers (with short keys, permitting one hand to play on both simultaneously) and an additional pedal-board. His more experimental Kaleidophon [Kaleidosphon] (1927) had a monophonic keyboard tuned in semitones, but with a pantograph-like 'stork's beak' mechanism which could expand or contract the basic intervals. The equivalent of chords were apparently produced by mixtures of overtones, possibly controlled by a touch-sensitive facility on the keyboard. Glissandos, vibrato and 'timbre trills' were also possible. His two models of the Partiturophon (1930–31; with three and four manuals respectively) were similar in principle to the Klaviatursphärophon. The circuits of all Mager's electronic instruments were simple but ingenious, featuring wide-ranging timbre controls. His early loudspeakers were made from telephone earpieces and a variety of materials (including gongs, brass and steel sheets, and cardboard boxes) that produced different timbres (*see* ELECTRONIC INSTRUMENTS, §I, 5(ii)). In his later multi-manual instruments each voice could be allocated a different timbre.

Mager's electronic keyboard instruments attracted considerable interest. In 1931, using electromagnetically-struck and possibly amplified Javanese gongs, he provided the bells for *Parsifal* at Bayreuth under Toscanini, and he used the Partiturophon to create sound effects, including thunder, for the *Ring* later the same year. He also composed microtonal incidental music for Goethe's *Faust* in 1932. Hopes for the commercial manufacture of the Partiturophon were unfulfilled, and in 1935, for a combination of personal and political reasons, he was forced to leave his Darmstadt laboratory. Mager's last 'official' commission was to contribute music for a film, *Stärker als Paragraphen*, in 1936. He composed several short works for his instruments, most of which were broadcast.

He died in isolation, and during World War II all his instruments disappeared or were destroyed. Although he was an important pioneer, financial, political and personal problems prevented Mager from achieving his ideal instrument (the Omnitonium), capable of 'all sounds and tunings'. His son Siegfried also worked in electronic instrument design.

HUGH DAVIES

Maggi, Carlo Maria (*b* Milan, 3 May 1630; *d* Milan, 22 April 1699). Italian poet and playwright. He was the son of a merchant of luxury goods, studied law at Bologna and travelled throughout Italy before becoming in 1661 secretary to the senate of Milan, a post he held for the rest of his life. From 1664 he was a lecturer in Latin and Greek at the Scuole Palatine and from 1691 a member of the Accademia d'Arcadia. He is known primarily for his comedies in Milanese dialect (e.g. *I consigli di Meneghino*), performed with great success at the Collegio dei Nobili: the servant characters (who speak in dialect) have a monopoly of sententious and proverb-laden wisdom, which, consistent with the author's declared pessimistic moralism, compensates for and neutralizes the caricatured social, economic and cultural corruption of the ruling-class characters. L.A. Muratori published three librettos in his edition of Maggi's works; they were friends and both criticized the shortcomings of musical theatre, sharing a concept of theatre committed to urban society. Maggi may have been the unnamed author of the parts in Milanese dialect in Carlo Righenzi's comic opera *La farsa musicale* (music by Francesco Rossi; Milan, Teatro Ducale, Feb 1664). The 'favola pastorale' *Lucrina* was written in 1666 for the visit of the future Empress Marghareta Theresa of Austria to Milan on her way to Vienna; the music is attributed to G.A. Celidone (in *I-Rvat* Ottob. lat.2480, ff.24–8). For the theatre of Count Vitaliano Borromeo on Isola Bella, Lake Maggiore (opened *c*1667–8), he wrote *Bianca di Castiglia*, first performed in October 1669, and at the Salone Margherita, Milan, in 1674 and 1676. Also for Count Borromeo's theatre he wrote *Gratitudine umana*, *Irene di Salerno* and *Ben venga maggio, o sia La ninfa guerriera*. In the winter of 1672–3 his *Il trionfo d'Augusto in Egitto* and *Amor tra l'armi, overo Corbulone in Armenia* were performed at the Salone Margherita, Milan. *Ippolita reina delle amazzoni* has also been attributed to him. Scores of *Ben venga maggio* and *Il trionfo d'Augusto in Egitto* and music fragments of *Bianca di Castiglia*, *Gratitudine umana* and *Irene di Salerno* are held at the Borromeo family archive in Stresa, Italy (*I-IBborromeo*).

In all these 'opere in musica' (the nomenclature is intentionally closer to the tradition of the *commedia dell'arte* than the normal 'dramma per musica' would be) the author of the text, though never mentioned by name on the title-page, is often present for the purpose of satire or criticism in the characters of servants or ministers or through transparent allusions to Milanese state and cultural events or to his own biography (e.g. the secretary Alfonso, the principal male character in *Bianca di Castiglia*). The romance-like intrigue, often of Spanish inspiration, is rigorously realistic (with abundant use of such mundane props as clocks, handkerchiefs and rings). The style is plain and clear, with a good deal of banter against metaphorical, high-flown language. The moralism is conveyed by the great number of terse 'mezz'arie', particularly for the secondary characters. Precisely because their comedy and morality were rooted in a specifically Milanese social reality, Maggi's works were never performed outside Milan, although they must be reckoned among the finest Italian librettos of the 17th century: the very structure of the mainstream of Italian opera ruled out any attempt at moral and stylistic regeneration such as that undertaken by Maggi, who after 1673 was reduced to supplying 'arie aggiunte' for imported dramas (e.g. *Girello*, 1674, and *Attila*, 1677; scores at *IBborromeo*).

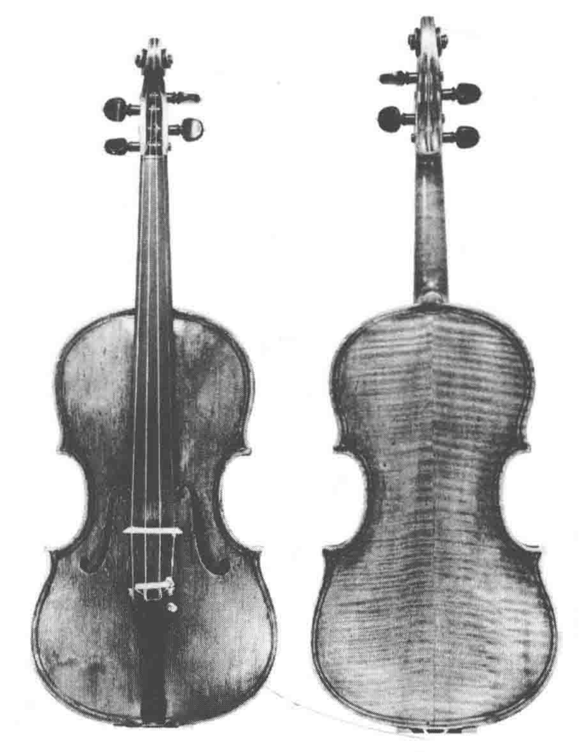
LORENZO BIANCONI



Maggi, Francesco. Italian singer, possibly identifiable with FRANCESCO DI MAGGIO.

Maggiello, Dominico. *See* MAGIELLO, DOMINICO.

Maggini, Gio(vanni) Paolo (*b* Botticino Sera, nr Brescia, bap. 25 Aug 1580; *d* Brescia, ?1630–31). Italian violin maker. The best-known maker of the Brescian school, he was a pupil of Gasparo da Salò. Whereas Gasparo is chiefly noted for his tenor violas, Maggini's output reflected the increased popularity of the violin. His instruments influenced the work of many later makers (including at times Stradivari and Guarneri).

Maggini moved to Brescia between 1586 and 1587, where he became Gasparo's pupil. His presence there is documented from 1598 to 1604, and in 1606 he bought a house with a workshop near Gasparo's first home, in the front of the Palazzo Vecchio del Podestà. He married Anna Foresti in 1615 and had ten children, although only four survived. A dowry document shows that Giacomo Lafranchini, '*magister a violinis*', lived with the Maggini family. Evidence of his family and business life is documented in two tax returns (1617 and 1626) and a number of notarial documents and other records of the parish of S Agata. In 1622–3 he moved to a larger house in via Bombaserie a Sant'Agata. He is shown to have paid a salary to a workman, possibly Lafranchini. In July 1630 he was still alive, shortly before the arrival in the city of the plague. The death register was abandoned between July 1630 and June 1631, during which time Maggini must have died: his death is not recorded in the register after its resumption, and in 1632 he is referred to as dead in a document witnessed by his son Carlo, then six years old.

In comparison with those of his Cremonese contemporaries the Amatis, Maggini's violins appear compact in outline: in general the waist of his design is less pronounced than on an Amati instrument with its more rounded, more elegant curves. In addition the arching of back and table are left fuller towards the edge. The violins are of two patterns, the bodies being either rather less than 35·5 cm long or, more usually, about 37 cm. It was the deep, rich sonority of the larger model that encouraged Stradivari to seek a combination of the virtues of Cremona and Brescia with his 'long pattern' violins dated between 1690 and 1699. In general, however, by increasing the volume of air in the body of a violin, the maker runs the risk of losing the essential soprano quality of violin tone,

Violin by Gio: Paolo Maggini, Brescia (private collection)

particularly on the lower strings. What Guarneri – more than a century later – sought to do, and achieved with unsurpassed success, was to adapt the compactness of Maggini's form and the strong gradation of the thickness of the plates in Gasparo's violins to 18th-century Cremonese principles of construction, at the same time limiting his dimensions strictly to preserve a much smaller volume of air than the normal Maggini. Maggini's achievement, however, was the creation of a violin with a big, broad tone, darker in colour but with more depth of response than the Amati. That the later Cremonese makers reacted as they did to his work shows that the tonal characteristics of the Maggini were well appreciated by players of the 17th century, as they were again in the 19th, when innumerable copies were made in the best workshops of Paris as well as Mirecourt, and in the German factories. The copies mostly have more normal dimensions, but are complete with the characteristic double row of purfling, soundholes with small lobes and small wings and other features. Needless to say they lack the rich, glowing red-brown or golden orange varnish, usually quite equal to that of the Amatis, though sometimes with a rather drier appearance.

Maggini is credited with having modernized the viola in accordance with changes in musical style and the demands of instrumental technique, thus contributing to the development of a new sound ideal. He reduced the dimensions of the viola from 44·4 cm (Gasparo's model) to 42·8 cm, and later to about 41·5 cm. Three examples of the smaller size are believed to be extant, and apparently predate the sole small viola made by Antonio and Girolamo Amati in 1615. In Maggini's viola the bridge is placed halfway along the body: as well as making the instrument easier to handle by reducing the string length and therefore the necessary reach of the fingers of the left

hand, this has a positive effect on the tone quality because the bridge is fixed at a good vibration point on the top plate; however, some may regard this placement as less aesthetically pleasing.

Maggini may also have been the first to make a cello smaller in size than the large Cremonese instruments commonly in use until the last quarter of the 17th century: the two known survivors, broad in proportion to their length, foreshadow the dimensions favoured by the celebrated Venetian makers a century and more later. Maggini, when compared to his contemporaries, brought the voices of the individual members of the violin family closer together in timbre to produce a highly homogeneous sound mixture, perhaps influenced in part by technical devices used in the organ. This idea was to some extent revived by Stradivari. In addition to violins, violas and cellos, Maggini made basses and instruments of the viol family, and also the Brescian cittern.

It is impossible to indicate with conviction the different stages of Maggini's development, as his labels (on which his name appeared as Gio: Paolo Maggini in Brescia) were never dated. Maggini's early death ended the contribution of the Brescian school to the development of the violin family: he was the last of the great Brescian makers.

CHARLES BEARE/UGO RAVASIO

Maggio, Francesco di. *See* DI MAGGIO, FRANCESCO.

Maggiolata (It.). An Italian popular song sung on May Day (Calendimaggio). Angelo Poliziano's poem *Ben venga maggio* is a 15th-century example of the May song of popular, oral tradition transformed into an art form of some literary pretension, analogous to the transformed *canti carnascialeschi* of Lorenzo de' Medici. Like most other Italian popular music of the 15th century, May songs were probably sung to simple strophic tunes that were never written down; Ghisi (p.47) suggested, however, that Isaac's *Or'è di maggio* may contain a paraphrased version of the melody that was originally sung to this text. Later in the 16th century the propitiatory character of May Day celebrations was subsumed into the pastoral, where it found a natural outlet in rustic texts set as light madrigals. A popular form of partly spoken and partly sung open-air theatre known as the 'maggio' is still prevalent in Tuscany, frequently representing a combat between Winter and Spring.

TIM CARTER

Maggiore (It.: 'major'). A term used mainly in the late 18th and early 19th centuries to denote a change to the major tonality in a work or movement written predominantly in the minor key. It was employed in a similar manner to MINORE, primarily in sectional movements (e.g. Beethoven's 32 Variations in C minor woo80, and the middle section of the funeral march of the 'Eroica' Symphony). The return to the minor key was usually indicated by the term *minore*.

See also VARIATIONS, §§8 and 9.

MICHAEL TILMOUTH

Maggiore, Francesco (*b* ?Naples, *c*1715; *d* ?Netherlands, ?1782). Italian composer and entertainer. He was said by contemporaries to have been talented ('brilliant and pleasing', in Gerber's words) but, as far as is known, he never achieved regular employment, and his life was unusually peripatetic. He studied under Durante at the Conservatorio dei Poveri di Gesù in Naples, 1730–35. After the production of a comic opera in Naples in 1737 he spent a number of years in the Veneto and elsewhere in north Italy, picking up occasional musical and composing jobs; librettos of the time name him as *maestro di cappella* of the Marchese di Torrecuso. For Carnival 1742 he contributed arias to a pasticcio of Piovene's *Nerone* in Gorizia, where he directed the operas at the Teatro Nuovo. In the same year he directed the music at the newly rebuilt theatre in Verona and wrote a cantata in Udine to celebrate the possession of Gorizia by the Count of Purgstall. The next year he was director of the opera in Reggio nell'Emilia, adding at least seven arias to a production of Gluck's *Demofoonte*, and seems also to have been in Ferrara. Similarly, in Venice at Ascension 1751, he helped put together a revival of Goldoni's *Statira*, providing the recitatives and several arias; other arias (according to Piovano) were chosen by the singers. He is of historical interest as having been among the first Naples-trained composers to write *opera buffa* for Venice (*I rigiri delle cantarine*, 1745), contributing to the new popularity of the form there. He travelled extensively throughout Europe giving concerts (for example in Frankfurt in 1763 and 1764) and directing operas. He had a singular gift for mimicking in his music (or, according to Schmidl, with his voice) the natural sounds of animals and birds. Although La Borde considered this a 'low and undesirable' species of entertainment, and Villarosa felt it to be 'useless and laboured', chroniclers agree that he amused his audiences well. He is said to have settled in the Netherlands by 1764, living with a daughter (perhaps Angelica Maggiore, later the wife of the tenor Giuseppe Gallieni, whom the Mozarts heard in Brescia in 1771), and finally to have died there in poverty.

Maggiore's surviving arias show compositional ability. Melodic lines, frequently setting conventional texts, are fresh, take unexpected turns and exhibit an unusual degree of expressive chromatic detail, which, however, does not obscure the solid harmonic structure. In 'Più di me sei fortunata' (*I-Nc*), for example, full da capo form is used, but with the addition in the first section's second half of a second repetition of text, after the return to the tonic key (in effect an elaboration of the tonic cadence), but with altered harmonies involving colourful augmented

6th chord to dominant progressions. The setting of the middle section is short, tonally unstable and essentially transitional in character. This structure suggests influence from instrumental music of about 1755.

JAMES L. JACKMAN/FRANCESCA SELLER

Mägi, Ester (*b* Tallinn, 10 Jan 1922). Estonian composer. She studied at the Tallinn Conservatory (graduated 1951), where her teachers included Mart Saar, and at the Moscow Conservatory (graduated 1954) with Vissarion Shebalin, among others. From 1954 until her retirement in 1984 she taught music theory at the Tallinn Conservatory. As a composer, Mägi adopted the values of Saar, one of the founders of an Estonian national style. Her interest in folk music, her settings of Estonian poetry and the suppressed emotionality, sincerity and seriousness of her music all demonstrate this. Her numerous choral and solo songs have received frequent performances and some of her large-scale orchestral works, such as the Symphony (1968), Variations for Piano, Clarinet and String Orchestra (1972) and *Bukoolika* ('Bucolics', 1983), have found their place in the concert repertory. Later works, such as *Lapimaa joiud* ('The Joiks from Lapland', 1987) employ complex polytonal and colouristic textures, repetition and static tonal figures that may originate from folk material, but also demonstrate the general tendencies of postmodern music. She was awarded the Estonian state prize in 1980.

URVE LIPPUS

Magi, Play of. Modern title given to the medieval liturgical play formerly described as *Officium stelle*. *See* MEDIEVAL DRAMA, §II, 2.

Magiello [Maggiello], **Dominico** (*b* Valeggio, nr Verona; *fl* 1567–8). Italian composer. His earliest known work, *Il primo libro di madrigali a cinque* (Venice, 1567), is among the first music publications to be dedicated to the important music patron and composer Guglielmo Gonzaga after his succession to the Duchy of Mantua in 1563. The book opens with an encomiastic composition, but is largely devoted to settings of Petrarch's verse including a six-section version of *Padre del ciel*, a particular favourite among contemporary composers. Petrarch's poetry also predominates in *Il secondo libro di madrigali a cinque* (Venice, 1568), which includes a further extended cycle, on the text *Non ha tanti animali il mar fra l'onde*. In the dedication of the *Secondo libro* Magiello echoed contemporary belief in the dignity of musical science which was, he claimed, 'second to none, including metaphysics, in nobility, age and certainty'.

IAIN FENLON

Magini-Coletti, Antonio (*b* Iesi, 17 Feb 1855; *d* Rome, 7 July 1912). Italian baritone. He studied in Rome at the Accademia di S Cecilia, and, having made his baritone début at the Teatro Costanzi in 1880, was retrained as a tenor. This proved unsuccessful and he quickly returned to the baritone repertory, becoming associated throughout Italy with the role of Escamillo. In 1885 he had a considerable success in Lisbon, appearing in rarities such as Rossini's *Matilde di Shabran* and Donizetti's *Poliuto*. Two years later he established himself as a favourite at La Scala, where in 1889 he created the role of Frank in Puccini's *Edgar*, and in 1901 appeared in the première there of Mascagni's *Le maschere*. He also sang Méphistophélès in the first Italian performances of *La damnation de Faust*. His wide-ranging repertory included Wagnerian roles such as Kurwenal, Telramund and Wotan (*Die Walküre*). Though his career centred on Italy, where he was engaged by most of the major houses, he sang regularly in South America, travelling also to Russia and Poland. He made his Metropolitan début in 1901 as Nevers (*Les Huguenots*) with Albani and the De Reszke brothers. His last stage appearance was as Iago at Reggio nell'Emilia in 1910. From 1902 to 1908 he made many recordings, showing to advantage his resonant, evenly

produced voice, wide in its range and authoritative and dramatic in use.

J.B. STEANE

Magli, Giovanni Gualberto (bur. Florence, 8 Jan 1625). Italian castrato. A Florentine, he was a pupil of Giulio Caccini and entered Medici service on 23 August 1604. In 1607 he was lent to Prince Francesco Gonzaga of Mantua for the first performances of Monteverdi's *Orfeo*: he played Music and at least one other role, acquitting himself well despite the difficulty of learning the music. Magli then performed in the wedding festivities for Prince Cosimo de' Medici and Maria Magdalena of Austria in 1608. He came under the protection of Don Antonio de' Medici, who arranged two years' paid leave (from 18 October 1611) to study vocal and instrumental technique in Naples. Magli again left Florence in October 1615 to serve the elector of Brandenburg, but his salary payments had resumed by September 1622.

TIM CARTER

Magnard, (Lucien Denis Gabriel) Albéric (*b* Paris, 9 June 1865; *d* Baron, Oise, 3 Sept 1914). French composer. His mother died when he was four, and the text for the first of his op.15 songs laments this loss and the ensuing loneliness of his childhood. He was brought up by his father François Magnard, a prominent author and journalist and editor of *Le Figaro* (1879–94). They had a strained relationship: raised in comfortable affluence, Alberic came to resent his position as 'le fils du *Figaro*', and the assumption that he would use his family's influence to launch his career. He passed the baccalaureate in 1882, and travelled widely at his father's expense (staying for six months at St Augustine's Abbey, Ramsgate). Subsequent military service was followed by law school, where he gained a degree in 1887. Though his musical gifts had not yet become apparent in any striking way, he had already determined on a career in music – which would depend on his talent rather than nepotism. The decisive catalyst in this decision seems to have been his attendance at the 1886 Bayreuth performance of *Tristan und Isolde* – and also his friend August Savard's winning of the Prix de Rome that year. He enrolled at the Paris Conservatoire shortly after and studied counterpoint with Dubois and composition with Massenet, graduating in 1888 with the *premier prix* in harmony. At the Conservatoire he began a lifelong friendship with Ropartz, who introduced him to César Franck and Chausson. The idealism of Franck's circle proved far preferable to the academicism of the Conservatoire, and Magnard soon embarked on private study of fugue and orchestration with Vincent d'Indy. His earliest important works, the first two symphonies and the opera *Yolande*, were written under d'Indy's tutelage, and the First Symphony is dedicated to him. This was performed in Angers, and *Yolande* was staged (though without success) in Brussels – almost certainly through the influence of Magnard *père*, who had taken to supporting the Schola Cantorum composers in *Le Figaro*.

After the death of his father in 1894 Magnard was forced to come to terms with conflicting emotions of chagrin, gratitude and loss. He expiated them with the deeply-felt orchestral *Chant funèbre*, which he regarded as marking a new stage in his artistic development. In 1896, the year of his marriage to Julia Creton, he completed the Third Symphony, perhaps his best-known work, and began to teach counterpoint at the Schola Cantorum (his most notable pupil was Déodat de Séverac). He also experienced the first symptoms of partial deafness, which exacerbated his social isolation. His time was divided between his Schola duties and composition for the rest of his career. In 1899 he financed a concert of his orchestral works in Paris, which won him some critical praise and a small circle of enthusiasts. Otherwise his music was seldom performed, except at Nancy, where Ropartz was director of the Conservatoire. However Ysaÿe and Pugno took up Magnard's Violin Sonata, and Busoni arranged for him to conduct the German première of the Third Symphony in Berlin in January 1905. Magnard printed and issued his major works at his own expense – owing to his dislike of the commercial nature of music publishing – which tended to restrict their distribution. The opera *Guercoeur* was not performed complete in his lifetime; *Bérénice* made little impression when presented at the Opéra-Comique in 1911; the *Promenades* were not played until 16 years after their publication and the Fourth Symphony was written for an orchestra that gave it a calamitous first performance. Prone to depression and disillusionment, Magnard may have come to regard himself as a failure.

He had settled with his family at the Manoir des Fontaines in Baron in 1904. After the outbreak of war he sent his wife and daughters to safety and awaited the German advance alone; although he had volunteered for military service, he had been disqualified on account of his age. When two enemy soldiers entered the grounds one was killed by a single shot, apparently fired by Magnard, and the Germans set fire to the house. Magnard died in the blaze, although his body could not be identified among the remains; the fire also consumed all existing copies of *Yolande*, two acts of *Guercoeur* in full score, and the recently completed set of *12 poemès en musique*.

Magnard was reputedly proud, unsociable and sardonic, an impression probably increased by his deafness, though he was capable of warm friendship and ready wit. Caring little for popular opinion – the *Hymne à la Justice* expressed his disgust at the hounding of Dreyfus – he also had a reputation for moral austerity, which originated in rebellion against his cushioned upbringing. He once wrote: 'l'artiste que ne puise pas sa force dans l'abnégation est ou près de la mort ou près du déshonneur', and denial may indeed be seen as one of the driving forces of his music. Though sharing his generation's enthusiasm for Wagner, he tended to eschew extreme chromaticism or rich instrumental colours. He had no interest in impressionism (though he shared Debussy's admiration of Rameau), preferring to concentrate on clarity of line and form. His vocal works subordinate lyric expression to what might be termed instrumental concerns, a tendency enshrined by *Bérénice*, where the love-duets proceed by canon at the octave and Titus's crucial meditation is cast as a fugue. His op.15 set of autobiographical meditations on his own texts, written in Alexandrines, are structured to resemble a four-movement symphony or sonata. And his operas manifest a particularly dark tone: Titus

renounces his beloved Hebrew princess, and the hero of *Guercouer* is killed by his former comrades.

Magnard's music, then, has long had a reputation for excessive austerity, but although some works are heavily scored and unremittingly serious in tone, they are well-crafted, clear in structure, rhythmically dynamic and passionate in expression. Despite his relatively small output, he made valuable contributions to all the major genres. His four symphonies are the last significant examples of the Franck-d'Indy tradition, but also transcend their models, foreshadowing, if anyone, Roussel. Rather than the Franckian three-movement form, he favoured a more classical four movements: all his symphonies contain important and effective scherzos. Redolent of rustic dances and sometimes in unusual metres (e.g. the 5/4 passages in Symphony no.3, inspired by a visit to the Auvergne), these scherzos are among his most individual inventions; further examples enliven the major chamber works. In his use of fugue, chorale and hymn forms, his exalted grandeur of expression and the sense of light and space that characterizes his mature orchestral style, Magnard resembles a French Bruckner.

As a musical dramatist his models were Wagner and Gluck, and he adapted the technique of leitmotif to a statuesque purity of expression. *Guercoeur*, to his own scenario and libretto, is perhaps his most unusual work: its first and last acts are almost oratorio-like and are set in a rationalist Heaven in which the divinities are Truth, Beauty, Goodness and Suffering. *Bérénice*, however, is probably his *chef d'oeuvre*, with the libretto's derivation from Racine matched by a tragic sobriety of utterance.

Magnard's small output of chamber music is as distinguished as that of any French composer. The melodic tenderness of the Violin Sonata's slow movement and the vigour and concision of the Trio and Cello Sonata are highly creative, and the substantial and technically demanding String Quartet bears comparison with Franck's own quartet. Its almost unrelieved intensity and contrapuntal activity, however, are less typical of Magnard than is often alleged. The Quintet has a serenade-like amiability and the piano *Promenades*, inspired by rambles around Paris, suggest a delightful fusion of Chabrier and early impressionism that constitutes an isolated but elegantly-sited milestone in the evolution of French piano music.

MALCOLM MACDONALD

Magne, Michel (*b* Lisieux, 20 March 1930; *d* Cergy-Pontoise, 19 Dec 1984). French composer. Essentially self-taught, he formed his own orchestra when he was 15 and made concert tours throughout France. He then took lessons with Simone Plé-Caussade and became passionately involved in *musique concrète*. A strong imagination and a taste for adventure led him to invent what he termed 'musique infrasonore': music of very low pitch which was to be felt rather than heard. Abandoning this, he wrote a sweeping fresco on World War II, his *Symphonie humaine* (1955).

From 1956 he experimented in another invented genre, 'musique tachiste', which mixed visual and aural techniques, both light-hearted and serious. He subsequently collaborated with Françoise Sagan on a ballet, *Le rendez-vous manqué* (1958), wrote several hit songs and devoted himself seriously to film music, writing more than 100 scores. In the 1960s, he was one of the most sought-after

screen composers, collaborating with many of the leading directors of the period, including Roger Vadim, Jacques Deray, Julien Duvivier and Claude Autant-Lara. He was nominated for an Academy Award for *Gigot* (1962). He committed suicide at the age of 54.

DOMINIQUE AMY/MARK BRILL

Magni. Italian family of printers and musicians, active in the 17th century. Bartolomeo Magni came from a family of musicians from Ravenna. Of his brothers, BENEDETTO MAGNI was a composer and organist and Giovanni was organist at S Maria in Porto, Rome. Bartolomeo was apprenticed to Angelo Gardano and married his daughter. On Gardano's death in 1611 the estate passed to his daughter and Magni printed as the 'heir of Angelo Gardano'. For much of his output he retained the Gardane title, presumably for commercial reasons, though he added his own in one of several formulae, such as 'Stampa del Gardano appresso Bartolomeo Magni'. He was a prolific printer, and although there were others in north Italy, he did not have to face the competition of Scotto, whose heirs had stopped printing a few years before. As a result he printed music by most of the important composers of the period to 1645, including the first editions of Monteverdi's later works and music by Agazzari, Banchieri, Cazzati, Cifra, Marco da Gagliano, d'India, Merula, Nenna, Giovanni Priuli and Filippo Vitali.

Bartolomeo Magni had two sons who were mentioned in Banchieri's *Lettere armoniche* (Bologna, 1628). One of these may have been the Paolo Magni who had a motet published in RISM 1679[1]; Francesco (*d* 1673) is first named in 1651. It is possible, however, that Bartolomeo had died in 1644, for the prints of the intervening six years are merely signed 'Stampa del Gardano'. Francesco continued printing until his death, though his output declined in later years. He concentrated on sacred and instrumental music, including works by Cazzati, Legrenzi, Vitali and G.M. Bononcini. The firm continued in business after his death. During the second half of the century it inclined away from music towards books, but it printed some music until 1681; it ceased production in 1685. Catalogues of music published by the firm in 1619 and 1649 are extant.

STANLEY BOORMAN

Magni [Magno], **Benedetto** (*b* Ravenna; *fl* 1604–17). Italian composer and organist. He was the brother of the printer Bartolomeo Magni (*see* MAGNI) but seems to have taken no part in the family business. He served as organist of Ravenna Cathedral under Cardinal Pietro Aldobrandini, the papal legate at Ferrara. One of his pupils was the 'gentleman' Giovanni Macigni, whose first book of five-voice madrigals (his only known publication) contains madrigals by Magni; there is no indication as to which pieces are by which composer. Magni's first printed work was a five-voice madrigal in *Musica de diversi eccellentissimi autori* (RISM 1604[8]). He published five collections of music, all but one sacred and four of them printed by Bartolomeo. The second book of 1612 was assembled by his brother Giovanni, who added to it five motets of his own; another brother, Sebastiano, assembled Benedetto's only book of secular music, the madrigals for five voices.

CLAUDIO SARTORI/R

Magni, Paolo (*b* ?Milan, *c*1650; *d* Milan, 21 Feb 1737). Italian composer and organist. He was active throughout his career at Milan, where on 31 January 1686 he was appointed second organist of the cathedral and, on 22 December 1688, first organist, retiring on 28 April 1716 with full pay. For most of that period he was also *maestro di cappella* of the Milanese court, with the composition of operas, often in collaboration with others, as one of his chief functions. The preface to *Il Radamisto* (1695) first names him as occupying this post; from 1718, because of his age, his duties were carried out by Giuseppe Vignati, though he retained his title. His solo motet *Ad pugnas o furie* (RISM 1679[1]) has a multi-sectional cantata-like structure, with arias in contrasting metre and rhythm; it requires considerable vocal agility and is perhaps a little more skilful than average.

THOMAS WALKER

Magnificat. One of the biblical canticles, sung with an antiphon at the end of Vespers. The text as it appears in St Luke's Gospel (i.46–55: 'My soul doth magnify the Lord . . .') evidently derives from an earlier Jewish or Jewish-Christian hymn. The use of the *Magnificat* at the end of Vespers, where it replaced Psalm cxl (Vulgate numbering) – a common practice at this Office in Oriental rites, was first prescribed in the Rule of St Benedict (*c*535).

1. Monophonic. 2. Polyphonic to 1600. 3. After 1600.

1. MONOPHONIC. The *Magnificat* is chanted to a canticle tone, a formula somewhat more elaborate than a psalm tone, the mode and ending (*differentia*) of which are determined by the antiphon. In some manuscripts, including several of the oldest antiphoners, special series of antiphons for the *Magnificat* are provided. These quote or paraphrase the *Magnificat* text, and usually appear in an order corresponding to that of the phrases on which they are based (see CAO, i, 1963, no.142, Compiègne; ii, 1965, no.142, Hartker). Antiphons from this series are sometimes incorporated in the ferial Office (op. cit., i, nos.37–43, Ivrea). Some of these texts are short, and the musical settings are quite plain. It has been proposed that these are the original *Magnificat* antiphons.

In another group of antiphons, intended for both the *Magnificat* and the *Benedictus* (the canticle of Lauds), the texts are based on the Gospel lesson of the Mass of the day. This sometimes results in the juxtaposing of markedly dissimilar ideas and literary themes. Some of these texts are long, though their musical setting is usually simple. In earlier manuscripts (11th century) a choice is often permitted from among these for a particular day, but in later manuscripts only two are provided, one for each of the New Testament canticles. In some instances these antiphons (*in evangelio*) are the only Proper chants in the Office for a particular day.

The tone to which the canticle is chanted seems not to have been fixed until a relatively late date; manuscripts differ a good deal in details. Peter Wagner published two versions of the canticle tone (*Einführung in die gregorianischen Melodien*, iii, Leipzig, 1921/*R*, pp.98–9, 102–3); others were published by P. Ferretti (*Estetica gregoriana*, i, Rome 1934/*R*; Fr. trans., enlarged, 1938, pp.303–6) and W.H. Frere (*The Use of Sarum*, ii, Cambridge, 1901, pp.lxvii–lxxi). A late date for the codifying of these tones is also suggested by the fact that antiphons for the *Magnificat* and *Benedictus* are usually not differentiated in tonaries from other antiphons.

2. POLYPHONIC TO 1600. Apart from the Ordinary of the Mass, the *Magnificat* was the liturgical text most often set polyphonically from the mid-15th century to the beginning of the 17th. The wide dissemination of the polyphonic *Magnificat* is doubtless linked with liturgical practice: established as the textual climax of daily Vespers, the Latin *Magnificat* was sung in both Catholic and early Protestant churches, usually in polyphony, on Sundays and feast days; and the musical-liturgical authorities were continually demanding the preparation of *Magnificat* settings in different modes (to match those of the framing antiphons). Thus there are relatively few composers of sacred music during the 15th and 16th centuries who did not set the *Magnificat* at some time. A fairly large number of settings were written by composers such as Du Fay and Stoltzer (who wrote five), with later composers writing increasing numbers of settings – Appenzeller wrote 12, Victoria 18, Palestrina more than 30 and Lassus about 100. In the 16th century the settings by Morales were the most widespread, while the settings of Gombert and Gaffurius, for example, have survived in only one source each. In the 15th century most settings were for three parts, whereas in the 16th (until about 1560) most were for four parts.

The manuscript and printed sources containing polyphonic Latin *Magnificat* settings are spread throughout the centres for sacred music during the 15th and 16th centuries, even though in the 15th century there was a predominance of Italian and afterwards of German sources – the latter not least because of the large number of editions designed for use in Protestant services. The earliest example of a polyphonic *Magnificat* dates from the 14th century (*GB-Cu* Kk.1.6.) and is an anonymous fragment. The real tradition began in the first half of the 15th century (Du Fay, Binchois) with the transmission of individual pieces in manuscripts containing a mixed sacred repertory by several composers, and was followed by a considerable increase in sources from the 16th century. From about 1520 there are manuscripts, and after 1534 prints, which contain either exclusively or predominantly *Magnificat* settings (e.g. *D-Ju* Cod.20; *I-Rvat* C.G.xv.29, xv.36, xvi.12, viii.39; RISM 1534[7], 1534[8], Attaingnant; 1544[4], Rhau; 1553[3], Du Chemin; 1557[8], Le Roy & Ballard).

The form and style of the polyphonic *Magnificat* was determined by three factors. First, the general vocal and polyphonic style that happened to be in vogue at a given time and in a given place exerted much influence. Thus, for example, simple discant settings were most common in the 15th century, while from the beginning of the 16th century settings with melodic through-imitation prevailed, and in Germany pure cantus firmus adaptations were preferred for a long time. Second, the conditions of musico-liturgical practice determined the relative complexity of style in which composers could indulge, so that from the 16th century we find simple fauxbourdon or *falsobordone* pieces alongside highly artificial motet-like settings. Third, and most important of all, was the cantus prius factus, almost inevitably the canticle tone, which formed the basis for virtually all polyphonic *Magnificat* settings until the 17th century. Together with the formal structure of the canticle text, the omnipresence of the tone

gave the polyphonic *Magnificat* a distinct character and allowed it to become a largely independent species of motet. The only exceptions to the use of the tone as a cantus prius factus were made by the English composers (John Browne, William Cornysh (ii), Fayrfax, Horwood, Tallis), and in the parody *Magnificat* settings written since the last third of the 16th century which were based on motets, secular compositions and non-psalmodic cantus firmi (Lassus, Hoyoul, Johannes de Fossa, Demantius, Michael Praetorius). Early parody *Magnificat* settings include Fayrfax's 'O bone Jesu' and 'Regali' and Ludford's 'Benedicta et venerabilis'.

The specifically liturgical function of the polyphonic *Magnificat* is apparent in the formal arrangement of the settings. Until the beginning of the 17th century *Magnificat* settings were arranged almost exclusively in sections, verse by verse; the large bipartite or tripartite motet form of the 16th century, which combines several verses of text at once, occurs in only a very few examples (e.g. by Gasparo Alberti, Valentin Rab, Jheronimus Vinders). The verse-by-verse setting facilitated the responsorial or *alternatim* performance of the *Magnificat* (a method also usual for polyphonic hymns, psalms and sequences). Thus the vast majority of polyphonic *Magnificat* settings use only half of the ten (with the doxology, 12) verses of the canticle, usually only the even-numbered verses beginning with 'Et exultavit'. Compositions comprising only the odd-numbered verses usually begin with 'Anima mea', and the introductory word 'Magnificat' is intoned in plainchant. Only an insignificant few polyphonic settings begin directly with the word 'Magnificat' (e.g. by Alexander Agricola, Gasparo Alberti, Johannes de Lymburgia, Valentin Rab, Jheronimus Vinders). Because the basic plainchant sounded the same in all verses of a *Magnificat*, it occasionally became desirable, in order to economize on effort, to use a single section of music for several verses of text, as in Du Fay's *Magnificat tertii et quarti toni*, with the form *abcdebcdecd* (this technique, like *alternatim*, was also common in polyphonic hymn settings). Most such strophic settings date from the 15th century and are found in Italian and German manuscripts.

Verses not set in polyphony were normally sung monophonically on the canticle tone or replaced by instrumental music. Of special note are intabulations of vocal pieces, and free paraphrases of the canticle tone. To the former group belong, for instance, an instrumental version of Josquin's *Magnificat quarti toni* in a St Gallen manuscript (*CH-SGs* 530), and the intabulation of various separate movements by Morales in Fuenllana's *Libro de musica para vihuela* (1554[32]), as well as several pieces in Venegas de Henestrosa's *Libro de cifra nueva* (1557) and in Valderrábano's *Libro de musica de vihuela* (1547[25]). The second group includes the explicitly didactic organ versets in the Buxheimer Orgelbuch and Paumann's *Fundamentum organisandi* of the 15th century. The earliest, and also the sole surviving *Magnificat* cycle (all eight tones) for organ is in a print by Attaingnant (RISM 1530[8]).

Within the continental *Magnificat* repertory the liturgical practice of the time and place determined the choice of antiphons for the *Magnificat* and thus the number of settings that would be required in a particular mode. The most frequently set tones were the eighth, sixth and first, the least frequently set the seventh, third and fifth. Some composers used several tones simultaneously in a single setting (including Du Fay, Brumel, Le Brung, Martini, Johann Walter (i), Clemens non Papa and Gombert). Local liturgical preferences also led to new arrangements of existing settings, evidence of which can be seen in variations among the surviving sources of a composition. The *Magnificat* settings by Costanzo Festa, for example, survive as continuously polyphonic settings of all 12 verses in manuscripts written for the papal choir (*I-Rvat* C.S.18 and C.G.XII.5), which seldom used *alternatim* performance. Four of the same works survive in a choirbook at S Maria Maggiore in Rome arranged for *alternatim*, setting only the even-numbered verses in polyphony. Similar variety is found among the sources of Morales's *Magnificat* settings: in editions printed by Scotto (1542) and Rhau (1544) they appear as eight continuously polyphonic settings, one on each tone, while in Gardano's edition of 1545 (on which Anglès based his edition in MME, xvii, 1956) they are arranged as 16 settings, an odd- and an even-numbered group for each tone. The influence of locale even extended to choice of style; for example, many written for the papal choir (e.g. by Festa, Morales, Palestrina and Victoria) increase the number of parts for the concluding doxology, and often introduce canons and other contrapuntal artifices.

In the sources from about 1500 onwards *Magnificat* settings are arranged ever more frequently according to the tones: the original names 'Primi toni', 'Secundi toni' and so on, are already to be found in the 15th century. The earliest complete *Magnificat* cycles (eight settings, one for each tone) that can be regarded as the original work of one composer are by Sixt Dietrich (1535) and Senfl (1537). Some *Magnificat* cycles of this sort, not at all ambitious from a compositional point of view, were clearly didactic examples showing how to set the eight canticle tones in polyphony (e.g. the settings by Martin Agricola in Rhau's *Ein kurtz deudsche Musica* of 1528 or the anonymous settings in the Berg edition *Kirchengesanng teutsch und lateinisch* of 1557, also in manuscripts at *D-Ju* Cod.34, *E-Bc* 682 and *GB-Lbl* Add.4911). These show direct expression of the compositional principle that determines every polyphonic *Magnificat* – 'variatio'. This is the task of arranging the constant plainchant in a different polyphonic way from verse to verse. The constraint of presenting the unalterable given plainchant in several different forms in a comparatively small space and with limited stylistic resources meant that many *Magnificat* settings (especially those of the minor masters) have a cramped, unnatural style showing an unbalanced relationship between 'elaboratio' and 'inventio'.

In the 15th and 16th centuries the melodic and harmonic relationship of *Magnificat* settings to the plainchant model could be highly varied. Simple adaptations of the canticle tone, usually in the top part, with chordal accompaniment were the rule during most of the 15th century (see the settings of Du Fay and Binchois); at the turn of the 16th century the tone often appeared as a cantus firmus in long notes and varying degrees of melodic ornamentation could be added by way of paraphrasing the tone in the 'free' parts (techniques combined in Josquin's *Magnificat tertii toni*); after 1520 it became the rule for the *initio* and *terminatio* of the canticle tone to be included in the polyphonic texture, often as points of imitation (see the settings of Gombert and Palestrina), while the repeated notes wholly disappeared. The presence of at least the outlines of the tone formed the stereotype element of all *Magnificat* settings, the style of which often hovered

between melody and psalmodic recitation, depending on the model used.

Above all, in the course of the 16th century the polyphonic *Magnificat* became an increasingly hybrid genre, standing between strict liturgical music and extended motet form, and contributing equally to the development of both. This character is visible in works that contributed to the development of polychoral writing, particularly in northern Italy in the first half of the 16th century (such as the polychoral *Magnificat* by Gasparo Alberti, antiphonally set from verse to verse, in choirbooks of about 1545 now at Bergamo, *I-BGc* 1207–9). It is also evident in a small group of 16th-century *Magnificat* settings that have Latin and German Christmas carols interpolated between the verses, rather like textual and musical tropes; these are a special instance of folk tradition, clearly confined to Reformation Germany. Nevertheless, traces of it are still apparent in Bach's first (E♭) setting of the *Magnificat*.

The *Magnificat* settings by Palestrina and Lassus represent a consolidation of all the 16th-century currents in the genre, serving as a guide for the *stile antico* settings of the 17th century. Those of Lassus, numbering over 100, must be given pride of place. About 40 of them are not based on the normal plainchant, but on other cantus firmi, on unrelated motets or on secular pieces. Indeed, it seems that Lassus devised this special class of parody *Magnificat* (the first edition of them appeared in 1573). Examples by other composers are all somewhat later, including those by Balduin Hoyoul (1577), Christoph Demantius (1602), Michael Praetorius (1611) and Johann Stadlmayr (1614).

The English tradition of the Latin *Magnificat* has always been somewhat distinct from that on the Continent, providing, for example, the earliest examples of the parody *Magnificat*, by Fayrfax and Ludford, in the early 16th century (see above). Settings by English composers of this time are unusual in other respects, too: in contrast to continental compositions, they are mostly five-part; in addition, the number of voices is changed frequently within a work, there are many fluent changes of register, and they are founded on small-scale structures, often with a caesura at the half-verse; but the most significant departure from the continental *Magnificat* lies in the fact that English composers did not usually adopt one of the eight canticle tones, but used instead in the tenor an improvised faburden, that is, the lowest voice (tenor) of a three-part movement, with the plainchant cantus firmus in the middle voice. The earliest surviving *Magnificat* (already noted) is this type of three-part faburden movement. Later examples are provided in the treatise of an anonymous Scottish theorist (*Gb-Lbl* Add.4911, *c*1560). However, the treatment of an independently devised faburden in the tenor voice is seen in most English 15th- and 16th-century composers. A most important source for English *Magnificat* style is an incomplete choirbook at Eton College (*GB-WRec* 178), which dates from the period 1490 to 1504, and once contained 24 *Magnificat* settings, of which ten survive. It contains further examples by English writers such as Nesbet, Kellyk, Walter Lambe, Stratford, Richard Davy, Robert Wilkinson and Sygar.

3. After 1600. After 1600 settings of the *Magnificat* began to show the new Baroque style with its enormously increased resources of colour and potentialities of word-painting. The *Magnificat* text provides ample opportunity for the depiction of words, both emotional ('exultavit', 'humilitatem', 'timentibus', 'dispersit', 'deposuit' etc.) and purely illustrative (as when the full ensemble enters after a solo passage at 'omnes generationes' or a phrase is left incomplete at 'dimisit inanes'). *Stile antico* settings are found from the early Baroque period, such as the three by Stefano Bernardi (DTÖ, lxix, Jg.xxxvi/1, 1929, pp.53–60) which start with an intonation of the plainchant and continue chorally, retaining the sectional construction and prevailing homophony of 16th-century settings and adding the occasional instance of word-painting (e.g. 'dispersit' in the third setting).

Unquestionably the greatest early Baroque *Magnificat* settings are the two with which Monteverdi concluded the Vespers of 1610. The first is a massive piece requiring considerable instrumental resources, the second an alternative, simpler version for smaller forces. As in the Vespers as a whole, Monteverdi achieved a remarkable coordination of styles, combining plainchant and vocal polyphony on the one hand with instrumental ritornellos, echo effects and other modern devices on the other. The concertato sectional construction of the early Baroque is evident, as is seen from the opening of the larger setting:

Magnificat	full, plainchant in upper voices
anima mea Dominum	soprano solo and continuo (plainchant)
et exultavit … salutari meo	florid parts in tenor and quintus, plainchant in altus, continuo
quia respexit … omnes generationes	instrumental ritornello, then plainchant in quintus against various instrumental duets: return of ritornello (? word painting) against 'omnes generationes'

The return of the opening material of the work at 'Sicut erat in principio' in the 'Gloria' occurs in both settings, and is an obvious illustrative device found in later *Magnificat* settings (although it can apply, of course, to any psalm setting and in fact appears in some of the other psalms of the Vespers). As with many devices of this kind, it performs a useful musical function in providing an element of recapitulation.

The great *Magnificat* by Schütz (SWV468) is another notable monument of early Baroque sectional style, and shows the influence of the polychoral style of Giovanni Gabrieli. It is for two choirs, one *coro favorito* (select choir), trombones, strings and continuo, and is a fine example of Schütz's use of concertato effects. At the outset the single *favorito* tenor alternates with the full ensemble: a substantial instrumental passage for the trombones with continuo then introduces 'Et exultavit' as a *favorito* soprano and tenor duet; 'Quia respexit' is for *favorito* bass with two violins and continuo. The 'Sicut erat in principio' recapitulatory device just mentioned is exemplified here also.

As the Baroque period progressed, such sectional construction gradually evolved into a sequence of more self-contained 'numbers' (arias, choruses etc.) as is the practice in the works of Bach and Handel. The *Magnificat* in D attributed to Buxtehude, for five-part chorus, five soloists, two violin parts and continuo, shows only minimal signs of this development, although the bass solo 'Esurientes' and the soprano duet 'Suscepit Israel' do point the way. A feature typical of Buxtehude is the instrumental ritornello heard at the opening, after 'timentibus eum', and again before the final 'Gloria', though in other respects the work seems to lack the hallmarks of his

style. In the *Magnificat* of 1657 by J.R. Ahle (DDT, v, 1901/*R*) 'Magnificat anima mea Dominum' takes 20 bars and 'Exultavit ... salutari meo' a further 26, and subsequent sections follow this pattern, each ending with a definite cadence usually in the tonic, A. Although there are still changes of time, speed and so on within each section (e.g. 'Magnificat', full, triple time; 'anima mea Dominum', tenor and continuo only, quadruple time), there is clearly a tendency here towards the use of separate numbers. The setting is for four-part choir and four-part instrumental ensemble (cornett and three trombones or violin, two violas and violone). No solo voices are indicated, but their use might be implied in suitable contexts. 'Omnes generationes' receives the illustrative treatment mentioned above and 'dispersit', 'esurientes' and 'inanes' are also suitably depicted.

The *Magnificat* by Dionigi Erba for double choir and strings is chiefly known for Handel's use of much of its material in *Israel in Egypt*. Its date is not known, but the late Baroque style is clearly evident in the use of separate numbers and in a stylized use of chromaticism, often used to prepare a cadence or other important event: thus 'humilitatem' produces digressions to B♭ minor, A♭ major and F minor from a local tonic of F major (main tonic A minor). The solo pieces now have ritornellos. The duet for two basses at 'Quia fecit ... timentibus eum' became 'The Lord is a man of war' in *Israel in Egypt*, and the dissonance expressing 'misericordia' was used by Handel for '[His chosen captains] also are drowned'.

In Vivaldi's *Magnificat* for four-part choir, soloists and strings the familiar late Baroque design is fully established. There are nine numbers, six choral and three solo (assuming the three voice-parts of 'Sicut locutus' to be solo). 'Et exultavit', for soprano, contralto and tenor soloists in turn, contains two choral interjections for the inevitable 'omnes generationes'. 'Et misericordia' is typically mournful and makes much of 'timentibus', the strongest chromaticism being significantly left for the end, where it also functions as preparation for the final cadence. 'Deposuit' is notable as being a chorus entirely in octaves, including the instruments. In an alternative version the solo pieces are replaced by more brilliant arias intended for pupils at the Ospedale della Pietà, three separate numbers now replacing the above-mentioned 'Et exultavit' (thus making 11 numbers in all), exemplifying even more strongly the late Baroque tendency towards the maximum number of separate pieces.

J.S. Bach wrote his *Magnificat* for his first Christmas at Leipzig, 1723. It is a festive setting in E♭, including trumpets and drums. Effectively there are now 12 numbers, 'omnes generationes' being virtually a chorus in its own right, though still inextricably connected to the preceding 'Quia respexit' soprano aria. The solo numbers are, however, remarkable for their brevity as compared to the average length of Bach's normal cantata arias. They show considerable variety of instrumental colour. 'Timentibus' produces striking chromaticism at its final appearance (preparatory to the final ritornello) and 'inanes' is depicted not only by a preparatory chromatic chord but also by the cutting off of the two obbligato recorders just before they reach the final chord. In the 'Suscepit' the German *Magnificat* plainchant is played by the trumpet against the counterpoint of the three upper voices, the lower parts being silent, an ethereal effect. There is the conventional recapitulation at 'Sicut erat'. The autograph score also includes four Christmas pieces, interpolations into the *Magnificat* text proper: *Vom Himmel hoch* (a short working of the chorale), *Freut euch und jubiliert*, *Gloria in excelsis Deo* and *Virga Jesse*. They would have been inserted into the work at appropriate points in conformity with Lutheran practice. Bach later rearranged the work in D (more normal for trumpets and drums), making a number of changes in detail and removing the special Christmas interpolations. It is in this form that it was performed in Leipzig in 1728–31 and is generally known today.

Bach probably represents the extreme of the extended treatment of the text in separate numbers. As the Classical period approached the tendency (as in the mass) was towards a more concise setting, but with a vital difference of approach. In Baroque settings each set of words was allocated its own music, often with definite word-painting; Classical composers, however, tended rather to design a complete movement in a definite form – often a rather free sonata form – and then to fit the words to this as best they could (such methods of construction are sometimes called 'symphonic'). Thus in Classical settings the music originally designed for one phrase of the words may be repeated to a quite different one (and even repeated again, thus bearing three sets of words in all).

These developments are already evident in the *Magnificat* for four-part choir, four soloists (presumably) and strings attributed to Pergolesi. The number of separate movements is now reduced to six. The first chorus takes the words as far as 'sanctum nomen ejus' (no.5 in Bach's setting). It is a ternary movement in B♭ using the same plainchant as Monteverdi did (as it happens with the same notes, although Monteverdi's settings are really in G minor). 'Magnificat ... salutari meo' forms the *A* section, ending in the dominant, and 'Quia respexit ... omnes generationes' (no depiction of these words) the *B* section, mainly in the mediant minor and ending with a firm cadence in that key. For the first time there is an artificial repeat of the initial words 'Magnificat anima mea' to the original opening plainchant: it appears in D minor in the *B* section and is used, at its original pitch, to mark the return of the *A*, before the text proper is resumed from 'quia fecit' onwards. It continues to appear against 'sanctum nomen ejus'. The cadence theme originally set to 'in Deo salutari' appears at the end to 'sanctum nomen ejus', now diverted to end in the tonic. All this shows the new subservience of the words to purely musical considerations: form has begun to have priority over word-setting. 'Et misericordia' starts as a soprano and contralto duet, but leads directly to a chorus for 'Fecit potentiam'. 'Deposuit' is a fugue, but the fugue subject later takes the words 'et divites dimisit' – a change that would have been quite unthinkable in the Baroque period. The latter part of the work is less far removed from the older methods, and the time-honoured 'Sicut erat' recapitulation is used, the return being made to the opening B♭ plainchant with these new words. It leads to a fugal conclusion and a further triumphant statement of the plainchant to 'et in saecula saeculorum, Amen'. The plainchant is thus used more sparingly but structurally more significantly than in Monteverdi.

C.P.E. Bach's *Magnificat* (1749), which has become popular in recent years, harks back to Baroque methods in the number of separate movements employed, though not in the musical style generally. The key is the same (D)

as the well-known setting of J.S. Bach and by coincidence the opening bar sounds as if it might be the beginning of the older composer's work. The listener soon realizes that the busy semiquavers, which in the father's work were an essential part of the contrapuntal web, are in the son's simply decorative material over a harmonic background. Many of the movements now have substantial ritornellos, and the solo pieces especially tend towards a sonata-form structure, thus showing much in common with the contemporary concerto. The soprano aria no.2 'Quia respexit' is notable for its patch of harmonic colour at bars 5 and 7 of the ritornello, later used to depict 'humilitatem': the use of a concord of a remote key (A♯ minor), although explicable as a double sharpened appoggiatura decorating an ordinary chord, nevertheless looks forward to Romantic harmonic technique. The 'solo exposition' (to use concerto terms) makes a very firm path from B minor to the relative major, the modulation being prolonged by an interrupted cadence in G minor (preparatory chromaticism in a typical Classical usage). 'Ecce enim' is used as a kind of second subject (bar 23, recapitulated 65). Choral depiction of 'omnes generationes' is now a thing of the past: it would disrupt the clear sonata-form structure. Similar second subjects, but to the same words as the opening, can be found in the tenor aria no.3 'Quia fecit' (bar 50, recapitulated, oddly at the same position initially, at 104) and in the chorus no.4 'Et misericordia' (bar 14, recapitulated 57). The latter piece makes much of 'timentibus', the composer perhaps remembering his father's memorable final setting of the word. The bass aria no.5 'Fecit potentiam' has a second subject brilliantly depicting 'dispersit superbos' (bars 48, 122). No.6 consists of two alto and tenor duets, the first, 'Deposuit', in A minor and the second, 'Esurientes', in F (the linking of what are really separate numbers by a modulatory passage is found also in the composer's piano sonatas). The final aria, no.7 'Suscepit', in D minor, makes an effective preparation for the D major recapitulation of the opening of the work, not at 'Sicut erat' but more logically at 'Gloria Patri', 'Sicut erat' being set to a long fugue which, typically of a period in which fugue was ceasing to be a natural mode of expression, makes great play with academic devices. In all, C.P.E. Bach's *Magnificat* is a kind of equivalent to the 'cantata mass' (as exemplified by Mozart's Mass in C minor K437): it employs the old separate numbers technique, but within each number the methods are strictly those of the Classical period, the words being subordinated to the musical design, their expression being general rather than specific.

The *Magnificat* of G.A. Fioroni (*GB-Lbl* Add.31310), for two choirs and double orchestra, is interesting as an example of an early Classical setting in that although there are separate numbers they are not entirely self-contained. The main tonic is F major, and the opening F–G–A–G–F motif is probably a reference to the above-mentioned plainchant. The first solo 'Et misericordia' for tenor begins in B♭ but ends in F, to be followed by a 'Fecit potentiam' chorus in F. 'Deposuit', a bass solo, begins in A minor but ends in C, leading to 'Esurientes'. Unity of key begins to be established towards the end: 'Suscepit', opening in D minor, works its way round to the dominant of F with F minor preparatory harmonies and a long melisma on 'saecula' over a dominant pedal. By a clever stroke the 'Gloria' opens not in the expected tonic but in A minor (soprano solo), thus keeping the listener waiting for an important event. The return to the opening key and material is reserved until 'Sicut erat', the composer thus happily combining a modern device with an old tradition. As in C.P.E. Bach's setting, an *alla breve* fugue to 'et in saecula saeculorum' completes the work.

The symphonic style of *Magnificat* setting is carried to its logical conclusion in the final movement of Mozart's *Vesperae solennes de Confessore* K339 (1780). Here the words have become almost completely subservient to the form. The *Magnificat* (one of six pieces forming the complete Vespers) is set as a single sonata-form allegro with an adagio introduction. The key is the main tonic, C major, and trumpets and drums are used, as in the first number of the work. The allocation of words is as follows:

Magnificat anima mea Dominum	*Introduction* (5 bars ending on the dominant)
	Allegro
et exultavit ... salutari meo	first subject (soprano solo)
quia respexit ... sanctum nomen ejus	transition (chorus)
et misericordia ... timentibus eum	second subject (strings, followed by solo quartet)
fecit potentiam ... inanes from	development (chorus, apart two bars soprano solo)
suscepit ... misericordiae suae	recapitulation, first subject (soprano solo)
sicut locutus ... in saecula	transition (chorus)
Gloria ... spiritui sancto	recapitualation, second subject (strings, then solo quartet)
sicut erat ... Amen	coda

The only possible concessions to the words are the use of a solo quartet after the full chorus at 'et misericordia', a sudden *piano* at 'humiles', the use of soprano solo, with a diminished 7th drop, at 'esurientes' and another *piano* at 'dimisit inanes'. Any of these devices could have occurred anyway (there is, for instance, another sudden *piano* at 'saeculorum' in the 'Gloria'): their use is incidental rather than integral, and Mozart's setting thus stands at the opposite pole from those of the Baroque period.

After a dearth of *Magnificat* settings in the Romantic period, modern composers have returned to the text with new inspiration. In 1958 the American composer Alan Hovhaness produced an essentially popular *Magnificat* employing modern orchestral effects such as low string tremolos, *senza misura*, and neo-organum and modal harmonic techniques. Despite this, the words are still set in separate choral and solo numbers, the first being an orchestral introduction entitled 'celestial fanfare', and there is even a separate chorus (sopranos and altos) for 'omnes generationes'. A notable 'traditional modern' setting is that of Lennox Berkeley (1968) for chorus and orchestra without soloists. With obvious profound differences this nevertheless looks back in some ways to the early Baroque sectional construction with its due regard for the words. Near the opening a triadic motif in the orchestra is taken up by unaccompanied sopranos entering with the single word 'Magnificat', using a diminished triad – almost a kind of B-mode plainchant. The end of a first main section is marked by the unaccompanied chorus singing 'sanctum nomen ejus', followed by an orchestral postlude. The idea of 'sanctum' – not a word usually chosen for depiction at this point – inspires solemn, largely diatonic progressions. 'Et misericordia' is in eight parts, entirely unaccompanied in a free use of the E-mode. A turbulent orchestral prelude, possibly inspired by

similar events in Janáček's *Glagolitic Mass*, ushers in 'Fecit potentiam', and 'dispersit' is traditionally set. Quite original, however, is the little ternary section at 'Esurientes'; filling the hungry with good things is depicted in an almost diatonic G major (Lento, 3/4), while 'et divites' is gigue-like and more chromatic, dying away to an almost longing repeat of 'inanes' that seems to suggest some sympathy with the rich, before the G major section returns with its own words. Another sectional break occurs at 'misericordiae suae', again an E-mode ending; the orchestra introduces an unaccompanied 'Sicut locutus'. The 'Gloria' links the old and the new, the rhapsodic melismas, possibly suggested by Stravinsky's mass with wind instruments, giving place to the traditional return to the opening triadic motif in the orchestra, introducing 'sicut erat'.

Penderecki's *Magnificat* (1974) is a setting for soloists, chorus and orchestra in the composer's typical manner of bizarre solo writing, massed choral effects and strange orchestral sonorities. It is in several sections, but the tone is almost constantly dark and heavy, bringing the piece closer to Penderecki's earlier works on Passion and Requiem texts than to any other setting of this young girl's song of praise. Arvo Pärt's *Magnificat* (1989), on the other hand, is a setting of great delicacy and intimacy. Scored for unaccompanied mixed choir, and written in Pärt's characteristic tintinnabuli style, it alternates between a two-part 'verse' texture (solo soprano coupled with other single vocal lines) and a three-part 'choral' texture (with occasional doubling at the octave to create six parts).

Magnus liber (Lat.: 'great book'). The name given to the repertory of liturgical polyphony (and some monophony) created at the Cathedral of Notre Dame in Paris during the second half of the 12th century and the first few decades of the 13th. The collection is mentioned by two music theorists: Johannes de Garlandia, who, in the version of his treatise included in the compilation of Hieronymus de Moravia (ed. S. Cserba, 1935, p.229), used the term 'magnum volumen'; and Anonymous IV (ed. Reckow, 1967, i, 46), who referred to it as the 'magnus liber organi de gradali et antifonario' ('the great collection of organum on the graduale and antiphonale') and wrote that it was 'made' ('fecit') by Leoninus 'to enhance the divine service' ('pro servitio divino multiplicando'). It was subsequently revised or 'edited' by Perotinus ('qui abbreviavit eundem'), whose work included the creation of 'many better clausulas', or sections of larger organa. In this revised form it remained in use at Notre Dame up to Anonymous IV's own time, the end of the 13th century. This Parisian *liber organi* is thus less a book containing a specific collection of works than an evolving repertory with somewhat different material in each surviving manuscript.

The *Magnus liber* is perhaps the greatest single achievement in medieval music, whose historical significance resides above all in its being a written collection. Appearing at a time when most polyphony was improvised, or at least orally created and transmitted, it represents the beginnings of polyphonic 'composition' in the modern sense, and was the matrix in which the

harmonic, contrapuntal and rhythmic aspects of European musical language were developed and normalized. The *Magnus liber* survives in several 13th-century manuscripts; numerous additional sources, now lost, are mentioned in medieval catalogues.

1. Repertory. 2. Chronology.

1. Repertory. Most scholars regard the *Magnus liber organi* as containing only two-voice organa. However, Anonymous IV made it clear that it was more comprehensive, and that 'organum' refers not to the genre of organum specifically, but rather to *musica mensurabilis*, polyphony in general, regardless of genre or the number of voices used. The *Magnus liber* described by Anonymous IV contained organum (settings of responsorial chant and a few other plainchant items) for two to four voices and conductus for one to four voices (Reckow, 1967, i, 46, 82); it is possible that Anonymous IV also understood the early motet to be represented, included among the new clausulas that formed part of Perotinus's revision of Leoninus's collection. It is likely that Leoninus and Perotinus both worked in a variety of genres and idioms, and composed for differing numbers of voices. It is unlikely that they were the only musicians involved in the creation of the *Magnus liber*, however: Anonymous IV mentioned the involvement of another figure, Robertus de Sabilone, and still others doubtless also contributed repertory or recast already existing works.

The surviving manuscript copies of the *Magnus liber* vary in the repertory and even the genres that they include, reflecting the changing character of the collection. Most sources do concur in the arrangement of the repertory, however. Thus the largest source, and the one with the closest ties to Notre Dame itself, *I-Fl* Plut.29.1 (hereafter F), begins with plainchant settings (organa and clausulas), continues with works with newly created texts, many of which have a less clearly defined place in the liturgy (conductus and motets), and concludes with a collection of refrain songs that are the most closely related of any of this music to the secular repertory. Within each group, the collection moves from pieces with more voices to those with fewer (*organa quadrupla*, *tripla* then *dupla*; conductus for three voices, then for two voices; then 'conductus motets' for three voices copied as though they were two-voice conductus, followed by motets for two voices copied as single lines; and finally monophonic conductus and solo refrain songs). Within the organum collections complete pieces precede separate clausulas (*quadrupla*, one four-voice clausula; *tripla*, three-voice clausulas; *dupla*, four cycles of two-voice clausulas), and within each of these collections the order follows the liturgical calendar (works for *temporale* and *sanctorale* feasts are fused into a single cycle; in the *dupla* and two-voice clausulas, Office and Mass organa appear in separate cycles, but in the relatively small collection of *tripla*, Office and Mass organa for the same feast appear together). The three-voice motets, all based on clausulas, are also arranged in liturgical sequence, suggesting that they constitute a clausula cycle of sorts in their own right; what determines their location in F (and hence the placement of the two-voice motets that follow them in the manuscript) is their layout on the page, which resembles that of the conductus that precede them. In the *Magnus liber* fragment *DK-Kk* 1810 4°, the motet *Gaudeat devotio/Nostrum*, included in F, appears in two-voice form as a clausula in the organum *Alleluia, Pascha nostrum*. The other large *Magnus liber* sources have somewhat different repertorial emphases but reveal the same overall principles of organization: *D-W* 628 (hereafter W_1) includes only a handful of motets and transmits them as conductus; *D-W* 1099 (hereafter W_2) concludes with four fascicles of motets, each divided into a series of alphabetically arranged collections, including two fascicles devoted to motets with French texts; and *E-Mn* 20486, after beginning with *organa quadrupla*, is dominated by conductus and Latin motets, most of them grouped together as though they belonged to the same genre.

The organa include settings of the solo portions of the gradual and alleluia of the Mass, the great responsories of the Office (the responsory sung at first Vespers and, on rare occasions, second Vespers, the third and sixth matins responsories and, often, the ninth, which frequently repeated the vespers responsory), responsories and antiphons sung during processions, and the *Benedicamus domino* at the close of Vespers and possibly other Offices as well. Organum was composed for the major feasts of the Parisian ecclesiastical calendar, the four *annuale* festivals of Christmas, Easter, Pentecost and the Assumption of the Blessed Virgin Mary, feasts of duplex rank, and feasts ranked as semiduplex and nine lessons. For the *annuale* feasts, polyphony was provided not only for the main festival but also for some of the days within the octave and for the octave itself. In their choice of chants and even in the details of the plainchant melodies themselves, the organa correspond to the liturgical practice of Notre Dame to a remarkable degree.

In a number of instances there is more than one setting of the same plainchant, even within the same copy of the *Magnus liber*. There are in F two organa for two voices and one for four of the gradual *Viderunt omnes*, for example. Some organa are contrafacta of other works: Perotinus's three-voice setting of *Alleluia, Nativitas*, for example, is also used for *Alleluia, Diffusa est gratia*, *Alleluia, Iudicabunt sanctis* and *Alleluia, Sanctissime Iacobe*, the first in F, the last two in W_2. *Alleluia, Post partum virgo*, found only in F, is for the most part cobbled together from material taken from *Alleluia, Assumpta est Maria* and *Alleluia, Per manus*, preserved in one or another form in W_1, F and W_2. In many organa, shared material is less the result of deliberate borrowing than a consequence of the use of common property, of stock figures that recur from work to work. Thus the openings of the responsory *Descendit de celis* and the gradual *Viderunt omnes* are each found in numerous other compositions (ex.1), and stereotypical cadence gestures appear, disappear and replace each other, seemingly at the discretion of the scribes who compiled the manuscripts. Ex.2 gives three different endings for the same clausula on 'Et Iherusalem' from the responsory *Iudea et Iherusalem*. A large number of these formulae are collected in the 'Vatican organum treatise' (*I-Rvat* Ottob. lat.3025), in which the melodic and contrapuntal language of the *Magnus liber* is presented in synthesis, probably to facilitate the creation of new organa.

Within the 'same' organum, there are likely to be striking differences from copy to copy. In *Alleluia, Assumpta est Maria*, for example, F differs from W_1 and the related setting in W_2 on 'Alleluia' and the beginning of 'Assumpta est', for the rest of which the three move into and out of agreement; F and W_2 share the same

discant clausula on 'Maria', while W_1 has *organum purum*, and so on; throughout this organum, W_1 is largely in *organum purum* while F and W_2 include significantly more (if not always the same) discant clausulas. In many instances, seemingly unrelated settings are actually different elaborations of the same underlying polyphonic structure, as in ex.3, from *Alleluia, Posui adiutorium.* Looking at the organum collection as a whole, each manuscript can be shown to have its own distinctive musical character, reflecting the aesthetic sensibilities and preferences of the particular composers, singers and scribes who were instrumental in shaping and transmitting it.

All of this underscores the constant revision sustained by the *Magnus liber* throughout its history, described by Anonymous IV as a 'revision' (*abbreviatio*) by Perotinus. One aspect of this entailed making *organum purum* more like discant. The organa were conceived in modal notation, which permits *organum purum* melismas in particular to flow in an unconstrained, rhythmically free, less than precisely measured fashion. The scribes of W_2, *D-Bs* lat. 4° 523 and *DK-Kk* 1810 4° copied the organa in mensural notation of one kind or another, thereby imposing precise measure (and in some cases rhythmic designs that were foreign to the original style) on the *organum purum* melismas and, in effect, yoking them into a consistent metrical structure. Another aspect of the

recasting involved actual abbreviation: in some manuscripts, the *organum purum* melismas are shortened or eliminated, as in the *organa tripla* in *F-MOf* H196 and the *organa dupla* in *D-Bs* 4° 523. Moreover, the clausula collections in F include two cycles of tiny snippets of rather simple polyphony, one for Office organa, the other for Mass settings (154 pieces in all), that can be used to replace much longer sections of *organum purum* and thereby effect a similar reduction in the overall scale of an organum (ex.4). The majority of the 462 independent two-voice clausulas in F and the 102 similar works in W_1 are, however, like the clausulas for three and four voices, substantial, sophisticated discant compositions, many of which explore and extend the possibilities inherent in modal rhythm. These are polyphonic treatments of plainchant segments that are also set as discant in the larger organa; without question, their primary function was as replacements for pre-existing discant, in many cases extending rather than shortening the work, and thus they probably bear witness to the 'many better clausulas' cited by Anonymous IV in connection with Perotinus's recasting activity. For example, the first three clausulas in F are all discant settings of the chant segment 'et Iherusalem' from *Iudea et Iherusalem*; the first is also found in the F and W_2 copies of the *Iudea et Iherusalem* organum (but with different cadence formulae; see ex.2), the second is found in the W_1 copy of the organum, and the third is unique to the F clausula cycle.

2. Chronology. Analysing the different stages of work in the *Magnus liber* has proved a difficult task. Even the pieces in the F clausula cycles are not necessarily all 'revisions' of earlier settings; many were probably salvaged from organa that were being reworked, and some doubtless came from alternative organum compositions on the same plainchant. Ludwig (1909, 1910) believed that each different copy of the *Magnus liber* preserves a distinct stage in the history of the collection, W_1 transmitting the organa of Leoninus and Perotinus's clausulas, F containing the music of Perotinus in its most comprehensive state and W_2 representing a subsequent stage in the evolution of the collection. However, this is too simplistic, since all the sources are significantly later than the repertory they transmit and each is the product of compilation from a number of exemplars (Roesner, 1981). Husmann (1962, 1963) suggested that the organa in the three major sources reflect various stages in the development of the *Magnus liber* in a somewhat different way, arguing that the pieces common to W_1, W_2 and F represent an original layer that began to appear at the time of the inception of work on Notre Dame in 1163, and that the organa found only in F and W_2 were created after the consecration of the new cathedral's high altar in 1182, while works common to F and W_1 and those unique to F constitute still later layers of creative activity, much of it at Paris churches other than Notre Dame. This view is no longer accepted, however (Wright, 1989, chap.7). It has always been assumed that the *Magnus liber* was created for the new cathedral, yet while this seems a reasonable hypothesis, especially in view of the appropriateness of the organum style to the spatial and acoustical environment of Notre Dame, it is not impossible that the origins of this idiom extend back to a period before the construction of this Gothic edifice began. Moreover, each of the three major organum sources has its own liturgical character, reflecting more the intent of its compiler than its place in the chronology of the *Magnus liber*: the large collection in F includes polyphony for both Matins and Vespers, as well as for processions and the ferial days within the octaves of the *annuale* feasts; W_2 includes no polyphony for Matins specifically, for days within the octave or for processions, and it subsumes within a *commune sanctorum* section numerous organa that are assigned in F to specific saints; W_1 also omits most organa specifically for Matins, most processions and the days within the octave, except for the second day within the octave of *annuale* feasts. F and W_2 provide polyphony for the 'Gloria Patri' section of responsory organa and, often, for the repeat of the respond in both Office and Mass organa; these sections are not included in the W_1 copies of the corresponding organa, undoubtedly reflecting a difference in local performing practice.

Several manuscripts contain what appear to be supplements to the *Magnus liber*, collections that bring the established Parisian repertory into line with local practices. These include the *organa tripla* transmitted in the fragment *CH-Bu* FX37 and the conductus, organa and clausulas in the 'St Victor' manuscript *F-Pn* lat.15139, both sources evidently reflecting Parisian liturgical traditions in the decades after the principal repertory had ceased to grow, and the cycle of organa for Marian masses in the last fascicle of W_1, which clearly reflects insular liturgical customs. Although the *Magnus liber* orginated at the secular cathedral of Paris, it achieved a wide dissemination and was used in a variety of institutions. W_1 was copied for the Augustinian cathedral priory of St Andrews in Scotland, and *E-Mn* 20486 was written in Spain, possibly for Toledo Cathedral. Other manuscripts confirm the presence of the *Magnus liber* in the English Benedictine cathedral of Worcester, the Spanish Benedictine monastery of S Domingo de Silos, the royal Cistercian nunnery of Las Huelgas, Burgos, and the French cathedral

of Beauvais, as well as at Dominican houses in present-day Germany and Poland. From library catalogues and archives we know that the Parisian *liber organi* was used at St Paul's Cathedral, London, and in the royal chapels of Henry III and Edward I of England, and probably in the chapel of Charles V of France in the later 14th century; one copy, which bore some resemblance to F, was in the treasury of Pope Boniface VIII in the early 14th century, and there is also evidence of the presence of the Notre Dame repertory in Italian Franciscan convents at the time. The music of the *Magnus liber* circulated throughout Europe, the first music to do so since the dissemination of Gregorian chant in the Carolingian domains four centuries earlier. As a 'classic' repertory, an *ars antiqua*, it was the point of departure for numerous local repertories and emerging styles, not only in France, but also in England and Italy.

EDWARD ROESNER

Magrepha (from Heb. *garaph*: 'to scoop' or 'shovel'). A shovel employed in the Temple of Jerusalem and possibly a kind of ritual pipe organ. The *magrepha* is first mentioned in the Mishnaic tractate *Tamid*, a work written soon after the destruction of the Herodian Temple by the Romans in 70 CE that describes the Temple and its daily sacrifice. It is depicted as a bronze shovel used by a priest to clear away the accumulation of ashes from the continually burning sacrificial fire. At one point in the service it is cast down upon the pavement near the altar with a great clatter (presumably as a threatening cultic symbol): 'No one in Jerusalem', the *Tamid* reports, 'could hear his neighbour's voice because of the sound of the shovel'.

A number of somewhat later rabbinic sources speak of the Temple's *magrepha* as a kind of pipe organ. Yasser has reconstructed the instrument on the basis of these sources, concluding that it consisted of a cube-shaped

chamber housing the bellows from which projected a long shovel-like handle. The handle serves a number of purposes: its stem is hollow and contains a wind-pipe leading from the bellows; its spade-like ending functions as a wind-chest, from each side of which protrude five clusters of ten small pipes; and the entire handle is worked back and forth to inflate the bellows. Such an organ would have all 100 pipes playing simultaneously to produce a shrill and menacing sound, one fulfilling with greater efficiency the purpose of casting down the original shovel.

If Yasser's reconstruction seems strange, it corresponds nonetheless with the later sources and has a certain historical plausibility in view of the fact that instrument repair experts from Alexandria (the home of mechanical signalling devices) are known to have visited the late Temple. The possibility cannot be ruled out, however, that the *magrepha* as wind instrument might be a literary creation rather than an actually observed artefact.

JAMES W. McKINNON

Magri, Gennaro (*b* Naples, *fl* 1755–79). Italian dancer in the grotesque style, choreographer and teacher. He is important mainly for his *Trattato teorico-prattico di ballo* (Naples, 1779; Eng. trans., 1988). This rare work is the only one so far discovered that connects the development of the formalized theatrical dance techniques of the late 18th century with the pre-Romantic movement of the early 19th. Considerable space is given to the use of music for dancing, attention being drawn to the rules that govern both arts and to the essential concordance of dance with its music. There is emphasis on the necessity of the dancer's knowing music and on the ill consequences of ignorance of this subject. Importance is given to the choice of dance music suitable to the type of theatre, and to the plight of the musician who does not give due thought to this problem. Technical steps, the minuet and 39 contredanses, with music and diagrams, are fully described.

MARY SKEAPING

Magri [Macri, Macro], **Paolo** (*b* Bologna; *fl* 1550–84). Italian composer. He was employed at S Petronio, Bologna, from 1550 to 1568, first as *chierico* and, from 1554, as *cantore*. His name disappears from the records from 1558 to 1561 but reappears, again among the cantori, from 1562 to 1568. According to Schmidl, he was nominated *maestro di cappella* at Vercelli Cathedral in 1569. In 1581, the year of his first publication, the *Liber primus ... mottettorum, due tamen addiciuntur dialogi* (Venice, 1581), for five, seven and eight voices, he was back in Bologna, where he was employed by the Accademia degli Argenti as *maestro di cappella*. On 8 September 1582 he was appointed *maestro di cappella* at the Santa Casa, Loreto, where he remained until 31 August 1584. A further publication, the *Lamentationes Jeremiae prophetae duo tamen adijciuntur psalmi, Benedictus, et Miserere, cum hymno ad crucem* (Venice, 1597), for five, seven to ten and 13 voices, is signed 'Venice, 8.5.1597' and is dedicated to Giovanni Morone.

IAIN FENLON

Magrini, Tullia (*b* Imola, 15 April 1950). Italian ethnomusicologist. She studied composition with Aldo Clementi and the piano (diploma 1971) at the Bologna Conservatory. After graduating at Bologna University in 1973, she taught music history at the Bologna Conservatory before becoming associate professor at Catania University (1988–91). In 1991 she was appointed to teach the anthropology of music and musical ethnography at Bologna University. She was general secretary to the Società Italiana di Etnomusicologia (1982–6), and in 1986 became chairman of the Italian committee of the International Council for Traditional Music, founding in 1992 its study group on the Anthropology of Music in Mediterranean Cultures. She has carried out field research in Italy and Crete on the anthropological aspects of orally transmitted music and also its relations with written musical sources.

TERESA M. GIALDRONI

Maguire, Hugh (*b* Dublin, 2 Aug 1927). Irish violinist. He studied at the College of Music in Dublin, and made his first public appearance in Dublin in 1938. His London début, after studies at the RAM, was in 1947 at the Wigmore Hall; in 1949–50 he studied with Enescu in Paris. He had a distinguished career as an orchestral leader and chamber music player, leading the Bournemouth Municipal Orchestra (which became the Bournemouth SO in 1954), 1952–6, the LSO, 1956–62, and the BBC SO, 1962–7. He succeeded Eli Goren as first violinist of the Allegri Quartet in 1968. With this ensemble he devoted much effort to the dissemination of 20th-century British music, recording quartets by Bridge, Britten, Elgar, Forbes, Goehr, Maconchy and Robert Sherlaw Johnson and touring British universities to give concerts and lecture recitals under the auspices of the Radcliffe Trust. In 1976 he left the Allegri Quartet to become first violinist of the Melos Ensemble, with which he worked until 1991; during this period he was also leader of the Royal Opera House orchestra. Maguire has taught at the RAM and the GSM, and is director of the orchestra and of string studies at the Britten-Pears School.

BERNARD JACOBSON

Magyar Kórus. Hungarian firm of publishers. Active in Budapest, its full name was Magyar Kórus Zeneműés Lapkiadó Kft. ('Hungarian Choir Music and Periodicals Publishers Ltd'). It was founded in 1931 by Lajos Bárdos (1896–1986), György Kerényi (1902–86) and Gyula Kertész (1900–67), pupils of Kodály, composers and choirmasters, to supply classical and modern choral music, especially to schools. The firm's publications quickly became popular and played an important role in rejuvenating the country's musical life. All types of choral music were included: Gregorian chant, solfeggio (Bertalotti, Kodály's pedagogical works), sacred and secular works, classics and contemporary Hungarian compositions. Magyar Kórus first published the choral works of Bartók and Kodály. From 1934 the firm organised the 'Singing Youth' concerts. Its series titles included From Advent to Advent (Protestant church song), Bicinia Hungarica (i–iv), From Transylvania to Upper Hungary, Singing Hungary, Western Choirs, Fallalla, Choir Music of a Thousand Years, Folk Songs for Choir, and the Roman Catholic collections Hungarian cantuale, Harmonia sacra and Sacred art Thou Lord. The firm also published the periodicals *Magyar kórus* (ed. Bárdos and Kertész, 1931–50), *Énekszó* ('The sound of song', ed. Kerényi and Kertész, 1933/4–49), *Zenei szemle* ('Music review', ed. D. Bartha and B. Szabolcsi, 1947–9) and *Zenepedagógia* ('Music teaching', ed. E. Czövek, 1947–8). It employed translators to help in the publication of Western and classical choral works and issued instrumental tutors and books. The firm was nationalized in 1950; its legal successor is Editio Musica Budapest.

ILONA MONA

Mahalingam, T(alainayar) R(amaswamy) (Mali) (*b* Talainayar, Tamil Nadu, 6 Nov 1926; *d* Madras, 31 May 1986). South Indian flautist. One of seven children, T.R. Mahalingam was initially taught singing by his father's uncle Gopala Iyer, he then switched to playing the flute and from this point on was largely self-taught, although greatly influenced by the violinist Dwaram Venkataswamy Naidu. He made his concert début at the age of seven, astounding the audience with his sense of rhythm. His father exploited this talent by making him tour and perform, which the young Mali resented, as he did the efforts of many others who tried to exploit him over the years. An erratic professional life, arriving late for engagements, leaving early or simply not turning up at all, was partly due to his heavy drinking. He claimed to suffer from excruciating headaches caused by goblins dancing in his head, and during 1958–9 he withdrew from the concert scene altogether, saying he was undergoing intense mystical experiences. However, audiences seemed willing to put up with this behaviour for his ability to produce great performances.

Although he claimed more than once not to be a serious musician, performing only for the financial reward, he brought about a revolution in Karnatak flute playing. Previously the flute had been an accompanying instrument, closely mirroring the melodic line of a vocalist. Mali reinvented the flute as a solo instrument, developing many of the techniques that enable performers to produce the subtle inflections necessary for the presentation of *rāga*. Furthermore, in performance he was a master at deconstructing, reassembling and transforming elements of a composition. He taught many students including T.S. Sankaran, Prapancham V. Seetharam and N. Ramani. In 1980 he married an American student who he had met in Rome.

N. PATTABHI RAMAN

Mahaut [Mahault, Mahoti, Mahout], **Antoine** [Anton, Antonio] (bap. Namur, 4 May 1719; *d* ?*c*1785). Flemish flautist and composer. Born into a family of musicians, he probably studied with his father (a flautist) before entering the service of the Bishop of Strickland at the age of 15. In 1735, according to Moret, Mahaut travelled with the bishop's entourage to London where he met John Walsh, who subsequently published his *Six Sonatas or Duets*. On his return to Namur in 1737 he served the wife of Walter de Colijaer, then moved to Amsterdam (in 1739, according to Gerber), where he worked as a performer and teacher. On 20 July 1751 Mahaut obtained a privilege permitting him to publish his own works. He visited Dresden, Augsburg and Paris as well as returning regularly to Namur. His acquaintance with the flautist P.-G. Buffardin in Dresden resulted in the dedication of six trio sonatas and possibly two concertos. About 1760 Mahaut settled in Paris. Although Gerber suggests that Mahaut later fled his creditors by retiring to a French monastery, he probably returned to teach in Namur.

Mahaut's compositions were published extensively during his lifetime, and his flute method was published simultaneously in French and Dutch (it was announced in the *Mercure de France* in January 1759) and twice reprinted (1762, 1814). It marked a considerable advance on the methods of Jacques Hotteterre, Michel Corrette and Quantz, particularly with regard to technique; it was the only work of its time to distinguish between the French and Italian ways of executing the trill and appoggiatura. Mahaut's sonatas combine Italian sonata structure and instrumental figuration with French dance rhythms and ornamentation. His flute concertos demand a first-rate technique and show the influence of P.A. Locatelli (who was also living in Amsterdam) in their use

of violinistic phrasing such as slurred staccato; they also display *galant* and early classical traits. According to Moret, Mahaut was the composer of the two 'beautiful instrumental symphonies' which he, his brother and his friend Bailleux performed for the Prince of Gavre in Namur in 1744. Between 1751 and 1752 Mahaut was also the editor of, and principal contributor to, *Maendelyks musikaels tydverdryf*, a series of italianate songs in Dutch.

WORKS

ORCHESTRAL

Fl concs.: 3 (1 inc.), *D-KAu*; 1 other, doubtful (attrib. 'Maho'), *KAu*; 1, *Rtt*; 4, *B-Bc*, 1 also in *S-Skma*; 12 others, *Skma*; 5 lost, 2 listed in Selhof catalogue, 1763, 3 listed in Breitkopf catalogue, 1763

Other orch: 6 sinfonie a piu stromenti (Amsterdam, 1751), as op.2 (Paris, 1754); 6 sinfonie a 4 (Augsburg, *c*1751); Concertino, str, before 1756, *F-Pc*; Symphonie, *D-Ds*; 4 syms., DK-Kk; 3 syms., lost, listed in Lambach catalogue, 1768

CHAMBER

6 sonate, fl, bc, op.1 (Paris, *c*1737/*R*); 6 sonate da camera, 2 fl/vn, 2bks, op.4 (Amsterdam, 1751–2); 6 Sonatas or Duets, 2 fl/vn (London, 1756), 2 ed. H. Ruf (Wilhelmshaven, 1986), 2nd set (London, *c*1758); 6 sonate da camera a tre, 2 fl/vn, vc/bc (Amsterdam, 1751), bk 1 (Paris, 1755); as 6 sonate da camera a tre, 2 fl, bc (Augsburg. n.d/*R*; 1er recueil de pièces françaises et italiennes, 2 fl/vn/ob/tr viol (Paris, 1757), Nouveau recueil (Lyons, 1758); Sonata and Allegretto con variatione, fl, b, *DK-Sa*, *Kk*; Sonata, fl, b, *F-Pn*; 9 sonatas, fl, bc, Sonata, 2 fl, *S-Skma*; 4 sonatas, 2 fl, bc, *D-KAu*, 1 also in *S-Skma*, *GB-Lbl*; 2 Trios, 2 fl, bc, *D-KAu*; Duetto, 2 fl, *SWl*

VOCAL

Maendelyks musikaels tydverdryf; bestaende in nieuwe hollandsche canzonetten of zang-liederen op d'italiaensche trant (K. Elzevier), 1v, bc (Amsterdam, 1751–2); Nieuwe geöpende musicaale tydkorting bestaende in nieuwe hollandsche zangairen, 1–3vv, bc (Amsterdam, n.d.); Amusemens agréables . . . ou Recueil de chansonnettes françoises, sérieuses et badines . . . dans le goût italien, 1v, bc, bk 1 (Amsterdam and Berlin, n.d.); De musikaale lente – en somer-tydverdryf, bestaande in 36 zang- en speel-ariaas (Amsterdam, n.d.); Driestemmige treursang op t'overlyden van Wilhelm IV (Amsterdam, *c*1751)

THEORETICAL WORKS

Nieuwe manier om binnen korten tijd op de dwarsfluit te leeren speelen . . . nieuwe druk (Amsterdam, 1759/*R*); Fr. trans. as Nouvelle méthode pour apprendre en peu de tems à jouer, de la flûte traversiere . . . suivie de petits airs, menuets, brunettes, &c . . . IIe recueil, 2 fl, vn, tr viol (Paris, 1759/*R*); Eng. trans. (Bloomington, IN, 1989)

Mahavishnu Orchestra. Jazz-rock band led by JOHN MCLAUGHLIN.

Mahieu [Mayeux, Mahieux]. French family of musicians and dancers active in the late 17th and early 18th centuries. The family originated in Laon, as did that of Nicolas Lebègue, and subsequently moved to Paris and Versailles. Henri Mahieu (*fl* 1643–67) was a bass viol player and a prime mover in establishing a concert series in conjunction with other instrumentalists in Paris. A handful of branles (*F-Pn* Vm6 5) from 1663 and 1666 are presumably by this Mahieu. Another Henri Mahieu (*fl* 1699–1704), who may have been his son, was organist of St Landry in Paris and a relative of Nicolas Lebègue, who engineered a *survivance* to him for the organist's post at St Merri in 1699. He was already playing there in 1701 when, according to the curate, a great number of organists assembled to hear Louis Marchand and were enthusiastic about Mahieu's abilities when it turned out to be he, and not Marchand, who descended from the loft at the end of Mass. At Lebègue's death in 1702, Mahieu was opposed by the power-hungry Marchand, but the latter's criminal record as a wife-beater rendered Mahieu the victor. His health failed, however, and he was succeeded by J.-F. Dandrieu in 1704.

Two brothers, apparently of the next generation, were dancers. Jacques (*fl* 1677–90) was at the Royal Academy for Dance; Antoine (*fl* 1677–1718) had a prestigious career as dancing-master at the Grande Écurie, Versailles. One of them danced in several operas of Lully at court between 1675 and 1680 and played the guitar on stage.

BRUCE GUSTAFSON

Mahieu de Gant (*fl* mid- to late 13th century). Franco-Flemish trouvère. As his name indicates he was a northern poet associated with the school of Arras. He is sometimes confused with Mahieu le Juif, even though the one source that attributes songs to both clearly distinguishes between them. His partners in the jeux-partis indicate that he was probably active in the mid-13th century. (Robert de la Piere, who appears twice as Mahieu's partner, died in 1258.) His songs, without exception, are written in bar form.

ROBERT FALCK

Mahieu de St Pol. *See* PAULLET.

Mahieu le Juif (*fl* ?13th century). French trouvère. Although only two songs have been ascribed to him, Mahieu

occupies a unique position in the annals of trouvère song. *Par grant franchise* (R.782; ed. in Beck, also ed. in CMM, cvii, 1997, vol. vi, no.457) enjoyed extraordinary popularity, having been preserved in no fewer than 12 sources including one Provençal manuscript. The subject of the song no doubt accounts for its fame: for the sake of his lady, Mahieu had abandoned the faith of his fathers and embraced Christianity, but rather than her favour he received only ridicule. The melody of this chanson, which is subject to a great deal of variation from source to source, is simple, well constructed and effective. *Pour autrui movrai* (R.313; ed. in CMM, cvii, 1997, vol. iii, no.184) was not so widely known, but here too Mahieu referred to his religion.

ROBERT FALCK

Mahillon. Belgian firm of wind instrument makers. The firm was founded by Charles Borromée Mahillon (*b* Brussels, 1813; *d* Brussels, 4 Sept 1887) who after serving apprenticeship in England returned to Brussels to form a partnership with his brother-in-law G.C. Bachmann, a noted clarinettist. He established his own business in 1836 as a maker of both brass- and woodwinds. The firm participated in exhibitions in Brussels (1841, 1847), London (1851, 1862) and Paris (1867, 1878). By 1856 his was the most important wind instrument factory in Belgium, supplying the army and also making percussion instruments. In 1844 he opened a branch in London, which later under the direction of his younger son Fernand (1856–1948) became also a flourishing manufactory, supplying both the orchestral and military market. His elder son VICTOR-CHARLES MAHILLON joined him in 1865, as did later other members of the family. In 1922 the London branch closed, while the firm became less active, ceasing in 1935 to make woodwinds and in 1937 becoming a limited liability company, managed successively by Jean Smits and, from 1970, Roger Steenhuysen. In 1999 the factory closed.

For bibliography *see* MAHILLON, VICTOR-CHARLES.

WILLIAM WATERHOUSE

Mahillon, Victor-Charles (*b* Brussels, 10 March 1841; *d* St Jean-Cap Ferrat, 17 June 1924). Belgian organologist, acoustician and wind instrument maker. He was the son of the maker C.B. MAHILLON, with whom he collaborated from 1865. In 1877 he accepted the curatorship of the newly created Musée Instrumental du Conservatoire Royal de Musique in Brussels. Over the next half-century he systematically built up the collection to become the largest and most important of its kind in the world with over 3300 items. These he proceeded to catalogue meticulously, publishing five volumes that set new standards of scholarship for his time. He prefaced the first volume (1880) with an 'Essai de classification méthodique de tous les instruments anciens et modernes', the first attempt to formulate a systematic classification of musical instruments. Though this scheme has since been slightly revised, notably by Hornbostel and Sachs in 1914, it remains essentially valid today. For these achievements, he has been hailed as 'truly the Father of Organology' (Baines). The author of several authoritative texts on acoustics and practical aspects of wind instruments, his interests also covered many other fields: for the authentic performance of early music he built pioneering prototypes of oboe d'amore, basset-horn and high trumpet. He reproduced rare models of historic woodwind instruments (many obsolete) for his own and for other collections. He took out various patents (some in collaboration with other family members) for improvements to woodwinds and brass and also officiated at a number of international trade exhibitions. In 1889 he was decorated with the Cross of the Legion of Honour.

WILLIAM WATERHOUSE

Mahler(-Werfel) [née Schindler], **Alma Maria** (*b* Vienna, 31 Aug 1879; *d* New York, 11 Dec 1964). Austrian composer. A daughter of the Viennese landscape-painter Emil Schindler, she studied music with Labor and took composition lessons with Zemlinsky. In 1902 she married Gustav Mahler, then director of the Vienna Hofoper, after agreeing to abandon her compositional aspirations. Their complex and often unhappy marriage (Mahler was nearly 20 years her senior) lasted until his death in 1911; of their two daughters only Anna Mahler, the sculptor, survived. Marital crisis in 1910 prompted Mahler to publish five of Alma's songs; other collections appeared in 1915 and 1924, the year in which she published her influential edition of Mahler's letters and the facsimile

manuscript of his Tenth Symphony. By that time she had married and divorced the architect Walter Gropius (a daughter, Manon, died in 1925). In 1929 she married the poet and novelist Franz Werfel, with whom she subsequently fled Nazi Austria, via France, for America, arriving there in 1940. In California Alma became an influential, if contentious, hostess to the European émigré community, maintaining a similar lifestyle in New York after Werfel's death in 1945. She died in 1964 and was buried beside her daughter Manon in Grinzing, near Vienna.

Mahler-Werfel's autobiographical writings colourfully document the history of a Nietzsche-inspired New Woman of the 1890s who subsequently professed sympathy with Mussolini and certain German fascists (not Hitler), whose anti-semitism she affected to share – to the distress of her Jewish friends and husband Werfel. Her songs are lyrical in manner and marked by occasionally bold chromatic harmony. The 14 that survive, mostly attributable to the period 1900–01, were published as Fünf Lieder (1910), Vier Lieder (1915), both by Universal, and Fünf Gesänge (Weinberger, 1924). The latter includes her 1915 setting of Werfel's 'Der Erkennende' and poems by Novalis, Bierbaum and Dehmel. No other works are known to survive.

PETER FRANKLIN

Mahler, David (*b* Plainfield, NJ, 13 Aug 1944). American composer. After studies at Concordia College in Illinois (BA 1967), he worked as a choir director and pursued graduate studies at several institutions, notably the California Institute of the Arts (MFA 1972) where he studied composition with Harold Budd and James Tenney. From 1975 to 1982 he was music director at And/Or, an alternative arts performance centre in Seattle, where he taught workshops, produced many concerts and edited anthologies of music by local composers. He has received two NEA grants (1978, 1979). Mahler's interest in country-and-western, jazz and gospel music is reflected in his compositions, which are often disarmingly simple. Works such as *Illinois Sleep* (1974) employ minimalist techniques in an extended format while other pieces, such as *King of Angels* (1978), based on an Elvis Presley song, and *Ty Cobb* (1988) are witty and concise. In Seattle in 1989 he created the Washington State Centennial Bell Garden, a permanent installation of 28 computer-controlled ringing bells.

INGRAM D. MARSHALL

Mahler, Gustav (*b* Kalischt, nr Iglau [now Kaliště, Jihlava], Bohemia, 7 May 1860; *d* Vienna, 18 May 1911). Austrian composer and conductor. He wrote large-scale symphonic works and songs (many with orchestra) and established a career as a powerful and innovatory conductor; while director of the Vienna Hofoper between 1897 and 1907 he provided a model of post-Wagnerian idealism for the German musical theatre. His compositions were initially regarded by some as eccentric, by others as novel expressions of the 'New German' modernism widely associated with Richard Strauss. Only during his last decade did they begin to enjoy the critical support and popular success that helped to ensure the posthumous survival of his reputation as a composer beyond the years of National Socialism in Germany and Austria. Mahler suffered the fate of innumerable banned composers of Jewish origin at a time when his music was still imperfectly known and understood outside the German-speaking countries of Europe. The centenary of his birth in 1960 inspired the popular rediscovery of his symphonies, particularly in England and the USA, where they rapidly gained a young and enthusiastic audience. The tension, passionate engagement and often cathartic power of his music acquired heightened resonance in a period marked by protest movements and critical experimentation with unconventional ideas and life styles. In the 1970s Mahler became one of the most frequently performed and recorded of symphonists, and his emerging historical role as a mediator between the Austro-German musical tradition and early 20th-century modernism, linked with the broad emotional range and energetically powerful effect of his music in performance, led to his symphonies acquiring canonic status. Historical and theoretical musicologists have found in them a persistently rich and provocative field of study; his continuing popularity and influence on other composers further justifies his description as one of the most important figures of European art music in the 20th century.

1. BACKGROUND, CHILDHOOD, EDUCATION, 1860–80. Mahler's parents were members of the Habsburg empire's increasingly assimilated Jewish petit-bourgeoisie of the mid- and later 19th century. In the year of Emperor Franz Joseph's 'mobility' decree (1860), Marie, a soap-maker's daughter, and Bernhard Mahler, an aspiring tavern proprietor, moved across the Bohemian border into Moravia with their recently born son Gustav, the eldest of their six children (out of 14) to survive infancy. They joined a flourishing German-speaking Jewish community in Iglau, an attractive market town where Bernhard's rougher side brought him into conflict with the local police, but where his determination and generally sound commercial sense enabled him to build up a secure distillery and tavern business. Subsequently characterized as an ill-tempered man who beat his children and behaved insensitively towards his more delicate wife, he nevertheless achieved a measure of respectability; his conventional aspirations for his family eventually permitted a proudly supportive attitude to his eldest son's musical inclinations.

Iglau was a thriving – culturally and linguistically German – centre of the cloth trade. The character of its busy musical life was variously derived from the folk traditions of the local Czech peasantry and itinerant Bohemian players, from German choral music (associated with the church of St Jakob), an amateur orchestra and a small professional theatre and opera house. The garrison stationed in the barracks supported a military band that participated in local festivals and gave regular concerts in the town's spacious square. Mahler's parents lived close to the square and throughout his childhood he was an enthusiastic observer at band concerts and parades. Family servants and Catholic school friends taught him songs of various kinds and players from the theatre orchestra gave him lessons. In keeping with the equating of social status with German culture typical of the period, Bernhard Mahler collected a small library and bought a piano, on which his son rapidly acquired sufficient expertise to be presented as a local *Wunderkind* by the age of ten. 'High' German musical culture was absorbed from scores borrowed from a subscription library and from teachers, including the musical director of St Jakob, Heinrich Fischer, who gave Mahler his first harmony lessons and whose son was one of his close friends.

Mahler's general education at the Iglau Gymnasium was interrupted in 1871 when his father sent him to the New Town Gymnasium in Prague, to improve upon his hitherto mediocre school results. The experience was an unhappy one and his father brought him back to Iglau. Formal musical training was considered only after Mahler's abilities had impressed the manager of a local estate, who subsequently made representations to the family. Bernhard Mahler eventually agreed to send his son for an audition with Julius Epstein in Vienna. Mahler was accepted as a student at the conservatory, beginning in the academic year 1875–6. Over the next three years he distinguished himself as a pianist (studying with Epstein) but turned to composition as his primary subject (studying harmony with Robert Fuchs and composition with Franz Krenn). His graduation submission was a scherzo for piano quintet, now lost.

Mahler's formal musical training thus took place in the Vienna of Brahms and Hanslick, and he became a prominent member of a student generation newly inspired by Wagner. Like his friends Hugo Wolf, Hans Rott, Rudolf Krzyzanowski and Anton Krisper, he developed broad musical sympathies, although his lively interest in Wagner, and Wagner's unlikely Viennese advocate Anton Bruckner, marked him out as a supporter of the modernist tendency. This was scorned by many of his teachers at the conservatory, including its anti-Semitic director Joseph Hellmesberger. Mahler became acquainted with Bruckner, some of whose university lectures he attended (without formally becoming his pupil) and whose affection he inspired. At the composer's request, Mahler prepared, with Ferdinand Löwe, a piano-duet version of Bruckner's Third Symphony, which was published in 1880. While Mahler later conducted cut versions of Bruckner's symphonies, he continued to promote their wider dissemination.

It is one of the ironies of Viennese cultural politics in the 1870s that Mahler's awareness of anti-Semitism in the imperial capital probably helped confirm his Wagnerian sympathies at a time when Wagner's own anti-Semitic sentiments were being more forcefully publicized. After successfully graduating from the Iglau Gymnasium by passing the 'matura' (at the second attempt) in September 1877, Mahler was eligible to attend courses at Vienna University. Those for which he enrolled in 1877, 1878 and 1880 engaged him little, but genuine literary and philosophical interests drew him towards like-minded student members of the Academic Wagner Society (which he joined in 1877) and to the circle of the university-based 'Leseverein der deutschen Studenten Wiens', whose pan-Germanist members included the subsequently influential left-wing politicians Engelbert Pernerstorfer and Victor Adler (founder of the Austrian Social Democratic party); the young poet Siegfried Lipiner was a forceful proponent of the ideas of Nietzsche. Wagnerism, socialism, pan-Germanism and Nietzschean philosophy achieved an unlikely and intellectually explosive liaison in that circle, which Mahler and some of his friends from Iglau recreated in an enthusiastic discussion group of their own. In this context Mahler encountered some of his closest friends of later life and began to plan ambitious works, two of which failed to win him the valuable Beethoven Prize; on the second occasion (1881) he entered *Das klagende Lied*. The closing years of his student life in Vienna brought him his earliest conducting engagements and found him earning money from piano teaching, frequenting philosophical coffee houses and fostering a fashionable form of artistic *Weltschmerz* that fuelled idealistic socialist beliefs.

2. EARLY CONDUCTING CAREER, 1880–83. While anti-Habsburg feelings may have coloured his inherited sympathy with a wider German culture, Mahler's earliest conducting posts increased his familiarity with the territories of the Austro-Hungarian empire. The first (1880) was a summer job in a small wooden spa theatre at Bad Hall, to the south of Linz in Upper Austria. Its scant resources and unremitting programme of operetta provided little for which Mahler could thank his newly

acquired agent apart from practical experience, which he proved adept at turning to his advantage (he had previously conducted only student rehearsals at the conservatory). In the following year he was engaged at the more professional and ambitious Landestheater in Laibach (now Ljubljana), whose troupe of singing actors staged both plays and operas in a modest 18th-century theatre. Here the 21-year-old Mahler conducted about 50 opera and operetta performances, including his first opera (*Il trovatore*, on 3 October 1881) and others by Rossini, Donizetti, Verdi, Mozart and Weber. His first significant press reviews in Laibach testify to the unifying role that music still had in an increasingly unstable empire; both German and Slovenian newspapers supported Mahler's efforts in a demonstration of cultural unanimity that became rarer in his later career.

Mahler's third appointment, occasioned by a suddenly vacated post, took him northwards from Vienna in January 1883 back to Olmütz (now Olomouc) in his native Moravia, where in September 1882 he had conducted a single performance (Suppé's *Boccaccio*) at the Stadttheater in Iglau. His loneliness and unhappiness in Olmütz were exacerbated by the news of Wagner's death in February 1883, but the practical skills he had acquired in Bad Hall and Laibach bore fruit in a judicious policy of focussing the mediocre company's strengths in practicable works, like Méhul's *Joseph*, rather than attempting the Mozart and Wagner it (and no doubt Mahler) would have preferred. He was in Olmütz for only three months before returning to a temporary post as chorus master at the Carltheater in Vienna, but it had been long enough to instil in the performers an apprehensive respect for his fiery and uncompromising manner. Its tangible results impressed a visiting producer from Dresden (Karl Ueberhorst) who helped arrange his release from the world of Austro-Hungarian second- and third-rate theatres. A trial week at the Königliche Schauspiele in Kassel, at the heart of the new German empire, helped Mahler to finance a trip to Bayreuth to hear *Parsifal* in July 1883 and led to his most important engagement thus far.

1. Gustav Mahler, 1884

3. Kassel, 1883–5. Mahler surreptitiously added two years to his actual age (23) when he signed his contract at Kassel (where he worked from August 1883 to April 1885); his achievements there, both as a conductor and as a composer, would not have discredited an older man. His youthful idealism nevertheless came into conflict with the kind of theatrical management structure with which, and against which, he was to work for the rest of his career. Although he acquired the title 'Royal Musical and Choral Director' in October 1883, he was subordinate to a resident Kapellmeister, Wilhelm Treiber, who had reason to fear the threat posed by Mahler. Both men were subordinate to the theatre's state-appointed general manager, or Intendant, the Prussian army officer Baron Adolf von und zu Gilsa, who ran the theatre on authoritarian lines (Mahler's name appeared in a punishment book for minor offences, such as walking noisily on the heels of his boots and making the women of the chorus laugh).

It was as the employee, later director, of state or court theatres that Mahler was to develop his self-contradictory persona as a dictatorial trainer of singers and orchestral players who nevertheless resisted and privately scorned external authority and officialdom. In Kassel his first professionally performed composition was an uncontentiously successful suite of incidental music to a series of *tableaux vivants* for a charity event, based on J.V. von Scheffel's popular narrative poem *Der Trompeter von Säkkingen* (one of its movements seems later to have been adapted as the eventually discarded 'Blumine' of the First Symphony). His most influential success in Kassel, however, was not in the theatre but as conductor of a local festival performance of Mendelssohn's *St Paul* in a large drill-hall, with nearly 500 performers (29 June 1885). The Kapellmeister, Treiber, had expected to conduct this concert with the Kassel theatre orchestra; its success, with an ad hoc ensemble that included an infantry band, in no way assisted Mahler's relations with his superiors.

An unhappy love affair with one of the sopranos at Kassel, Johanna Richter, inspired a series of six love-poems from which Mahler drew the four texts of his *Lieder eines fahrenden Gesellen* cycle (1883–5). The ending of the affair must have inflamed his increasingly urgent desire to leave Kassel. His letter requesting some form of assistantship to the celebrated conductor Hans von Bülow, who visited Kassel with the Meiningen court orchestra in January 1884, had humiliatingly been returned to Baron von Gilsa. Two other job-seeking letters bore richer fruit. Max Staegemann, director of the Leipzig Opera, offered him a six-year contract, beginning in 1886, as a junior colleague of Arthur Nikisch. Then, providentially filling the gap between his departure from Kassel (July 1885) and the start of his Leipzig appointment, there came an invitation from the Wagner impresario Angelo Neumann, who had been engaged to rescue the declining Neues Deutsches Theater in Prague.

4. PRAGUE, 1885–6, AND LEIPZIG, 1886–8. Mahler welcomed the Prague appointment (regretting his binding agreement with Staegemann in Leipzig); his return to a prominent theatre on what was virtually his home territory was not unproblematic, however. Personal tensions of an already familiar kind developed between Mahler and his older colleague Ludwig Slansky and with the generally forbearing but economically pragmatic Neumann. Wider cultural tensions underlay the German theatre's need of rescue at that time. In Laibach German culture had bridged ethnic and linguistic divisions, but in Prague Czechs far outnumbered Germans, the Czech language provision of the German theatre having been taken over by a flourishing Czech National Theatre. Its repertory featured works by Smetana, Dvořák and the Russians, and its high performance standards were matched by an overtly Czech nationalist agenda. Neumann succeeded in winning back some of the German theatre's lost audience, aided by Mahler's successes with Mozart's *Don Giovanni* (in the city of its première) and with Wagner (*Das Rheingold* and *Die Walküre*). These, like his high-profile concert of February 1886 featuring extracts from *Götterdämmerung* and *Parsifal* alongside Beethoven's Ninth Symphony, were strikingly contextualized by the nationalist cultural politics undermining imperial control.

Ill-health had prevented Mahler's mother from travelling to see him conduct in Prague, but he was able to spend time with his family in Iglau before returning northwards to take up his new post in the town of Wagner's birth in July 1886. The mid-19th-century Neues Stadttheater of Leipzig had a large auditorium, excellent singers and a first-class orchestra (the Leipzig Gewandhaus). Although the almost inevitable rivalry with the well-established Nikisch, five years Mahler's senior, caused an early crisis over the conductorship of a new *Ring* cycle, the latter's indisposition in January 1887 led to Mahler taking over both *Die Walküre* and *Siegfried* and achieving a success that won over the Leipzig public and critics. Continuing resentment on the part of the orchestra, devoted to Nikisch and its respected concert conductor Carl Reinecke, was inflamed by Mahler's unyielding manner and punishing rehearsal technique, but he retained the support and personal friendship of the director, Staegemann, and managed to establish a congenial working routine that allowed time for composition. Ironically, he achieved his first important success as a composer in Leipzig with the completion of another man's work: Weber's posthumously performed comic opera *Die drei Pintos*.
